FIRE-PROOF GLASS WINDOWS.

They give absolute security—resisting intense fire heat, as well as the action of water.

Arranged to open with this "fusible link" attachment, they close and lock automatically if a fire occurs—150° melts the link—thus giving complete and perfect protection.

This "wired glass" admits the light as freely as plain glass—is rather ornamental in effect, and greatly lessens insurance rates.

Full information if you write

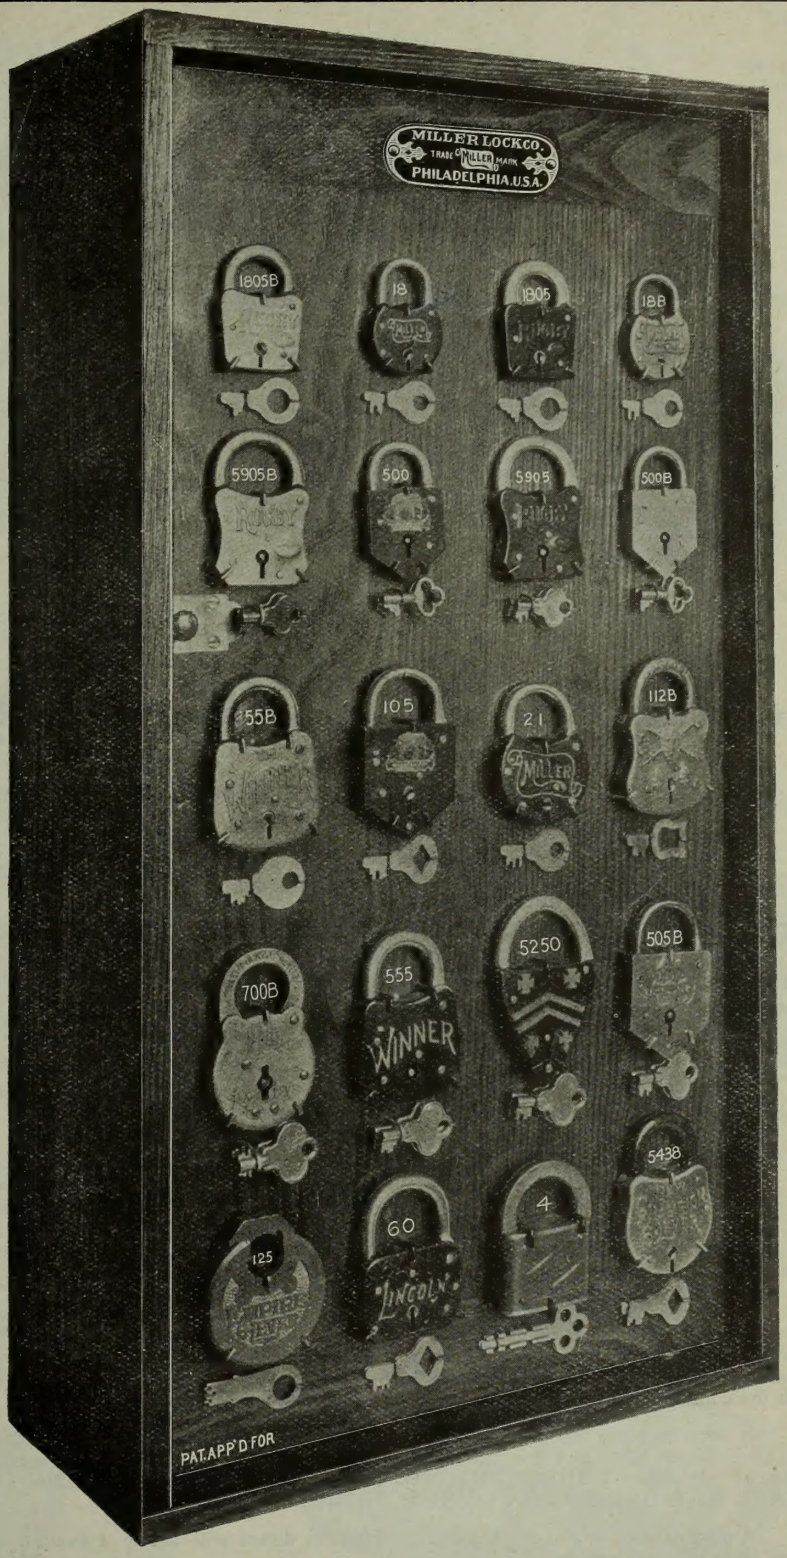
FROTHINGHAM & WORKMAN, Ltd.
Wholesale Hardware and Iron Merchants
Montreal : : : : : **Canada**

Here is a Device

that will increase your sales of padlocks.

It is a highly finished hardwood case, 12 x 24 in., and forms both a display board and stock case. The board exhibits 20 well-known "Miller" Padlocks in five rows, all the locks in each row selling at the same price. These prices range from 15 to 75 cents each. Behind the display board the space is large enough to contain the stock of locks.



Two assortments are put up in this way. Each assortment contains the same locks but in different quantities.

No. 1000 assortment contains 12 dozen "Miller" Padlocks.

No. 1001 assortment contains 6 dozen "Miller" Padlocks.

This case will sell padlocks for you. It contains a full line in a compact space, giving you all the variety you require. Try one of these cases. We can fill up the case again whenever any line is sold out.

This case is patented and is the only one of the kind on the market.

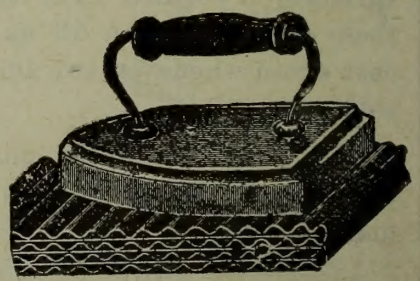
Every Little Bit Helps!!

Mr. Hardware Man,—Don't you often find that the "little sales" of the day are a big feature in the day's receipts and are often the lever to larger sales?



The Kaiser Wax Pad and Iron Cleaner

is a "little thing"—retails at 10 cent—but it is a household necessity, something entirely new on the market, a quick and big seller, with a good profit.

Every housekeeper dreads ironing day, especially so when she has a lot of shirt-waists, men's shirts, collars, cuffs, etc. to iron, she always wants to obtain a high-grade finish, equal to first-class laundries. She of course asks the dealer for advice—in return he offers her the common wax—She knows it is impossible to do good work with the common wax—So she walks away—one customer lost.

Now where she can procure an article of this merit—that reduces ironing time by half—reduces labor to a minimum—adds to the finish of clothes—and makes ironing a day of pleasure—THERE SHE IS SURE TO DO HER BUYING—AND LEAVE HER ORDER FOR OTHER THINGS.

A post card to any of our Canadian agents or direct will bring a sample of this great little business getter.

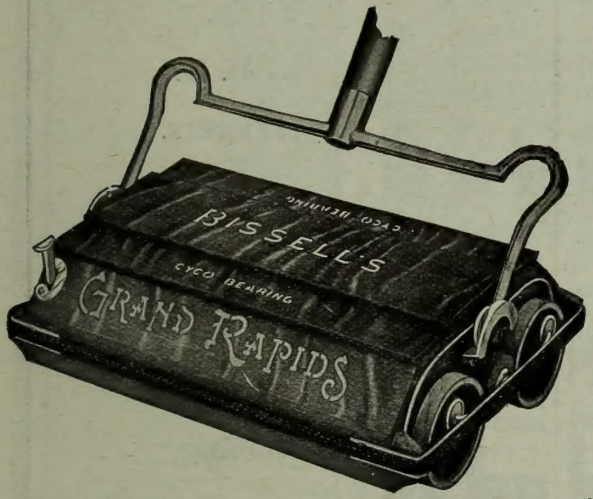
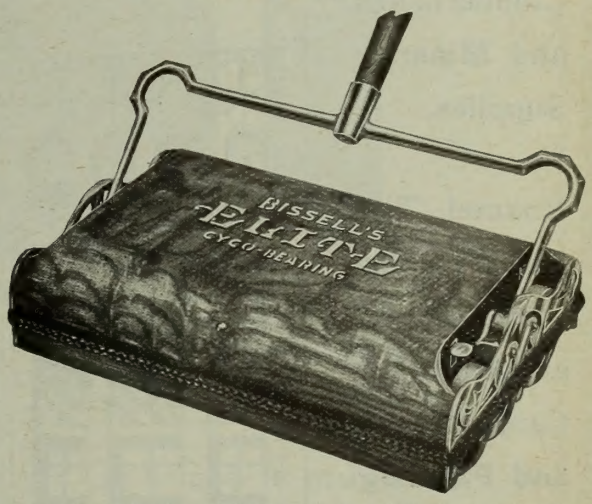
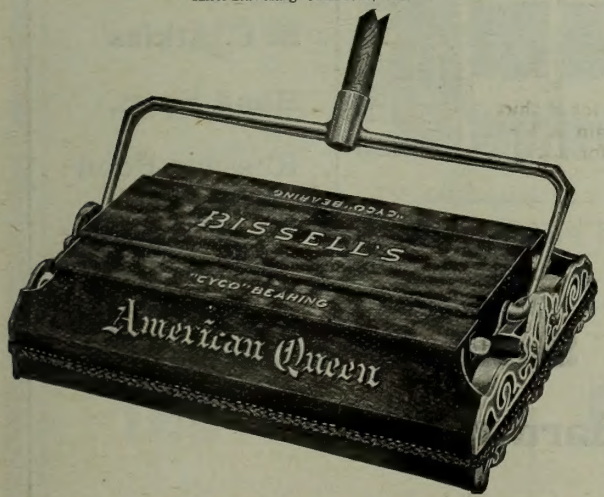
138-140 WEST FRONT STREET, TORONTO.



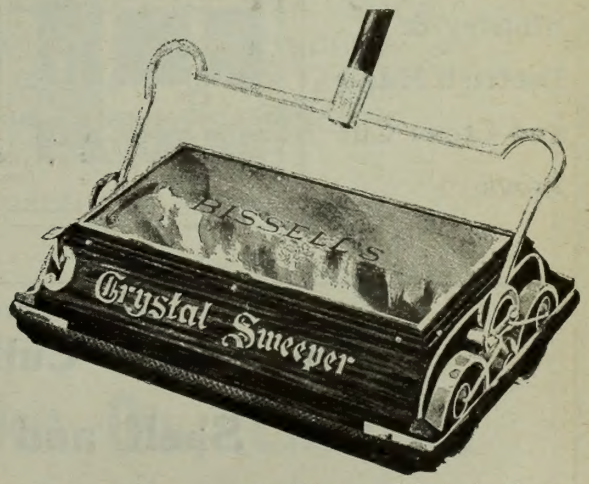
CARPET SWEEPERS



It has pure bristle brush, and is self-adjusting to all grades of carpets; has Reversible Bail Spring and one of the best Automatic Dumping Devices, which dumps each pan separately.



This sweeper is the original "Grand Rapids" without "Cyco" Bearings and is one of the strongest and most durable of all the Bissell patterns.



The "Grand Rapids" contains all the latest patented improvements such as "Cyco" Bearings, Dust Proof Axle Tubes Anti-Raveling Collector, etc.

Finished in four beautifully figured veneers, distinctive design; oval case; bail and metal end of special design; full nickel; piano polish finish.

Finished in imported figured Mahogany and Circassian Walnut, piano polish finish, full nickel trimmings.

The case of this sweeper is solid Mahogany and the top is of heavy bevelled plate glass; the brush is made of a combination of black and white bristles, so that it can be easily seen when revolving rapidly.

Leave the Money in the Country Wherein You Expect to Make Yours

Keen Buyers

of Horse Clipping Machines

BUY THE BEST MACHINES. IT'S MERELY A MATTER OF BUSINESS—NOT SENTIMENT

It really makes no difference to the hardware dealer where the machine was made. He is in business to sell ***good*** goods—goods that satisfy customers and bring more business. The merit of a machine lies in what it will do—how long it will last—and how much it costs.

ON THE STRENGTH OF ITS MERITS

Stewart Horse Clipping Machines

are being used by horse-owners and sold by dealers in every civilized country on the globe.

One concern pilfered the idea on our Stewart No. 1. Of course, it was rather a clumsy adaption, but it was visible acknowledgment of Stewart superiority. The "counterfeit" machine resembles the Stewart in appearance—but the similarity ends right there. They couldn't steal the manufacturing process, because it may be imitated, but it is ***not*** equaled. Again, the Stewart has gears made of cut steel made file hard—not mere cast steel.

We fit the Stewart No. 1 with plenty of high grade flexible shaft and equip it with the famous Stewart tension one-nut clipping knife. We guarantee it to please the user better than any other machine made, or it can be returned to us at our expense and money will be refunded.

Send for details of our plan which helps dealers sell more horse clipping machines and which includes individual advertising.

CHICAGO FLEXIBLE SHAFT CO., 250 La Salle Avenue, CHICAGO

No. 60

No. 60 Breast Drill

Manufactured by

Ryall Tool Company, Montreal, Canada

RYALL TOOL CO. Breast Drill is carefully designed and proportioned, durable, easy working and strong.

FRAME—Finished in black and yellow enamel.

HANDLES—Polished Hardwood.

BREAST PLATE—Adjustable to any position.

GEARS—All gear teeth cut from solid metal, and the small pinions from rolled steel bars. Double gears equalize the bearing.

CHUCK—Nickel-plated, three-jawed chuck with knurled sleeve, holding round straight shank drills No. 0-½ in. in diameter.

LEVEL—Enables the drill to be held true. It is set in solid iron where it can be seen while in use, and is protected from all but intentional injury.

SPEEDS—Two speeds, one approximately three times faster than the other; readily changed to fast or slow by turning the knurled nut on the frame marked "F" and "S", at the same time turning the large gear slowly so the clutch may drop in.

SPINDLE—Runs in case-hardened, anti-friction cone bearing.

Length:—16 inches over all. Weight:—61 lbs. per dozen.
Packed one drill only in a linen reinforced cardboard box.

Manufacturers of the best KNOWN CLIPPERS IN THE WORLD.

BOWN'S Newmarket Clipper is made solely by us. This Clipper has enjoyed the highest reputation throughout the world for THIRTY YEARS. It brings REPEAT ORDERS wherever sold. Supplied in strong cardboard box with leather bag.

THE "GRAND" CLIPPER (Ball bearing) is the only genuine BALL BEARING clipper produced to-day, fitted with black ebonized handle and nickel plated. A STRONG SELLER.

THE "HANDICAP" is a lower priced CLIPPER but its quality is high. It is a centre adjustment Clipper of very simple construction and is in great demand in all the Colonies. It is a STANDARD IN CANADA.

These are three of our most popular LINES. LET US SEND CATALOGUE.

NO. 17 POWER CLIPPER STANDS ALONE. The PHENOMENAL SUCCESS of this POWER CLIPPER is undoubtedly due to the excellence of the patent CLIPPING HEAD: its wonderful cutting QUALITIES: its anti-FRICTIONAL design and ITS PERFECT BALANCE and at the same time it runs lightly and EASILY. The gearing that runs the machine is in a DUST PROOF GEAR BOX and it sells on sight. BURMAN NO. 17 Clipper weighs only 35 pounds packed: size 26 x 11 x 8 inches.

SOLE CANADIAN AGENTS

They've Made Good

Our line of skates have turned out to be the largest sellers of the season, and justly so, for we believe there are no skates on the market so good in appearance, strong in wearing qualities or fine in finish.

We have advertised heavily our aluminum top "Automobile" Skate, Model "C." It is a unique and an exclusive line that has caught on. Our Model "B" steel top "Automobile" Skate takes the first rank in its particular class—Positively the very best on the market.

The other lines are equally good and as far ahead of their competitors as Model "C" and Model "A."

Place orders for next year to-day—we will guarantee a strenuous advertising campaign.

A special line of Hockey Sticks, Pucks, Straps, Skate Grinding Corundum-Wheels and Skate Accessories.

We have what we believe to be the best line of Hockey Sticks sold anywhere. Manufactured by one of Canada's best makers and at prices to introduce below any other on the market.

The C. C. & M. Skate Line

These are the retail prices of the skates:

"Automobile," Model "C" Aluminum tops, nickel steel blades, both round and pointed toes	$5 00
"Automobile," Model "B" Steel tops, plated and polished, nickel steel blades, round toes	4 00
"Automobile," Model "A" Steel tops, plated and polished, nickel steel blades, made with and without puck stops	3 50
Ladies' Auto A very light and dainty model made specially for ladies, in sizes 9, 9½ and 10 only	2 50
Cycle 25 A high-grade double-end skate, with whitened steel tops and laminated and tempered steel blades, highly polished and plated	2 50
Cycle 5 Whitened steel tops, flanged, curved runners of laminated and tempered steel, highly plated and polished	2 00
Cycle 15 A high-grade single-end skate, with laminated and tempered blade, whitened steel tops	1 50
Arctic Special This is a new double-end model, with blade of high-grade untempered steel, same design as Cycle 25, divided foot and heel plated of whitened steel, strong and of fine appearance	1 50
Yukon Whitened tops, single-end, blades of high-grade untempered steel, well finished	1 25
Klondike Curved blades of high-grade untempered steel, highly plated and polished, whitened steel tops	1 25
Model 20B Same blade and top as "Yukon" and same material, but not nickel-plated	75

Oneida Community, Ltd., Niagara Falls, Ontario

A Selling Argument

that always hits the mark is what distinguishes

SHIRREFF'S DIVIDED WRINGER

from all others. It is the central dividing bar which causes the rubber rollers to wear evenly along their whole surface. This gives them double the life of ordinary wringers, as the rollers of ordinary wringers soon wear out in the centre.

Of Hamilton, Ont. and they make also the well known and reliable

Champion Jewel Scales

Weather and Wear are both defied in the

Dillon Hinge Stay Field Fence

We use nothing but the best No. 9 high carbon, high coiled wire, which makes our fence strong and durable. The hinge-in-the-stay—that is where we have a decided advantage over others. The fence gives at the hinges only. Immediately the weight or strain is removed, the laterals spring back into place—uninjured and unharmed. Try this test with another fence and witness the sad results.

PURITAN REFRIGERATORS

Medium Priced ***Extra Good Value***

To hardwaremen having a call for a medium grade refrigerator, our Puritan line is recommended. We make them in four sizes, each size being splendid value for the money. They are not offered in competition with the "cheap" lines. Puritans are lined with high grade galvanized sheet steel, which is easy to keep clean, non-rusting, non-corroding. The case is Soft Elm with a handsome Golden Oak finish, ice rack, provision shelves, ends of ice compartment and drain pipe are easily removable. The insulation is perfect and all parts are easily accessible. Puritans are fitted with strong, heavy retaining casters, lever locks and hinges in copper finish. And there are other points described in our catalogue.

MEN WHO SELL THINGS

By Walter D. Moody.

This "Salesman's Blue Book" gives the up-to-date methods of solving the problems which confront the average seller of goods. These practical and stimulating suggestions, written in vigorous and entertaining style, are based on twenty years' experience. It is specially written for Manufacturers, Merchants, Employers, Salesmen and all Sellers of Goods, for it will show them HOW TO INCREASE BUSINESS. The three maxims of this book are—"How to Get Out of the Rut"; "How to Increase the Efficiency of Your Selling Service"; "How to Encourage a Higher Standard of Salesmanship on the part of Your Men or in Yourself." 269 pages. Net, $1.00. By Mail, $1.10.

TECHNICAL BOOKS, 10 Front Street East, Toronto

Auto Spray

Compressed-Air Automatic

Thinking the Thing Out, Working It Out, Trying It Out, Then Pushing It for All It's Worth

That's the McClary "Help-the-Dealer Way"

The Idea Expenditures

When we want to know just what a man can do for us we examine just what he has done for someone else. The same rule of "looking backward" into the personal service of one man applies to the personal service of many men acting as one--a company.

We are pleased to state that because from year to year, since 1847, an ever-increasing number of dealers have realized the advantages to themselves from dealing with us, we have been enabled to become the leader in our field. Handling every item of business, entrusted to our care, on the basis that to be profitable to us it must be a "repeater," we have endeavored, as far as possible, to swing behind every order the utmost of retail selling strength.

Do you know that we spend thousands of dollars annually on tested ideas that you may be the better able to give your customers the Latest, the Surest-Serving, the Most Reliable.

Here are some extracts from the "BRAIN'S RECORD":

¶ "Sunshine" Furnace is one of the few if not the only Canadian Furnace absolutely created in Canada; certainly the only one in Canada, patterns of which were purchased by an American Furnace Company to be used as an American model.

¶ "Famous" Stoves are the only stoves in Canada treated with a secret water-proof blacking, which gives them a perpetual lustre.

¶ The only gas producer power plant operated by a stove or tinware company in Canada is to be found in Chelsea Green with the sign "McClary" over the top of it.

¶ The Duplicate Parts system recently inaugurated in our Foundry is alone in its far-reaching benefits to the trade--so comprehensive that any duplicate part required (no matter how old the pattern) can be attended to on a moment's notice.

¶ "Sunshine" Furnace is the only furnace in Canada in which Special Bond (no water) cement is used in all joints. These are just a few items from the IDEA LEDGER, but they illustrate that in addition to working for our agents, we also do some thinking in regard to their requirements.

Absolutely Our Own

That Thinking Has Produced Labor-Saving Machinery
Quicker Despatch of Goods to You
Money-Saving Features
Quicker Return of Customers to Your Store
Power-Saving Plants
Quicker Growth of Our Capabilities

A Particular Plan

Let no dealer imagine that we are satisfied with our record. Don't misunderstand us; *we are proud of our record but we draw from it greater incentives to "set a new mark."*

This "move-onward" spirit tells us that no success is worthy unless it is perpetual, and that no sale is complete unless it

Secures the necessary profit
Pleases the customer
Advertises itself

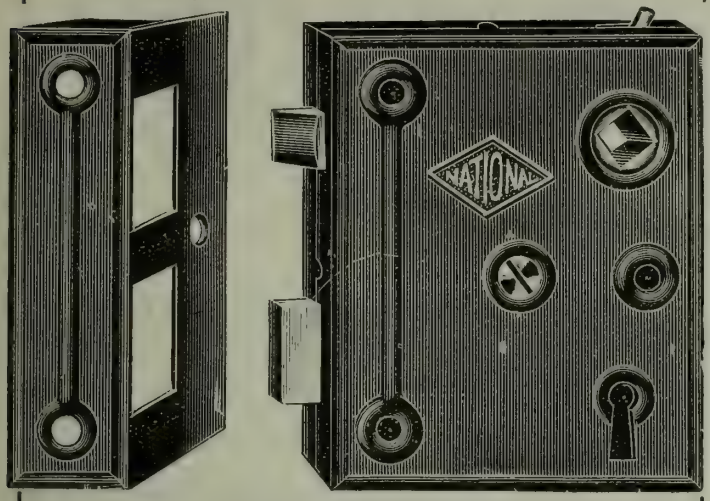
An Open Offer

If there is a retailer in this country who believes his business should be bigger and better--paying let us tell him that we are spending over half a million dollars a year for brains--have grouped around us men who know how Stoves, Furnaces, Enamelware ought to be made, men who know how these goods ought to be shipped, men who know how these goods ought to be advertised, men who know how these goods Can Be Sold.

More Power Better Power

Mr. Anxious-To-Get-Along-Retailer: This great organization of activity is yours for the asking--that is, its Experience, its Ripened Judgment, its Sterling Record, its Persistent Goaheadness *is ready to point the Way of Profit to You in Stoves, Furnaces, Enamelware, etc.*

Are you ready to be vaccinated with the McClary Success Germ?



Send in Your Application

So Point No. 2 in favor of a dealer purchasing McClary products is McClary Persistent Application to the Perfection of the Goods.

Amatite ROOFING

"THIS IS THE ROOFING THAT NEEDS NO PAINTING"

THERE was a time when everybody bought roofings that required painting. It was the regular thing to do. In fact there was nothing else to do, for all roofings were "smooth surfaced" and required painting regularly to keep them from deteriorating.

Now there is Amatite, an improvement over painted roofings, having a *real mineral surface* imbedded in pitch — making a kind of flexible concrete.

This mineral surface needs no painting. The waterproofing material, Coal Tar Pitch, is the greatest enemy to water known. It is the base of many waterproof paints. Only in a paint the pitch is diluted and made into a thin film, whereas the At waterproofing is *solid pure Pitch*—two layers of it. It wou'd take something like a dozen coats of pitch paint to equal in thickness that upper sheet of pitch in which the Amatite mineral surface is buried. And under that heavy sheet of pitch is a layer of wool felt and under that another sheet of pitch, just as thick as the outer one. And below them all is another layer of strong felt. That makes two roofs in one.

If the storms wore away the mineral surface and dug through the pitch and destroyed the felt, they would still be only half way through. And if the weather then removed the next sheet of pitch, you would still have left a final layer of felt—nothing more or less than an ordinary smooth surfaced roofing which could keep off the rain very nicely if painted every year or two.

But as a matter of fact, the weather never gets past that mineral surface, securely gripped in its matrix of pitch.

The mineral surface is there to stay. No painting—no bother—no further expenses after the roof is once laid.

We should be glad to send you a free sample of Amatite, and you can see for yourself how much better it is than the smooth surfaced kinds.

Address our nearest office.

Distinct Trading Advantages

¶ Your orders for paints, oils, glass, etc., are not placed on sentiment. When we tell you of the length of time we have been in business and of our recognized reliability we are appealing to your business acumen — not to your sentiment.

¶ Our long experience gives us thorough market knowledge. We know the goods that move and what makes them move. We have seen new lines come and disappear in rapid succession. We know the lines that possess staying power. Experience has taught us what the trade want and when they want it. We have learned where and how to buy to get the best that's going in price and quality.

¶ Our goods have been tried out by **TIME**—and have stood the test. These things create confidence in our reliability.

¶ Just try us with a sample order.

I Hope Every Hardwareman In Canada Will Read This

My best customers, my best business friends, and the best representation I could possibly have, are among the hardware and tinsmithing men of Canada. I want those men—men who know well the fair-and-square Pedlar policy—to read here my side of this controversy about the metal roofing situation.

I want those to read it too, who seem to think I am no friend of theirs—judging by some of the comments this excellent journal has printed of late.

Understand that I am going to hit straight from the shoulder—going to talk man-fashion. Some of you may get mad; but most of you will see the sense, the justice, of the Pedlar position.

A few of you good fellows have kicked because you think the metal shingle business is going by your door. Some of you imagine that Pedlar wants to grab a direct trade from the consumer. But listen a minute:

What Would You Do?

You are in business for business. So am I. Put yourself in my place and ask yourself what YOU would do if—

—some hardwareman applied for an exclusive agency for your goods; got it; got a good many dollars' worth of time and samples; and —

—the first time one of my travelers happened in on him, it appeared that he was also the exclusive (?) representative for others in the same line!

Wouldn't that make you eager to find more of the same kind?

Ask yourself again how you'd feel about another Pedlar "agent" who'd send back a few shingles left over from some job—the cost of returning them being more than their value—simply because he didn't feel like carrying any stock.

Wouldn't you be apt to think that an agent who won't carry a stock of the goods he's selling isn't much use to himself or the manufacturer?

Or how would you feel toward the occasional chap who gets me to send a high-priced expert to visit him and figure on a job (that he couldn't estimate accurately), and—

after putting me to that outlay, made in good faith, buys somebody else's goods!

You'd like that right well, wouldn't you? So do I.

Gentlemen, let's try to be fair. Let's try to be sane. Let's have it clear, for once, that the manufacturer isn't any foe to the merchant. He couldn't stay in business sixty days if he started in to be unfair to you.

Those of you who have been growling because you haven't profited enough from the rise in favor of the steel shingle have just one man to blame—

—that man is YOU, yourself. I have tried hard, again and again, to bring you to see the trend of the times—

—tried and tried and tried and TRIED to show you that your best interest lay in carrying the goods the modern builder, the up-to-date farmer, wants and WILL GET.

How Much Did You Sell?

Just about four years ago I printed no less than fifty-two straight talks to you in this journal—one a week for a whole year. For those talks I paid more than five hundred dollars. I was trying to get you to handle my expanded metal lath—

Here Is Some New Light For You On a Vexed Question

—a lath as good as any concern ever made, offered to you at just HALF the price of any like product; a good profit for you in it; the demand was there.

How much of my lath have YOU sold? I sold thousands of dollars' worth of it last year. It's a legitimate line for any LIVE hardwareman. But—

—you wouldn't stock it. Does that require me to scrap my lath machines and quit making it? Not noticeably. If you won't sell it, I will—or somebody not in your line will. Is that anything more than good business sense?

How Can I Show You?

And, last year, I sold a lot of my roofing—a mighty big lot. It's good roofing; it's easy to sell—look how it's advertised! And—

—if you, as a hardwareman, can't see where it's to your profit to stock it and sell it, how do you expect me to show you, any more plainly than I have done?

Perhaps I haven't always chosen my representatives with absolute wisdom. I am not infallible. But ask yourself:

What would you have done, if there was a big market for your product in your locality, and the people who ought to handle it, wouldn't? What would you do?

Just about what I have done, I imagine. Just about what any business man would do.

This is no defiance, gentlemen—far from it. I can't get along half so well without your friendship and co-operation as I can with it. I wouldn't want to if I could.

But I am going to sell my goods. Especially am I going to sell a NEW product of mine—something hitherto unknown to Canada, and certain to sell heavily everywhere.

Will You Come In Now?

The hardware trade are the logical distributors of this new thing. There's a good profit, and reputation, in it for YOU. And you can have the very first chance to get the cream of the business I'll create for you—

—if you speak up now and say you want to! If you won't speak up, please be fair enough not to complain, publicly or privately, later on. That applies, too, to any of you who will start now to handle Pedlar Steel Shingles right.

I will tell you about this new thing in the next issue of this paper. You will be interested, if you have business foresight.

Hardwaremen and Metal Roofing

The Subject Considered from the Standpoint of Both Manufacturer and Retailer—The Former Should Not Encourage Price-Cutting, While the Latter Must Make a Canvass of His District for Business if he Desires to Hold This Line in the Hardware Trade.

On another page of this issue an important announcement is made by a metal roofing firm who were criticized recently by Hardware and Metal for ignoring the hardware trade and selling to the general public at practically the same prices as were quoted to the retail trade.

We also took issue with this firm with reference to the statements made in their advertisements that anyone with hammer and snips can lay the roofing satisfactorily. We pointed out that this was a very short-sighted policy and militated against both manufacturer and retailer, as one roof improperly laid would be the means of prejudicing a dozen other sales in the immediate neighborhood against metal roofing.

No reply has as yet been made to the second point, but the first question of protecting the trade is dealt with briefly in the double-page advertisement in this issue. Every hardware merchant should read this announcement as it is a very frank statement on the part of a manufacturer of some of the difficulties he has had to face.

Manufacturers Should Maintain Price.

We have never found fault with any firm for selling direct to the general public when the trade would not take up their line, but unless a manufacturer decides to adopt a policy of ignoring the hardware trade altogether we contend he should not quote the consumer a price which is practically the same as he is quoting the trade. To follow such a policy would demoralize the trade and be the means of inaugurating a condition of price-cutting which would eat up the legitimate profits of both retailer and manufacturer.

Take, for instance, a town in which there are three retailers, each of whom have the exclusive agency for a line of metal roofing. The fourth manufacturer, unable to secure an agent, is not content to lose all the business in this territory and starts out to sell direct to consumer. He is only in the town for a day or two and must close business while he is there or leave it for his competitors, who have representatives on the ground. He is also somewhat sore because these dealers have refused to give up the line they are handling and take the agency for his firm. He finds the farmer or the builder is well acquainted with the dealers in the town and would prefer ordinarily to buy from them. He has to offer some inducement to close the order and usually it is a cut price. If the dealers are given a chance to meet this price they usually do so and probably cut a little below the outsider who is invading their field.

Now, in such a case as this, no fault can be found with the manufacturer for going direct to the consumer, but the trade should stand together and insist that if manufacturers solicit business direct from the consumer that they shall quote a price which they expect their agents in other sections to secure; in other words, that the manufacturer should sell his goods by salesmanship and not by price-cutting.

Price-Cutting a Bommerang.

We do not say that manufacturers may not make more money for a few years by doing the bulk of their business through the legitimate channels of trade and augmenting it by securing at dealers' prices some of the larger orders in sections where they are not represented, but we believe the trade as a whole will resent such methods, knowing that it will not be long till other manufacturers are forced to adopt similar methods in districts in which they are not represented.

The metal roofing business has gone forward during the past few years by leaps and bounds, due largely to the energetic advertising campaigns which each of the manufacturers has carried on. We regret that occasionally in their advertisements manufacturers have had to turn aside from their work of educating the general public to the advantages of metal shingles and roofing to criticize the methods and goods of their competitors. Such advertisements not only weaken the confidence of the general public in one particular firm, but is detrimental to the metal roofing business as a whole. Let manufacturers, therefore, devote their attention primarily to convincing the general public of the advantage of metal roofing over any other line, and then let them point out as cleverly as possible the special advantage their own line has over any other. Let competition be as keen as possible to secure the best agents, but let the inducements offered be the way in which the manufacturer backs up his agents and creates business for them, rather than an inducement of an extra low price.

Hardwaremen Make Best Agents.

The interests of the hardware merchants and manufacturers are for the most part identical. If the retail trade are not the most economical distributors for the manufacturers the manufacturers will eventually find other methods of getting their goods to the consumer. But we hold strongly to the view that hardware dealers and tinsmiths are the best agents the manufacturer can secure, The retailers are the salesmen for the manufacturer and if they are not doing the business their territory warrants the agency should be taken away from them. There are, no doubt, some hardwaremen who are content with the business which comes to them, and there may be some others who will not deal squarely and honestly with the manufacturers, but we believe that as a class hardware dealers stand head and shoulders above any other class of trade, as far as financial rating and progressiveness are concerned. In fact, this is one of the strongest reasons why the hardware dealer makes the best agent the metal roofing manufacturer can secure. The percentage of bad debts from this class of agents is very small and there is little or no expense in collecting accounts.

Then, too, the hardware dealer and tinsmith makes the best agent because he will see that the roofing is properly laid and a satisfactory job is the best advertising any manufacturer can have.

Retailer Must Make Canvass.

One of the greatest difficulties the metal roofing people have had to contend with has been that when they heard that some farmer was building a new barn the contracts had all been let and probably the builder had induced the farmer to use wooden shingles. The hardware dealer should be in close enough touch with both builders and farmers to know who is figuring on new barns. If he has a canvasser calling regularly on the farmers he will also see what barns need to be repaired and in this way should be able to create a large amount of business. The trouble is most dealers do not make the best use of the information they have or can easily secure, but manufacturers and Hardware and Metal can do a great deal towards educating them to adopt better methods.

It is always easier to close a deal by personal call than by correspondence. The hardwareman is in constant touch with farmers and builders and can answer any objection they make, besides being in a much better position to secure the business than the manufacturer who may be hundreds of miles away.

Carry Stock and Guarantee Goods.

Every man who buys metal roofing wants some assurance that the goods he is buying will do all that is claimed for them. Should not, therefore, the guarantee of the dealer, with whom the farmer is well acquainted, be of more value than that of a manufacturer not known personally to the customer? Undoubtedly there is considerable advantage in having the guarantee of the manufacturer endorsed by the local dealer.

If the dealer carries a stock he can give much quicker delivery than if each order is sent separately to the manufacturer. Moreover, he can supply a few additional squares promptly should they be required at any time for an addition to the building. Many progressive dealesr are buying in carload lots and keeping a good assortment of stock and this number should gradually increase for there is no doubt that the sale of metal building materials is still in its infancy.

These are some of the reasons why we agree with the statement made by one of our advertisers in this week's issue that the hardware trade are the logical distributors of metal roofing products and we hope the trade will back up the efforts of the manufacturers who are spending a good deal of money to create business throughout the Dominion.

ANOTHER HOTEL DISASTER.

The burning to death of three persons in a hotel at Cornwall during the past week again forces the question of hotel inspection to the front.

Commercial travelers are vitally interested in having proper life saving apparatus supplied as well as having all sanitary conveniences installed. The Ontario Government, it will be remembered, however, recently appointed a party organizer instead of the traveler the commercial organizations had recommended.

Hardwaremen are also interested in having fire escapes placed on hotels as, with a little enterprise in securing catalogues from the manufacturers, they can secure the business with a fair margin of profit.

Look over the hotels in your town and if they are deficient in life saving devices send for catalogues and then interview the hotelmen and others who own large buildings needing equipment.

A WINNIPEG WORLD'S FAIR.

It has been definitely decided by the city of Winnipeg to go on with the project of holding in that city in the year 1912 a Selkirk Centennial Exhibition, which is to take the form of a World's Fair. The project has had the serious and careful consideration of a strong committee of the best business men of the western metropolis, and it has been regarded simply and solely as a business proposition. Capable committees have visited St. Louis, Chicago, Seattle and Portland, to get information from the management committees of the Fairs and their reports have convinced the committee in charge in Winnipeg that the project for 1912 is in every way feasible and practicable.

The principal value of the exhibition will no doubt be the advertising which not only the city of Winnipeg, but the whole of western Canada will receive. If several hundred thousand visitors from all over the continent and from abroad attend a successful exhibition of this kind in the new city of Winnipeg, the commercial capital and metropolis of the new Canadian west, and learn of the resources and opportunities available, the advertising secured will be of immense benefit. This is what Winnipeg business men have in mind and it is because they are convinced of the feasibility of the project that they are prepared to put up their money to support it.

Grants from the Dominion and Provincial Governments will no doubt be secured and western business men will subscribe liberally. It is a project in which all Canada is interested and it undoubtedly will receive the generous support which it deserves. We cannot afford to allow it to be only a partial success; it must be made a big success. If the necessary support is secured the Selkirk Centennial will be the best advertisement which Canada has ever had.

CASH MOVEMENT SPREADING.

The experiences of many merchants in the hardware line, as given in Hardware and Metal last week, show that the cash basis of doing business is making progress and that even in new sections of the country dealers are finding it easier and better to adopt the system.

Like the majority of things in life that we so much dread, intervening obstacles appear formidable until we tackle them and then half the difficulties vanish. It is so in starting the cash system. No man in the trade ever changed from credit to cash methods without dreading the procedure. Summed up, his fears amounted to this—he was afraid his trade would fall off, that he would offend old customers and that he had not the necessary stamina and backbone to stick to the cash basis through thick and thin. It was like wrestling with a new problem.

Of all those who have once fairly and squarely begun the cash systems, Hardware and Metal has yet to learn of a single merchant who regrets the change or who is not chiding himself for neglecting so long its introduction. It is gradually being forced upon all merchants that the system of giving credit is antiquated.

One thing noticeable is that when a man has to pay cash for his goods, knows that he cannot get them under any circumstances unless he has the the wherewithal for prompt payment, he will scurry around and rake up the money every time. In the end he is better pleased, for he has the satisfaction of being able to look every merchant straight in the eye.

In the cash system, when once started, no exceptions should be made and a banner having been raised should, under no circumstances, be lowered.

In the symposium presented last week on the cash system, its advantages and results, the two most convincing and unanswerable arguments in its favor, were by western hardwaremen—one a resident of Manitoba and the other of Saskatchewan. The reasons are so striking and forceful—so out of the rut of the usual stereotyped assertion—that they will bear repetition. They might be conjured up by every follower of the cash principle, should he at any time be tempted to waver.

Here they are: "Under the cash system all are treated alike. Refusing to sell a man under the credit system is the same as telling him he is dishonest and incapable of paying and practically an insult. When you have the cash basis the man recognizes that he is up against a system. It is less awkward to refuse under cash than credit, and you must draw the line somewhere * * * I insist on getting cash from every customer. I would not make an exception for a man who is unable to pay and I see no reason for making an exception for the man who has the money. The better the customer the more reason why he should pay at once."

COMPLIMENTS APPRECIATED.

"We are delighted with our ad. in the Annual Spring Number of Hardware and Metal. It is very striking and attractive and entirely comes up to our expectations. We certainly congratulate you on a very handsome and interesting number."—"Belleville Iron and Horseshoe Co., Belleville.

"Your Spring Number is certainly a credit to you and it is flattering to the hardware trade to have such a handsome official paper."—Bernhardt & Gies, Preston.

"Your Annual Spring Number has a very fine appearance and we do not think it could be improved upon."—E. T. Wright & Co., Hamilton.

"We congratulate you on the get up of this number. An up-to-date printer might suggest some improvement but we must confess that we think it about right and a very creditable issue."—Walter Woods & Co., Hamilton.

What To Do In April

Spring Lines and Housecleaning Sundries Should be Brought to the Front—Window Displays Encourage Increased Sales—Paints, Brushes, Woodenware, Garden Tools and Sporting Goods Should be Pushed.

With the arrival of April the problem as to the most suitable lines to display is easily solved. Between the seasons there is naturally a diversity of opinion as to the class of goods most likely to tempt the consumer. Some hardwaremen believe in general assorted displays, some in specialization, and so on. But with the arrival of a season the difficulty ceases. In April the dealer should start by showing his housecleaning utensils. Although housecleaning may not start until the end of April—it all depends upon the weather—it is the secret of successful advertising that the windows should anticipate the demand, and not be concurrent with it. By his windows the merchant warns consumers that, before long, storm windows must be taken down, furnaces and stoves allowed to cool, and the house thrown open to the genial spring weather. And through that warning the housewife goes home, looks through her stock of utensils, and finds she is in need of several articles. In preparing her list then she is naturally more inclined to be liberal in estimating her wants than if the housecleaning day arrived, and found her totally unprepared. In the latter case old scrubbing brushes, brooms and pails, etc., would probably be made to do service another year. By delaying the window, new lines are given a lessened chance of attracting the consumer. How often is this remark heard in a store, "I wish I had seen this article before I started my housecleaning. It is just the sort of thing I wanted." It is up to the hardwareman, by anticipating the demand, that this remark is not made so far as his store in concerned.

The merchant, then, will start with housecleaning utensils, giving prominence to any new line that he may have and at the same time running a well-assorted display. He could specialize these lines into two departments. That is to say, a housecleaning window proper, consisting of brushes of all kinds, wall dusters, window cleaners, step-ladders, mops, pails, chamois leather, carpet sweepers and polishes, followed by a laundry window, comprising washing and wringing machines, washboards, dippers, tubs, ironing boards, sleeve boards, irons of various kinds, curtain stretchers, clothes dryers, clothes lines, pulleys, reels, and pegs. In connection with this a mechanical figure of a woman working a washing machine, showing how labor has been minimized by present-day methods, is always a good attraction.

The Paint Department.

At the same time the merchant should bear in mind the importance of his paint department. The cleaning up of the house will reveal the wear and tear of the winter. Varnish, stains, enamels and paint will be wanted in various directions, and the merchant by judicious window displays, and an effective use of the colored cards, hangers and posters issued by the manufacturers, can influence the buying of a much greater amount of paint lines than would otherwise be the case, The motto of the merchant should be, "Brighten up," and he should impress this upon his community in no half-hearted fashion, Later on the merchant can take in outside painting, but for the moment he can devote his attention to the needs of the household. But whether he combines the two or not, he should remember that his paints should be no minor side line of his store, but a very important one. The field is a very large and profitable one, and the merchant can make paint a strong feature of his business.

Gardening Tools.

With the real breaking up of the weather, the merchant can pay attention to his tool department. Carpentering and gardening tools make very pretty displays. In the gardening windows green effects can be introduced which lighten up the store with an appropriate touch of spring. After the long spell of winter a window with a spring effect is irresistible to the passer-by. With artificial leaves and flowers gardening tools can be displayed to the utmost advantage. In all his window designs the dealer must not forget that the more attractive he makes his displays the greater the force he gives to the advertising, not only of the particular lines in question, but to the whole store. By concentrating his energy on certain class of goods he is not neglecting his other lines. He is in other words killing two birds with the one stone.

Sporting Goods.

At the latter end of the month the merchant can commence to give attention to his sporting goods. The various athletic organizations will be busily engaged in making preparations for the season. Outfits will be wanted and the merchant who is ready for the demand will secure the trade. The sporting enthusiast is always in a hurry to get his new bats, mitts, or whatever it may be, and he does not like to be told that certain lines are not yet in stock, and that he must wait if he wants to get them at that particular store. He probably does not wait, but goes to another hardwareman who has been more prompt in ordering. The great secret of the store's success is the anticipation of the demand. It is the man with the goods, and not the man who has them on order, who gets the trade.

Warm Weather Lines.

With the coming of April we presume that the merchant has all his spring stock in, and that he is well assorted in refrigerators, ice cream freezers, builders' hardware, building paper, nails, screws, green wire cloth, screen doors, and so no, Buying has been very cautious up to now, and the spring demand will in many cases be met with stocks on the light side, although well assorted. Just one word of advice therefore. If the merchant finds the demand better than he expected he would be wise if he lost no time in forwarding his repeat order to his jobber. If things are better to him they will be better to other men, with the result that everybody will be sending in early repeat orders. In these circumstances a congestion of shipping is more than likely. The merchant who gets in first will stand the best chance of securing his goods promptly. Nothing could be more disastrous than to be short on lines that are selling like hot cakes. It is the man who is well ahead with his ordering who reaps the most advantage.

ARREST OF W. A. COULSON.

The principal topic of discussion in Winnipeg retail circles last week was the arrest of W. A. Coulson, the secretary of the Retail Merchants' Association of Western Canada, an organization similar lines to the Retail Merchants' Association of Ontario, on a charge of embezzling the funds of the Association and of the Retail Merchants' Fire Insurance Company which he was instrumental in organizing in connection with it. Mr. Coulson was secretary-treasurer of the insurance company as well as of the association proper.

About four years ago he was appointed secretary of the Retail Merchants' Association of Western Canada then being formed under the presidency of T. J. Lawlor, of Killarney, Man. He displayed considerable organizing ability and commendable zeal and energy with the result that the Association grew very rapidly in numbers and in influence.

About two years ago Mr. Coulson undertook to organize a Retail Merchants' Fire Insurance Company in connection with the Association. The company was duly incorporated a year ago by an act of the Legislature of Manitoba, the five incorporators including only one retail merchant: John Hiebert, merchant, W. A. Coulson, agent, Oswald Fertham, accountant, Bruce W. Thompson, barrister-at-law, and George Alexander Stewart Potts, barrister-at-law. The capital stock was fixed at $1,000,000 and the provisional directors were to call a meeting as soon as $100,000 had been subscribed and 20 per cent. of that amount paid in. It is stated that five different members of the Association put up $2,000 each but it is not known yet what was the total amount of stock subscribed or what was the amount of the payments. It is charged that Mr. Coulson has embezzled some $1,600 of insurance premiums. Mr. Coulson was released on $8,000 bail and A. R. Leonard was appointed receiver of the Retail Merchants' Association.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 74.

MARKETS IN BRIEF.

Montreal.

Spelter—Back at $5.50.
Copper—Firmer.
Old Metal—Some changes.

Toronto.

Copper—Very firm.
Turpentine—Now 58c.

THE MARKET SITUATION.

A more settled feeling exists in the metal markets, as it now appears that the U. S. tariff changes will not affect Canadian prices to any extent, if at all. Canada has been favored with lower prices on many steel products than have prevailed in the United States, the large corporations selling lower for export than in the home market. While it is not yet certain as to what the final outcome will be it looks as though the tariff changes will make prices in the two markets more even. A possibility, too, is that the Steel Corporation may go ahead with its proposed Canadian plant at Sarnia, Sandwich, Port Stanley or some other lake port.

The Iron Trade Review (Cleveland), of March 26, says: Some interesting developments in the iron and steel industry in different parts of the country are anticipated shortly. Since the announcement of its proposed tariff schedules showing heavy reductions, iron and steel makers declare a more general lowering of wages can no longer be avoided. This is expected to take place about April 1, and will apply to blast furnace as well as steel mill workers. The reduction, it is believed, will consist of a minimum of 10 per cent. for the lower grades of labor, and correspondingly greater in the case of the higher skilled employe. In order to adjust current production with its increasing stocks to the very moderate demand for pig iron, representative furnace interests are now advocating the blowing out of all active merchant stacks in the Mahoning and Shenengo Valleys for a period of 60 days or longer, as the needs of the situation may dictate. Many are now urging a quick enactment of the bill in some form, and the effectual settlement of the tariff problem, the doubt over which has been a very disturbing factor in the market.

MONTREAL.

March 26.—There is no change in the metal markets this week with the exception of spelter which has advanced ¼c, owing presumably to good local trade, and goes back to its old price again. Business generally shows improvement in jobbing orders, and the aggregate volume moving is now assuming good proportions. Inquiries are a little stronger, and the spring trade promises to be better than at one time was expected. Although the spring bookings have been very fair, stocks will not be heavy when the bulk of the metal moves, and it is anticipated that new orders will be early placed by large users. Open water prices for imported pig iron have been issued, to take effect on the 1st of May. There is very little pig in store now, and users will not be sorry when the season opens. Large consignments are due on the early boats. Antimony has received a spurt, and the price now obtaining is influencing a lot of inquiries.

PIG IRON—Open navigation prices on pig iron have been issued as follows: Middlesboro No. 3, $16.50 to $16.75; Summerlee No. 1, $18.75 to $19; No. 2, $18.25 to $18.50. There is little pig in store. Cleveland warrants quoted at 46 shillings and threepence, which is higher than last figures. The English steel market shows some improvement, and with the promise of a better shipbuilding season prospects look much brighter.

TIN—There is no change in jobbing prices for tin, and fair trade is being done around 31½c. With the stronger tone in the English market the recent evidences of shading have disappeared for the time being. Inquiries are a little better, and a strengthening market would bring out a lot of orders.

COPPER — Copper is somewhat stronger locally, and the jobbing price of 14½c is more strongly held. Orders have shown improvement, and altogether a fair amount of metal is being used. Inquiries are on the quiet side, but taking everything into consideration the market is in a better condition than it was. The firming of prices in the States has helped to improve matters.

SPELTER—Spelter is again firmer, and local prices have gone back to $5.50. Trade is very good, and the market is in consequence firm. Some very good orders are booked for spring delivery. The English market is steady with consumption reported as being good. St. Louis is not so firm and buying is on the quiet side.

LEAD—There is no change in lead, and we quote $3.65 for imported pig with Trail at $3.55. Orders are on the quiet side.

OLD METALS—Stocks are not very heavy, but as buying is quiet, there is plenty of material on the market for all purposes. Heavy copper is down a little and so is yellow brass. Heavy lead has advanced ¼c and machinery cast scrap, owing to a shortage, is up to $14.50. We quote: Heavy copper and wire 11c; light copper, 10c; heavy red brass, 10c; heavy lead, 2¾c; wrought iron, $11; No. 1 cast, $14.50.

TORONTO.

March 26.—There is a slightly better tone to the situation among metals this week and a gradually strengthening feeling is coming over the market since the interests in the United States have decided to keep their cut prices out of Canada. True, buying is yet on a small scale, but inquiry increases.

Copper is the most interesting metal at the present time, and it is again showing its strength. During the past ten days it has recovered its price in the primaries. Just now London controls this metal, for during the past year, immense quantities were bought and stocked up at a low price, and the holders there won't let the quotation go below a certain figure. They have proved their ability to do this over and over again during the past few months, but how long they can do so is conjectural, seeing that the world is producing a surplus of 1,000,000 pounds a day over present actual requirements. New York takes its cue from London, and Toronto quotations are based on New York prices. There are not the fluctuations here that there are in the larger buying centres, because the quantities demanded are not so great, but New York's market conditions are certainly reflected on Toronto.

The city of Toronto is in the market for copper wire for electrical purposes, to be used for supplying energy when the Hydro-Electric power reaches its gates. Local metal men will hardly reach for this order as the difference in the price of manufacture, 15c, and the price of Lake copper, 13c., is too close to figure on. It is likely, therefore, that some U. S. wire manufacturing concern will obtain the booking.

The interesting thing in the steel line is the rumored purchase by the steel trust of ore in the Michipicoten district. The rumor was of local interest because of the location here of interests in the same line of business as the trusts. Lake Superior Corporation officials do not place much stock in the accuracy of the rumor, but one Toronto mon holding iron claims in that district, said he was not surprised that the steel trust should look to Michipicoten for iron ore, as it would place them in a good position to compete with other Canadian iron and steel concerns should the trust decide to locate a branch plant in the Dominion. Toronto parties in close touch with other iron industries do not care to speak of the matter, saying the talk is based only on supposition.

PIG IRON—More active than during the past fortnight, but still relatively quiet. Some foundries are working full time, and the industries using pigs are reviving, although rather slowly. Quotations are: Cleveland, $22; No. 3 Middlesboro, $21, and Canadian Foundry, $18.50, which have been the prices ruling for some time past. It might be stated that while quotations generally rule almost every order received is based pretty much on its merits.

COPPER—More active and considerably firmer outside. This latter point has caused the placing of orders more freely. For although 14c locally has been the even figure ruling the past ten days, there is a better linducement to buy on the home market when the primaries show strength and firmness.

TIN—While tin is just as quiet as since the opening of the month there is a firm undertone growing up. 31c is still the local quotation.

LEAD—Becoming more active. Trading is still in small lots, though outside points report fair sales and in foreign markets the price is firming and advancing. No change has yet taken effect here. $3.80 is the local quotation, though a better figure may be obtained for large quotations.

SPELTER—Locally, beyond the fact that spelter is firmer, due to advancing prices abroad, there is no change in the

situation. Business is still passing in small lots. The quotation is at $5.50.

SHEETS AND PLATES—The stock trade is good and the West has bought nice lots of tin plate in Toronto. The market has got rid of the uneasiness apparent when prices were cut across the border, and the opinion is that the prices prevailing for months will continue and that no competition will be met with here.

OLD MATERIALS—Stocks are large and while sales are not so good as might be wished, satisfactory prices are to be obtained. Copper wire is in demand and is worth nearly as much as ingot. All old metals are unchanged at pretty nice prices.

HARDWARE MARKETS

MONTREAL.

March 26.—With the near approach of the lower freight rates, orders have greatly increased in bulk, and next week will see a strong shipping movement to all parts. It is still apparent that dealers are reluctant to look too far ahead and stocks, therefore, while being in good assorted shape, will not be heavy. This will probably result in prompt delivery orders during April being much more numerous than is usually the case. Taking everything into consideration prospects look very promising, and if a good spring demand breaks in the increase will be felt quickly right through to the manufacturer.

House-cleaning lines are moving well, and so are carpenters' tools. Lawn mowers, egg crates, and ice cream freezers are showing good accumulation for April delivery, although there is no sign of any great rush. Builders' hardware has improved, especially so far as the local trade is concernel. A decided improvement has taken place in wire nails, and bolts. Bright wire goods are also in good request. Miners' supplies are continuing to move in steady volume, and extreme activity is promised in districts like Cobalt and Gow Ganda. The markets are steady, and no important change is announced. So far the cut in the States has not affected any important line. In fact, bolts, which would most likely be the first to feel any shading movement, are reported as being very firm.

BUILDERS' HARDWARE — Local trade has brightened up wonderfully in builders' hardware, the improvement in the building permits accounting for this. Orders generally are of a good assorted character. We continue to quote door sets and escutcheons, 50 and 10; escutcheon pins, steel, 50; brass, 55. Spring hinges, No. 20, $9 per gross.

SPRING LINES—A good shipping movement will be experienced at the opening of April, although there will not be the rush observable in other years. It is expected that the latter end of April will be very marked in rush delivery orders., as dealers seem to be waiting until the demand is upon them before they extend themselves. Egg crates continue to move well. Hose has improved, and stimulation is shown in harvest tools, lawn mowers, gardeners' tools freezers and poultry netting.

SPORTING GOODS—There has been an improvement in fishing tackle, and the season promises to be a good one. Cartridges are also showing better strength. Guns are moving in a steady manner.

HOUSEHOLD UTENSILS — Housecleaning utensils are in good demand. These articles are feeling the spring movement probably more than any other line. Good shipping will be made next month in washing machines, wringers, carpet sweepers, window cleaners, scrubbing brushes, clothes lines, pulleys, etc.

MINERS' SUPPLIES—Picks, prospectors' hammers crowbars, etc., are booked in good volume for Cobalt, Gow Ganda and other mining districts. A very good season promises in these lines. We quote: Miners' picks, 17c a pound; prospectors' hammers, 20c; pick handles, $1.85 a dozen; drilling hammers, 6c a pound; crowbars, 3½c; drill steel, 8c.

BOLTS AND NUTS—Despite the shading in the States, bolts are reported as being very firm, and there seems little possibility of any immediate change. Trade is good. Nails are also moving well, stocks in dealers' hands being very low. We quote: Discounts on carriage bolts, ⅜ and smaller, 70; machine bolts, ⅜ and less, 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

SCREWS—Good movement characterizes screws. All lines seem to be in request, and prospects look very promising. We quote: Discounts at 85 and 10 off for flat head bright; 80 and 10 off for round head bright; 75 and 10 for flat head brass, and 70 and 10 for round head, brass.

WIRE—Good bulk will be moving next month and inquiries point to an improving trade all through.
fication of 80 per cent. of the bookings was a factor in keeping down the quantity. Booked orders will move out after April 1. We quote: Wire nails, $2.30 · No. 9 coiled spring wire, $2.50; No. 9 galvanized wire, $2.35; poultry netting, 2 inch mesh, 60 and 2½, and galvanized barb fencing, $2.65.

TORONTO.

March 26.—Business during March has been rather slow owing to the bad condition of the country roads and to the disinclination of retailers to place orders for spring delivery until the winter has definately broken up. April will open with brighter prospects as large quantities of fence wire, nails, poultry netting, garden tools are booked for delivery on April 1, and will begin to move out as soon as March is over. Some years there is a call for these lines in March, but this year few retailers are asking for early shipments. Collections since the first of the year have been satisfactory.

While Montreal jobbers have been capturing a large share of the Cobalt and Gowganda mining supply trade, Toronto jobbers say they have nothing to complain about as Toronto seems to be increasing its hold on the northern Ontario trade. The outlook for building is bright in all parts and more attention is being paid to builders' hardware, roofing and nails. The approach of the Easter holidays is putting a little life into sporting goods and the bright weather during March has given housecleaning sundries and paints a start in the retail stores. The outlook for April is better than for several months past.

SPRING LINES—Housecleaning always develops a lot of trade in the brush, paint and woodenware departments and the warm spring weather during the past fortnight has caused many women to visit the stores for floor stains, scrubbing brushes, etc. This is but a forerunner of the trade to be done during April & May if an effort is made to encourage the demand in this line by newspaper and window advertising. As soon as the weather becomes more settled garden tools will be in demand, and stocks of screen doors, poultry netting, etc., will be needed. Washing machines, carpet sweepers and kitchen sundries are already showing a better demand.

BUILDERS' HARDWARE—While orders are not yet being placed in heavy lots indications point to a splendid trade in builders' hardware and mechanics tools this season. In the latter line, for instance, old tools were made to do service last season and with many new mechanics beginning work this season large quantities of new tools will be required. Stocks of builders' hardware are light and with many permits being issued in every city, jobbers look for large orders in April and May. We quote 50 and 10 on Canadian door sets, locks and escutcheons.

SPORTING GOODS—A spring demand for fishing tackle is developing while baseball and lacrosse clubs are being organized and supplies purchased for the season.

HEAVY GOODS—Fair business is being done, with prices unchanged. Bar iron is $1.95. Stove bolts are 80 and 7½. Bright and steel wood screws, flat, 85 and 10 and round head, 80 and 10 per cent. Brass screws are: flat, 75 and 10 and round head, 80 and 10 per cent. Brass screws are: flat, 75 and 10, and round, 70 and 10.

WIRE—Fencing is moving well but other lines have been booked in as large a quantity as the conditions of the season allowed. The call for the speci-

BRIGHT WIRE GOODS—Trade is very good, especially in immediate delivery orders. Screw eyes are very prominent. We continue to quote: Gate hooks and eyes, and screw hooks at 60 and 20 per cent.; stove pipe eyes, screw eyes, and square hooks, 60 per cent. Wire hat and coat hooks, 40c a gross.

Retail Hardware Association News

Official News and Correspondence on Association Matters Should Be Sent to the Secretary of the Ontario Retail Hardware Association, 10 Front Street East, Toronto, and Matter for Publication in This Department Addressed to the Editor of Hardware and Metal, Toronto.

OPPOSE THIS BILL.

As announced in Hardware and Metal of March 20, a bill has been introduced in Parliament to amend the section 119 of the criminal code by adding a subsection intended to discourage and practically prevent the sale of revolvers in Canada.

If there were need for such legislation retail hardwaremen would enter no opposition to the proposal, but the proposed amendment is a meddlesome attempt at legislation introduced by some ill-informed person who has apparently taken no advice before bringing his ideas before Parliament. Surely in such important legislation, the trade most affected, the retail hardware merchants, should be consulted through their trade organizations in the various provinces.

But no such consultation has taken place and the matter is now before the Ontario Retail Hardware executive, and definite action will be taken in a few days along similar lines to that taken by the Winnipeg Retail Hardware Association as reported on this page. The Alberta and British Columbia Provincial Associations will also be heard from and a deputation representing these interests may be sent to Ottawa when the bill comes up for consideration.

In the meantime every individual hards ware merchant in Canada should do his part by at once writing his local member of Parliament urging him to oppose the meddlesome legislation until the trade has had a chance to express its views.

Wherever possible, also, induce your local Board of Trade or Retail Merchants' Association to pass a resolution, or in places where such action cannot be taken draw up a petition and ask your fellow merchants to sign it to be sent on to the Minister of Justice, Ottawa, pointing out that there is no more reason for anti-revolver legislation than an anti-razor law.

Send copies of resolutions and petitions to the secretary of the Ontario Retail Hardware and Stove Dealers' Association, 10 Front Street East, Toronto.

WINNIPEG HARDWAREMEN REORGANIZE.

The hardware merchants of Winnipeg met on the evening of March 17, to discuss the possibilities of reorganizing the Retail Hardware Association. The old organization comprised the three immediate provinces of West Canada, but the field was found to be too extensive to make it a success. The membership fee for merchants outside the city was ten dollars per annum, but the funds failed to come in during the past two years, and it devolved upon the city merchants to meet the expenses of winding up the Western Canada Association about a year ago.

The Winnipeg merchants were contributing $20 per annum, but the default of outsiders has more than doubled the fee per member. The city retailers, as a consequence, have decided to organize a local association. At the meeting it was decided to choose a secretary and a committee was appointed to bring in a recommendation to that effect. J. E. Thomas, the past chairman of the Western Canada Hardware Merchants' Association, acted as chairman for the local merchants and it is probable that he will continue to act in that capacity.

It was agreed that $10 per annum will be the membership fee for the local association, and twenty-three merchants out of twenty-five have joined the Association to date. The meeting was very enthusiastic and there is promise of a strong organization. The policy of the Association will be to soften the asperities of competitive business, and to protect, as far as possible, the retail trade against the wholesalers supplying jobbers.

Oppose Anti-Revolver Legislation.

It was also decided to petition the Dominion House of Commons to cancel article 3, of Bill 83 of section 119 of the criminal code, which now reads as follows :

> "No revolver or pistol shall be be sold to any person, unless he produces to, and leaves with the vendor a permit in writing from the chief of police, or a police magistrate, or justice of the the peace, allowing him to purchase a revolver or pistol."

It was contended that such a law would practically destroy that branch of trade, and greatly injure the hardware business generally. The resolution reads as follows :—"Resolved that it is the unanimous wish of the members of the Hardware Dealers' Association of the city of Winnipeg, that the clause and penalty governing the sale of revolvers and pistols above quoted be struck out and the following alternative clause inserted.

> " "That anyone who sells a revolver or pistol shall keep a record of the name and address of the purchaser, also an accurate description of the weapon sold."

"This association would also call the attention of the House to the drastic penalty for non-compliance with the terms of this amendment and would respectfully submit that the minimum penalty of one year's imprisonment would be unnecessarily severe and out of all reason in certain circumstances, and should be left to the discretion of the justices."

BIG TRADE EXHIBITIONS.

At the New York State Retail Hardware Association convention at Rochester, Feb. 16-19, the trade exhibitions contained the displays of 75 firms making goods sold through the hardware trade.

At the Pennsylvania State convention at Philadelphia, Feb, 10 to 12, there were 68 firms exhibiting, just double the number who made displays at the Hamilton convention the same week.

WESTERN RETAILERS OBJECT TO CARTAGE.

The first question taken up the second day of the "Inland Empire" Retail Hardware Association at Spokane this month was an address on "Cases and Cartage," by A. P. Myers, of Lewiston, Idaho, who said in part :

"The case and cartage question is of considerable importance to every member outside of Spokane. Why should cartage be added to our bill? It is clearly a legitimate expense item of the jobbers' business. City merchants do not have to pay cartage, though the haul to them may be much farther than to the depot. Eastern jobbers make no case or cartage charges. Why should Western jobbers? We should all stand together and refuse to pay cartage, and if necessary buy where such charges will not be imposed upon us. Such action would speedily solve the problem."

After a general discussion the chairman appointed a committee composed of F. S. Anderson, J. P. Shickler and E. E. Plough to prepare a resolution expressing the sentiments of the convention, to be referred to a joint committee to meet with the jobbers. The resolution favored the discontinuance of charges for case and cartage.

The Inland Empire hardwaremen are not alone in their fight against the case and cartage charges now made by Spokane and Pacific Coast jobbers. The Oregon and Northern California dealers have taken up the matter with great energy, and it is practically assured that all the States of the Pacific Coast will unite to do away with the practice.—Hardware, New York.

TRADE GOSSIP.

The Standard Sanitary Manufacturing Company, Pittsburg, expect to make a decision next week as to the location of their proposed Canadian plant. Toronto and Welland are the two places most likely to secure the industry.

C. A. Birge, of the Canada Screw Co., Hamilton, has made a large donation towards the library building fund of Victoria University, Toronto.

W. H. Parks' hardware store at Arden Man., controlled by the Robertson Hardware Company, Winnipeg, was destroyed by fire on March 25.

A delegation from Morrisburg and Brockville headed by Andrew Broder, M.P., and W. McComb, President of the Canadian Sheet Steel Corporation, on March 23 asked the Dominion Government for the imposition of a protective duty on tin plate of 15 per cent. against the United States and of 12½ per cent. against Great Britain and all other countries.

Developing the Electrical Department

The Man Who Introduces New Articles Gets the Best Profit Besides Widening His Reputation—New Ideas in Lighting Fixtures—Electric Sad Irons Becoming Popular.

A plan to be put into operation by a Chicago electrical firm to popularize the use of electricity in the household might well be followed to some extent by hardwaremen handling electrical supplies. The plan is to loan a number of electrical sad irons to reliable customers so that a trial may be made of the utensil, and a fair appreciation gleaned of its merits over the ordinary kind. Although consumers generally are quick enough to realize the advantages of electric lighting, there is a certain amount of prejudice to be overcome in connection with the utilization of the power in household work. Customers are afraid that the article might not work satisfactorily, and that they might not like it so well as the old style one, despite the many advantages in labor saving. The loan of two or three electrical appliances would do a great deal to dispel this objection. For instance, the fact that Mrs. So-and-So was using an electrical sad iron, and found it all right, would soon get around, and her friends would not be content to allow her to be the only one in possession of this up-to-date household article. Of course, this plan could only be followed out with reliable customers, but it would tend to advertise the store in other directions.

Electrical Side Lines.

A hardwareman in keeping up with the times does a good stroke of business. Especially is this so with electrical side lines, for not only is there the additional profit accruing, but customers, seeing the articles, give the dealer the rightly deserved credit of being progressive, and that opinion is a fine business asset. People like dealing at the progressive man's store. They know that they get the best and latest in the market. Hardwaremen have not given electrical lines the attention that they deserve. Without going too deeply into the electrical business, there are a number of articles which could be well carried. Electrical novelties are shown possibly at Christmas, but that is only a meagre part of what could be done all the year round. Lamps, attachments, electricians' tools, wire, fixtures, and then even in closer connection with hardware those contrivances for the house such as electrical sad irons, ovens, heaters, radiators, motors for sewing and washing machines, and so on.

Even the farm can be catered for. The advancement in the science of practical farming has been marked by the invention and introduction of electrical machines and devices in great numbers, which not only add to the comfort and convenience of farm life, but are advantageous in the matter of production and labor saving in all departments. Electrical incubators are in growing use, while cream can be separated, and butter made by electrical apparatus. Such articles could be handled by the hardwareman, while the man who has an implement department could further extend himself in electrical appliances for field work, and small electrical pumps to replace the old wind mill. There is no doubt that as time goes on electricity will be generally employed all over the country, and few districts will be without power stations. Of course, much of the trade accruing will be taken by the electrical supply house proper, and rightly so, but there is plenty of scope for hardwaremen along those lines which we have mentioned. And there is always this point: that the department may be the means of making a new and constant customer for the store—a point which can be brought forward in support of any department of the hardware industry. The more lines a dealer carries, the greater the chance that a consumer coming in for any particular article may be led to purchase something else, or turned into a regular customer. The selling of a lamp, or lamp protector, may mean the sale of a tool or a tin of paint.

Indirect Lighting Popular.

In the selling of lamps a wide field is being offered by the many new inventions constantly being put on the market. The idea of indirect lighting is now gaining ground in many quarters and may become very popular, both for office and house illumination. This indirect lighting is a system by which the lamps are entirely screened from view, and throw their light against the ceiling and upper walls for reflection, thus avoiding the glare of direct lighting, yet diffusing an illumination that reaches into every corner of a room with an efficiency that makes reading in any part of it not only possible, but restful. This system comprises especial chandeliers with pendant sockets containing Tungsten-metal incandescent lamps. Mounted or hung beneath, and semi-enclosing each lamp, are special bowl-shaped glass reflectors backed with a silver coating. These reflectors are concealed by ornamental bowls of spun brass. From the reflectors the light is thrown up against the ceiling and from there is cast in diffused illumination throughout the entire room. The absence of direct illumination is at first deceptive as to the real intensity of the illumination, but the ease with which ordinary print can be read in any part of the room shows the illumination to be sufficient as well as pleasing. Special chandeliers are not absolutely necessary. Such a system can be easily installed on gas or electric fixtures already in use, assuming, of course, that the arms of the chandeliers are not unusually heavy.

Acetylene Lamps in Mines.

The development of acetylene lamps for underground workers should be a source of profit to hardwaremen in mining districts. For several years, acetylene has been used in miner's lamps in France, Germany and Belgium to a large and steadily increasing extent. The light is satisfactory, saves nearly fifty per cent. of the cost, giving more and better light. Mining engineers have been more or less familiar with this fact, but the introduction of acetylene into mines, up to the last two years, has been very slow on the American continent. Its uses now, however, are coming to be recognized as an important advance, and it promises shortly to replace all other means of illumination, except in special cases. It is seldom that an improvement in quality is accompanied by reduction in cost, but this paradox is shown in the case of acetylene. Candles, which are largely used, remove seven times and kerosene five times as much oxygen as acetylene. The difference is, therefore, enormous. While acetylene in a mine gives off no smoke whatever, every miner is familiar with the difficulty from the products of combustion given off by other illuminants. Acetylene, therefore, makes for the life and comfort of the miners, protects them from the degenerating effects of insufficient oxygen, and removes the one important cause of lung and throat troubles. An interesting thing about acetylene is the tenacity of the flame. It is not easily blown out, the rapid motion of the miner will not cause it to flicker badly, and it burns brilliantly in an atmosphere so foul that candles fade and go out. For underground surveying and mine inspection, the use of acetylene is of great importance. Maps and records escape the usual accompaniments of grease and smudge. The acetylene flame is so small and clear that it affords an accurate point on which to sight instruments. This development of the acetylene lamps should be watched carefully by hardwaremen who are in the districts where it would be in demand.

Passing of the Canada Horse Nail Co.

The Reasons for Going Into Liquidation Explained by Wm. Smaill, Who for the Past 14 Years Has Been Manager and Secretary-Treasurer of the Company.

Editor Hardware and Metal :—After a successful and continuous manufacturing career of forty-five years, we have owing to the changing conditions and largely increased cost of distribution of our product through travelling salesmen on the part of our rivals been obliged to close our works and dismiss our employes, many of whom have spent the greater part of their lives in our employ, and with the sale of our plant and machinery and stock, which has taken place this week, will pass out of existence the oldest horse nail business in Canada.

During all the many years of our business career we have distributed our nails through a strictly limited number of firms representing those whom in our judgment had the best facility and credit for handling our product.

We have reason to believe from the facts made known during our connection as members of the Horse Nail Association, that we did about 45 per cent. of the entire business in horse nails in Canada and that we enjoyed the good will and friendly co-operation of the hardware trade in thus confining our business relations to them.

We made under the old "C" Brand, what was conceded by both buyer and consumer the best horse nails, which we always accepted as the standard, and commanded a higher price than other brands.

We had adhered to the old time tried and reliable hot forged process, and used the best obtainable quality of material for our purpose, which was a special quality of Swedish charcoal, Siemans-Martin steel nail rods. Our patterns were modified and improved, and we can say without fear of disproof, that the improved taper new pattern countersunk "C" brand horse nails, as produced by this company last year, have no superior in the world in any respect. Our prices were fair, and our discounts to the trade as liberal as possible, consistent with the quantity purchased, and a moderate profit to ourselves.

Why then could we not continue ? The explanation is simple, as stated at the outset : The method and the added cost of distribution to the shoers direct adopted by our rivals.

Competition is said by some, to be "the life of trade" but there is a class of competition based upon a code of business ethics which is not embodied in the golden rule. "Do unto others as you would that they should do to you."

WILLIAM SMAILL.

Montreal, March 22, 1908.

Hardware Trade Gossip.

Quebec.

Labodie & Moreau, tinsmiths, Montreal, have assigned.

O. Trudeau & Co., tinsmiths, Sherbrooke, have been registered.

W. S. Leslie, of A. C. Leslie & Co., Montreal, is on a business trip to the Old Country.

J. A. Jackson, of the R. Simpson Co., Toronto, has been visiting hardware circles in Montreal.

A. E. Dugart, lumber dealer and hardwareman, Beausejour, has sold his business to G. R. Scruton.

Cote & Frere, dealers in hardware, paints, etc., St. Johns, Que, are offering to compromise at 25 cents on the dollar.

Lieut.-Col. Lockerby, of Lockerby & McComb, Montreal, has been elected president of the Montreal Caledonian Society.

The Montreal branch of the Consumers Cordage Company may be removed to Dartmouth, on the eastern side of Halifax harbor.

Neil McDonald, who has had charge of the Halifax branch of the Canadian Oil Company, has joined the staff of Brandram-Henderson, Montreal, and will travel between Montreal, Toronto and the Ottawa Valley.

B. & S. H. Thompson & Co., Montreal, among their many agencies represent the Associated Portland Cement Manufacturers, Limited, England, makers of the J. B. White & Bros. brand of Portland Cement, which has been in use for every class of constructional work all over the world for three-quarters of a century. Since its invention to the present time it is computed that something like ten million tons of this cement has been used. Amongst other notable works, the cement was used in the Nile dam at Assouan, the Barrage at Assiout, Egypt, and the dam at Montmorency, Que.

D. McNicoll, second vice-president and general manager of the Canadian Pacific Railway, denies the report which has been extensively circulated that a union station in Montreal costing a million of dollars is now engaging the consideration of the various Canadian and American railway managements. Mr. McNicoll, in answer to an inquiry as to the correctness of the statement said : "There was no truth in it. This is the first time that I have heard anything of the matter." Mr. McNicoll stated that the C. P. R. were, however, contemplating big improvements to the station at Windsor Street. The Grand Trunk management also totally denies the report.

The Canadian Fairbanks Co. have come out easy winners of the Montreal Hardware Hockey Association. By defeating Caverhill, Learmont & Co. in the last match of the season by 4 to 3 after a strenuous game, they finished with the fine record of 7 matches won to 1 lost. In the game previous to this Starke-Seybold & Co. beat Frothingham & Workman by 5 goals to 3. The final standing of the league is as follows :—

	Won.	Lost.
Canadian Fairbanks	7	1
Starke-Seybold	6	2
Lewis Bros.	5	3
Frothingham & Workman..	2	6
Caverhill, Learmont & Co.	0	8

Lariviere, Incorporated, Montreal, are commencing to deliver all the Corbin art hardware selected by the C. P. R. architect for the furnishing of the Chateau Frontenac, Quebec. The order was secured in the fall of last year, and amounts to several thousand of dollars.

W. H. Wiggs, of the Mechanics' Supply Company, Quebec, called at the Montreal office of Hardware and Metal this week. Mr. Wiggs is favorable impressed with prospects in Quebec. There had been a heavier fall of snow than for many years past, and that should put the farmers in much better trim, as for two year's there had been a scarcity of water. Trade was opening out well, and personally he had taken more orders for future delivery than he had ever done before.

Ontario.

C. E. Britton, Gananoque, was a delegate to the Foresters' convention at Winnipeg last week.

Kitely & Booth, hardwaremen, Welland, have dissolved partnership. The business will be continued by B. L. Booth.

Hunter & Harold Kingston, have the plumbing and tinsmithing contract for the new observatory building at Queen's University, that city.

W. J. Christie manager of the Canadian Heating & Ventilating Co., Owen Sound, was a visitor in Toronto on March 19 on his way to Winnipeg and Vancouver.

The Aikenhead Hardware, Limited, of Toronto and Winnipeg, have been awarded the hardware contract for the new Canadian Northern Railway Union Depot at Winnipeg.

The Pedlar Manufacturing Company, of Oshawa, have bought the building at 111-113 Bay St., Toronto. The purchase price was $25,000. The Pedlar Company will make extensive alterations to the building and occupy it as a sample room and warehouse.

WHY THEY CRIED.

An Irishman noticed his companion shedding tears at the dinner table and asked him what he was crying about. He had just partaken of some red peppers, but he replied: "I'm crying because me mother is dead." Soon No. 1 tasted of the fiery fruit. "And what are you crying for," he was asked. "I'm crying because you didn't die when yer mother did," he answered.

Maritime Provinces

Many New Public Buildings to be Erected—Hardwaremen Change Positions—New Firm at Halifax—Nova Scotia's Mineral Resources.

ST. JOHN.

March 24.—The consolidated school at Kingston, King's county, was completely destroyed by fire on Sunday, March 14. The building was erected about 5 years ago at a cost of about $25,000, through the generosity of Sir William McDonald, the Montreal tobacco millionaire.

The county council at Woodstock, N. B., has decided to build a court house at a cost of $35,000. Plans have been prepared by F. Neil Brodie, of St. John, and tenders will be called for shortly.

The contract for erecting an addition to the Harkins Academy, at Newcastle, has been awarded to Newcastle contractors who will do the work for $47,000.

Dr. Borden, of Mount Allison University, Sackville, has employed Burke & Horwood, architects, of Toronto, to prepare plans and estimates for a four-story stone building, as an addition to the Ladies' College. The proposed new building would be about 117 feet by 46 feet.

F. R. Whipple, who has been with McLean, Holt & Co., foundrymen, at their stove warerooms, on Union street, has severed his connection with the firm and taken a position with the Windsor Foundry & Machine Co., Windsor, (N. S.), to represent them on the road, covering the maritime provinces. Previous to his departure from McLean, Holt & Co., the employes of the firm presented him with a travelling bag and a fountain pen.

Joseph B. Hopkins, who has been with Emerson & Fisher, hardware dealers, for the past fifteen years, will leave shortly for the Pacific coast, to make his home there. His fellow employes in Emerson & Fisher's have presented him with a very fine travelling bag and a fitting address.

A new prison hospital is being built at Dorchester Penitentiary.

W. Herbert Downie, who has been on trial for the theft of $1,114 from T. S. Simms & Co., brush and broom manufacturers was found guilty and on Saturday last was sentenced by Judge McLeod, to three years in Dorchester penitentiary.—W. E. H.

HALIFAX.

March 23.—Halifax is to have a new retail hardware and sporting goods store, the proprietors of which will be two enterprising young men. Welsford R. Morton, who, for nine years has been with A. M. Bell & Co., four years on the road and five years as manager of their retail department, has severed his connection with that firm and will enter into partnership with John J. Cragg, formerly of Cragg Bros. & Co., and now with George A. Wooten & Co.

Messrs. Morton and Cragg will conduct a kitchen furnishing, sporting goods, and household hardware establishment on Barrington St. Both of these gentlemen have been closely allied with the various branches of sport during the past four years, and should be successful in their new field. They expect to be ready for business by the first week in April.

The sporting goods trade of Halifax is now practically controlled by the retail hardwaremen of this city. All the leading retailers carry large stocks of sporting goods of every description. The development of this line of business has been most marked in recent years.

The mineral production of Nova Scotia is increasing every year, the output during the past year showing large gains with the exception of gold. The report of the Commissioner of Public Works and Mines, which has just been issued, shows the following:

	Tons.
Coal raised	6,299,282
Pig iron	326,303
Iron ore	902 475
Lime stone	484,685
Coke	505,003
Gypsum	242,535
Antimony ore	1,321
Copper ore	1,200
Gold (ounces)	11,900
Building stone	45,500
Cement (barrels)	44,520
Drain pipe (feet)	300,000
Grindstones	360
Bricks	23,000,000
Copper (pounds)	28,800
Moulding sand	185

The total tonnage of coal sold during the year was 5,480,583. The bonuses paid on each ton of coal consumed in the manufacture of iron and steel in Nova Scotia during the year totalled $65,294.48. The companies benefiting were the Dominion Iron and Steel Co., the Londonderry Iron and Mining Co., and the Nova Scotia Steel and Coal Company.

Five hundred men are now engaged in the gold mining industry of the province, and as prospectors are now at work in several districts it is expected that there will be a boom this season. Prospectors have just taken up large areas in twelve different sections of the province.

The Torbrook Iron Mines produced 19,712 tons of ore 9,260 tons at Londonderry and East Mines, 327 tons at Brookfield and 1,276 tons at Barrois. Two companies were engaged in mining copper, the Lake Copper Co. at Lochaber, C.B., and the Sterling Mining Co. at Waugh's River.

At the recent meeting of the Nova Scotia Mining Society held in this city, it was announced that tungsten, one of the rare metals of the world, is now being found in Nova Scotia, and the members of the society were given much information about this metal by A. L. MacCallum. At Moose River several veins of this metal have been discovered, and also at Waverley. This metal is used principally for tempering steel, and tools with some of this metal in their composition retain their edge at white heat. Tungsten is also used for filiments in electric lights. This discovery promises to be of great importance.

Nine hundred bales of pisal fibre, damaged by fire on board of the steamer Sokoto, were recently sold at public auction here. Buyers were present from New York, Boston, Montreal, St. John and also local men. The prices ranged from $3.29 to $3.35 per hundred pounds, and the buyers from Boston, St. John and Halifax got the most of the lot.

Mr. Mitchell, the representative of an English Turbine and Steam Company, is in Sydney, and is endeavoring to capture orders from the Dominion Steel and the Dominion Coal Companies.

E. M. Archibald is at present engaged in preparing plans for the Canada Iron Corporation, for their Torbrook iron mine development in Annapolis Co. They propose to develop an output of one thousand tons per day.

Another new industry is promised for New Glasgow, N.S. It will be a forge for the manufacture of steel drop forgings for all kinds of service and machines. The establishment of this plant is in the hands of George E. Harris, formerly of Buffalo, N.Y., and more recently in the Nova Scotia forge at Trenton, as superintendent, from which position he has resigned. Mr. Harris is now in Philadelphia ordering a large steam hammer. All New Glasgow capital is interested in the plant, and it is expected that quite a number of skilled mechanics will be employed.

M. C. MacDonald, mechanical engineer, who has worked in some of the large plants in England and Canada, will shortly open up a business in Parrsboro, N.S. He will deal in supply installation and repairs of all kinds, engines, steam and electrical, gas producer plants, portable plants and electric lighting.

A little over a year ago the firm of Shaw & Mason, of Sydney, C.B., undertook the manufacture of a special brand of metal which they registered under the name of the Colonial Anti-Friction Metal. The firm is now shipping the metal all over Canada. For some time past some manufacturers in the United States have been aware of what the Colonial metal had accomplished in Canada and the firm has received large orders from New York, Buffalo and other American cities. At present shipments to the United States are made from the factory at Sydney, but they are arranging to start a branch factory in the United States to handle the American business.

J. H.

MONTREAL.

Merchants are taking a great deal of interest in the proposal to start an Old Home Week for Montreal. In the States these festivals are very popular, and there is no reason why one in Montreal should not be equally so. Apart from the advertising they give the city, and the pleasure they afford to thousands of people, they are good drawers of trade to the stores. It is proposed to have special amusements, and with the co-operation of the retail merchants who could decorate their stores to suit the occasion, a pleasing reunion of Montrealers could be brought about. A public meeting is to be held in the Windsor hotel to discuss the project.

Beauvais Freres have two well arranged side windows of paints. The design is not crowded, and the whole effect is good while being simple. It is evident that local dealers intend to push paint well this season. As one merchant said, paints are a profitable line, and can be pushed much more easily than many dealers seem to think. L. J. A. Surveyer has an extremely well assorted window of general lines. There is no concentrated design, but all the articles blend together in a very harmonious effect. Such a window proves how a hardwareman need never be at fault for a scheme of window display when he has the ordinary lines at his command. Extraneous effect is not always necessary to make a window attractive.

At the annual meeting of the Montreal branch of the Retail Merchants' Association, A. Laniel, the retiring president in the chair, Fred. C. Lariviere, delivered the address which gained so much appreciation at the Ontario Hardware convention at Hamilton, recently, on "How to Conduct a Retail Business." I. Prefontaine, President of the Montreal Chambre de Commerce, who was a guest of the meeting, congratulated the speaker on the clear way in which he had treated the subject, and this was generally endorsed by the meeting. The election of officers resulted in J. G. A. Filion being elected president, A. Leger, of Lacroix & Leger, first vice-president, O. Normandin, second vice-president, J. A. Dore, treasurer, while J. A. Beaudry, was re-elected secretary. The meeting endorsed the bill before the Quebec Legislature of the Merchants' Light, Heat and Power Co., for rights to supply power to certain districts of the city.

Ontario Trade News

Brantford Merchants Win Interesting Lawsuit—Bicycle Trade Likely to Boom This Year—Merchants Organize to Boom Hamilton—Building Trade Reported Active in Many Cities.

KINGSTON.

March 22.—Ald. Elliott, of Elliott Bros., hardware, plumbers and tinsmiths, was recently elected president of the Kingston Reform Association, by a unanimous vote.

The Board of Trade Council has forwarded to Dr. D. R. Dupuis, Chicago, the terms upon which it will recommend to the City Council, civic assistance in the erection of a big hotel in Macdonald Park. The city must share in a first mortgage on the property, for which the guarantee of $100,000 in bonds is offered. It is understood that if this proposition is not acceptable to the promoters, the deal will be off.

If the proposition set forth by the members of the Light, Heat and Power Committee is fruitful, there should be a great sale of gas stoves in this city during the summer. It is the intention of the committee, which has control of the civic light plant, to boom the sale of gas, for cooking purposes, and, besides the extensive advertising which will be done in the local press, and various literature, canvassers will be sent on the rounds to work on a commission, and every effort possible will be set forth to secure new customers for the gas. Ald. Elliott is at the back of the suggestion, and is backed up by the members of the committee. "Use gas for cooking, it is the quickest and the cleanest," is to be the slogan.

Tenders for the erection of a new observatory for Queen's University have been awarded for the plumbing and tinsmithing to McKelney & Birch.

A. K. Routley, Princess Street, sporting goods man, has received from a Montreal firm a model of a horseshoe which he has had patented. The frog of the shoe is like an ordinary shoe, but the corks are detachable. There are corks for summer and winter use.—A. B.

BELLEVILLE.

March 24.—The Belleville Rolling Mills plant has resumed work in its third mill, only two mills having been in operation for some months. A large number of extra men were put at work. The company find it almost impossible to keep up with their orders for finished bar iron and horseshoes.

Local retail hardware dealers report business quite active, especially in dairy utensils, sap buckets and paints.

H. C. M.

HAMILTON.

March 23.—Hamilton merchants have formed themselves into an association which so far is without name, the object of which is to co-operate with the civic industrial committee to boom Hamilton. An enthusiastic meeting was held this week at which many of the more prominent merchants expressed their views. The object is to bring industries to this city and to boom the population to the 100,000 mark. It is proposed to have a fund of between $5,000 and $10,000, made up of donations from the city and the merchants and manufacturers who will directly benefit by the association. The first step will be to secure a name for the association, and toward accomplishing this end a competition may be held.

Among the important undertakings in view in the building line, are a new building for Wagstaffe, Limited, at the corner of Maple avenue and Trolley street. The factory will be one storey in height and the foundation and walls will be substantial enough to allow for the addition of other stories later. It was 100 x 140. The cost will be about $15,000. Another work will be the erection of a new edifice for the Herkimer Baptist Congregation at the corner of Locke street and Stanley avenue. The estimated cost of this structure is $20,000. Work on it will be started almost immediately. An important addition is being made to the plant of the Meriden-Britanni Company. It will be a three storey structure and will be erected under the supervision of A. W. Peene, architect.

The Crescent Oil Company will erect a warehouse in the north eastern part of the city. It will be 100 x 60 feet. The Hamilton Bridge Company and the Hamilton Steel and Iron Company will make important additions at an early date. Some new store buildings are in the course of erection at the corner of Barton and Emerald streets for occupancy by the Hawkins Drug Stores Company, and J. Holt, grocer. The Bank of Montreal will build a branch at the corner of Barton street and Victoria avenue.

From what could be gathered from interviews with several hardware retailers and manufacturers the prospects are very bright for a satisfactory business season. So far, however, there appears to be no general activity although some of the merchants and manufacturers report a very satisfactory state of affairs. Nearly all of the manufacturers spoken to stated that numerous enquiries were being received, indicating that there was business in the air if it could only be reached.

Among the wire fence manufacturers there is hope. The railway companies are out to do a lot of fencing this year and they are being keenly watched by the manufacturers. So far enquiries have been received but little business has been forthcoming. Henry Banwell, of the Banwell-Hoxie Wire Fence Company, said that business with them was very encouraging, that every month this year has been far in excess of the same months last year. On the whole the prospects are pretty fair.

The F. W. Bird Company has secured the best evidence of spring briskness in the form of a contract from the United States government for 770,000 square feet of Paroid roofing to be sent to Messina, Italy, for the reconstruction of buildings destroyed by the earthquake. The firm is very busy and is considering the extension of its plant.

There is a noticeable activity in the building line which augurs well for the success of the building trades this season as well as for the hardware dealers. The first touch of spring weather has created a run in paints and the active householders are getting early on the job. Business in paints as a result is reported to be brisk. The same may be said of other lines of builders' hardware.

Frank B. Wright, locksmith and stove dealer, has taken out a permit for the erection of a brick warehouse on Park street between York and Market streets. The building will be used for storage and office purposes. It will be two or three storeys in height and is expected to cost approximately $5,000. W. H. Yeates has the contract for the brick work.—D. L.

GUELPH.

March 22.—The Board of Education finding that there is a great need for technical education in the city, have appointed a committee to get estimates on the cost of the erection of a suitable building and equipment. They also talk of either erecting an additional four-roomed school building in St. James Ward or enlarging the present one.

G. A. Richardson, hardware merchant, has been elected a member of the executive of the Guelph Retail Merchants' Association.

H. Occomore has recently enjoyed a very successful graniteware sale. He stated to your correspondent that he believes that the secret of success in a sale in any line of goods is to have on display the articles the people want most and to mark them at prices that simply make the people who see the goods in the window come in and buy.

L. D. McArthur, of Bond's hardware store, and Morgan White, of Kloepher's, were recently elected members of the Eecutive Committee of the Guelph Clerks' and Salesmen's Association.

The Ontario Government has increased its grant of $20,000 to $25,000 in aid of the building of the extension to the Winter Fair Building. There will likely be some changes made in the plans as the estimates ran from $40,000 up, while there is as yet only $35,000 provided for. Probably the change will be that it will be a cement instead of a cut stone building.

LONDON.

March 16.—Ald. Robert Parsons, proprietor of "Parson's Fair & Hardware" who has two stores in the east end, is opening up a down town business at 263 Dundas Street.

Henry Parock, manager of the London Concrete Machine Company, is erecting twenty dwelling houses in the eastern part of the city.

Wortman & Ward, the local manufacturers have been made a tempting offer to erect a $75,000 factory at Estevan, Sask. Mr. Wortman, however, says he is not seriously considering the proposition at present, but he can't say what he might do later on. The company has just now between seventy-five and eighty men on its pay roll, and Mr. Wortman says he is figuring on an increase in business of at least twenty per cent. over last year.

G. H. Smith, lately representing the McClary Manufacturing Co. in western Ontario, has been promoted to be assistant to the manager of their Winnipeg branch. N. R. Turner has been promoted from the territory east of Toronto, to headquarters, vice Mr. Smith, and Mr. Garnet Maguire, of the cost department has taken Mr. Turner's place.

R. S. Wilson, for the past eight years buyer for the McClary Manufacturing Co., is going into business on his own account at Vancouver.

Retail hardwaremen report business picking up and the prospects most bright. This optimism is largely induced by the indications of a substantial building revival as soon as spring has fairly opened. In the first half of the present month 27 building permits were issued by the city engineer's department, calling for an expenditure of over $42,000. This brings the total value of permits issued since the bebinning of the year up to $137,310.

J. E. Young has taken possession ol the McMurty hardware business.

London will likely make a bid for the big steel plant which Sarnia is after, not for this city, as the concern wants a water front, but for Port Stanley, which would be the next best thing. The Mayor and chairman of the Manufacturers' Committee, believe there is a possibility of the plant being secured for the southern terminus of the city's own railway. The concern which would employ at least 2,000 high wage men, is considered well worth going after.

The latest scheme is a steamboat service between Cleveland and Port Stanley, with traction railway connection with London. A company is being formed to float the enterprise, which will shortly be considered by the Board of Trade.

Another natural gas company is seeking a franchise here. The wells are located in Romney, and the proposition is said to be backed by Pittsburg, Pa., capitalists.

James W. Rowlands, for over thirty years chief clerk in the cost department of the McClary Manufacturing Company, died suddenly this week.

The mayor has received a letter from a large corset manufacturing firm in London, England, making inquiries about this city as a possible location for a Canadian branch of their business. The firm, which is one of the largest of the kind in the old country, is believed to mean business, and the mayor promises to get in touch with it as speedily as possible.

As a result of an order sent out from headquarters at Montreal, seventy-five men have been laid off at the Grand Trunk car shops. They are mostly young fellows, as many married men as possible being kept on. Superintendent Treleaven told the men he hoped for improved conditions, and that they would be given first chance when more men were needed. It will likely be a month at least before things pick up. There are now 390 men on the pay roll, and all are working nine hours a day.

The first toy engine turned out at the factory established by the Trades and Labor Council, for the benefit of unemployed men is now on exhibition, and is really a credit to the workmanship of the men who made it. The promotors of the enterprise claim that from every standpoint the factory has thus far proved a success, and that the best part of it is yet to come. They point out that it took some time to turn out the first engine, as they had to make their own patterns, and there was considerable building and rebuilding before they got in working order. Now that this work is completed they expect to be able to turn out the toys in wholesale quantities.

F. T. Y.

CHATHAM.

March 23.—Country roads are drying rapidly, and as a result farmers are coming to the city in good numbers, to make their spring purchases of wire fencing, rope, nails, and similar lines. Business is generally reported to be picking up. Plumbing is coming up pretty well, and everything points to a good spring trade.

J. C. Wanless has secured the exclusive local agency for the Chicago Jewel gas ranges. The Chatham Gas Company formerly handled this line of ranges, but the company is going out of the stove business. Mr. Wanless received his first consignment of ranges last week, and gave them a good send off with a striking window display, the central feature of which was the $32 Jewel. The display, which was arranged by Sep Poole, had the big Jewel posters for background, and was helped out by Jewel cook books and Jewel "bird books," neatly arranged. A large distribution of these books is taking place.

Jas. E. Gray, of The Ark, has been holding another series of "auction sales" daily, afternoon and evening, similar to those held last year. The same auctioneer, Col. Strong of Boston, is in charge.

The "Auto Buggy" has made its appearance here, three or four of these vehicles being now in daily use. Negotiations are now in progress with a view to the manufacture of the Auto Buggy in Chatham. It is to retail at about $500, and will consequently appeal to people who can't touch the big, heavy and expensive touring cars.

A number of large building contracts are looked for this year. The city board of education has decided to proceed with the proposed addition to the Collegiate Institute. Wilson, Son & Arnold, architects, are drawing the plans, and the structure will cost between $15,000 and $20,000. The Dresden public school board is securing plans for a new school building. T. J. Rutley is architect for a new Presbyterian manse in Harwich. Wilson, Son & Arnold have the plans and are asking tenders for the new Howard township hall, to be built at Ridgetown.

Stephens & Douglas were last week awarded the civic contract for all hardware required for city purposes during the year. Park Bros. were the successful tenderers on castings.

A number of agents representing a St. Louis concern toured the city last week, selling an "anti-splash water filter" for use with water taps. The contrivance sold for 25c. The chief of police, however, insisted that these transients take out the necessary license, and, rather than do that, they passed on.

Jas. E. Gray is showing fancy house numbers in his window. This is a line of trade little pushed by hardwaremen. When the numbering scheme was completed, ordinary aluminum numbers were supplied free by the city. Some householders, however, preferred to buy fancy numbers of their own; and it is possible that, by appealing to individual "good taste," a hardwaremen might be able to work up quite a trade in this line.

T. W. N. Clements, formerly in the tinsmithing business here, left this morning with his family for Prince Rupert, B.C., where he will carry on the same trade.

Mitchell Bros. have received the contract for the steam heating system for the new Princess Theatre.

O. H. Leake, formerly of A. Westman & Co., London, has taken the position on J. C. Wanless' sales staff rendered

vacant by the departure of Harry Shillington for Saskatoon.

Coincident with the return of spring, Westman Bros. have a very timely and attractive paint window. In addition to a big display of Sherwin-Williams' paints, brushes, kalsomine, stepladders, and other more or less remote accessories to painting are shown.

Burleigh Campbell, of the hardware department of the Crawford store, Tilbury, has been appointed leader of St. Andrew's church choir in that town.

John E. Scriven, Tilbury, who recently disposed of his hardware and tinsmithing business to H. Sloan, left last week for Alberta, where he expects to locate.

The Premier Electric Light & Power Co., Wallaceburg, has installed a new boiler, manufactured by the Leonard Co., London. H. A. Stonehouse, general manager for the past four years, is retiring, and his successor will be appointed in April.

Geo. M. Watt of Watt & Sons plumbing establishment, underwent an operation for appendicitis last week. He is reported to be progressing favorably.

ST. THOMAS.

March 24.—Hamilton & Scott are instaling a hot water heating system for J. Hunt, of Glencoe. This makes the fifth plant this firm have installed in Glencoe. They have secured seven other contracts during the week.

Finlay & Glover, Port Stanley, have bought out B, Day, of that place. They will add hardware to their other lines.

W. Mitchell, hardware dealer, Port Stanley, has returned from his wedding trip.

Patticary & Dixon, plumbers, have dissolved partnership. Mr. Patticary will carry on the business in the old stand, while Mr. Dixon has secured new quarters in the east end.

There is always good local competition over the tenders for the city lighting and waterworks departmens. This year Ingram & Davey secured both contracts.

Architect Darrah is asking for tenders for a brick school house for the Township of Yarmouth, to be erected one mile east of the city.

The engineers' building is so far advanced that the roof will be put on this week. The Hamilton Bridge Co. have completed their steel work.

The prices that will likely prevail for wire this season will be: Plain, $2.65; crimped, $2.80; barb, $3.05.

G. A. F.

BRANTFORD.

March 23.—The slogan "Boom Brantford," seems to be coming to a head this year. Your correspondent in speaking to several prominent contractors this week learned that, contrary to general expectations, the building season promises to be a brisk one. One contractor who does a great deal of important work said, "The indications are that this year will be a go-a-head year in the Telephone City, a year much ahead of 1908. Within a radius of six miles of Brantford several schoolhouses will be erected as well as a number of modern farm houses with every convenience. In the city, although there will not be many very large buildings erected, yet there will be a good deal of work. Colborne St. Methodist Church has decided to expend $14,000 in enlarging the present edifice. Park Baptist Church will also make extensive alterations and additions. A number of plans have been drawn up for modern houses, and as soon as the weather opens, the preliminaries of the campaign will be commenced.

It will be remembered that a number of merchants, about 150 in all, were caught by "trial orders" of a New York oil firm. They decided to fight the cases and organized for protection. The Liberty Drug and Oil Co., New York, the firm alluded to, brought suit against Wm. Tipper, and the association backed him up in his defence. It was shown that the orders were to be trial orders, given on the understanding that they could be shipped back if everything was not satisfactory. The oil, which cost the oil company 50c per gallon, sold at $5 for three gallons. Judge Hardy, who presided, thought that there had been tricky contracts and dismissed the case. It is altogether unlikely that the company will prosecute any further cases.

A fire which broke out in the premises of the Brantford Rag and Metal Co., Dalhousie St., did $9,000 damage to the building, and $600 to the contents.

Brantford butchers and grocers, who have a strong organization, have decided to protect themselves in a similar way to the Guelph merchants, and will appoint a collector of bad debts. A black list will also be kept.

An automatic pressure reduction gauge for the reduction of the water pressure in buildings, has been placed on exhibition in J. T. Minnes & Co.'s plumbing store, Colborne St. As it deals with a live issue, it is attracting a good deal of attention.

J. Holman, Plattsville, has been awarded the contract of building the Bruce School, the contract price being $2,500.

A prominent manufacturer informed your correspondent that he had received assurances from the Brantford and Hamilton Electric Railway officials that a fast freight line would be established on the radial this spring and shipping connections made with the lake vessels. This move would make Brantford, for freight purposes, practically a lake port, and would have a great effect on local shipping firms. A radial freight service on the proposed line to Port Dover would still further increase the advantages.

Taylor & Taylor, architects, have drawn up a successful plan for a four-roomed school at Ingersoll.

The general hardware business conducted by Koenig & Wilson, at Paris, for the last two years, has been dissolved by mutual consent. The latter will open up a hardware store in the Allchin Block.

It looks as if the bicycle would boom here this year. The local streets are splendid for bicycling, and as there are a very large number of mechanics who have a good distance to go, it seems "a sure thing" that the trade will be brisk.

A. W.

The Prairie Provinces

Practical Advertising Done by Calgary Firm—Opening for Wholesale at Saskatoon.

CALGARY.

March 22.—Business still continues very good, with very brilliant prospects for the coming season. Money seems to be a great deal more plentiful, and already building operations are quite brisk.

A new central fire hall is to be erected by the city, also three small sub-stations. When these are completed, Calgary fire equipment and fire halls will be equal to that of any city on the continent.

The city building inspector has issued permits to W. R. Eveleigh for two houses in Sunnyside, $2 000; David Jones for one house in Bankview, $1,500; Benson & Houlton, two houses, $2,500; J. H. Haynes, a brick terrace on First St. east, five apartments, $8,000; Wm. Reid, $2,500 residence, and Lea & Goulding for a $2,700 residence.

The Ashdown Hardware Co. had a very attractive display of carpenters' tools in their window last week. The main feature of the window was three different sized arches, the smallest at the front, and largest at the back. The tools were arranged all over the arches, and over the floor of the window. The groundwork of the entire window was of white drapery cloth, which made a very artistic effect.

A. McBride & Co. are laying out the finishing hardware for the new city hall.

Work has commenced on the new steel traffic bridge across the Elbow on Ninth Ave., also on the new bridge across the Bow River fro mSt. George's Island to Riverside.

W. J. Thompson, hardware merchant, Okotoks, called on his friends here last week, on his way home from Ontario. Mr. Thompson informed us that this was his first trip east in eight years, and he has come back more than ever satisfied with the business, business principles and the business prospects as he finds them in Alberta.

A very important business deal has been effected here by the sale of the entire business and real estate of the Dominion Meat Co., to the Morris Co., who are connected with the Swift Co., of Chicago. It is reported also that the new company have purchased a whole section almost adioining the property on which the plant is now situated. They will make very large additions to the present plant, build a new abattoir and erect large stock yards.

Linton & Hall, in an advertisement in the recent special edition of the Morning Albertan, say a few words about the people of our city sending out of town for goods, instead of helping to maintain the city where they make their

money. This practice is being carried on more out of habit, probably, than from any real financial standpoint, for it has been proven that in, yes, we may say, the large majority of cases, where people send away for lines of hardware, that they pay as much and often more than they could buy the same article for right here in Calgary.

WINNIPEG.

March 24.—While there are few who have anything definite upon which to base their convictions, nevertheless the local retailers have a decidedly hopeful outlook with the incoming season. It is known that several very important building permits have been issued, and this looks good to the trade. But with this exception nothing is in view to stimulate the trade directly. The change of season is the natural source for the optimism which prevails and no doubt as business gradually unfolds all expectancies will be fulfilled. It is admitted that hardware goods generally are not moving as they were in some of the recent years, yet the books will show progression, but on a somewhat lower scale. The average retailer does not like to think of a smaller business than that conducted two or three years ago, yet no one is dismayed, and, as intimated before, much depends upon the coming season to recall any superb prosperity previously enjoyed.

R. Wyatt, a retailer of this city, has been taking orders for galvanized iron tanks to serve as basement soft-water cisterns. He has equipped many residences in the city, and will instal his tanks in many of the new houses to be erected this coming summer. Mr. Wyatt also makes a specialty of refrigerators made to order, many of which will be sent out this spring.

As an outcome of what is expected this spring a large stock of paints is being shelved in this city, and throughout the province generally. The Hudson Bay Co., and Watt & Gordon, two old retail stores here, have on hand a larger stock of paints and varnishes than ever before in their history.

The past fall and winter has been a poor one, comparatively, in the stove and range trade. Stoves have not moved as freely as they did a year ago, when the stock was increased liberally, consequently this season the supply was much in excess of the demand. From this can also be seen the decline also in the number of houses being furnished, comparative to previous years. There is at the present time, quite keen competition among the stove manufacturers. It will be interesting to note that American-made stoves have been the most popular all through the West up to the present time. The reason for this has been on account of the light malleable steel which the American firms have been able to put into their ranges. Of late Ontario manufacturers are producing ranges of the same quality, but the American, on first presenting it to the market, have still the lead in stoves and ranges. Another reason why the Canadian stove is not so popular in the West is because the Americans were first to satisfy the western demand in matter of style. The Ontario manufacturer has been slow to note the style of stove required in the West, and insisted upon shipping good selling stoves in Ontario to Winnipeg for Western distribution. The popular Ontario stove has an eight-inch lid, for instance, while in the West there is invariably nothing in demand except the nine-inch lid. The American manufacturers have catered to Western demand, in this respect, as well as in others. They have been more able to do so, perhaps, since this type of stove is in demand in the Northwestern States. However, the Canadian stoves are coming up to the requirements, and no doubt the bulk of the trade will be confined to our home industries in time.

E. E. Sheppard, the manager in this city for the Dominion Bridge Co., has been notified that this company intend expending $100,000 in increasing the output of their plant here. The present output is about four hundred tons per month. With the proposed extension this output will be about twelve hundred tons per month. The company, when the new plant is installed, will be able to carry about four thousand tons of raw material in stock. They are at present supplying the steel to the new union depot, and Nova Scotia bank, now under construction.

C. D. Waldon has withdrawn from active management of the Pease-Waldon Co., of this city. The firm at the present time is in charge of J. T. Sheridan, president Pease Foundry Co., Toronto, and C. F. Sheridan, who has been connected with this branch for some time. The company here are doubling their warehouse capacity at the present time, and are preparing to conduct their business on a much larger scale. Some large orders for furnaces have been received, including an order for furnaces to be installed in the Prince Albert high school now under construction. The Pease-Waldon Co. think it highly probable that a manufacturing plant will be established here some time in the future. At present, the labor situation is such that plans are quite indefinite.

The Pease-Waldon Company, Limited, Winnipeg, announce that Charles D. Waldon, formerly manager of the company, has severed his connection with the company. The new management, under the temporary charge of President J. T. Sheridan, Toronto, are making elaborate preparations to take care of what they believe is going to be one of the best years in the history of the West. They have doubled their warehouse capacity so as to be in a position to ship promptly and thereby avoid delays which are annoying and unprofitable. They will also be in a better position than ever to take care of their steam heating and ventilating business, which has proved so successful, especially in schools, churches and other large buildings. A recent order secured is for the warm air heating of the Prince Albert High School.

L. C. H.

SASKATOON.

March 22.—A wholesale hardware concern is wanted here in a very marked way and any such concern coming in will do well from its inception.

Hardware is very necessary in any new country and here we have a new country which is filling up as no part of the West ever did. Little stores are opening up all over the country. Hardware is their chief staple. They have not sufficient business yet to handle carloads from the East. Scarcely a day passes but people write in from some of these little places asking the names of our wholesale hardware people. We have no regular wholesale hardware concern, but have several good retail stores and they do, in their own way, and to the best of their ability, what wholesale business offers.

Probably there is no better opening in the West than the one I have cited above and any experienced party investigating would find what I have said is not overdrawn.—F. M. S.

British Columbia.

Large Amount of Building Being Done at Victoria and Vancouver—C. P. R. May Establish Car Shops Near Vancouver — A Successful Chilliwack Hardwareman.

VICTORIA.

March 20.—It is a long time since building was so brisk in Victoria as it is at the present time. Twenty-one buildings, involving a total outlay of about $93,750, are in course of construction, or will be under way in the course of a few weeks. The buildings are only those in the hands of one firm of contractors, while other contractors in the city are also busy. Among the structures that are planned are three of a good size. One is a brick, steel and concrete store and office building and will cost about $25,000. Another is a large rooming house of three storeys, to cost about $30,000. The balance of the $93,750 is dwelling houses ranging from $5,000 to $2,000.

H. F. Shade, plumbing inspector, has taken out a permit for a house to cost about $3,000.

In addition to those above enumerated Lim, Bang & Co., a wealthy Chinese firm, are to erect a large brick block on Government Street. The building will have twelve spacious stores on the ground floor, the top floors to be offices and rooming apartments. Construction is to commence at once.

Another Chinese firm are to build a block on Broad Street, to cost $20,000.

The steamer Amur, on her last trip

north took about sixty tons of machinery for the pulp mill of the Western Canada Pulp & Paper Co., now under course of construction. Quatsino Sound, on Vancouver Island. Work is being rushed on the mill and it is expected to be in running shape by the end of the year.

The cutlery and sporting goods establishment carried on on Douglas St. by W. H. Adams, has changed hands, Mr. Adams having sold out to Sweeney Bros., who are making a big bid for the sporting goods trade.

The contract for valves has been awarded to E. G. Prior by the city council at the price of $1,263.05, the Crane valves to be supplied.

Tenders are being called for the erection of a five-storey and basement block by the Times Printing and Publishing Co. to be used entirely by the company in the printing and publishing of their paper. The new building will be among the finest in the city, being of steel and concrete faced with pressed brick and stone.

A change has been made in the firm of J. Barnsley & Co., cutlery and sporting goods dealers, Mr. Barnsley having retired from the business, which will be carried on by his partners under the firm name of J. R. Collister & Co.

F. G. Brenton, representing F. W. Lamplough & Co., wholesale hardware dealers, Montreal, is in town this week. Mr. Brenton found trade very good all the way west and much ahead of last year.

W. B. C.

VANCOUVER.

March 20.—General conditions are very encouraging. The lumber mills, both on the coast and in the interior, are starting up one after another, though in the territory east of the Cascades there are still a number of idle plants. Logs are going up in price, and a rise in the price of lumber is bound to come, for with the raw material at $9 and $10, rough lumber cannot be profitably sold at $12 and $13. An indication of the business in sight is shown by the large orders held by the Fraser River Lumber Company, at Fraser Mills on the Fraser river. These aggregate twelve million feet, over half of which is to be supplied to the G.T.P., the other firms in the contracts being the Rhodes Curry Company, of Amherst, N.S., the Ottawa Car Company, and dealers in the territory west of Regina.

As a result of the sending of a deputation to Ottawa, the King Edward dredge is to be put to work in False Creek without delay, in the construction of a channel which will eventually be part of the waterway to the upper basin where industrial enterprises will be located.

There seems to be some ground for the story in circulation here that the C.P.R. will establish car shops at Westminster Junction, a point 20 miles from Vancouver on the main line. It seems a feasible proposition for lumber from here is shipped to the car manufactories in Eastern Canada. Not only cars but locomotives are talked of, but these locomotives will be mostly for the lumber and logging industry. Many of these are used in this province, with the prospect of a good demand for years to come, since with the logging of areas close to the water, more power will be needed the further back timber is located. The report is that Seattle capitalist have an option on property in the east end of the city.

Building is going for a record. During the past two weeks, the total value of permits was $277,805. Ex-Mayor Buscombe will build a six storey warehouse on Beatty street to cost $20,000. John S. Heyler, architect, has filed plans for a eight storey building on Hastings Street, three lots below the large Carter Cotton building, which will cost $75,000, and which is being erected by a local synidicate. Mayor Douglas and A. E. Thorley will erect a $50,000 block on Granville Street, the architects being Parr & Fee and the contractors, Purdy & Lonergan.

Instead of awarding a contract for the supply of hardware required by the city this year, it will be purchased in open market. H. Darling will supply the paints aad oils required.

NEW WESTMINSTER.

March 20.—The Schaake Machine Works, of this city, has been given the contract by E. J. Fader, also of New Westminster, to manufacture an improved logging appliance which is to be operated by a donkey engine, and of which he is the inventor. The improvement consists of an endless cable revolving on a double drum and wrapped a sufficient number of times to prevent slipping. Mr. Fader claims that with the use of his invention logs can be hauled from any part of the woods and even from the top of a mountain. The endless cable does away with the haul back, and is expected to be a boon to loggers in many other ways.

KAMLOOPS.

March 20.—The general scheme for the reorganization of the civic light and power department, which has been laid before the city council, involves an expenditure of $16,500. This includes the purchase of a comound direct engine, with a capacity of 150 h.p., costing $9,000 ; a 120 k.w. dynamo, indirect, $3,200 ; 150 h.p. boiler at $2,100, new wiring, $2,200, and contingencies, $1,000. This equipment will provide abundance of power.

CHILLIWACK.

March 20.—There is no more respected man in this district than James Munro, the hardware merchant, who by faithful and honest methods of dealing has increased his store from a small stock of graniteware and tinware to one of the leading hardware houses in the province. Nineteen years ago, he moved to Chilliwack from Belleville, Ontario, and started with the firm of A. C. Henderson & Co. In 1891, in a small portion of the store at present occupied by him, he started in business on his own account as a tinsmith, with a small stock of tin and graniteware. Trade increased so that in 1899 he was warranted in putting in a general hardware stock. To-day he is able to buy certain lines by the carload, which enables him to give the best prices to his patrons. Last year, to facilitate business, he erected a warehouse on the rear of his property. To-day he carries a $20,000 stock, including all lines. After being so long in the district, Mr. Munro can lay claim to the unique distinction of having been successful and having few if any enemies. Let him run for any public office and he heads the poll. His advice at the council board is sought after and is always relied upon as sound, and the city finances are safely looked after by him.

THE TRAVELER'S HOME.

When on the road the commercial traveler depends for his home upon the proprietors of the hotels he patronizes. If they do not look after his wants properly he suffers many inconveniences. That is why knights of the grip always go to that hotel which best caters to their wants. This explains the wonderful success of Ottawa's fine Cecil Hotel, the commercial traveler's hotel. Up-to-date in every particular, not one modern convenience which is conducive to the comfort of the commercial traveler is forgotten. In the centre of the business district ; near the railways, most convenient in every way, no wonder it is patronized. The proprietor, Walter B. Walby, for seventeen years spent his time in learning the good lesson in leading Canadian hotels. He saw the want for a really first-class hotel in Ottawa that would cater to the commercial traveler particularly, and the Cecil was established. That the boys recognize his efforts to make as near an approach to home as possible for them in Ottawa—comfortable and convenient quarters and an excellent cuisine service—is amply evidenced by the growing number of them who make the Cecil Hotel their headquarters when in the Capital city.—advt.

HINTS ABOUT NAILS.

An old hardware dealer who had a good deal of experience in the handling of nails for all classes of work was one day asked by a local carpenter for some nails suitable for use in hard woods, such as oak and maple, etc. The carpenter complained that he found great difficulty in avoiding splitting mouldings and beadings made of these woods, and thought perhaps he was not using the right kind of nails. The hardware man smiled and told him that it was a case in which he had often been able to help before. He said : "Take a small quantity of oil and dip the point of each nail in it before driving, when you will have no more difficulty." The carpenter followed his instructions and found, to his surprise, that the merchant's words were true.

J. L. Vokes & Son, Toronto, are getting their new premises at 68 King St. west in order for business. One side of the store is given over to a display of mantels and fire places, while the other has a counter with a battery of glass faced shelf display boxes.

CONDENSED OR "WANT" ADVERTISEMENTS.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost **must** accompany all advertisements. **In no case** can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

AGENTS WANTED.

This is the problem of many manufacturers who are anxious to get a foothold in Western Canada. It will be easily solved if HARDWARE AND METAL is given the opportunity to solve it.

MANUFACTURER, hardware specialty wants agents for Ontario, New Brunswick, Nova Scotia, on commission. Selling wholesale and retail hardware trade. Box 802, HARDWARE AND METAL, Toronto. [12]

UNITED STATES firm manufacturing a fine line of sheet metals and sheet metal products, such as corrugated sheets, corrugated roofing, roll roofing, metal shingles, also complete line of galvanized buckets, pails, wash-tubs, etc., are anxious to secure good Canadian agents for Montreal, Toronto and Winnipeg. State lines already carried and address Box 814, HARDWARE AND METAL, Toronto. (13)

WANTED—Second hand set tinsmith tools. J. W. Scott, Streetsville, Ont. (14)

ARTICLES FOR SALE.

Don't keep any fixtures or tools around your store for which you have no further use. They are worth more to-day than they will a year hence. Don't keep money tied up which you could use to secure discounts from your wholesaler.

ELLIOTT-FISHER STANDARD Writing-Adding Machines make toil easier. Elliott-Fisher Limited, 513, No. 83, Craig St. W., Montreal, and 129 Bay Street, Toronto.

SECOND-HAND tinners' tools. For list apply to Box 807, HARDWARE AND METAL, Toronto. (12)

BUSINESSES FOR SALE.

Somewhere in Canada is a man who is looking for just such a proposition as you have to offer. Our "For Sale" department brings together buyer and seller, and enables them to do business although they may be thousands of miles apart.

HARDWARE and furniture business for sale on Winnipeg Wetaskiwin line in Alberta. Good district. Stock about $5,000, turnover $25,000. Real estate about $2.000. Sell or rent. Address Box 39, HARDWARE AND METAL, Winnipeg. [17]

BUSINESS CHANCES.

WANTED—Partner wanted with hardware experience to join good tinsmith with established business in important town on the G.T.P railway. References furnished and required. State what capital. Complete particulars furnished on request. Apply Box 4, HARDWARE AND METAL, Winnipeg, Man. (13(

MISCELLANEOUS

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, 129 Bay Street, Toronto.

A MARKET OF BUYERS, backed up by money to spend, is open to you in the Busy Man's Magazine. Every territory in Canada is represented. If you have something to sell, something you want to buy, a condensed advertisement in the Busy Man's Magazine will put you in touch with the classes you want to reach. Four cents per word will carry your message from Atlantic to Pacific. Send copy of your advertisement along with order to cover cost of insertion. Your announcement will appear under a special heading. BUSY MAN'S MAGAZINE, Montreal, Toronto, Winnipeg.

HIGH CLASS COLOR WORK; Commercial Stationery, Posters. The Hough Lithographing Co. Limited, Office—No. 3 Jarvis St., Toronto, Telephone, Main 1576. Art, Good Workmanship; Business Methods.

IF INTERESTED in a Duplicating Machine for getting out circular letters, reports, price-lists, etc., or for printing various office forms, write for booklet and samples of work. The "POLYGRAPH" is the newest, latest, and best, and sells for a lower price than the others. Is unexcelled by any similar device on the market. F. W. Tenney, Canadian Sales Agent, 123 Bay Street, Room 116 Stair Building, Toronto, Can. (tf)

IF YOU are looking for a side line to add to your business there is none better than COLUMBIA GRAPHOPHONES. Double Disc Records (which means two records for a single price) and Indestructible Records (that will not break or wear out no matter how much you abuse them). The Columbia Phonograph Company is the only firm that manufactures both Disc and Cylinder Machines and Records, therefore, a Columbia dealer has the advantage over all others, as he can furnish his customers with what they want, while his competitor has to sell them what he has or lose the sale, which he generally does where there is a Columbia dealer. Are Columbia goods sold in your town? If not, why not? Do you want the exclusive agency? (remember exclusive). You had better write to-day or someone else in your town will read this advertisement and beat you to it. A postal will bring catalogues and full information free. Write to-day. Do it now. Toronto Phonograph Company, Limited, Exclusive Columbia Jobbers, 40 Melinda St., Toronto, Canada.

60,000 Shrewd merchants all over the world have paid $60,000,000 for 650,000 National Cash Registers. They've saved more than that. The National Cash Register Co., F. E. Mutton, Canadian Manager, cor. Yonge St. and Wilton Ave., Toronto.

NOTICE—Users of Pitner Gasoline Lamps are warned against being induced to purchase parts of other makes of lamps to be used on the Pitner. The most vital part of any lamp is its generator, and the Pitner generator has been granted a patent in Canada, the United States and other countries, on the principle of its improved method of generating gasoline vapour. Supplies and parts for the Pitner lamps can be received by return mail by applying to our representatives or direct to THE PITNER LIGHTING CO., Limited, 36-38 Lombard St., Toronto, Ontario.

NOTICE—The Village of Langenburg, Sask., is installing a system of Fire Protection and the Secretary is open to receive quotations from manufacturers as to the prices of Chemical Engines and Manual Pumps. Write to The Secretary, Village of Langenburg, Langenburg, Sask. (12)

SITUATIONS WANTED.

Western Canada Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected by Telegraph up to Noon on Friday.

Winnipeg, March 23.—There has not been relatively much change in the wheat situation for the past ten days. The market has varied up and down and occasionally the variation has been considerable, as is always the case with a narrow market and the wheat market of the Canadian West has been an exceedingly narrow one. There have been a few days when export trading was good; there have been no days when it could be said to be very active. No advance in prices and no "bull dope" as to the condition of winter wheat seem to have been able to shake the British miller from his serene calm or tempt him into anything like active buying. Stocks are light in the old country, and for a long period the actual world's crop news shorn of all exaggerations, was bullish and yet the British miller with his many million mouths to feed has absolutely refused to do anything but buy from hand to mouth. Now the news on the whole seems to endorse the wisdom of his policy, for taking world conditions at the end of the third week in March they are decidedly more bearish than they were at the end of the third week of February and the season is a month nearer another harvest. This is emphatically so, so far as the Canadian West is concerned. Receipts, which for so long a period after the new year set in, were phenomenally light, began to increase about that time and have steadily increased ever since. Not only receipts in Winnipeg but receipts at country elevators.

Estimate of 1908 Crop.

C. C. Castle, the Warehouse Commissioner, has just issued a report placing the crop of the Canadian West for 1908 wheat alone, at 105,149,354 bushels and this report coincides with the final returns of the various provincial governments. According to the details of this report there are 14,673,154 bushels still in farmers' hands and 12,511,000 bushels in store in interior elevators, making 27,184,154 bushels of the crop of 1908 still to come forward. The seed requirements for 1909 are put at 144,000,000, which is excessive, so that even the figures mentioned as available may be slightly increased. In the opinion of your correspondent the government and Mr. Castle's estimate of the wheat crop is too high by several million bushels, but the amount still to come forward is fully endorsed. There is a great deal of truth in the homely wisdom of an exchange to the south, which remarked some weeks ago, "make the price high enough and it is remarkable what the farmers can do with brooms and shovels in the bin corners." It is quite probable that this report will have the effect of making the British miller still more indifferent in his buying.

There is a factor in the British millers' position that seems to be rather generally overlooked. It is not only that he seems to see plenty of wheat ahead to buy when he needs it but it is more than probable he sees a decreased demand for bread with the 2½ pound loaf doubled in price in the west end and 1½d. higher in the east end of London. It is no use to say that people must have bread, the awful fact is that when times are hard, as they have been all this winter in Britain, an advance in the price of bread means a direct and very noticeable decrease in consumption. The outlook for better times in Britain is not brilliant at the present moment. All these things affect more or less directly the wheat market in Winnipeg.

An Early Spring Expected.

With St. Patrick's day behind them, westerners are talking spring. The weather has been mild and very bright and though throughout the country there is a good blanket of snow, in the cities it has almost disappeared. There seems to be a general feeling that spring will be early this year and implement houses declare they are already beginning to feel the pressure of spring trade. Seed houses report the same condition.

The building trade has certainly felt spring, as within the past week a very large number of excavations for business and residential blocks have been started and are being pushed vigorously. Wherever steal frame work is in course of construction it is being rushed.

Emigrant trains are arriving two and three times a week and the class of settlers coming in is of an unusually high order. The rush of emigration promises to be large this season and immigration officials are making every preparation to handle the rush. The opening of so large a number of homesteads in the Province of Manitoba has concentrated attention more on the older province than has been the case for some years.

The various committees appointed to inquire into the feasibility of a Selkirk Centennial reported to a general meeting the other day and these reports were so favorable that it was unanimously decided to go ahead with the project as fast and as energetically as possible.

Cattle Moving Slowly.

The cattle market is very dull here just at present and there is little coming forward beside some rather indifferent butchers' stuff. Last year at this time quite a few range cattle were moving but so far there is nothing doing this spring. This is probably due to the fact that range cattle were more closely cleaned up last fall than was the case in the fall of 1907 and therefore a new supply will not be available until later in the season.

Dealers in coarse grains, bran and hay report a rapidly increasing trade and an excellent inquiry looking to business later in the season. The projected railway construction is largely responsible for this. Contractors are already getting their outfits under way and the moment the snow is off the ground work will commence in many districts. In some districts in Alberta work has already commenced.—H.

Winnipeg Hardware Markets.

Although trade is quite brisk no change can be quoted in prices. It is rumored that the manufacturers are about to advance the price in a few lines. Iron pipe is unchanged but it will be lowered immediately on the opening of navigation. Builders' supplies are in large demand, locally, as well as throughout the West generally.

Price Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.90 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base; plain galvanized, wire, 6, 7, and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

POULTRY NETTING—57½ per cent.

HORSESHOES — "MRM" and "Bell" iron, No. 0 to No. 1, $4.50; No. 2 and larger, $4.25; snowshoes, No. 0 to No. 1, $4.75; No. 2 and larger, $4.50; steel, No. 0 to No. 1, $4.85; No. 2 and larger, $4.60; featherweight, $6.

HORSENAILS—"MRM," cold process—No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

WIRE NAILS—$2.70 Winnipeg, and $2.25 Fort William.

CUT NAILS—Now $2.90 per keg base.

PRESSED SPIKES—½x5 and 6, $4.60; 5-6x5, 6 and 7 $4.25, ⅝x6, 7 and 8, $4.10, 7-16x7 and 9, $4.00, ½ x 8, 9 10 and 12, $3.90, ⅝x10 and 12, $3.75. All other lengths, 25c extra, net.

SCREWS—Flat head, iron, 80, 10, 10, and 10 per cent.; brass, 75 per cent.; round head, iron, 80 per cent; brass, 70 per cent.; coach, 67½ per cent.

WESTERN CANADA GOSSIP.

The Presholdt Lumber & Hardware Co., Hanley, Sask., have sold their hardware stock to the Rollefson Bros.

The estate of P. E. Tufts, hardware merchant, Fairfax, Man., are advertising the stock for sale by auction.

The B. R. Hamilton Hardware Co.,

CHARLES T. PEARCE, WINNIPEG,

Who has just been transferred from Toronto to Winnipeg by the Pease Foundry Co.

Neepawa, Man., has sold its building and premises to J. P. Shannon, lately of Carnduff, Sask., who takes possession on April 1. The purchaser is a man of wide experience in the hardware trade, young in years, and with ample capital to carry on a large business.

THE BARBED WIRE FENCE.

The luckiest invention in history that of barbed wire, came about by accident. Isaac L. Ellwood, the inventor, in his youth lived in De Kalb, Ill., and having a neighbor whose pigs trepassed on his garden, he put up one day a wire fence of his own make. The fence had barbs and points on it; it was queer and ugly, but it kept out the pigs. It was a real barbed wire fence, the first in the world, and there was millions of money in it, but young Ellwood and his friends laughed at its freak appearance.

One day two strangers saw this fence, perceived how well it kept out the pigs, realized how cheap it was, realized, in a word, its value, and ordered several tons of it from Ellwood. Furthermore, they contracted to sell for a term of years all the barbed wire he could produce. Ellwood borrowed $1,000 and set up a little factory. A few years later on he had paid back that loan, and was worth a small matter of $15,000,000 besides.

R. J. Turner & Sons, hardware and crockery merchants, Truro, N.S., are succeeded by Turner & Co.

Another Big Force Behind
The Sherwin-Williams Agency

PERHAPS you have noticed advertisements in some of the newspapers similar in general appearance to this one. This is an *additional* help we are giving our agents to move the goods. Commencing early in March we started a campaign of newspaper advertising in 180 newspapers in all parts of Canada. It will continue throughout the Spring painting season. It will also be started again in time to influence the fall paint buyer. Most of the papers are of local circulation; some are national. Together they cover the *entire* Dominion, and will be a tremendous force in sending paint buyers to your store for Sherwin-Williams products.

Be sure to have a good stock of

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Development.

J. G. Stormes will erect a carriage factory at Shedden, Ont.

John McKinnon has started a woodworking business in Wapella.

Maguire & Sutherland have started a saw mill at Duck Mountain, Sask.

H. A. Metler, St. Catharines, proposes to establish a basket and box factory at Beamsville.

The Enterprise Foundry Co., Sackville, N. B., has rebuilt and reopened its plant burned some time ago.

The North American Bent Chair Company are making extensive additions to their buildings at Owen Sound.

Hart & Carlaw, who recently took over the old Scott planing mill at Galt, are equipping it with modern machinery.

The Toronto and Belleville Rolling Mills Co., Belleville, report things booming. Three mills are now running and over 200 men are employed.

The Atwood Cement Mills were sold recently to James Pearson, Toronto, who is overhauling the plant preparatory to reopening it in a short time.

A wealthy syndicate, whose personnel has not yet been divulged, plans to build large sawmills at Esquimalt Harbor, B.C., at an expenditure of over $300,000.

The Building, Lumber & Supply Co., composed of well known Orillia men, will put up a large factory at Welland. The factory and yards will cover four acres.

Detroit capitalists are said to be about to establish automobile works at Sarnia this year, and possibly will locate there if a rumor from that port is correct.

The Canadian Fairbanks Co., Sherbrooke, are running their factory full time. They are unable to meet demands, and may have to enlarge in the spring.

The Tomiko Mills, have been incorporated to operate a sawmill on the Temiskaming & Northern Ontario Railway. G. B. Ferguson, of Renfrew, Ont., is president.

The Victoria Machinery Depot, Victoria, are enlarging the marine works damaged by fire some time ago. New boiler shops are being erected and an up-to-date plant installed.

Taylor & Taylor, Brantford, are preparing plans for an addition to the factory of Gould, Shapley and Muir, that city, and for the proposed new factory for Harold Sanderson, at Paris, Ont.

Work has been proceeding on the Selkirk, Man., Match Company's factory rapidly lately, and the building is now nearly completed. Matches will be made from poplar wood, and the company are buying up large quantities of it now for their summer operations.

Municipal Undertakings.

London's proposed waterworks extensions will cost $50,000.

The ratepayers of Claresholm, Alta., will be asked to vote a sum of $70,000 for a waterworks system and electric light plant.

Tenders will be received until April 7 by the Secretary-Treasurer of Weyburn, Sask., for sections of the proposed system of waterworks.

The Yorkton, Sask., council have adopted the report of the water and sewerage committee in favor of extending the system at an estimated cost of $50,000.

Application will be made to the Ontario provincial parliament to authorize the Etobicoke Township council to install a sewerage disposal plant for sanitary sewer and drainage purposes.

Tenders for Victoria's supply of 6-inch valves were as follows: W. S. Fraser & Co., $11.50 each; E. G. Prior & Co., $13.50; Crane Co., $15.00. The contract was awarded to Fraser & Co.

Tenders for the supply of cement to Victoria were as follows: R. P. Rithet & Co. $2.51½ per barrel; Robert Ward & Co., $2.65 per barrel; Bostock & Co., $2.51¼ per barrel. The contract was awarded to R. Rithet & Co.

It is estimated that $53,840 will be required by the Hamilton Waterworks Department for improvements, which include $25,975 for the beach pumphouse, $67,000 will be required for water works construction, this amount including $35,000 for extension of mains and $20,000 for new services.

The following contracts have been awarded for waterworks supplies for 1909 at Ottawa: Hydrants and valves, Thomas Lawson & Sons, Ottawa, $2,644; cast iron pipe, T. Sidney Kirby & Co., $15,065.10; lead pipe, McKinley & Northwood, $1,306.77; brass goods, James Robertson, Montreal, $987.95.

The St. Thomas City Council has decided to petition the Legislature for power to go into municipal heating by steam or hot water. The intention is to utilize the present light and power plant, which will not be used after Niagara power comes, to run this system of heating to the city schools, private buildings and residences. At present the City Hall and library are heated by exhaust steam from the works.

Winnipeg's city engineer has presented to the Board of Control his report on cost of constructing sewers. Combined intercepting sewers from Colony and Assiniboine Avenues to Red River north of city, including Cornish Street system, $1,225,000, or storm sewers in same section for dry weather flow only, $400,000. For combined intercepting sewers from Assiniboine River at Clifton Street to Red River north of city, including capacity of that portion of Ward 1, west of Cambridge Street, $3,077,080; sanitary sewers for same section for dry weather flow, $750,000.

Public Buildings.

A new public school is proposed for Windsor.

Flesherton, Ont., ratepayers propose to erect a high school.

The Owen Sound town hall will be remodelled and extended at a cost of nearly $12,000.

The contract for the Fort Erie, Ont., new public school has been awarded to Edgar Burgar.

Fernie, B.C., city council decided to call for tenders for the erection of the municipal building.

A stone school house costing $2,400 will be built in the village of Chamberlain, Sask., this spring.

The erection of a new drill hall at St. John is now assured. A site will be acquired this season.

The Kenora, Ont., town council is negotiating for the construction of a court house in that town.

F. T. Burgess will erect a moving picture and vaudeville theatre at Toronto at a cost of about $20,000.

City Architect Nutter, of London, is busy at work on the plans for the additions to the Wortley road school.

The St. Thomas Board of Education is asking for $3,218 for repairs to various school buildings during the current year.

The Winnipeg Horse Show Association has had plans prepared for a large amphitheatre to be erected in the near future.

W. E. Doran, Montreal, has awarded to C. E. Teakin the contract for the erection of the United States immigration offices.

Leslie & McNeil, St. Mary's, Ont., have been awarded the general contract for the erection of the new post office at Leamington.

It is reported that $250,000 has been bequeathed with which to erect a building at Toronto to be known as the Burns Memorial.

Tenders are invited by C. M. Borter, Niagara Falls, Ont., for the construction of a four roomed brick school building at Stanford, Ont.

The congregation of St. Matthias have decided to proceed with the construction of a new church at Westmount, Que., at a cost of $25,000.

Chas. Pasternack and Simon Rabinovitch will remodel, for theatre purposes, at a cost of $15,000, the old Agnes Street Methodist church, Toronto.

Mayor Robinson, of Kamloops, B.C., has presented to the City Council a scheme for the erection of a new city hall and the carrying out of other public works at a total cost of $100,000.

Andrew Carnegie has agreed to donate to the village of Milverton the sum of $7,000 for the erection of a public library building, with music hall, providing the village will supply a suitable site.

General Building.

The Y.M.C.A. will erect a $40,000 building at Moose Jaw.

The Saskatoon Club will erect a $10,000 building some time this year.

H. N. Smith will erect at Toronto a row of dwellings to cost $30,000.

Angelo Calori is erecting a new $125,000 hotel building at Vancouver.

G. E. Case will erect four detached dwellings at Toronto, to cost $12,000.

Moore & Henry will erect a terrace of four residences at London for Arthur McClary.

The erection of a big apartment building will be started at Saskatoon at an early date.

T. Baker, Prince Albert, has purchased property on which he will erect a large business block.

Eighteen Shatford, M.P.P., plans within a year to erect a four-storey business block at Victoria.

Truss Bridge Bicycle

STRUCTURALLY AND MECHANICALLY CORRECT IN EVERY DETAIL

¶ The value of the truss as a factor for strength and rigidity is exemplified by its employment in bridge construction. The truss is generally regarded as the most scientific means of supporting weight between piers, having the peculiar property of stiffening under pressure.

¶ The truss in the frame of the Iver Johnson gives an added strength and rigidity that makes a stronger and an easier riding bicycle. Other superior features of the

Iver Johnson Truss Bridge Bicycle

are the Iver Johnson solid forged fork-crown, of which we have not known one to break in the years that we have used it, and the Iver Johnson two-piece crank-hanger which is at once the strongest and simplest ever used on a bicycle.

¶ These combined features make this bicycle the best selling on the market; an Iver Johnson sold remains sold,—is proof against "come-backs;" and is the best advertisement you could have.

¶ The prices are no higher than those of poorer makes: but a bigger profit is ready for the man who sells them.

Manitoba Steel Plate Furnace

We want a good hardware man in every town to handle our furnace. It will burn Souris and other soft coals mined in the West, and it will burn them economically. It is the furnace Western people have been looking for. If you are from Missouri, so much the better. Ask us and we will show you.

The consumer saves 25 to 40 per cent. on fuel when he uses the Manitoba.

The Brandon Machine Works Co., Limited

Brandon, Manitoba

A site is being selected for the erection of a new hall for the Knights of Columbus at Winnipeg.

Thomas Smith has taken out a permit for a building to be erected at Ottawa at a cost of $12,000.

J. Perrault, Montreal, has prepared plans for eight two-storey dwellings to be erected there for J. M. Derion. Estimated cost of buildings $18,000.

The National Finance Company has taken out a permit for the erection of a business block at Vancouver at a cost of $30,000.

The I.O.O.F. Hall Association have purchased property at Toronto on which they will erect a new lodge building, to cost at least $60,000.

The Fathers of the Holy Ghost, who conduct an agricultural college on the old Alonzo Wright property, near Hull, purpose enlarging their institution.

Plans are being prepared for three business blocks to be erected in the vicinity of the city hall, Prince Albert, for D. Agnew, Andrew Holmes and G. W. Baker.

It is understood that Stopes & Fuerstman, Saranac Lake, N.Y., are preparing plans for the erection of two sanitariums, one at St. Agatha, and the other at Quebec.

Preparations have begun for the building of about 40 semi-detached brick houses at Carlton, near Toronto. The cost of the undertaking will exceed about $50,000.

An eight-storey apartment house is to be built at Ottawa. It is said that Hon. William Pugsley, Minister of Public Works, and several Montreal capitalists are behind the venture.

The contract for the erection of the head office of the Royal Bank of Canada at Winnipeg, will be awarded shortly and the work of construction commenced as soon as weather permits.

Jos. Sawyer, Montreal, has prepared plans for a three-storey building to be erected there for F. Harel. It will have electric lighting, open plumbing, hot water heating and metal ceilings. Cost of building, $55,000.

The erection of a large brick and concrete addition to George Sparling's block, at Saskatoon, will shortly be commenced, while a large central site has been purchased by the A. Carruthers Company, who will build in the near future.

E. LeRoy Wills announces the formation of a syndicate of prominent Montreal and Sydney capitalists, with capital of $150,000 for the purpose of enlarging and reorganizing the Sydney, C. B., hotel. Salt water baths will be installed.

New Companies.

The Marceline Company of Ontario, Toronto; capital, $3,000 to deal in metals and machinery. Incorporators, Marcel Wormser, New York; and B. Frank and M. L. Lowenthal, Buffalo.

The Unicell Bell and Signal Co., Montreal; capital, $49,000; to make electric bells, annunciators, batteries, etc. Incorporators, R. T. Heneker, A. H. Duff and W. S. Johnson, Montreal.

Mace Mfg. Co., Montreal; capital, $20,000; to manufacture ice cream freezers and novelties. Incorporators, A. H. Mace, R. T. Heneker and A. H. Duff, Montreal.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Booklets on Heating.—The Jas. Smart Manufacturing Co., Brockville, Ont., have recently issued very attractive booklets describing in detail the construction and operation of the Kelsey Warm Air Generator for home, church and school heating, also giving a few opinions of the users. The manufacturers state that 35,000 of these heaters have been sold since 1889, and principally to home users who have investigated, and that over 7,000 have been placed in churches, schools and public buildings. The claims for the efficiency, healthfulness and economy of the Kelsay Warm Air Generator are based on the following: (1) Its superior construction with zig-zag heat tubes or sections; (2) The great heating surfaces of these tubes and their weight; (3) The method of warming large volumes of fresh air by passing in separate currents through these heat tubes; (4) The even, positive circulation of the warm-air currents which may be controlled and forced to distant and exposed rooms; (5) Most economical use of fuel, because all the heat is utilized with the minimum loss of same in the cellar or up the chimney; (6) Ease of management, low repair expense, and actual results secured during the seventeen years it has been in use.

Artistic Calendar.—The calendar just issued by Allis-Chalmers-Bullock, Limited, Montreal, is strongly Canadian in its predominating features. The picture which occupies the upper part is entitled "The First Engineers" and is a most appropriate title for the calendar issued by Allis-Chalmers-Bullock. It shows a family of beavers at work damming a stream, and is a reproduction of a painting by Arthur H. Hider, a Canadian artist. It is in natural colors and will be quite an attraction to any office in which it is hung. The calendar is for twelve months, dating from March, 1909.

Heating Features for 1909.—The Percival Plow & Stove Company, Merrickville, Ont., have issued announcements of the new features in their heating goods, including a new gas attachment for their "Colonial" and "Colonial Prize" ranges. The "Imperial Oak" base burner is another new line this year, it being made both as a single and double heater and is very powerful. A description of their full line of wood cooks and box stoves in all sizes and styles is also available to readers who send for the company's reading matter.

Rifle Price List.—Finding that their plan of supplying Canadian retailers through the jobbers with Marlin arms at definite net figures, has met with the approval of the Canadian trade, the Marlin Company is sending out revised, up-to-date Canada dealers special net price list, giving net cost prices on all standard Marlin arms, f.o.b. jobbing points. The Marlin Company has discontinued Models 17, 18 and 21 and added the following new goods: Model 25, 22 calibre repeater, using 22 short or 22 C.B. caps; new Marlin trap gun,, 12 gauge, take-down, straight grip; the new Model 26 Marlin repeating shotgun, 12 gauge, non-take-down, straight grip. The great advantage of this net price list is that a retailer can tell instantly his cost of any standard Marlin rifle or shotgun, and can quote instantly without delay of writing for a special quotation.

Shovels, Spades, Scoops.—The Canadian Shovel & Tool Co., Hamilton, have just issued and are sending to the trade their new catalogue of shovels, spades and scoops. This company are manufacturers of the "Skelton" patent solid neck socket shovel, made from one piece of bar steel without weld, and they also make the "split D" handle for shovels. The various shovel lines made by them are rehandled at cost if they are returned. The catalogue has a novel index at the back, which in a line gives a description of the article named.

Practical Farm Buildings.—Under the above title F. W. Bird & Son, East Walpole, Mass., and Hamilton, Ont., have published a booklet of plans and suggestions, edited by A. F. Hunter. A very complete chapter is that devoted to poultry houses which treats its subject matter in all its phases and, besides, being of special value to hardwaremen handling the articles named therein, is interesting from an ordinary reader's point of view and really necessary to the poultry fancier. Barns and stables are treated in another chapter, and cattle sheds and pig pens are also dealt with. Paroid roofing and Neponset red rope roofing are touched upon and the various other lines made by Bird & Son are enumerated. The booklet is very fully illustrated and hardwaremen will find it worth writing for.

Useful Book Free.—"Aid to Shippers," is the title of a 72-page book containing a quantity of information of value to all engaged in the export or import trade. The book is issued by Oelrichs & Co., of New York, for more than forty years the American representatives of the North German Lloyd Steamship Company, who by reason of long experience are qualified to advise. The table of foreign moneys with United States equivalents, together with weights, measurements, tariffs, customs requirements, etc., etc., will be found of great value. "Aids to Shippers" will be send, postpaid, on request to Oelrichs & Co., Forwarding Department, 5 Greenwich St., New York.

The Princess Hotel Co. has been incorporated and will erect a 16-storey modern hotel at Winnipeg.

News of the Paint Trade

THE SPRING CAMPAIGN.

Having decided upon his scheme of general advertising, the paint dealer in preparing for the spring campaign, should set himself out to consider his window displays. Here we have something that necessitates practically no outlay of money, only time, thought and attention, and yet it is one of the most effective means of advertising that a store can command. But there must be plenty of time, thought and attention if the merchant wishes to get the most value out of the window.

Effective displays are not a matter of placing a few tins of paint in a window, and letting them stay there. To focus the eye of the street as it were; to hypnotise the hurrying passer-by, and make him think of paint when the previous moment his thoughts were fixed on something totally differnt, needs much more than a careless grouping of paint tins once in awhile. The window must be made to radiate paint, and that can only be done by careful and artistic display.

But the merchant having arrived at such a window design must not be content with that, and allow its effects to fade away by reason of being continued too long. Monotony in a window is as bad as having no window at all. Follow one effective design by another. Keep knocking. It may not be necessary to change the whole construction of the design, but alter it in some way that the effect of the first window is not lost but is felt all the way through. Keep up the interest.

Luckily, the merchant has plenty of material upon which to work. Paint tins with their effective decorative labels lend themselves to a number of effective designs, while over and above this, the dealer has the co-operation of the manufacturer—a co-operation which does not exist to the same extent in any other line. Window trims, color cards, hangers, posters, and everything that the ingenuity of man can suggest and money buy, is at the command of the dealer. The manufacturer spares no expenses to help him, and there is no doubt that by the exercise of care and attention, the dealer can run a series of windows that will be equally attractive, and yet different in design.

But to do this it is necessary that the merchant should give a considerable amount of attention to the subject. He should think over and prepare his windows in advance, and not wait until the morning of the first spring day to work out his design. If the merchant gives his ingenuity full play he can readily evolve some designs that will radiate paint through the street, and advise the public that not only is the merchant a progressive man, but he means to see that the district is properly painted for once, and that he is the man for the material, The merchant, therefore, should start to figure out his window displays at once. It is the man who plans ahead who gets the best value out of the work.

W. J. Savage, Kingston, has the painting contract for the new observatory at Queen's University, that city.

White Lead

Few articles have such a reputation for honesty as "Tiger" Brand White Lead.

It has grown to be a household word among painters where an article is required tnat gives universal satisfaction.

"Tiger" Lead is made from strictly pure White Lead and pure Linseed Oil, containing no adulteration whatever.

Every package bears the yellow guarantee label of the White Lead Association of Canada.

The Montreal Rolling Mills Co.

Paint and Oil Markets

MONTREAL.

March 26.—General trade seems to be going off with a swing, and shipments have been encouraging to all parts of the Dominion. Orders are of a heavier character, and dealers seem to be getting ready for a good spring demand. Prices have been very steady for some time, and except for a sagging in Paris green, which is yielding somewhat to pressure to make sales in some quarters, the markets are firm. Ready-mixed paints are showin great improvement, and shipping in all size tins is becoming heavy.

TURPENTINE—The spring crop is now moving, and coming into contact with ample stocks which have been carried for some time, the situation is none too strong. Turpentine "farmers," however, do not care to recede from present-day quotations. We continue to quote 58c for single barrels, net 30 days.

LINSEED OIL—With more seasonable weather linseed oil is showing greater activity. Buyers are not displaying such a cautious spirit, and the outlook is much better. There is no change in quotations: Raw, 1 to 4 barrels, 59c; 5 to 9 barrels, 58c; boiled, 1 to 4 barrels, 62c; 5 to 9 barrels, 61c; Strictly net, 30 days.

GROUND WHITE LEAD—The improvement noted for the last two weeks continues, and a most satisfactory business has developed. Prices are unchanged, and we quote: Strictly pure, $5.50 to $6, according to brand, and No. 1, $5 to $5.50 f.o.b. Montreal.

RED LEAD—Stocks are very much depleted, and to keep up with the demand now being experienced, good shipments are arriving via Halifax and St. John to fill up stocks before the Montreal shipping opens. We quote: Genuine red lead in casks $4.50; in 100-lb. kegs, $5; in less quantities, at $6 per 100 lbs.; No. 1 red lead, casks, $4; kegs, $4.50, and smaller quantities, $5.50.

LIQUID PAINTS—A healthy improvement is noticed on all sides in liquid paints, not only for small tins, such as half-pints and pints, but in one-gallon and five-gallon packages. Dealers are evidently preparing for a good spring demand.

VARNISHES—Strong trade is now in evidence for shellacs, both orange and white. Household, furniture, and carriage varnishes are reported as being in good demand at steady figures.

PARIS GREEN—No change is being made in published prices, but the market is none too strong, and we hear of orders for good round lots being shaded in price.

WHITE ZINC—The call is light, but prices are unchanged, and we quote: Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5¾c.

PUTTY—This line has resumed activity. All general orders seem to include a fair amount of putty, and good trade is opening up. There is no change in prices, and we quote: Standard putty, 880 lbs., in casks, $1.65; in 100-lb. drums, $1.90; bladder putty, 400 lbs. in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb. drums, $2; 25-lb. tins, $2.05; 12½-lb. tins, $2.25 f.o.b. Montreal.

TORONTO.

March 26.—Quietly steady about covers the paint situation this week. There is an improvement noted over last week, but it is very slight. What is wanted is a week of continuous sunshine to make the market have vim. Spring orders continue good, but they are scattered.

Leads, varnishes and putties are in good demand just now, showing the transition from winter to spring lines, although all paint goods are asked for in bookings.

Paris green in most cases is booked for May delivery, but it looks as if delivery a month earlier would pay hardwaremen better, especially since the Government bulletin was issued calling attention to the fact that April spraying of fruit trees would do more good than in May or later on in the warmer weather. Irregular prices prevail. They could hardly be called cut prices, for as a rule hardwaremen placed their orders for this year's green some weeks ago, and the present demand is rather light.

LINSEED OIL—The market price remains stationary, but with the fine weather the local demand has increased and if it continues business in this line is sure to improve. At this season of the year occasionally prices are broken by low quotations in Great Britain, but at the present there is no indication of this happening. The Glasgow Herald, a Scottish paper usually well informed in these matters, says, that the linseed oil market is in a healthy condition; that the prices which in 1905 were £7 per ton for oil lower than they are at the present time was occasioned by an overwhelmed supply of seed from the River Plate country, but this year all the supplies from the Argentine have been well absorbed; that consumers of oil for some time past have purchased only for their immediate requirements and that prices for the future are now at a slight premium; that there is no large quantity of seed expected this season now from the River Plate, neither is there any indication of an extra supply from India, and the cost of linseed oil for cargoes to arrive in Toronto now, all cash, would be about the same as the jobbers here are selling 5-barrels at. 59c and 62 cents are the prices for single

Let Us Set Him To Thinking.

All that some people need to influence them to action is something to make them think. Lots of people could be secured as your customers if they were reminded in a tactful way that their premises could be improved by the application of the painter's brush.

Have you ever taken notice, Mr. Dealer, of how many buildings in your territory really need painting and the owners of these places seem to be utterly oblivious of the fact? We have a plan for arousing interest on this subject in the minds of the people who would make good customers.

This plan of co-operation has proved a success with Martin-Senour paint dealers, and we would like to co-operate with you in the same way for the advancement of your paint trade. We'll do it if you will get in touch with us. What do you say? Send us your name and address on a postal and let us talk it over.

The MARTIN-SENOUR CO., LTD.

Pioneers of Pure Paint

MONTREAL **CHICAGO**

The Winnipeg Paint & Glass Co., Ltd., Winnipeg

The Maritime Paint & Varnish Co., Ltd. Halifax, N. S.

barrels of raw and boiled oil, respectively; 5-barrel lots are 58c and 61c.

TURPENTINE—In regard to turps the price has been unchanged at Savannah for the past ten days with very small quantities arriving. It looks, therefore, as if some advance might take place. The only thing that is likely to prevent this is in the case of parties who are making turpentine from old timber being able to persuade the consumers that it is as good as turpentine made from live trees. Single barrels are at 58c; two to four barrel lots 57c; and 5-gallon lots, 63c.

WHITE LEAD—Whether or not it is true that some cutting was done recently there is certainly a decided brightening up of orders in the lead lines. Market quotations are held at the prices prevailing since the opening of the year: No. 1 is $5.40 to $5,65; pure white, from $5.80 to $6, and a superior line is offered at $6.25. Genuine red lead is quoted at $4.50 for casks and $4.75 to $4.80 in 100 lbs. Good business is being done.

PARIS GREEN—Irregular prices are being quoted, but the great bulk of this season's orders have already been booked. Jobbers are asking that customers take their supplies earlier than May. 25-lb. drums are 21¾c, and barrels are 20½c.

STAINS AND VARNISHES — Beginning to move more freely are these two lines. The coming of the summer season has prompted hardwaremen to include varnishes in their orders. These orders call for delivery next month. Prices are grming up, though unchanged from the figures of the past few weeks.

GLASS AND PUTTY—Putty is getting quite active, though glass continues quiet. Some little putty is going out now, though the bulk is called for in future deliveries. Prices unchanged.

PETROLEUM—Demand is lessening somewhat. Stocks, however, are slow, and dealers are awaiting the finer weather to import and stock up for next season, The past winter was a very good one from the business viewpoint. Prime white is 13½c; water white, 15½c; and Pratt's astral, 17½c.

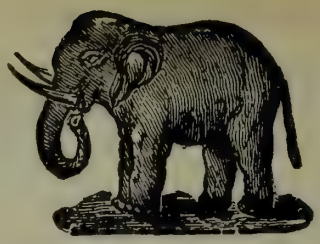
NEW PAINT WORKS AT OTTAWA.

The large new factory at 687 Wellington Street, Ottawa, is now occupied by the Ottawa Paint Works. This new structure is 48 feet by 104 feet, and is a two-storey building with a basement, and thoroughly modern. The basement, which has a solid concrete floor is used for a storeroom for manufactured goods and glass, while on the ground floor are to be found the offices, stock room, sample room, and a portion of the manufacturing plant. The offices and sample room are particularly neat, being finished in mission style. On this main floor, where much of the manufacturing is done, a new lead mill is now being installed, and the company will in future manufacture all its own white lead. Several paint grinders, of the latest make, are operating on this floor constantly, as well as mixers, and other machines. The stock room is systematically arranged. On the second floor stock is stored also, while considerable manufacturing goes on here, too. T. C. Hickman, one of the partners, has charge of the manufacturing side, while J. M. Young, the other partner, looks after the sales and financial end of the business. One feature in connection with the factory is the magnificent light, windows occupying almost as much space as the brick itself.

LINSEED OIL MILLS OPENED.

The Manitoba Linseed Oil Works, located at Winnipeg, began operations at the big $75,000 plant on March 15. The capacity of the enterprise is 2,000 gallons daily, and a staff of a dozen skilled men will be employed. G. T. Mumford, the general manager, says the opening of the plant will consume a large quantity of grain and the product will be shipped as far west as Vancouver, and into the remote north. This is the second linseed oil plant in Winnipeg.

IMPURE PAINT IN TEXAS.



In a bulletin just issued by Dr. G. S. Fraps, chemist of the Texas experiment station, a law regulating the sale of paints in Texas is advocated, and statements of adulteration which has been found are made in the duscussion of the subject.

It is estimated that paint to the value of $3,000,000 is sold in Texas every year. Dr. Fraps says: "Eleven samples of white lead in original packages were collected by us and subjected to analyses. Four samples were found to be of high purity, five contained 75 per cent. or more of barium sulphate, two of these five did not contain any white lead at all and the remaining three did not contain over 5 per cent. The other two white leads, so called, contained about 35 p.c. to 40 per cent. white lead, the remainder of the pigment consisted mostly of zinc oxide and carbonate of lime. Four of the samples of white lead referred to were sold in small packages, but they were sold as white lead and nothing else. The other three were sold in larger packages and undoubtedly represent adulterated white lead which has been sold in quantity for painting purposes. It is evident that while pure white lead can be purchased in this state, there are a number of pigments sold under this name which either are not white lead at all or are highly adulterated.

"Fourteen samples of mixed paints were examined. Four were pure lead and zinc paints. Six samples contained 10 to 15 per cent. carbonate of lime, three contained 36 to 58 per cent. barium sulphate, one contained 15 per cent. carbonate of lime and 15 per cent. clay. Two of these paints contained benzine, an inferior substitute for turpentine. Some appeared to contain linseed oil adulterated with resin oil and one contained linseed oil adulterated with a mineral oil."

Dr. Fraps believes there should be paint laws requiring the exact composition of all paints to be printed on the label, expressed in terms approved by the officer in charge of the law and there should be a penalty for any statement about paint material which is false or misleading.

E. W. Cook, paint and wallpaper dealer, New Westminster, has sold his business.

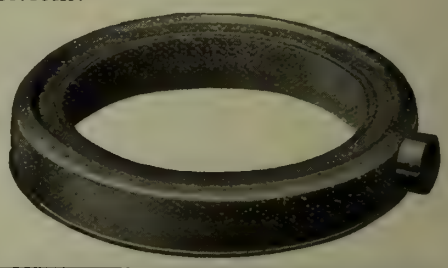
The FOUNTAIN Sprinkler

NOT merely a round box with holes punched in it to let the water out —BUT a perfect Lawn Sprinkler.



NOT merely a group of straight round streams working with mathematical precision—BUT a natural shower of spray.

The Sprinkler with the "MIST LIKE SPRAY."
No other Lawn Sprinkler can produce the beautiful—The perfect results like the "FOUNTAIN."

The name "FOUNTAIN" is plainly marked in raised letters on the bottom of every Genuine, Original FOUNTAIN Sprinkler.

When you think of Lawn Sprinklers — Think FOUNTAIN
When you buy Lawn Sprinklers — Buy FOUNTAIN
And insist on getting the FOUNTAIN
Stick to the Sprinkler you KNOW is right.

Do you want a sample for comparative test.
Post paid to any dealer at the wholesale price.

CURRENT MARKET QUOTATIONS.

March 27, 1909

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

Some Impressive Points

which you may drive home when discussing our lawn mowers are

We engage only skilled men.

We guarantee every machine.

Our castings are machine made.

Al our mowers are self sharpening.

All wheels are three times weight of other machines.

Fully ninety-five per cent. of jobbers carry our mowers.

The pawls are made of flat steel—highly carbonized.

The Taylor-Forbes machine possesses many other merits. Our catalogue will tell you all about them. Write for it.

CARBORUNDUM

Carborundum is admitted to be with the exception of the diamond the hardest substance made and cuts all other abrasives with ease. The crystals are hexagonal in shape and possess a sharpness superior to all other cutting materials.

It is infusible at the highest and insoluble in any of the ordinary solvents.

Carborundum products embrace:—

Crystals
Grains
Powders
Wheels
Cup Wheels
Sharpening
Razor Hones
Combination Stones
Dental Wheels
Axe and Scythe Stones
Oil Stones
Rubbing Stones
Scouring Stones
Slip Stones

In fact in every form in which abrasives can be used it has no equal.

FROTHINGHAM & WORKMAN, Ltd.

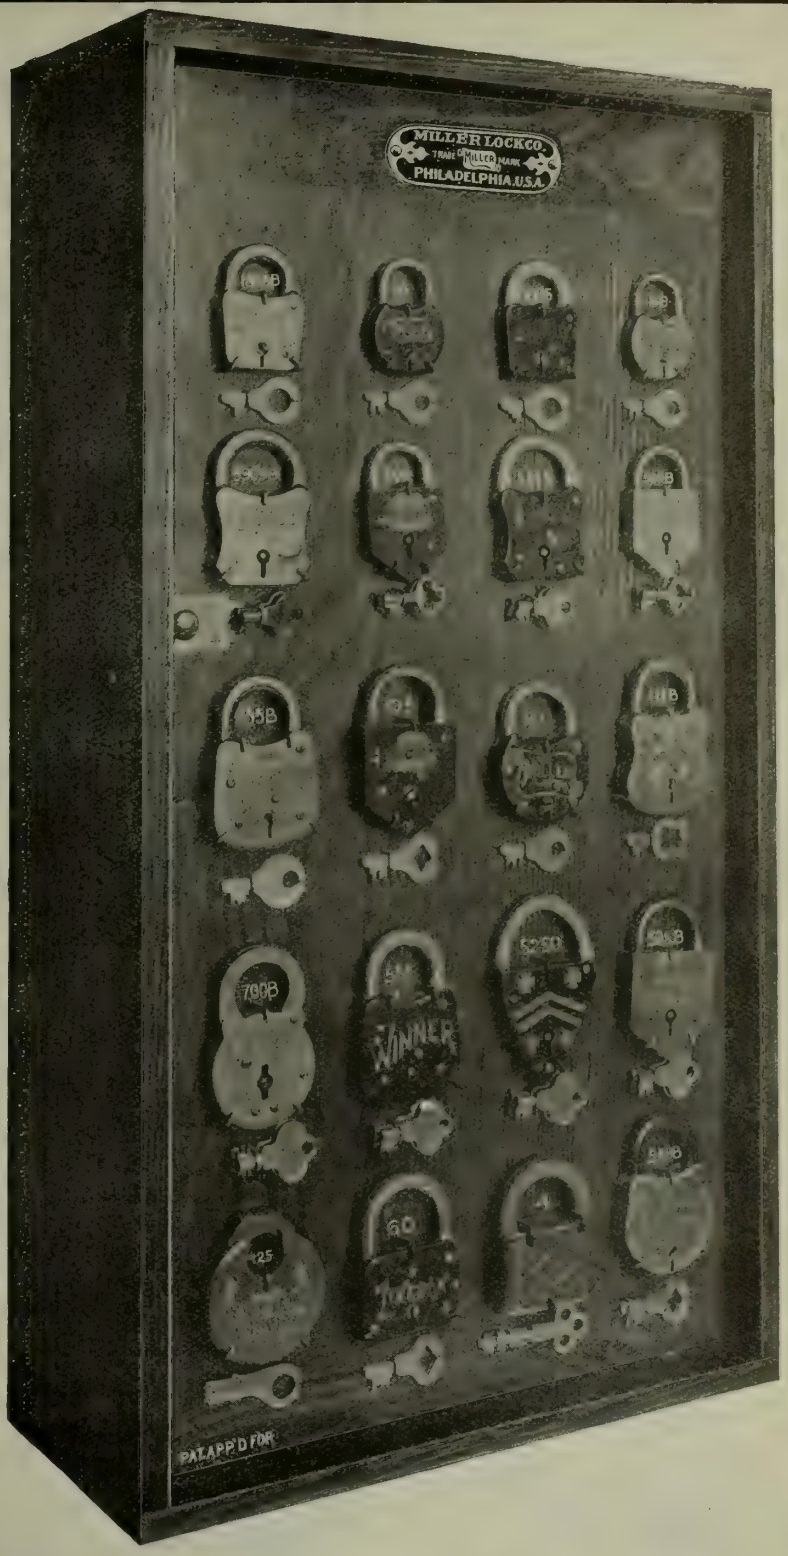
Wholesale Hardware and Iron Merchants

Montreal : : : : : Canada

Here is a Device

that will increase your sales of padlocks.

It is a highly finished hardwood case, 12 x 24 in., and forms both a display board and stock case. The board exhibits 20 well-known "Miller" Padlocks in five rows, all the locks in each row selling at the same price. These prices range from 15 to 75 cents each. Behind the display board the space is large enough to contain the stock of locks.



Two assortments are put up in this way. Each assortment contains the same locks but in different quantities.

No. 1000 assortment contains 12 dozen "Miller" Padlocks.

No. 1001 assortment contains 6 dozen "Miller" Padlocks.

This case will sell padlocks for you. It contains a full line in a compact space, giving you all the variety you require. Try one of these cases. We can fill up the case again whenever any line is sold out.

This case is patented and is the only one of the kind on the market.

Caverhill Learmont & Co

Hardware, Iron and Steel

Head Office and Warehouse, MONTREAL. Warehouse at WINNIPEG, MANITOBA.

Showrooms, TORONTO, 77 York St. OTTAWA, 111 Sparks Street, QUEBEC. FRASERVILLE.

It pays you to Demonstrate

You can make $1.50 profit on each AutoStrop Safety Razor you sell.

No other razor pays you a better profit than this and no other sells so readily in the hands of a capable demonstrator.

Show your customer how the AutoStrop Safety Razor keeps itself constantly sharp, how it removes all his shaving troubles, and he will gladly give you $5.00 for it.

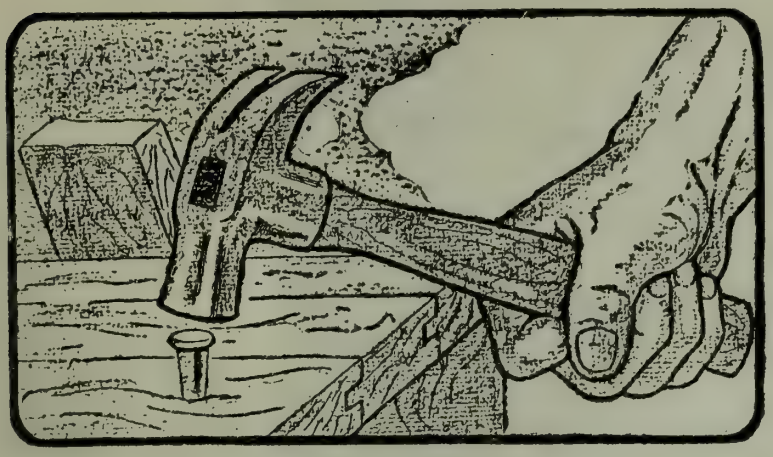
But—bear this in mind: It is no use merely saying to him "The AutoStrop Safety Razor is a good razor. I can recommend it"—or "The AutoStrop is the best on the market."

To interest and convince him, you must demonstrate to him:

1. How it sharpens itself.
2. How it can be cleaned without taking anything apart.
3. How it pays for itself in a year by doing away with the buying of new blades, necessary with all non-stropping razors.

PRICES:

Retail - - -	**$5.00**
Wholesale 3 DOZ. LOTS, - -	**3.50**
SMALLER QUANTITIES, - -	**3.75**



You have opportunities every day of doing this, and a week or two will prove to you that it pays you to demonstrate.

Address your order to your Jobber or to

Long Distance Phone No. 87

Sold throughout the Dominion by all Wholesale and Retail Hardware Merchants.

Every Little Bit Helps!!

Mr. Hardware Man,—Don't you often find that the "little sales" of the day are a big feature in the day's receipts and are often the lever to larger sales?

The Kaiser Wax Pad and Iron Cleaner

is a "little thing"—retails at 10 cent—but it is a household necessity, something entirely new on the market, a quick and big seller, with a good profit.

Every housekeeper dreads ironing day, especially so when she has a lot of shirt-waists, men's shirts, collars, cuffs, etc. to iron, she always wants to obtain a high-grade finish, equal to first-class laundries. She of course asks the dealer for advice—in return he offers her the common wax—She knows it is impossible to do good work with the common wax—So she walks away—one customer lost.

Now where she can procure an article of this merit—that reduces ironing time by half—reduces labor to a minimum—adds to the finish of clothes—and makes ironing a day of pleasure—THERE SHE IS SURE TO DO HER BUYING—AND LEAVE HER ORDER FOR OTHER THINGS.

A post card to any of our Canadian agents or direct will bring a sample of this great little business getter.

Eclipse Roofing

A large factory covered with Eclipse Roofing.

¶ Eclipse Roofing is a high quality, water proof and odorless roofing. It is adapted to all kinds of roofs and will resist the severest weather.

¶ It is made of a composition which renders it tough and durable. It will resist acids and is an excellent protection from fire.

¶ Every dealer should carry a stock in hand. Eclipse Roofing is very popular on account of its good qualities, not the least of which is the ease with which it can be laid.

Why not get your share of the profits to be obtained by the sale of Eclipse Roofing?

Send for samples and descriptive circulars.

Crescent Brand Hinges and Butts

Bright Steel, Japanned, Electro-Plated and Nickel Finishes

Crescent Brand

Registered

Is the other fellow pressing you hard for business ?

Chances are he is doing it with Crescent Brand Hinges and Butts.

Many of the successful fellows have chosen them exclusively—and they are well worth choosing too, being made for the trade that seeks the best, and who are governed by quality.

Can you risk handicapping your business with inferior goods, when the price is not lower ?

If your jobber does not keep them, we will fill your order.

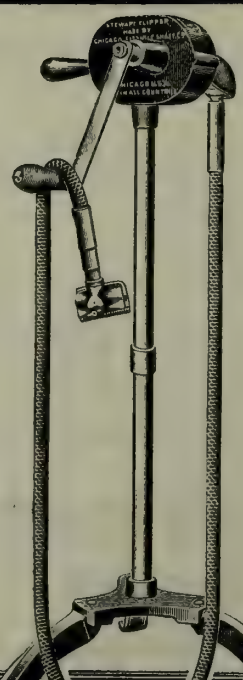
Canada Steel Goods Company, Limited

Hamilton, Ontario

Leave the Money in the Country Wherein You Expect to Make Yours

Here's the Machine

---that competitors are copying



The superiority of our Stewart No. 1 over all clipping machines on earth caused one manufacturer to pilfer the idea. It was a steal—but, without a perfect result. The shape of the "counterfeit" resembles the Stewart; so does some of the mechanism. But the real principle of construction—the process that put the Stewart in the lead—they only guessed at. Don't sell "guesswork" machines. Sell the original machine—the machine that's backed with a **quarter-century guarantee.**

Why the Stewart?

We don't ask "shrewed buyers" to buy our machine because it was made in a certain country. We have more respect for their common sense. We just want horse-owners and dealers to know why the Stewart machine is the **best** machine.

CHICAGO FLEXIBLE SHAFT CO.

Write at once for our big free catalogue

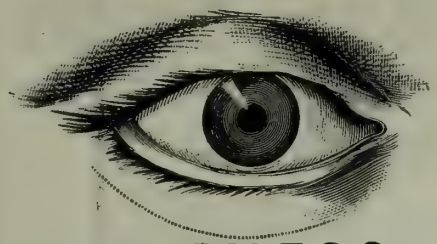
---the Stewart No. 1

Horse Clipping Machine

The Stewart No. 1 has gears made from cut steel, hardened file hard, working parts enclosed in an oil bath and is equipped with plenty of best quality flexible shaft and the world famed Stewart one-nut tension knife.

We help the dealer

We are willing to give individual advertising to dealers who believe in square dealing and who want to sell more horse clipping machines. Write ***at once*** for particulars of our co-operation policy with hardware men.



It's to your interest as well as ours to sell the **Stewart,** because it's to the best interest of the **user** to **own** and operate one.

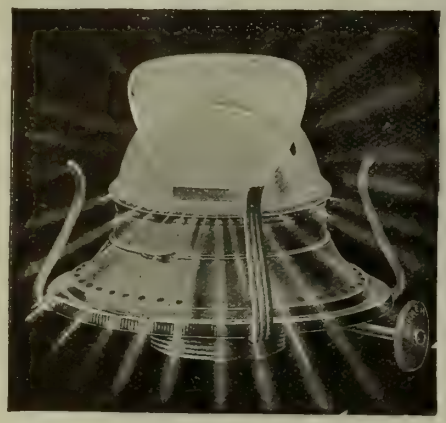
After all is said and done, for and against any household article, the supreme—the final—test of all is its wearing qualities, and this is why the

"PANSY" BROOM SELLS SO EASILY.

It is manufactured out of the best grade of broom corn, is strongly made and of the highest workmanship. It costs only a few cents more than an ordinary broom and will outwear three of them. You have the satisfaction of knowing that you are pushing a superior product and, when you please the housewife in one line, you command her confidence and trade in others as well.



"Buy from the makers."

LOOK OUT!

¶ Live business men should always be on the look-out for new lines which are going to take on, because by not carrying them they lose trade and reputation.

¶ We recommend them, therefore, to be quickly on the trail of our new No. 23 Handsaw, which has already met with great favour, partly because men wanted a straight back to compare in quality with our 87 and 87A, and partly because we have hit on a mighty good thing in our new alloy saw steel.

¶ There's "just a little something" in it which makes the difference your customers will notice.

HAMILTON (22 Calibre) RIFLES

Money Makers

Models 27 and 027

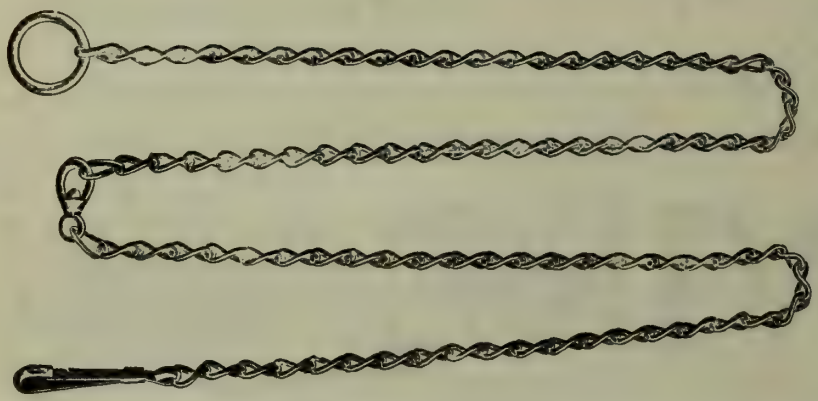
Prices $2.00 and $2.25

We Specialize on Boys' Rifles

We build our rifles under patents exclusively our own and confidently claim to make the best rifle ever built for the money.

MODEL No. 27 is an efficient sporting rifle, with hammer action, of few parts and exceedingly simple, using 22 calibre short or long cartridges. The barrel is bronze, rifled and steel jacketed, finished in blue black gun finish. Breaks down for loading and ejecting shells. Flat stock and forearm of gun of gum wood. A beautiful model, symmetrical and well balanced. Barrel is 16 inches long, length of rifle over all, 30 inches. **Price $2.00.**

MODEL No. 027 is exactly like No. 27, except the stock and forearm, which are of genuine walnut, turned and beautifully finished. **Price $2.25.**



Other models are Nos. 15 at $2.00, 19 at $2.50 and 23 at $3.50, each a winner in its class.

Our continuous advertising in the boys' papers will bring the business to you, as every boy will want one and you should have a stock on hand. **Write for catalogue and net trade prices.**

Refuse all razors without the Tree as Boker's. It is your assurance—your customer's guarantee. For sale by all Leading Wholesale Hardware Houses.

HOUSE CLEANING TIME

Suggests

The Ideal Duster

THIS SUGGESTION is not because the article depends upon any particular season for its uses, nevertheless the approaching cleaning time creates a profound interest in more useful appliances than have been.

THE IDEAL DUSTER

AS { a high reaching duster
an outside Window Washer
a Polished Floor Duster
a Porch and Grill Duster }

has a principle excelled only by the human hand.

It is a MECHANICAL HAND, closing automatically, opened by a wire pulling cord. The user may change wiping cloths with practically the same facility as in hand cleaning—without stooping or climbing. THE HAND AND WRIST SHAPE gives the hand action, to wipe tops of doors, mouldings, etc., and gives 11 square inches like the hand on top the cloth for surface rubbing—WHEREAS ALL MOPS HAVE ONLY A STRAIGHT LINE RUBBING SURFACE.

The wholesale trade will supply you at prices right to enable you to sell with a proper profit at 50 cents for the Duster complete in the two parts, or with a proper a very proper, Dust Cloth at 60 cents.

The consumption of these Dusters in some towns, where introduced the past year, has been enormous and this demand shows no abatement. Retail Price:

1st section, 5 ft., carrying the head, 35c. ***2nd section, 5½ ft. Extension Handle, 15c.***
Ideal Dust Cloths, 10c. ***Sold separate or ensemble.***

Any dealer can obtain this line with the same facility as

The Tarbox Self Wringing Mop and The Tarbox Pillow-Sham Holder

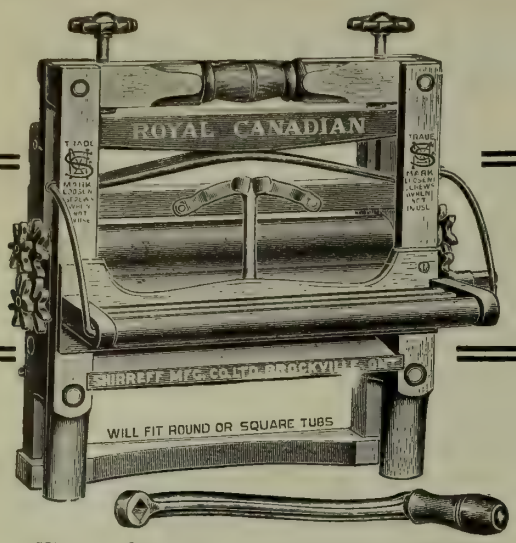
Martin's Store Ladder
Low Down High

For all merchants that carry merchandise on shelves enquire of E. R. CASE, Toronto

A Few Testimonials



Rockford, Ill., May 27, 1908.

Mr. S. B. Martin, Dalton, Ohio,
Dear Sir,—Ladder is very satisfactory—the new track holds up and were we fitting a "string of stores" we should place your ladder in each one of them.
Very truly,
Hunter Hardware Co.

Toronto, Ont., Sept. 28, 1908.

Mr. S. B. Martin, Dalton, O.
Dear Sir,—We are well pleased with the "Low-Down-High" Ladder you installed in our warehouse some weeks ago. We find same works very easily and smoothly and makes the work of filling orders from the shelves a very easy matter compared with the old style of ladders. We will be glad to receive quotations for Ladders for other parts of the Warehouse.
Yours truly, T. Woodbridge & Co.

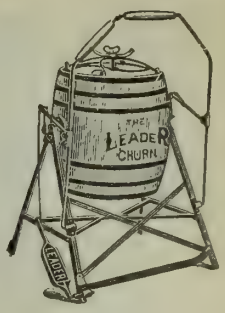
Strong and Permanent

Dillon Hinge Stay Fence



The quality and weight of the wire have much to do with any fence, but not all. What strain will it stand of stock, wind and weather is an important question. The advantage of the HINGE STAY is your strong talking point—a feature possessed by no other fence. A hinge in the stay relieves all tension and stress on the strand wires —a hard fact, common-sense principle. Our catalogue will tell you more, Mr. Dealer.

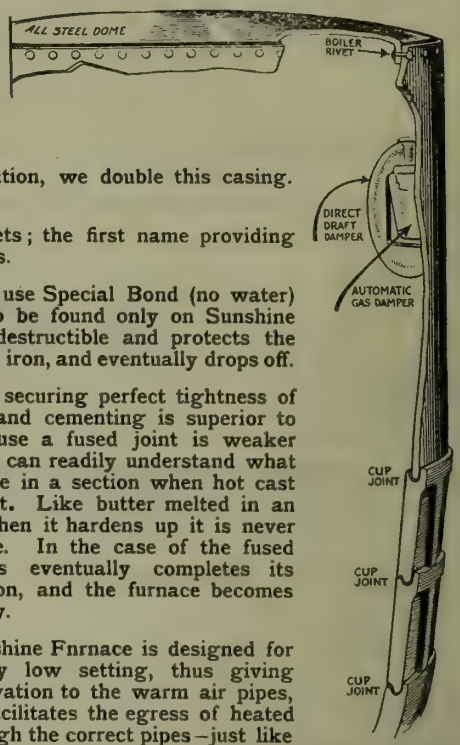
How SUNSHINE Furnace is Made

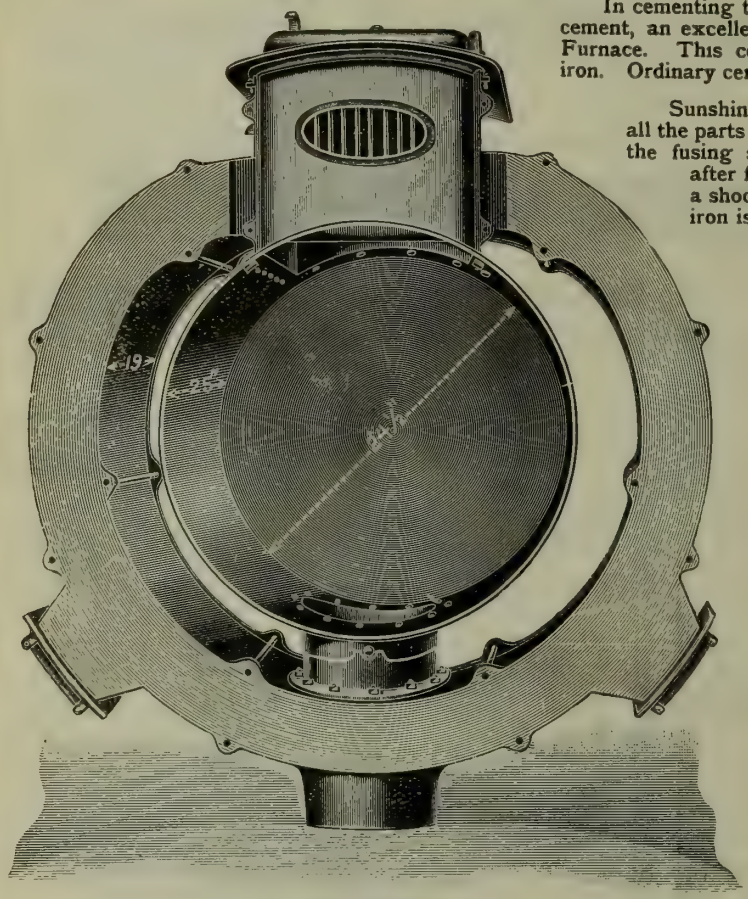


Excellent Materials — Careful Construction

Radiation is the life of a Furnace. As you know, the radiation comes from the dome, and the radiator. As nickelled steel yields maximum radiation and affords maximum self protection we make Sunshine Dome and Radiator of nickelled steel.

Naturally, as the heated air created must have no outlet other than through the registers it is necessary that the outer walls or casing of the furnace be a non-conductor of heat. Otherwise there would be a hot cellar and a cold upstairs.

We make Sunshine Furnace Casings of Galvanized Iron, and, as extra precaution, we double this casing. Some Furnaces only have a single casing.



To make all the joints solid we employ our "Famous" cup joint, and boiler rivets; the first name providing for contraction and expansion, the last name producing gas, smoke and dust tightness.

In cementing the joints we use Special Bond (no water) cement, an excellent feature to be found only on Sunshine Furnace. This cement is indestructible and protects the iron. Ordinary cement eats the iron, and eventually drops off.

Sunshine system of securing perfect tightness of all the parts by bolting and cementing is superior to the fusing system because a fused joint is weaker after fusing. You can readily understand what a shock takes place in a section when hot cast iron is poured on it. Like butter melted in an oven, when it hardens up it is never the same. In the case of the fused joint gas eventually completes its destruction, and the furnace becomes unhealthy.

Sunshine Fnrnace is designed for extremely low setting, thus giving good elevation to the warm air pipes, which facilitates the egress of heated air through the correct pipes—just like a healthy man whose red blood is pumped up and down.

STEEL DOME AND RADIATOR

The above cut represents the Dome and Radiator turned on its side, showing the large air space between the Dome and Radiator, also the position of the Direct Draft, Smoke-collar, Clean-outs and Dust-flue.

Sunshine Furnace has maximum heating capacity so that every unit of strength is extracted from the coal, wood, or coke and fully utilized.

Sunshine Furnace has maximum weight so that as the furnace is set in cement this weight makes it absolutely secure in position.

Sunshine Furnace is designed to be operated at the front for the simplicity and convenience of the householder, as the following illustrates: Coal goes in through the main front door, ash pan comes out the lower front door, water is placed in the pan at the top front door, direct draft is operated near the water pan door, the dust damper near the ash door. Draft in lower front door and check draft in smoke pipe are operated by chains fixed to a shield in the hall or a room above.

Queen City Water White Oil

GIVES PERFECT LIGHT
FOR SALE BY DEALERS EVERYWHERE

This New Pedlar Product Will Sell From The Start

It's a culvert. But it is different from any culvert you know—different and better; and it will sell better in Canada than any other culvert. Every hardwareman ought to stock it, ought to boom it, ought to come right in with us and get the good our big advertising campaign will bring.

It took many a month of hard thinking, many a dollar spent in experimenting, to invent Pedlar Perfect Corrugated Galvanized Culvert. It is not going to take very long to convince every Reeve and Warden in the country that it is the culvert any township can best afford to buy. You can profit by the demand; and I will see that you do profit by it, if you will talk the thing over with me early—now. This Pedlar Culvert is made of best Billet Iron, heavy gauge, shaped and corrugated under a pressure of sixty tons to the square inch. After it is corrugated, it is heavily galvanized all over. It is shipped "knock-down"—nested in half-cylinders—a one horse wagon can haul many hundred lineal feet—keeps freight charges down to a minimum, this nesting feature (possible with no other culvert).

Has triple-rib flange-lock, not corrugated, running along each side—an unskilled man, with a simple tool clamps the sections together in a few minutes.

It is the only culvert that is frost-proof; the only culvert that will stand huge strains without springing or giving. No bolts, no rivets, no tension nuts. It's made in all diameters from eight inches to six feet. It is being, and it will be, widely and largely advertised, and advertised in such a way that the Pedlar representatives will have a long lead over would-be competition for any culvert trade in his locality.

Now, the hardwareman is the natural source of distribution for this Pedlar product. There is a good profit in it for him, easy selling; and protection, in every sense of the word. He doesn't need to carry a great big stock, even. All I ask from him is just the kind of a deal I'll see that he gets. And I will show him, beforehand, that he wants that kind of a deal.

The time to get in on the cream of this culvert trade is NOW. The Pedlar Culvert has a hundred uses—it serves every purpose any wooden pipe, concrete pipe, or smooth steel pipe can serve. It costs less, it will last longer and it will stand more.

What are you going to do about it? I'd suggest that you do this:

Write me to-day, to the head office at Oshawa, and tell me about what prospects you think there are for business in your neighborhood. Then we can get right down to figures.

G. H. Pedlar

The Pedlar People of Oshawa

MAKERS OF HIGH-GRADE SHEET-METAL BUILDING MATERIALS

321-3 Craig St., MONTREAL. W. 423 Sussex St., OTTAWA. 11 Colborne St., TORONTO
86 King St., LONDON. 200 King St. W., CHATHAM.

Send Now For Sample And Booklet

PEDLAR

PERFECT CORRUGATED GALVANIZED CULVERT

For any work any culvert can be put to, nothing else yet made quite equals this new Pedlar product —Pedlar's Perfect Corrugated Galvanized Culverts. Only the Pedlar People in all Canada make a culvert of Best Billet Iron, in semi-cylindrical sections, corrugated under enormous pressure (over 60 tons to the square inch !) and **Galvanized After** being shaped

Most compact and portable culvert made, and the easiest to put in place.

I KNOW it's pretty hard to make some folks believe a new thing is better than what they've been used to—a Pedlar Culvert, for instance, than concrete or wood or whatnot. But I feel pretty sure that you will SEE it is, if you will just look into the question fairly and squarely before you undertake any more culvert construction, or road improvement, or ditching. Don't judge this NEW culvert by anything you've heard about other culverts. MINE IS DIFFERENT—a whole lot different, and a whole lot ahead of any other. Write to my people and make them show you why and how. We're making this in all standard diameters, from 8 inches up to 6 feet, so your wants can probably be supplied. Write and ask questions anyhow.

G. A. Pedlar

This Is The Practical Culvert

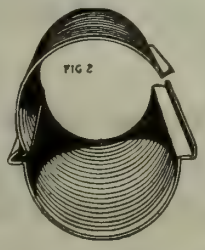
Not only is the iron that makes Pedlar Culverts best quality money can buy, but it is unusually heavy—from 14 to 20 gauge, instead of lighter gauges common to inferior goods. This extra-strength enables a Pedlar Culvert to stand heavy traffic upon roads, even though protected by only a very thin cushion of soil. Mark, also, that this is the ONLY culvert made that is galvanized AFTER being curved and corrugated,—thus insuring it positively against rust and decay.

Not a Bolt Nor a Rivet About It

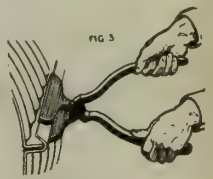
Unskilled Labor Can Easily Lay It

Extra-Heavy, Strong, Rust-Proof

The peculiar Pedlar flange, or locking-rib, along the whole length of each side of these Culverts, clamps together easily and most rigidly. There are no bolts, no rivets, no lock-nuts of any kind,—simply clamp the edges of the flanges together, making a triple thickness of inter-sealed heavy metal along the sides of the pipe (read below here how this is quickly done) and you have a Culvert that is enormously strong, tight, and not only leak-proof but strain and rust and frost-proof, the rib allowing for expansion and contraction.



Made of Best Heavy Billet Iron



Galvanized AFTER Being Shaped

You cannot appreciate the value and the simplicity of this until you have seen the culvert itself. It is the easiest culvert to put together, and it is better when put together. It is the most portable. It costs less per linear foot to ship by freight, and a whole lot less to haul,—it nests, that's why, of course. And it will serve any culvert use better.

When the sections of Pedlar Culvert, of any diameter—it's made from 8 inches to 6 feet—reach you, they are nested like Fig. 1. Note the two distinct flanges—the radial and the recurved. These fit into each other, and are FLAT, while the CURVE of the culvert is corrugated. Place section on top of section, and the flanges, or locking-ribs, engage easily, as you see in Fig. 2. The joints between one length and another are "broken" —no over-lap reaches more than half-way round the culvert's diameter; and this is possible with NO OTHER metal culvert made. It is a most valuable feature, for it reduces the chance of leakage to the very least minimum.

CONGO

NEVER LEAK ROOFING

BACKED BY A 10-YEAR SURETY BOND

We have just arranged with The National Surety Co., a $1,000,000 corporation, to furnish a Surety Bond with every roll of Congo. This bond says that Congo 3 ply Roofing, if directions are followed, will last ten years.

If it should fail during that period you get a new roof absolutely free.

Of course Congo will last the full time and more.

Otherwise the Surety Co. couldn't afford to stand behind it.

The real insurance lies in its durable, lasting qualities. Nevertheless, to give the purchaser confidence, we furnish him absolute protection against loss by including the numbered and recorded Surety Bond with every roll.

No other ready roofing manufacturer dares give such a guarantee.

A Surety Bond like this is as good as gold, and Congo to be sold profitably this way must be "as good as its bond"—and you can be sure it is.

Send for Sample of Congo to-day. You can then see why we are so willing to guarantee it.

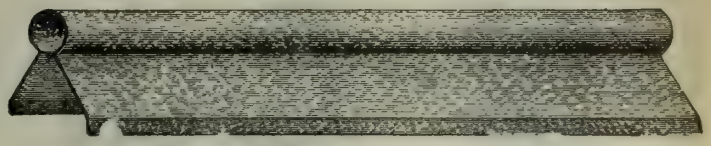
Loyalty
in the roofing business



consists of two things. First: the maker remains true to his promises and does not compete with the dealer, but turns over inquiries to the dealer and assists him in every possible way to do a big business. Second: the dealer remains true to his promises and pushes the sale of the goods for all he is worth. It's this kind of LOYALTY between the makers of Brantford Roofing and their dealer-agents that is making a roofing business which is profitable to both dealer and maker.

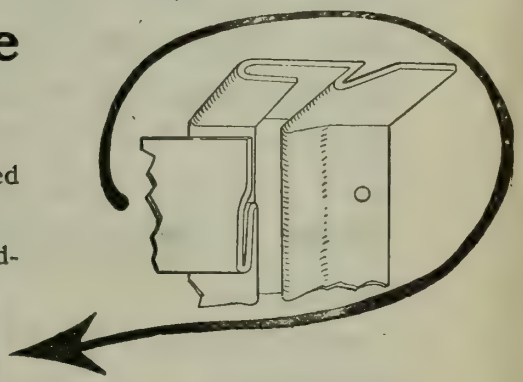
METAL SHINGLE & SIDING Co LTD.
PRESTON & MONTREAL

OUR GOODS ARE CARRIED IN STOCK BY

Emerson & Fisher, Ltd. St. John, N.B.	J. A. Bernard Quebec	G. P. Breckon Toronto
Clare & Brockest Winnipeg	Ellis & Grogan Calgary	Wm. N. O'Neil & Co. Vancouver

Remember! There is only one "Galt" Shingle

Only one shingle with the gale-proof, non-leakable, closed side-lock illustrated here:



Only one shingle with two concealed nailing flanges:

And only one shingle with continuous, over-lapping end-locks formed without cleats or notches.

Just about places the "GALT" SHINGLE in a class by itself, doesn't it? This is the shingle your customers will insist upon and it's the shingle that you must handle if you want to make the most of metal roofing business.

You don't need to carry stock nor handle an account—just ask us for samples to-day and begin now to corner the roofing business in your locality. Will you?

THIS CLOSED SIDE-LOCK is found only in the new "Galt" Shingle. It is folded down by a blow from the hammer after laying and positively prevents wind from driving snow or rain up and out of the side-lock. It is the simplest, quickest, easiest, ONLY way to keep water out at this point.

It is such a real, conspicuous improvement on the old-fashioned metal shingle that it decides a man in favor of the "Galt" on sight.

This is something REAL to show a prospect—he doesn't care whether the manufacturer is twenty years old or a hundred—he wants a water tight roof and in the "Galt" he has one.

HIGH CLASS COLOR WORK; Commercial Stationery, Posters. The Hough Lithographing Co. Limited, Office—No. 3 Jarvis St., Toronto, Telephone, Main 1576. Art, Good Workmanship; Business Methods.

IF INTERESTED in a Duplicating Machine for getting out circular letters, reports, price-lists, etc., or for printing various office forms, write for booklet and samples of work. The "POLYGRAPH" is the newest, latest, and best, and sells for a lower price than the others. Is unexcelled by any similar device on the market. F. W. Tenney, Canadian Sales Agent, 123 Bay Street, Room 116 Stair Building, Toronto, Can. (tf)

IF YOU are looking for a side line to add to your business there is none better than COLUMBIA GRAPHOPHONES. Double Disc Records (which means two records for a single price) and Indestructible Records (that will not break or wear out no matter how much you abuse them). The Columbia Phonograph Company is the only firm that manufactures both Disc and Cylinder Machines and Records, therefore, a Columbia dealer has the advantage over all others, as he can furnish his customers with what they want, while his competitor has to sell them what he has or lose the sale, which he generally does where there is a Columbia dealer. Are Columbia goods sold in your town? If not, why not? Do you want the exclusive agency? (remember exclusive). You had better write to-day or someone else in your town will read this advertisement and beat you to it. A postal will bring catalogues and full information free. Write to-day. Do it now. Toronto Phonograph Company, Limited, Exclusive Columbia Jobbers, 40 Melinda St., Toronto, Canada.

NATIONAL AID—An aid to every retail merchant in the world. Saves money, time, work and worry. The National Cash Register Co., F. E. Mutton, Canadian Manager, cor. Yonge Street and Wilton Avenue, Toronto.

NOTICE—Users of Pitner Gasoline Lamps are warned against being induced to purchase parts of other makes of lamps to be used on the Pitner. The most vital part of any lamp is its generator, and the Pitner generator has been granted a patent in Canada, the United States and other countries, on the principle of its improved method of generating gasoline vapour. Supplies and parts for the Pitner lamps can be received by return mail by applying to our representatives or direct to THE PITNER LIGHTING CO., Limited, 36-38 Lombard St., Toronto, Ontario.

SITUATIONS WANTED.

Travellers, clerks, or tinsmiths, wishing to secure new positions, can engage the attention of the largest number of employers in their respective lines, by giving full particulars as to qualifications, etc., under "Situations Vacant."

AS TRAVELER for hardware, stove, furnace, or plumbers' supplies, wishes to better position. Box 816, HARDWARE AND METAL, Toronto. (14)

EXPERIENCED SALESMAN for hardware and stoves, with general knowledge of heating. Wholesale and retail. Box 822, HARDWARE AND METAL, Toronto. (16)

HARDWAREMAN, now in west, open for position. Would take charge of hardware department in general store. Box 25, HARDWARE AND METAL, Winnipeg. (15)

HARDWARE SALESMAN, age 27, single, desires to locate in Western Canada. Box 819, HARDWARE AND METAL, Toronto. (14)

TRAVELER open for new position. Has been calling on retail hardware trade in Ontario for fifteen years. Box 815, HARDWARE AND METAL, Toronto. (14)

WANTED—Position of trust, experienced banker or partnership in broker's or other financial business. Can supply limited capital. Financier, care J. B. MacLean, 10 Front Street E., Toronto. (14)

SITUATIONS VACANT.

Opinions About the Spring Number

"Be sure you're right then go ahead," is a good motto for any line of business. The unanimous opinion of manufacturers, jobbers and retailers seems to be that we are working along right lines in connection with our Annual Spring Number.

It is gratifying to us that so many representative firms have hastened to express to us their appreciation of this number as soon as they had examined it.

The success of this number does not consist in the amount of money represented in the advertising pages, or in the amount of reading matter it contains. The success of the number from the standpoint of advertiser, subscriber and publisher depends entirely on whether the information it contains will make hardware dealers and their clerks shrewder buyers and more efficient salesmen.

To this end the advertisers are urged to supply copy which will impress their strongest talking point on the men who have so much to do with the sale of their goods. Each year manufacturers and jobbers have taken more pains and gone to more expense in the preparation of their copy. It is to the interests of the retail trade to have advertisers place before them talking points of their goods in such attractive form that they will remember these points when they are endeavoring to make sales to their customers.

We would therefore urge the trade to write any of the advertisers whose announcements they consider specially attractive and in this way they will encourage them to do even better another year.

"We acknowledge receipt of your annual spring number, which came duly to hand and wish to take this opportunity of expressing our hearty appreciation of the attention which our advertisements have received. After many years of advertising in your columns we are satisfied to continue. Eternal vigilance and push are the price of success; that is particularly the case when endeavoring to acquire new trade. Perfect goods, fair and equitable treatment of customers are necessary factors; then advertise, and we know of no better medium than the Hardware and Metal.—The Martin-Senour Co., Chicago.

* * *

"Have carefully looked over the spring number from cover to cover, particularly every advertisement, and these are unusually attractive. It is truly an educator to any man who desires to be abreast of the times in the hardware trade to read the practical articles by Mr. Lariviere and others. They should stimulate any man to bigger and stronger plans and put "ginger" into his business. A strong and extended article on salesmanship, perhaps in the form of lessons, by the Sheldon people, or some other acknowledged source, would add value to the special number and aid in having it kept for future reference, which as you know appeals to advertisers strongly. Any number of short articles, be they ever so good, do not lead to the number being kept, as would something extended and important."—Brass & Steel Goods, Limited, Belleville.

* * *

"Please send us two extra copies of your annual spring number for which you will find 50c. enclosed. There is no doubt but that it is a most valuable issue of your paper for any hardwareman to have."—Bond Hardware Co., Guelph.

* * *

"Your annual spring number has just reached us and it is impossible to give anything but praise to it. In fact, we think it is many a day since such an attractive number of any trade publication has appeared.—Chicago Flexible Shaft Company, Chicago.

* * *

"We think your latest spring number which has just come to hand is the finest production you have yet made and we cannot well see how you could improve on it in any future number. In our opinion there is no better medium of advertising to reach the hardware and general trade and as far as we are concerned we are thoroughly satisfied in every respect."—Standard Paint and Varnish Co., Windsor.

* * *

"I must congratulate you on the fine spring number of Hardwate and Metal as it is certainly a credit to the MacLean Publishing Company. The reading pages are very instructive and I am going through them slowly at home each evening, but what has interested me most of all is the matter on the advertising pages which are a mine of information for any retail hardware merchant."—H. P. Morgan, vice-president Peterboro Hardware Company, Peterboro.

* * *

"Your spring number received. In our opinion it reflects credit on your company, and we have always considered that we get good returns from any advertisement investment we have made in your papers."—Lewis Bros., Limited, Montreal.

* * *

"Your issue of March 20, is certainly a credit to you. It is well gotten up and the advertisements are attractively displayed. Taking it altogether, we will just sum up our opinion in this, that it is well done."—The Hobbs Hardware Co., London.

* * *

"We are in receipt of your special spring issue and wish to compliment you on this work. The composition, press-work and editorial work is a credit to your office and mechanical staff and the hardware trade should be pround of such a worthy champion. We suppose that your future issues will be better than this but we think that everybody concerned should be well satisfied if they are as good."—The Galt Art Metal Co., Galt.

* * *

"We wish to congratulate you on the publication of such a very fine and attractive edition."—The Metallic Roofing Co., of Canada, Toronto.

* * *

"We are in receipt of the special number of the spring issue of Hardware and Metal, and in our opinion we think the number is a good one, and should be appreciated by the hardware trade."—Onward Mfg. Co., Berlin, Ont.

"We are just in receipt of a copy of your annual spring number and after looking it over, we feel that we should compliment you upon the production of such a creditable number. With special reference to our own advertisement, we would add that we are well pleased with the color work and anticipate good results in time."—The Woodstock Wagon and Mfg. Co., Woodstock.

* * *

"We are in receipt of your annual spring number. It is a very creditable publication and we have no regrets for taking two pages for advertisement instead of one as formerly. The arrangement of our ad. is entirely satisfactory."—David Maxwell & Sons, St. Marys.

* * *

"The annual spring number of Hardware & Metal has just come to hand, and in glancing over it casually, I am struck with the great improvement which has been made this year. The cover is especially fine, and is, I think, much better than anything used on the spring number within my remembrance.—Metal Shingle & Siding Co., Preston.

* * *

"We have received your annual spring number and are very well pleased with the appearance of our ad. The number is very complete and attractive."—Hollands Manufacturing Company, Erie, Pa.

* * *

"We must say your annual spring number is a very attractive edition indeed and we cannot suggest any changes whereby you could improve on it."—The Brown, Boggs Co., Hamilton.

* * *

"Your special spring number more than surpassed our expectations and we can make no suggestions as regards further improvement."—Ontario Lantern & Lamp Co., Hamilton.

* * *

"Your annual spring number looks good to us."—The McClary Manufacturing Co., London.

* * *

"We have much pleasure in stating that we are extremely pleased with your spring number just to hand, and to say that it comes up to expectations hardly does it justice, although we are accustomed to look for something good from Hardware and Metal. We also wish to thank you for the pains you have taken

with our ad., and we are pleased with its appearance.—A. C. Leslie & Co., Montreal.

* * *

"We have received the spring number of Hardware and Metal, and on looking it over we find it is a splendid edition. We think it is the best you ever issued. You are to be congratulated for issuing such a fine number."—Adolph & Bonnett, Listowel, Ont.

* * *

"We are in receipt of your annual spring number. We are pleased with the advertisement, of our product, and the number as a whole is very satisfactory indeed. We can think of no suggestion at the present time, that would tend to make it more valuable."—Lufkin Rule Company, of Canada, Windsor.

* * *

"We received the annual spring number, and are certainly very much pleased with same, and can assure you that you deserve every credit for turning out such a splendid journal."—The Hall, Zryd Foundry Co., Grimsby.

* * *

"We consider your annual spring number a very handsome book and well gotten up in every way. The advertisement that shows under our heading is pleasing to us."—The Hart & Cooley Company, New Britain, Conn.

* * *

"We have received your spring number of Hardware and Metal, and are very much pleased with our ad."—The Schultz Bros., Company, Brantford.

* * *

"I have not had an opportunity to carefully digest all the matter contained in the special number. From the perusal I have made of it, however, I am convinced that this is the best number you have issued, both as regards the interesting character of reading matter and the splendid advertising display made by the different firms whose ads. appear therein. I venture to say that to the retail hardwaremen, especially those some distance removed from large centers, the valuable matter contained in this special number will prove very interesting and instructive."—A. J. Wood, Montreal Rolling Mills, Montreal.

* * *

"The copy of your annual spring number was duly received and we want to congratulate you on the appearance and contents. This should prove a very interesting number to all of your subscribers."— Smith Hardware Co., Montreal.

* * *

"Owing to the press of the spring business we have been unable to write you earlier regarding the exceedingly interesting spring number which you issued last week. It is full of good reading matter, and, being printers ourselves, we can confidently say that the whole volume is well set up and of a handsome and striking appearance. 'En avant!' (go ahead) is evidently the motto of Hardware and Metal."—W. H. Evans, The Canada Paint Co., Montreal.

* * *

"We believe you have the best publication in Canada, and it is always with interest we examine its pages on its weekly rounds."—W. H. Turnbull & Son, Brantford.

Retail Hardware Association News

ONTARIO EXECUTIVE MEETING.

A meeting of the executive committee of the Ontario Retail Hardware and Stove Dealers' Association will be held at Toronto on Thursday, April 8, to discuss various matters regarding the work of the association, including the place of holding the 1910 convention and the proposed summer trip to Montreal.

Regarding this Montreal trip, if it is held, it will not be of the nature of a convention, as some seem to think, but rather a coming together of hardwaremen and their wives in a joint excursion to a central point of interest—a gathering where old acquaintanceships can be renewed and new friendships created, where business and pleasure can be merged to the mutual benefit of all. It is suggested that one, or possibly two meetings be held, one to be a "Question Box" and the other a discussion on freight claims with representatives of the big railways present to answer questions.

If the trip is decided upon some social features will be included—an offer of a boat trip down the St. Lawrence has already been made and other features such as shooting the rapids, a trip up Mount Royal, etc., will probably be arranged.

In connection with the executive meeting it has been suggested that the Toronto members of the association meet the executive at luncheon on Thursday evening to talk over trade matters and this feature will be included on the program.

HELPS THE MAIL ORDER HOUSES.

The anti-revolver legislation proposed in the Dominion Parliament is undoubtedly more drastic than hardwaremen will approve of. Something can be said in favor of restricting the sale of revolvers which one Toronto paper styles the "murder gun" and hardware merchants will not oppose any reasonable proposal to keep track of sales to aid the police in case of criminal acts. But bill No. 83, introduced into Parliament by E. M. Lewis, M.P. for Huron, would practically prohibit the sale of revolvers in retail stores and turn the trade to the mail order houses, besides encouraging smuggling and illicit trade.

As a matter of fact, revolvers and air-guns are not supposed to be sold to minors under sixteen, a maximum penalty of $50 being provided, while the Criminal Code, sub-section 2 of section 119, reads as follows:

"Everyone is guilty of an offence and liable, on summary conviction, to a penalty not exceeding $25, who sells any pistol or air-gun without keeping a record of such sale, the date thereof, and the name of the purchaser and of the maker's name, or other mark by which such an arm may be identified."

Mr. Lewis, however, wants to add: "No revolver or pistol shall be sold to any person unless he produces to and leaves with the vendor a permit in writing from the chief of police or a police magistrate or justice of the peace allowing him to purchase a revolver or pistol."

A bill, more reasonable in some respects, came up in the Ontario Legislature on Thursday afternoon and after discussion was withdrawn. It was introduced by Mr. McPherson, M.P.P. for West Toronto, and containing provisions intended to prevent (1) the sale of revolvers, etc., in pawnshops and second-hand stores; (2) the sale of any firearms or ammunition by or for any person under 18 years of age; and (3) further restricting the sale of all firearms and ammunition by compelling the keeping of accurate records of each sale; (4) heavy penalties being provided for non-observance of these regulations.

The first provision will be generally agreed to but the prohibiting of the sale of ammunition to minors would prevent youths under 18 years of age from participating in target practice while the tendency of public sentiment is in favor of accepting the endowment of $500,000 offered by Lord Strathcona for the purpose of encouraging young Canadians to become expert marksmen. The provision of keeping records of sales as outlined in the act are also more drastic than required, all that is necessary being the enforcement of the clause governing this point in the Criminal Code.

The bill was opposed by Geo. C. Wilson M.P.P. for Wentworth, and Hon. Frank Cochrane, both hardwaremen, and R. R. Gamey, formerly a hardware merchant, and after discussion withdrawn.

If hardware merchants throughout Canada take the trouble to write their member of Parliament urging the enforcement of present laws and the lack of necessity for further restrictive measures it is likely that Mr. Lewis' bill in Parliament will meet the same fate as did Mr. McPherson's bill in the Ontario Legislature.

CATALOGUES AND BOOKLETS.

Telephone Book Cover.—A. C. Leslie & Co., Montreal, are supplying their friends in the trade with a telephone book cover. By an easy arrangement of wire the book is firmly fixed inside, while the covers themselves being of very stout board and of handsome appearance, give a pleasing appearance, too, at the same time preserving the contents. The firm have had numerous inquiries for this useful and artistic cover, but those in the trade who have not had one should address the firm.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 74.

MARKETS IN BRIEF.

Montreal.

Tin—Now 32½c.
Lead—Advanced to $3.75.

Toronto.

Lead—Advance of 5c.
Tin—Up 1c.

THE MARKET SITUATION.

During the week all the metals in the primary markets took a turn for the better, and this has naturally influenced Canadian markets. The clearing off of another Banca sale, gave bull operators a chance to manipulate the English tin market. The United States tin plate consumption is improving, and for the time being much more interest is taken by users in the markets. Developing strength in the English copper market improved the situation in New York, and prices rallied a little. But the heavy production of the metal is having a very depressing effect. Both lead and spelter have showed better strength across the Atlantic, and it looks as if the dying away of the war scares was having good effect. The iron and steel situation in the States is very unsatisfactory. Too much pig is being stored, and with prices still dropping, a very pessimistic feeling is apparent. Finished steel products have also been badly hit, and bottom prices have not yet, apparently, been reached. Conditions in the Old Country are somewhat brighter although not so bright as they might be; Cleveland warrants are quoted at 46s 10d, which is 7d higher than last figures.

The Iron Age (April 1) says: The wire trade is beginning to feel the approach of the close of the spring trade, so far as the mills are concerned. Shipments from storehouse and mill continue heavy, but production is beginning to decline. On the other hand, the tin plate mills have been pressed into service until now about 90 per cent. of the capacity is working. The works are taking care of the season requirements of the canners, and will probably try also to accumulate a stock in anticipation of summer developments. Copper has gained a little in strength, there having been further sales to domestic consumers. The market is now at 12⅝c cash for electrolytic. Lead is up to 4.10c, New York, and spelter is a shade higher. There has been a good deal of activity in tin, and the price of the metal is now the highest of the year.

The Iron Trade Review (April 1) says: The mills are getting a fair amount of business in bars, plates, shapes and merchant pipe. Tin plate operations have increased rapidly during the past several weeks, and the American Sheet & Tin Plate Co. is now running 94 per cent. of its serviceable capacity. General conditions, however, are scarcely up to the point at which the market broke in February, and it remains to be shown by further lapse of time whether any considerable volume of new business will be stimulated by the reduced price level. A stronger inclination toward weakness is shown in pig iron, although the transactions through which conditions are expressing themselves are not sufficient to show the true levels of the market. Makers are facing the problem of heavy stocks being constantly increased, and of unsettled prospects as to when the market will be able to absorb this surplus tonnage.

MONTREAL.

April 2.—There is a strong tone to the markets this week. Not only have tin and lead advanced, but the other metals are much firmer. This is chiefly due to the improvement in the primary markets, although good local trade has contributed to the movement. The nearing approach of open water has also helped in the betterment of the situation. There is a much brighter feeling all the way round, and with stocks in their light state, trade prospects undoubtedly look very promising.

During the week inquiries increased in strength, influenced probably by the firming tone in the markets. A good many orders are being held off until users are certain as to which way prices will turn, and any decided improvement to the markets would see these orders quickly placed. Tin has been in good demand during the week, while lead has taken a turn for the better.

Antimony continues to show improvement, and the market seems working for higher prices. Canadian furnaces are reported as having a fair amount of business on hand, and prices are held firmly although, of course, under the figures obtaining for English and U.S. iron.

PIG IRON—Little business is doing in imported pig at present. There is practically none left in store, and users unless severely pressed, are waiting for their consignments due into Montreal at the commencement of next month. Canadian furnaces are reported as being in almost full operation on old and new contracts. At Ontario points, home furnaces have to meet with the low prices made by U.S. furnace interests, and in Montreal district they come into competition with English metal, which is being offered at prices which are lower than for many months past. But while meeting this competition they are holding the market well. A good season is anticipated in imported pig, and also in steel and structural material. We quote open water prices as follows: Middlesboro No. 3, $16.50 to $16.75; Summerlee No. 1, $18.75 to $19; No. 2, $18.25 to $18.50.

TIN—With a strong advance in the English market, and very good local trade, tin has been raised 1c, and jobbing lots are now quoted around 32½c. The stronger tone has brought out inquiries, and users are displaying much more interest in the market.

COPPER—Copper is unchanged this week, although the tone is firmer owing to better figures at London and New York, and ordinary jobbing lots can still be obtained at 14c. While copper has not been in so good a demand as tin, a satisfactory movement has occurred. Inquiries are better than they were and prospects look good, especially considering the absence of stocks in users' hands.

SPELTER—Spelter is very firm at $5.50. Trade is steady. Some heavy shipments are expected at the opening of navigation, but with industrial activity increasing, it is expected that the metal will soon be swallowed up, and fresh orders quickly in from consumers.

LEAD—Owing to the rally in the English market lead has been advanced 10c, and we now quote imported pig at $3.75,. Trail taking a corresponding increase at $3.65. Trade in lead seems quieter than in the other metals, although with the building season near at hand, business is expected to develop strongly before long.

OLD METALS—There is no change this week. We quote; Heavy copper and wire, 11c; light copper, 10c; heavy red brass, 10c.; heavy lead, 2¾c; wrought iron, $11; No. 1 cast, $14.50.

TORONTO.

April 2.—The metal business is now in a better position than it has been for a year back. That is the statement of a prominent Toronto metal man. All the metals are active and strong and the prices are firmer, and in the case of lead and tin show an advance.

The volume of metals moving is great. While individual orders still call for small lots they are frequent enough to make the totals bulk large. Copper futures are asked for and in a great many cases are being taken up, though metal jobbers say as they cannot buy the red metal farther ahead than May, it is a little hard to expect them to supply copper for consumption on orders calling for delivery up to the end of the year.

Pig iron and manufactured steel are showing strength as the distance between the cut prices in the U.S. of some short time ago lengthens. Spelter, antimony and sheets and plates are unchanged, but are showing advancement from week to week. The warmer days of this week have increased business quite perceptibly.

The West is again to be a good customer, and local men expect to share in some of the business going. The great demand for agricultural implements and the inadequate supply has caused inquiry to be made here for metals by manufacturers, and judging from recent

reports these inquiries will lead to business. Metal men think so at any rate.

PIG IRON—Cleveland $22; No. 3 Middlesboro, $21; Canadian foundry, $18.50, are still the prevailing market quotations, and the market shows strength, too. The fear of cutting in manufactured iron and steel has declined somewhat, and the advance noted in other metals has helped the iron and steel situation wonderfully.

COPPER—Very active and strong, with buyers looking for the metal for future delivery at the low prices prevailing. Dealers say they cannot buy in New York beyond May, but they are not averse to do business when orders for good stocks call for delivery up to December. The local price is yet 14c, but copper is very firm at that figure and may advance a little, though not much, as production is still greatly in excess of demand.

TIN—Up 1c; now quoted at 32c, and active. The business in tin has ben splendid and at present there does not appear to be any let-up.

LEAD—An advance of 5c has taken place since last issue. The local quotation is now $3.85. Like in the case of tin, first-class business has been done and the prospect for the future is good.

SPELTER—Although inquiry has increased during the past few days, spelter sales are still quiet. The outlook is hopeful, however, and business may revive as it has with almost every other metal.

SHEETS AND PLATES—Very good steady business has been done. Unlike other metals these lines do not figure largely in speculation. No change in price is expected for six weeks yet, and perhaps not then.

OLD MATERIALS—Large stocks are still being carried, but sales are satisfactory. Scrap metals are demanding fine prices, when these are taken in comparison with the new metals, and some buyers continue to prefer scrap to the new metals, especially when small lots are considered. Prices are unchanged. Dealers are paying the following prices: Heavy copper and wire, 12¾c; light copper bottoms, 11c; heavy red brass, 11¼c heavy yellow brass, 9c; light brass, 6¾c; tea lead, 2½c; heavy lead, 3c; scrap zinc, 3⅛c; No. 1 wrought iron, $10; machinery cast scrap, No. 1, $14; stove plate, $12; malleable and steel, $8; old rubbers, 8c.

HARDWARE MARKETS

MONTREAL.

April 2.—Jobbers are now busily engaged in shipping orders which have been held for the lower freights. There is no great rush observable, but the bulk moving is very good, and certainly better than at this time last year. Immediate delivery orders have also developed in strength the last few days, showing that while dealers are still inclined to feel their way yet they are taking a more hopeful view of their trade possibilities. Travelers report that confidence is developing all over the country, and that the prospects of a strong improvement along steady lines, are very bright.

Housecleaning lines are well to the fore, while builders' hardware shows gratifying improvements, and by the time the building season opens dealers will be well stocked up. Hose and gardening tools are moving freely. Although many orders in ice cream freezers, and refrigerators are still being held back in shipping, good bulk is now moving. Bookings in harvest tools are also assuming satisfactory strength.

No important changes in prices are reported. The markets are firm, and a bright feeling is in evidence among the trade generally.

BUILDERS' HARDWARE—With the near approach of the building season immediate delivery orders in builders' hardware are showing strong improvement. All lines are moving, the generally assorted character of the orders being very marked. No changes in prices are reported, and we quote door sets and escutcheons, 50 and 10; escutcheon pins, steel, 50; brass, 55. Spring hinges, No. 20, $9 per gross.

SPRING LINES—With the arrival of the lower freights, jobbers have been very busy in despatching accumulated orders. The movement in hose and gardening tools is very marked. Carpenters' tools are also in good request. Poultry netting, green wire cloth and screen doors are moving out well. We quote: Screen doors, stained, $7.80; grained, $8.10; poultry netting, 60 and 2½; green wire cloth, $1.70 in 100 feet rolls.

SPORTING GOODS—Fishing tackle is now commencing to move strongly, and dealers are getting their stocks ready for what promises to be a good season. Cartridges for trap shooting are in growing request. We quote: Dominion rim cartridges and C.B. caps, 50 and 2½ per cent.; B.B. caps, 50, 10 and 2½ per cent.; Crown black powder, 18 per cent.

MINERS' SUPPLIES—The strong movement in these lines still continues, and most successful trade is being done. Jobbers are keenly alive to the trade possibilities of the mining districts. We continue to quote: Miners' picks, 17c a pound; prospectors' hammers, 20c; pick handles, $1.85 a dozen; drilling hammers, 6c a pound; crowbars, 3½c; drill steel, 8c.

HARVEST TOOLS—Bookings in harvest tools continue to improve. We quote hay fork pulleys, $1.60 to $8.50 a dozen; hay carriers, hay rakes, etc., 55 off.

BOLTS AND NUTS—Trade is showing improvement, orders coming in steadily and well. The market is firm,

WIRE—Good shipping is now going on in wire. Immediate delivery orders are steadily increasing in strength. There is no change in prices, and we quote: Plain wire, $2.30 base; barb wire, $2.65 in straight and mixed car lots, and $2.70 in small lots. Galvanized wire, No. 9, $2.35 in straight and mixed car lots, and $2.40 small lots, f.o.b. Montreal. Coiled spring fencing, $2.65, straight and mixed car lots, and $2.75 small lots.

BRIGHT WIRE GOODS—Screw eyes are still in good demand. Other lines, if not so prominent, are showing improvement. We quote: Gate hooks and eyes, and screw hooks at 60 and 20 per cent.; stove pipe eyes, screw eyes, and square hooks, 60 per cent. Wire hat and coat hooks, 40c a gross.

TORONTO.

April 2.—The month of April has opened out remarkably well, and judging from the way goods have been going out the past few days it looks as if the trade was nearly back to the place it occupied in the boom days of 1907. Of course many of the orders now being filled are orders that were booked at various times since the beginning of the year for delivery about April 1; but there is fine immediate buying going on and jobbers are more than satisfied.

The mining regions in the northern part of the Province began the call for goods and during the past ten days the older and more settled portions of Western Ontario have been buying in car lots. Now the west is asking for goods, especially for agricultural tools and building materials, and a couple of cars of hardware went forward this week for distribution in Alberta.

The country roads are still pretty bad and hardwaremen in the smaller centres have not yet experienced the pressure of sales so much as city hardware merchants, but from the way they are stocking up of late there can be no doubt that frequent inquiries have been made.

SPRING LINES—Poultry netting, screen doors, tubs, brushes, washing machines, kitchen utensils, housecleaning articles, and lawn goods are but a few of the lines which come under this heading. They are going out in splendid style. Perhaps the best selling line this past week, however, has been agricultural implements—shovels, spades, pitchforks, rakes, hoes, etc. They have been going out in almost unprecedented numbers. The agricultural sections of Ontario and the west have actually been taking these tools by the carload. Refrigerators, ice cream freezers, lawn hose and sprinklers, too, are in demand again, though shipments are not yet very heavy in these lines. The mining regions are still asking for goods, and tinware, rope and prospectors' tools are going there. The bulk of the goods for the mining country, however, are now there or on the way, at least, those intended for Gow Ganda are, as when the snow melts the roads will not be fit for heavy teaming.

BUILDERS' HARDWARE — City hardwaremen are experiencing good sales and jobbers say their city business is better than it is in the country just at the moment. Outside, however, there is a good movement on the way, and business is expected to be splendid in this line the coming season, now that an almost bumper building year is assured. Door sets, locks, bolts, hinges and many new door and window contrivances are being shown and are also being included in orders now being filled.

SPORTING GOODS—The hardware trade is on the fringe of a good season for sporting goods, so we are assured by travelers' who know, Certainly the fine weather of the past few days has given outdoor sport a boost, and with the opening of the baseball season right at hand there should be some business for the hardwareman who is ready for the emergency. The football season, too, is at the door, and next month lacrosse will be here.

HEAVY GOODS—The best business in a year is now being done. Prices are unchanged. Bar iron is $1.95. Stove bolts are 80 and 7½. Bright and steel wood screws, flat, 85 and 10 and round head, 80 and 10 per cent. Brass screws are : flat, 75 and 10 and round head, 80 and 10 per cent. Brass screws are : flat, 75 and 10, and round, 70 and 10. Nails are in exceptionally good demand,

BRIGHT WIRE GOODS—Good sales being made of all articles coming under this head. Gate hooks and eyes, and screw hooks at 60 and 20 per cent.; store pipe eyes, screw eyes, and square hooks are at 60 per cent. continue to be the quotations. Wire hat and coat hooks, 40c a gross.

THE COPPER SURPLUS.

The voicing of the complaint that copper is being produced too rapidly is becoming stronger every day. During the closing months of last year doubts were expressed as to the wisdom of piling up such heavy stocks, but the then heavy exportation to Europe, and the belief that a strong consuming demand might break in at any moment, made the situation seem less hazardous than it really was. But now, with the greatly reduced exportations across the Atlantic, and the home legitimate demand seemingly no more anxious to break in the dangerous position of copper, stands out in much clearer relief. Although producers maintain that the present situation is not dangerous and certainly they hold up prices with great determination, there is no minimizing the fact that stocks are exceedingly heavy, and are being added to every day. At the same time the demand is dull with no certainty of any immediate improvement.

If consumers were ignorant of the fact that all this metal was being held, the possibility of their being tempted into the market would be greater. But they are fully aware of how much metal is being stored, and in the hopes of a break, they are holding off to the last gasp. It is now a question of who can last the longest—the producer or the consumer. Even if all the copper that has been sold in the last six months, for instance, had for a certainty gone into consumption, whether in Europe or America, the situation would be easier —although not much—but it is open to doubt whether the metal has been used. It is exceedingly probable that it is being held for speculative purposes, and it must not be overlooked that metal in speculators' hands weakens and not strengthens a situation.

With this surplus of metal all buoyancy is being squeezed out of the markets, and a tremendous reaction will be necessary to throw off the weight of the heavy stocks. If the larger interests will not do what the big steel interests did from the start, reduce their output, then the smaller concerns must close down, and thus relieve a situation that is daily becoming serious, so far as the future prospects of copper are concerned.

TRADE NOTES.

Ontario.

J. W. Scott, Streetsville, intends building a hardware store at Port Credit.

Harry Moulden, manufacturers' agent, Winnipeg, is renewing acquaintances in Toronto this week.

M. W. Howell, of the Howell Hardware Co., Goderich, is one of the delegates to the missionary convention in Toronto this week.

W. H. Wiggs, head of the Mechanics' Supply Co., Quebec, is in Toronto this week attending the Laymen's missionary convention.

The LePage Door Check Co., Toronto, whose factory was burned recently, have secured fine new premises at 256 Macdonell Avenue, Toronto.

J. O. Cameron, who for some months has been head salesman in the Moir hardware store, Arnprior, left last week to accept a position with a Buckingham, Que., firm.

John Miller & Son, Montreal and Toronto, have been appointed sole Canadian representatives for the Simms Magneto Co., London, Eng., makers of magnetos, plugs and adapters.

Carter Bros., Picton, who installed a Bowser pump for gasolene at their store a year ago, have just installed another on the bay front, to serve motor boats. They are also instaling a battery of seven Bowser oil pumps and tanks at their store.

Quebec.

A. Lemieux, Henryville, has been visiting Montreal.

Victor Milot, St. Severe, has been on a visit to Montreal hardware circles.

Lebadie & Moreau, tinsmiths, of St. Romuald, are offering to compromise.

R. W. Grant, of the Ottawa Wire Fence and Gate Co., has been visiting Montreal.

Frenette & Bro., scale manufacturers, Montreal, have removed to larger and more convenient premises at 44 Jacques Cartier Square.

Frank Wilkinson, vice-president of B. & S. H. Thompson, Montreal, is away on a business trip to the Maritime Provinces.

Des Rochers Co. have succeeded to the firm of G. U. Des Rochers, and will continue to carry on the general hardware business at Centre Street, Montreal.

Godfrey S. Pelton, Montreal, has secured the sole Canadian agency of Tyzack & Holmes, Sheffield, Eng., makers of metallic, linen and steel measuring tapes, steel rules, steel squares, etc. Mr. Pelton is also now representing D. Anderson & Sons, St. Andrews, Scotland, the makers of golf sticks and other golfing accessories.

Some friends of Lieutenant-Governor Fraser have just presented him with a handsomely gotten up Gillette safety razor set. The articles are finished in gold, the initials of the Governor and the coat of arms of Nova Scotia cut by hand upon the handles, soap and brush boxes. The whole case is a perfect specimen of the high class work turned out by the Gillette Safety Razor Co of Canada, Montreal.

For convenience in business, Lockerby & McComb, Montreal, have been incorporated as a joint stock company, with a capital of $99,000. D. W. Lockerby is president; J. H. McComb, vice-president, and Miles Birkett, secretary-treasurer. The other directors are J. Howard McComb and J. T. Fisher. The company have secured a very broad charter, and will be able to extend their business along varied lines. Since the commencement of the year business has been very good, much better than for the same period last year, and the directors look forward to marked development.

PLUMBING BUSINESS CHANGES.

The Standard Sanitary Manufacturing Co., Pittsburg, have purchased the plumbing supply business conducted at Toronto by Somerville, Limited, the transfer taking place on April 1 when, it is said, a cheque for $250,000 was paid over, this not including the brass plant, which will continue to be the property of the Somerville Co. W. A. Porter will manage the supply business in future, Fred Somerville retiring.

The Standard Sanitary Company, as reported last week, will build a large enamelware plant at Toronto or Welland, to supply this market.

Another transfer made this week was that of the heating supply business conducted by Warden King, Limited, Montreal, under the name of Cluff Brothers, at 21-27 Lombard Street, Toronto, it being taken over by the King Radiator Company, of which R. J. Cluff is managing director.

The J. L. Mott Iron Works, New York, is another United States enamelware concern after Toronto business, J. F. Dewar, of the Somerville Company, having been appointed Toronto representative for W. J. Wall, Montreal, sales agent for this Company in Canada.

The Anderson Porcelain Company, East Liverpool, Ohio, has also decided to invade the Canadian market and will erect a factory, probably at Toronto.

SUCCESS IN DULL TIMES.

There is a great deal of difference between success in good times and success in bad times. In the one case unless the merchant deliberately kills the goose that lays the golden egg, all that he has to do is to look after, and to exact the fullest measure of profit from the demand that the consuming wants of the country have created. To a great extent good times take care of themselves. But when times are dull, and consumers apathetic, it is then that the dealer is in need of all his business acumen and salesmanship. He has to create a demand, and that is a hard task.

It is not the man who sleeps during the dull periods of the year, and only wakes up when trade comes knocking at the door, who makes the most success of his business. It is the man who fights and schemes to turn the bad times into good who gets ahead of the game.

It is in the power of every dealer to create trade, be the times what they may. The appetite of the consumer may be dormant, but it can be tickled into activity. This can only be done by unceasing preseverance, unceasing vigilance, and an intelligent appreciation of what will best attract the consumer. The merchant who continually offers up attractive bait, and induces the consumer to bite when he does not want to, whose windows are always original and smart in design, and whose store seems to be always busy, is the man who converts bad times into good. Undoubtedly there is a great amount of truth in the statement that the trade which naturally comes to a merchant pays the expenses of the business, but the trade that is attracted pays the real profits.

VALUE OF A BUSINESS EDUCATION.

Though a college education is not necessary to a successful business life, there is no doubt that it is of great material benefit to any young man, in that he is able to face the problems before him with a mind that is well trained and his decision and assurance in all matters naturally gives him a better standing in the business world.

Some of the most successful business men of the day have never had better than a public school education, but there is not one of them but what will admit that he has often been handicapped without a more complete education.

The business college is a splendid training school for the young man who contempletes entering business life, and if the student would realize that such subjects as spelling, composition and arithmetic are just as important as the special subjects of bookkeeping and shorthand, the graduated student would be far more acceptable to the business community, for it is not in the special courses where he is deficient, but in the ordinary subjects he has studied at school and which he feels that he knows so well. The theory groundwork, if well taught, will prove of great benefit to any young man.

In whatever capacity he starts out, whether with a small or a large concern, he should determine to master completely every detail of the business as it presents itself to him day by day. Some of these details may be termed "drudgery" at the time, but this very work will prove to be of incalculable benefit to the young man when he himself holds an advanced position or is even head of the concern. We are too apt to speak disparagingly of some detail work, in the early days, and yet this training is the very best thing to fit us for the higher duties of life.

DO AS YOU SAY.

Over in Germany there exists a law which prohibits a merchant holding a removal sale unless he actually intends to remove. Similarly no merchant can advertise "selling below cost" or "clearing out sale" unless these things are actually his intentions. If he states his goods are to be sold below the cost an officer of the law may demand his invoices and determine whether he does so or not. A fire sale cannot be held unless there has been a fire.

The law protects the consumer in this respect which appears to be the proper course to pursue. A similar law might well be enacted in Canada with good results, for most merchants know how often sales of the above description are advertised when it is impossible for them to take place. When goods are stated to be sold at less than the invoice price, or when a selling out sale is advertised they should be carried out to the letter. It is certainly advisable for the consumers to know exactly what they are doing and with such a law such a condition would follow and the majority of the merchants who are not accustomed to these periodical "selling out" sales would be much benefitted.

SUCCESS NEEDS ENERGY.

Success, it is said, is composed of one part ability and two parts energy. A hardware merchant in order to succeed must attend to every detail of his business and he must enjoy his work. Intellectually he may occupy a favorable position, but unless that knowledge is augmented by the power to do something it will profit him nothing. The man who takes it into his head to do a thing and does it, who first plans his work and then works his plan, is the one who wins. He takes the "get-there" stroke and sticks to it. Failure itself, often leads to success. If you should lose all your possessions would you quit work or stop saving? What you would do, having the right stuff in you would be to buckle down and work harder than ever and economize more rigidly than before.

FOREIGN LANGUAGES AND BUSINESS.

Slow and sleepy China is gradually awakening. Among the evidences of this is the recent announcement that there are one thousand Government and private schools in one province of that country teaching western branches of learning, and that as a result of this teaching the Chinese are showing unusual zeal in acquiring a working knowledge of English.

This is not without its lesson to Canadians. We are probably among the most laggard of all nations in acquiring a knowledge of foreign languages, and yet foreign languages are becoming more and more necessary as a qualification for those who intend following commercial careers.

Germany is to-day one of the most progressive nations in a commercial sense. Probably no nation places more importance on the acquiring of foreign languages, a result of which can be seen in the way in which young Ger-

man business men make headway in other countries.

Every young man in Canada aiming at a business career should master foreign languages, and particularly German and French. If he can add Italian and Spanish so much the better.

GIVE TRAVELERS A HEARING.

"My desk is right here in a big open office," said a leading stove manufacturer of Toronto to a representative of Hardware and Metal the other day.

"You may wonder at this, but it has many advantages. I can easily see every one coming into this establishment, and am, therefore, in a position to know if they are getting prompt, polite and proper attention. Every move in the place is under my scrutiny, and the only inconvenience is that there is considerable noise at times owing to so many clerks and typewriters in the office, but one gets used to the buzz. We have only two private or walled-in offices in the whole factory. One is for the auditor and there is another for any one who desires to discuss some private matter. Heads of departments complain at times that they are placed in too open and exposed a position. Now I tell them it is their duty to meet all people who wish to see them and treat them courteously. I do not believe in dodging anybody and resorting to all kinds of subterfuges to get rid of undesirable callers. All traveling representatives and others are accorded a friendly welcome and one remarked to me a few days ago: 'Well, I always like to come and see you. I get a kind greeting even if you do not give me an order. I wish that I could say the same of everybody on whom I call.'"

When one of the heads of this firm expressed a desire for a more private office the other day I promptly told him it was his duty to meet everyone who had any business to transact with him. I brought the lesson home by remarking that we ourselves had twelve or fifteen travelers on the road and he should treat others in the same way as we like to have our own representatives treated. This made the point, and the application of my remarks clear, and he added: "I see things differently now. I certainly would not like to have our own men accorded a gruff, indifferent reception or to be kept waiting an unnecessary length of time on some flimsy excuse."

"I want to tell you," continued the speaker, "that I spent several years on the road and I have at times gone many miles to call on a hardwareman, and then, perhaps, he would not see me or else would give me a churlish reply, intimating by act, if not by word, that my call was not welcomed and the sooner that I took my departure the better pleased he would be. Now, here is a point which I wish Hardware and Metal would impress upon its subscribers, and it is this, the man who refrains from or neglects seeing a traveler, probably thinking he is saving time, that he has stock enough already or business is too slow to place further orders, is making a grave mistake. The traveler is his best friend, whether he is a customer of the firm or not, and can often give him pointers which are valuable and timely on the way the market on certain classes of goods is shaping, whether there is going to be an advance in price, whether anything new is coming out, and how the future appears generally. The traveler is the best barometer of business and probable changes in prices, and unless the merchant places himself in the closest contact with all avenues of information in his particular line, he is bound to lose money and some other man in the trade not so short-sighted will reap the benefit. It is a narrow, selfish policy for any up-to-date business man to refuse to see a traveler even if he does not require anything. He can often pick up valuable information and trade pointers which will repay him many times over for the few minutes taken up in conversation or in looking over samples, and inquiring prices."

KEEP THE STORE WELL LIGHTED.

The lighting of a store is always a problem. Both daylight and artificial light should be supplied in an ample degree. In the congested quarters of the cities it is not always possible to get sufficient daylight, but it is always possible to have a good quantity of artificial light. When the days get short, the well-lighted store is the one that commands attention, and beginning at the front door, which should always be well lighted, the window should be resplendent, of course, taking for granted the dressing is attractive, otherwise the lights ought to be as dim and few as possible. The efficacy of good lighting in the store itself is obvious. First, there is the psychological effect on the customer when he comes into a flood of light where everything seems to speak a welcome full of warmth. Secondly, in ill-lighted stores dirt and rubbish are more likely to collect and lead to an unsanitary condition. Thirdly, there is the general satisfaction to be derived from working in a well-lighted store, as compared with work anywhere in a dim and insufficient light. Electricity is undoubtedly the best form of light, as it is the cleanest, least cumbersome and most easily taken care of, requiring very little attention Gas and acetylene come next, and coal oil last. There are many kinds of acetylene plants, and some of them give a very brilliant light, but they require considerable attention.

BOOST THE BOARD OF TRADE.

The importance of a Board of Trade in any town of city cannot be too highly spoken of and it should be the duty of every grocer to take an interest in its welfare and assist it in every possible way. It is a regrettable fact that merchants in many cases do not appear to realize the importance and necessity of their being identified with the Board of Trade. It is certainly displeasing to a merchant to learn that citizens of his own town are doing their trading at a distance, and that instead of buying from him or a home merchant in some other line, they are spending their money elsewhere. This being true, should not every merchant who looks to his own town for support, take off his coat, figuratively speaking, and put his shoulder to the wheel of progress?

There is an old saying, don't knock; boost. The merchant who does not take an active part in work calculated to advance the affairs of his own town is indirectly neglecting his own business for the greater advancement made by his town, the greater will be his volume of business. There are many ways in which grocers and other merchants in general can assist in this work. They should always talk up the town in which they live and identify themselves with all movements that are deserving of their support, for it is a well-known fact that the people like to go to the busiest and most-talked-of places and an increase in population spells more business for the merchant.

"I am opening a tinsmith, plumbing and furnace business, and wouldn't be up-to-date without having a copy of the Hardware and Metal to look over."—A. F. Shepherd, Kentville, N. S.

"I receive a large amount of information from Hardware and Metal, regarding methods, new goods and the goings and the comings of the hardware world, to say nothing of the advertisements. As a commercial traveler I should set a good example for promptness. This I regret I have not done, but have put you to the extra expense of drawing on me. I am enclosing, therefore $2.25 for my subscription."—A British Columbia hardware traveler

Hardwaremen and Metal Roofing

Culverts Now Made of Corrugated Iron—Plans for Securing Business—Eastern Ontario Dealer Wants a Remedy for Price-Cutting Evil.

WHAT IS THE REMEDY?

Editor Hardware and Metal:—After reading the article on "Hardwaremen and Metal Roofing" in last week's paper, I want to write you about my experiences with metal roofing. I am in a town where there are two hardware dealers, and both of us have tried to push this line amongst the farmers. Three years ago I did very well with it, but the last two seasons have been discouraging, as representatives of other manufacturers have canvassed the district for business and quoted prices about as low as I can buy from the firm I represent and fully as low as I have been quoted by one of the firms which was doing the cutting.

A few weeks ago I read a very interesting letter in Hardware and Metal by a hardware dealer who wanted this roofing business discussed at the Retail Hardware Association Convention, at Hamilton. I was not able to attend, however, and as your correspondent said he had found a remedy to apply to these price cutters, I would like to have him give it, as it may help me to hold my trade this year. I don't want to drop the metal business, if I can make a reasonable margin of profit on it, as it helps to bring other trade to the store.

Yours very truly,
EASTERN ONTARIO DEALER.

LOOKED LIKE METAL SIDING.

On page 92 of Hardware and Metal of March 20, a picture of the Arcade Hardware Company's store at Forest, Ont. was given, and the impression given that the building was covered with metal siding, the point being made that a dealer using such goods on his store ought to be able to sell larger quantities of sheet metal products by showing his faith in the line. Before publishing the picture, the editor wrote the Forest firm for information and the reply came that they had used the Metal Shingle & Siding Co.'s products on all their buildings. It turns out, however, that metal goods were only used in the interior work, while cement blocks were used outside. The photo suggested that the building was covered with metal siding and the error made does not change our argument, that a hardwareman using metal siding on his store can use the point to good advantage in making sales.

ONE DEALER'S SELLING PLAN.

The Batty Hardware Company, Norwich, Ont., who have been very successful in selling sheet metal goods, describe their system of selling as follows:

"The plan we adopt is to get as many prospects as we can a couple of months before the parties wish their roofing. Then we send to our manufacturer, and they send one of their travelers with whom we drive out and call personally on each of our customers who are talking of building. Thus by spending a couple of days with this traveler, we are often able to close a number of good sales. We do not carry very much metal roofing in stock, and in fact do not carry any stock of the corrugated roofing for large barns, but we often carry from fifteen to twenty-five squares of the regular grade of galvanized shingles. The reason we do not carry this in stock, is that there is a very small margin on this class of goods; in fact, we seldom figure on any job bringing us any more than 10 or 12 per cent. profit.

"We do not have our tinsmith put on this class of roofing for us. We have to pay them from $1.75 to $2.50 a day and their time is worth to us from 35 to 45c. per hour at other work. We could not get this price per hour on roofing work of this description, as in this neighborhood this class of work is usually put on by carpenters or builders, who charge about $1.50 or $1.75 per day."

GOING AFTER ROOFING TRADE.

Metal roofing is rapidly gaining in favor because of its many desirable features as compared with wooden shingles, and considering its slight increase in cost. The objections to sheet metal as a roofing material, until a few years ago, were considered great by people who lacked the details of its points of advantage. There then seemed to be a sentiment against this manner of covering buildings for no other apparent reason than that wooden shingle dealers and public sentiment corralled against it. But time has worked vast changes in these conditions, until now a large majority of the most expensive structures are covered with galvanized iron, tin, or some other similar metal roofing.

Retailers and sheet metal workers have thus opened to them a new field—yet in its infancy—which offers unlimited chances for development, and which also now abounds in sources of increased income. If these opportunities are embraced, the practical sheet metal dealer can derive profits which his less energetic and foresighted competitor has failed to see. There are many good selling features embodied in sheet metal roofing and other sheet metal products, of course— and among them is the long wear assured by their use. It is needless to enumerate reasons for this, as it is so manifestly plain as to render argument with the customers unnecessary. Another point which incurs immediate favor with certain classes is the neat and attractive appearance which these goods possess. The aesthetic feature alone will sell large quantities, and this quality only adds to the versatility of these goods.

The non-leakable element, perhaps the most important in the minds of some builders, is often a deciding factor in effecting a sale of this class of roofing. More or less trouble is always experienced with wooden shingles, as they "spring leaks" easily; and when the question is brought to the customer's attention, it often decides in favor of the metal product.

Merchants handling this class of goods should make a practice of getting information relative to new buildings soon to be erected, and then make a thorough canvass among the owners. This has proven effective in some cases as it has often resulted in good contracts being made. By early gaining this information from contractors and architects in localities where there are some building prospects for the coming year, dealers can work up a good volume of business.

CORRUGATED IRON CULVERTS.

A new use for metal goods is in the construction of culverts, the Pedlar People, Oshawa, Ont., having placed on the market a new product known as Perfect Corrugated galvanized culverts, made in two sections of semi-circular shape, in all standard diameters from six inches to eight feet. In shipping, the sections can be nested together, and before being placed in the excavation, the sections are joined together by locking ribs. The galvanizing is done after the culverts are shaped and as no bolts or rivets are required in assembling the sections, the work of construction is simple, while the danger of damage from rust or decay is reduced to a minimum. Metal culverts can be used in very large quantities in country districts, if the hardwareman goes to the trouble of drawing the attention of municipal councils and farmers to its utility. Consequently, hardwaremen should look into the merits of this line and secure the booklet and sample which can be had by any dealer on request.

Hardware Letter Box

Any questions on trade subjects will be answered by the editor in this department. Do you want any address, any special line of goods, anything relating to the hardware trade? Ask us. Letters from manufacturers, jobbers, travelers, retailers or clerks are solicited. Suggestions for trade improvement or discussions on trade evils are invited.

Rope and Twine.—J. & C. McDonell, Hensall, ask for the names of manufacturers of twine and rope.

Some makers of twine, rope and wire rope are the following: Consumers Cordage Co., Montreal; Hamilton Cotton Co., Hamilton; Brantford Cordage Co., Brantford; Peterboro Cordage Co., Peterboro; Shurly & Derrett, Toronto; M. B. Perine & Co., Doon; Perth Flax & Cordage Co., Stratford; Independent Cordage Co., Toronto; Dominion Wire Rope Co., Montreal, and the B. Greening Wire Co., Hamilton.—Editor.

Boys' Express Wagons.—E. J. Cherry, Vancouver, asks for the names of makers of parts for boys' delivery wagons.

Woodstock Wagon Co., Woodstock; Gendron Mfg. Co., Toronto, and the Wrought Iron Wheel Co., Orillia, manufacture boys' wagons.—Editor.

American Stove Manufacturer.—The Collingwood Hardware Co., Collingwood, ask for the name of a base-burner manufactured in the U.S. known as the "Perfect Home, No. 45."

The Western Stove Works, Peoria, Ill., make the coal heater referred to.—Editor.

Maritime Provinces

Emerson & Fisher's Store at St. John Being Enlarged—Salesman to Manage Stove Business—Trade Improving in Nova Scotia.

HALIFAX.

March 29.—The spring business has opened up with a rush and all the wholesalers are busy shipping supplies. The rush came rather unexpected but the wholesalers welcome the change after a long period of dullness. There is every indication of a heavy spring business, Some of the wholesalers still complain of the delay in shipments from the manufacturers, particularly those in the United States. The Canadian manufacturers in most cases give far better satisfaction as regards shipments than those across the border. Prices are fairly steady throughout the list, no very material changes being reported. There has been another advance in the price of corn brooms, 25 cents per dozen additional being asked. This is the third advance within the last five weeks and it is beginning to look as if the day of 25 cent brooms has disappeared. There has been a sharp advance in galvanized wire poultry netting, the increase being fifty cents per roll, or one cent per yard, which the dealers claim is due to the "dumping clause" in the customs tariff. Collections in some parts of the province are better than in others, but on the whole they are considered to be quite satisfactory.

ST. JOHN.

March 31.—Tenders are being called for by H. H. Mott, architect, for a brick addition to Emerson & Fisher's hardware building on Germain St. It is only a few years since this enterprising firm built their present immense six-storey building and the construction now of an addition is the best kind of evidence that they are meeting with success Tenders close on April 6. The new addition will be used for office purposes and the space at the rear of the store now occupied by the offices will be devoted to enlarging the retail showrooms.

R. H. Irwin, for several years salesman in John E. Wilson's stove warerooms, on Sydney St. and latterly salesman for C. S. Everett, furniture dealer, has accepted the position of manager of the McLean & Holt Company's stove warerooms, on Union St. and entered upon his new duties on Monday last.

A well-known business man passed away on Tuesday, March 23, in the person of William H. Nose, of the firm of P. Nose & Sons, general storekeepers, Main and Bridge Sts. The firm, in addition to carrying on a very extensive grocery and feed business, have a department devoted to hardware, paints, farming implements, etc., and do a very large business with the country people from all along the St. John River. The business will be carried on in future by Leonard T. Nose, a brother, the father, Phillip Nose, having died some years ago.

John K. Parsons, who has conducted a stove and tinsmith business on Charlotte St. for the past fifteen years, has sold his stock to W. A. Sleiper & Co. Mr. Parsons will be associated with R. D. Coles, in similar work, in the future.

W. S. Fisher gave a very thoughtful and interesting address before the Natural History Society last week, on the problem of transportation from a Canadian point of view, especially emphasizing the relation of the Maritime Provinces to this subject, standing as they do, as the gateway for the commerce with Europe. The speaker dealt with the rapid development of transportation facilities, the growth of St. John as the winter port of the Dominion, and the extension of trade from these provinces to the west.

Ontario Trade News

American Can Company Absorbs Norton Can Company, at Hamilton—Chatham Merchants Adopting Debt Collecting Plan—Building Trade Active in all Parts of the Province.

KINGSTON.

March 30.—John Corbett, hardware merchant, was awarded the contract to supply the city with blue stone, at 5⅛c per pound, and A. Chown & Co. wire at $2.75 a hundred pounds.

The civic waterworks committee, awarded the contract for the supply of pump valves to McKelvey & Birch, hardwaremen at 88c per pound.

Charles Somerville, son of R. H. Somerville, has left for Antler, Sask., where he has accepted a position as clerk in a hardware store.

"That makes me shiver," remarked a traveler to your correspondent, as he read about the fire in the Cornwall hotel, where three lives were lost. "It makes one dread sleeping in a hotel, but, of course, we have to secure accommodation," He recalled the hotel fire at Tillsonburg, where a traveler lost his life, and added, "Everything possible should be done to give the hotels proper fire protection. In case of fire, if there was only a strong rope in each room, which would reach the ground, it would often be the case that in this way a man would be able to save himself, when all other avenues of escape were cut off."

As a result of the inspection made by the Government after the Tillsonburg fire, a local hotel was ordered to put in an additional fire escape, and the work has been completed.

One of the best window displays noticed in some time is that at the store of McKelvey & Birch. It is a rather novel exhibit, as it demonstrates the "Useful things in the kitchen, or labor-saving devices." There is the bread-mixer, showing a fine loaf of bread which has been turned out; orange slicers and lemon squeezers, with the lemons and oranges in evidence; raisin seeders, coffee and pepper grinders, bread cutters, cake mixers, food choppers, vegetable choppers and potato parers and ricers.

E. G. B.

HAMILTON.

March 30—After a season of business depression, it is interesting to note that the net profits for the year of the Canadian Westinghouse Company amounted to $320,377.36. At the annual meeting of the company held today, this report was presented. Dividends paid during the year amounted to $249,937.09, and the profit at January 1, 1909, was $431,724.82.

Some idea of the immense building operations which have been undertaken during the past two weeks, can be gathered from the fact that building permits for houses and small factory additions to the extent of nearly $50,000 have been obtained. When it is considered that this total is mostly for houses, which average about $1,500, it can readily be seen that building is on the boom here. Many of the dwellings are of the better class however. This activity in the building line means a decided increase in the wholesale and retail hardware business.

An announcement which is of the greatest importance to builders, architects and contractors, is that Andrew Carnegie has offered to donate $75,000 to the Public Library Board for the erection of a new building for the city library on condition that at least $100,000 is spent on the erection of such a building. The library board, will, it is thought, have no hesitation in accepting the offer, and it appears to be only a matter of selecting a site and deciding upon the plans for the new building. It is likely that a handsome structure to cost considerably more than $100,000 will be decided upon, as the present library building would bring at least $40,000 by its sale.

Other big undertakings which are in the not far distant future, are the erection of a new general hospital on a new site. The present grounds are too congested, owing to constant additions to the hospital, and now that it is proposed to build a new fever isolation hospital, an agitation has been started to find a new site and build an entirely new hospital. In order to do this, it will be necessary to submit a by-law to

the ratepayers and this may be done shortly. There is also considerable activity in the building line contemplated among the manufacturers. The Reid Press, will, it is understood, very shortly erect a $25,000 addition to their plant, and the Otis-Fensom Elevator Company has secured land on which to put a good sized addition.

The announcement that the American Can Company has acquired the Norton Can Company has been confirmed by the heads of the company in this city. An official statement from the firm says the plant and business has been sold to the American Can Company, of New Jersey, and that the owners will take possession on Thursday of this week. Kenneth Bethune and H. P. Nichols, formerly with the Norton Company, will be retained as local representatives of the new owners, and W. C. Breckenridge the president of the old company, will shortly retire. Large additions to the plant are contemplated. D.L.

GALT.

March 30.—The opening of spring has resulted in a picking up of trade in the hardware line in Galt. The demand for house-building material is exceptionally brisk, and a number of dealers interviewed by your correspondent stated that owing to the many new buildings to be erected this year the outlook was very promising. Travelers state that business in Galt, and, in fact, in all western Ontario, in the hardware line is exceptionally bright.

The Galt Free Methodists will shortly ask for tenders for the erection of a new church.

A. D. Dame, salesmanager for the Galt Art Metal Co., has recently returned from a trip to the Pacific coast. He reports that business in the west is exceptionally brisk. Mr. Dame will leave this week on a trip to the Maritime Provinces in the interests of his firm. The factory is running 24 hours a day and are unable to keep up with the orders. The biggest demand is for Galt steel shingles, additional machinery for the manufacture of which is now being installed.

B. E. C.

LONDON.

March 30.—That the Globe Casket Works, which were recently destroyed by fire, will remain in London is now assured. The management expresses satisfaction with the bill, as passed, permitting the city to grant the company 15 years' exemption from taxation, instead of 20 years, as originally intended, and will rebuild as speedily as possible. It is expected the concern will be in running order and employing the usual number of hands in June next.

Another old-time employe of the McClary Mfg. Co. died last week, when Thos. Vallier, of this city, passed suddenly away at Granton. Mr. Vallier, who was in his 62nd year, was in the employ of the McClary Mfg. Co. for over 40 years. For many years he occupied the position of traveler.

One night last week the employes of the McClary Mfg. Co.'s sheet metal and tin departments waited on Jos. Nicholson, for many years superintendent of those departments, and presented him with a magnificent diamond ring, accompanied by an address. Mr. Nicholson is retiring, after a service of seventeen years, on account of his health, which during the past year caused him much suffering and inconvenience.

Building permits are being issued by the city engineer's department at the rate of twenty-five per week, and the indications are that the coming season will be one of the busiest in the building trades in the city's history.

Col. Gartshore, president of the McClary's Employes' Benefit Society, entertained the committee of that organization to an oyster supper in Famous hall, Wellington Street, on Saturday night last, when a most enjoyable time was spent. About forty persons were present.

F. T. Y.

CHATHAM.

March 30.—The debt collection proposition discussed at the last meeting of the retail merchants is reported to be making very favorable progress in the hands of the special committee, comprising Messrs. Cunningham, Hodges and Poile. At the meeting Mr. Cunningham, who has had practical experience in this line of work in his earlier connection with the hardware business, took the position that, instead of taking up the scheme as an rxperiment for only one or two months, it should be placed on a firmer basis. His view was that the experimental nature of the scheme would tend to weaken it, and he thought that any scheme adopted should cover a full year, or at least the balance of the present year. The committee is working along this line, and has been securing propositions from various parties to take charge of the work. Though nothing definite has yet been arranged, the committee will probably have a very satisfactory report to lay before the next retail merchants' meeting, two weeks from to-night. It has been noted here that Brantford merchants are moving along the same line, taking up a scheme similar to that in force in Guelph, which was also the pattern on which the Chatham scheme is being modeled. It has been suggested that, a representative of the Guelph merchants be invited to visit Chatham and discuss with the Chatham merchants the workings of the scheme.

Business here is remarkably good, considering the state of the roads, and the outlook is distinctly favorable. Building prospects are excellent, a number of contracts in Chatham and adjoining district having already been let.

Chatham's source of natural gas supply will in all probability be further tapped in the near future, since an offer from the Volcanic Oil & Gas Co., to supply Windsor is now under consideration by the council of that city. This is the same company which supplies Chatham, and the price in the border city will be 30c. a thousand for household purposes, 5c. more than in Chatham. The fact that the gas is only slightly purified has caused considerable complaint here.

The special number of Hardware and Metal excited lots of favorable comment among local hardwaremen, practically all of whom are subscribers. "It's the best special number Hardware and Metal has ever turned out," is the general comment.

R. J. Clements, proprietor of the Tilbury Iron Works, has made an assignment to Harold Callwood of Tilbury. Mr. Clements purchased from C. Wylie, little more than a year ago. The assignment was probably hastened by a recent fire resulting in a loss of $700, there being no insurance.

E. S. Hubbell & Sons, hardwaremen, Thamesville, are making arrangements for the erection of a coal elevator near the G.T.R. station this spring.

The manufacture of dynamite at the Dunbar & Sullivan factory in Amherstburg commenced last week. It is anticipated that not so much of the explosive will be required this year as last as the lake drilling will necessarily be harder and slower.

The Prairie Provinces

New Warehouse at Brandon—Saskatoon's Big Building List—Emerson & Fisher May Locate Wholesale at Saskatoon—Calgary Merchants Considering Early Closing—Winnipeg Trade News.

WINNIPEG.

March 31.—Considerable anxiety is being felt in many quarters at present, lest the unrest among the labor unions will culminate in strikes, and thus seriously inpede the building proposals for the coming season. The bricklayers are creating most of the agitation and it is thought that other unions will not press to any serious extent for increases of wages. Up to the present the bricklayers are quite relentless, and it is only a matter of a few days when their refusal to work will be felt by many lines of trade. Builders' hardware is not moving as it should be, according to the number of permits that have been let. It would seem almost impossible for any union to withhold the execution of building permits since the past year has been a dull one in that regard. It is hoped that a settlement will be arrived at soon, yet the contractors and workmen are very rigid in their positions.

The Manitoba Linseed Oil Mills Co., opened their $75,000 plant at St. Boniface last week. The new mill, which has a daily capacity of 2,500 gallons, will be in continual operation. The plant proper is 116 feet long and 42 feet wide and comprises a combination frame and cement flax seed elevator of 30,000 bushels capacity. The seed is automatically carried from the elevator to the cleaner and thence into the crushing rolls and afterwards to the expeller. It is then automatically weighed into the rolls and the oil and cake meal are similarly weighed before they go into storage. From a bushel of seed

weighing 56 pounds, the proportion is 18 pounds of oil and 38 pounds of cake. Even the bagging machinery for the cake is automatic so that machinery is used in every place possible though there is a staff of about a dozen men engaged in the mill. There are five of the expellers or oil machines and the building is planned so that the capacity can be readily doubled.

R. W. Patterson is president and G. T. Mumford manager of the new concern.

C. A. Baskerville has sold out his tinsmithing and jobbing business which he has conducted for a number of years in connection with his retail hardware store. He will confine his attention to the hardware business exclusively.

The Mercantile Hockey League Cup was won this year by the Miller-Morse wholesale hardware team. The Miller-Morse hockey team have also won for the third time the Wholesale Hardware Hockey League Cup, and have it for permanent display in their office.

Harry F. Moulden, who has been in the city for a year acting as a hardware manufacturers' agent, has changed his office address from Garry St. to a suite in the new travelers' building. Mr. Moulden has had remarkable success as an agent here, and is highly esteemed by those who have made his acquaintance. Mr. Moulden left on a business trip to Ontario on March 26 and will return in a few days. Mr. Moulden recently donated a cup to the wholesale hardware rinks. The cup is accompanied each year by four miniatures which become the permanent possession of the winners. The James Robertson Co. have won the trophy for the season '08-'09. After three successive wins the cup becomes the permanent possession of the successful rink. The second prize, consisting of four solid gold lockets, presented by David Philip, manufacturers' agent, was won by the J. H. Ashdown wholesale hardware team. Frank Agnew, of the James Robertson Co., is the president of the Wholesale Hardware Curling Association. J. M. Lynch, of Miller-Morse, is vice-president, and Robert Fair, of Geo. D. Woods, secretary.

A. Ross, late of the Marshall-Wells wholesale, of this city, and his brother, Hugh Ross, of Edmonton, have taken over the hardware business of Hockin & Siddons, Moose Jaw.

L. C. H.

BRANDON.

March 30.—Geo. White & Sons, are calling for tenders for the erection of a brick warehouse on Assiniboine Ave. adjacent to the premises of the Brandon Brewing Co., which should give them plenty of space in which to handle their increasing business at this point.

Enquiries for prices on building materials are coming in every day from the farmers which should result in a heavy sale of these goods during the coming season.

W. B.

SASKATOON.

March 29.—Prospects look bright for a busy building season and as soon as the ground can be excavated there will be general activity. Hardwaremen are looking forward to a good year with the contractors, who themselves are optimistic regarding the coming summer. Several permits have been taken out and quite a number of buildings of all kinds are in sight.

One of the first contracts to start this year was the C.N.R. freight sheds and the ice house. These are now nearing completion and it is generally understood that the C.N.R. station will be built this year. A warehouse has been built for J. G. Nicholson, implement agent, and an addition is about to be made to it. An addition will be made to the Gordon & Sparling block while Early and Early will erect a warehouse on 20th street. Offices and yard buildings are now under way for the Farmers' Lumber Co., who recently purchased a site and located here. Some material is on the ground for the Bank of Montreal and the Kempthorne warehouse, both of which will be erected on 2nd avenue. An extensive addition will be made to the Empire hotel while negotiations are under way for a site for a new hotel. Plans are completed for a big warehouse for the International Harvester Co., who have purchased a site here on which to erect a distributing warehouse.

Amongst those who have signified their intention of building residences this year are Hon. A. P. McNab, A. H. Hanson, Magistrate J. Jackson, R. H. Timmins, H. H. Elford, J. Priel, H. M. Earle, B. A. Archibald, S. R. Ross, W. Houlding, C. Wentz, A. H. Shannon, J. G. Nicholson, and W. Murphy. F. H. Webb and Webster & Noel are talking of putting up apartment blocks while the Union Bank people are figuring on building. Wilson Bros. have added to their premises on First Avenue. A frame church will be put up by the German Lutherans while a new land titles office is on the programme.

A new hotel is being built at Outlook, Sask., for Bastedo & Cheney.

A. L. Haining, of St. John, N.B., is in the city this week in connection with establishing a branch warehouse here for Emerson & Fisher. Some time ago a site was purchased on which the firm will erect a warehouse, making this a distributing point for wholesale hardware and stoves. Interviewed by your correspondent Mr. Haining stated that his plans were not yet completed but would be in a few days.

British Columbia.

Nail Factory to be Established at New Westminster—Building Outlook at Grand Forks—Canadian Cement in Favor at Seattle—Victoria Hardware Firm Enlarging.

NEW WESTMINSTER.

March 27.—The Hamilton Nail and Wire Company, Hamilton, Ont., has purchased four acres at the Fraser river here and will operate a large factory as soon as it is possible to do so. Raw material can be readily brought by the big liners which come to this coast regularly.

The hardwaremen have a team in the business league of bowlers, and have a number of matches on hand.

E. J. Fader has given the Schaake Machine Works the contract of constructing an improved logging appliance that he has invented. The improvement consists of an endless cable revolving on a double drum and wrapped a sufficient number of times to prevent slipping. With the use of this invention it is claimed that logs can be hauled from any part of the woods and even from the top of a mountain. The endless cable does away with the haulback and is expected to be a boon to loggers in other ways.

REVELSTOKE.

March 27.—S. Gisley, of Vancouver, is here with C. H. Revercombe, general manager of the Victoria Air Light and Power Company, which has secured the patent rights for this province of the Intensified Light Co., Toronto. The light is now being introduced in this city, and is 95 per cent. air and 5 per cent. gasolene. Those interested in the company in British Columbia are M. Carlin, late of Golden, now of Victoria; John Turner, C. R. Brown, Calgary; J. C. Ross and R. Oliphant.

GRAND FORKS.

March 27.—Building operations in this city during the coming summer promise to far exceed those of any other year since the city was inaugurated. The fire of last summer fairly well gutted the business section, which was almost constructed of wooden buildings. Since then, a fire limit by-law has been passed, which takes in all of the business portion, and which calls for buildings of fireproof construction. The only building to this regulation that has been constructed is the Province hotel, with brick and marble facings, but a number of other fine buildings are planned. When these are completed there will be a vast improvement in the appearance of the city, and there will also be less danger from fire.

VICTORIA.

March 25—The condition of trade is shown by the enterprise of business firms in making additions to their premises. The latest firm to add to their quarters is W. S. Fraser & Co., wholesale and retail hardware merchants. This house has been doing business in a two-storey building with a one-storey warehouse at the back. Business has increased to such an extent that the present floor space is altogether inadequate, and they have decided to make extensive additions. The present buildings were built so that they could be added to, so three storeys will be built on the back part and two on the front, making a large square block four storeys high. Work is to be commenced at once. The firm is also negotiating for a property near the new C.P.R. yards, where they may erect warehouses for their wholesale stock.

Western Canada Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected by Telegragph up to Noon on Friday.

Winnipeg, March 31—While business of all kinds is showing the stir that invariably precedes the coming of spring, there is little of a startling nature to write about. The weather has been very soft and mild all week, and has been further marked by one or two very heavy falls of snow, which have been general throughout the whole west, and have been welcomed by the farmers, as in many sections further west particularly, the snow fall had been light and had almost entirely disappeared. It is generally conceded that nothing could be more opportune to put the seed bed in a good condition than this heavy blanket of soft snow, which is already beginning to melt and making the roads very sloppy and difficult to travel.

Implement men report a great movement in their business and the inquiry and orders both very much in advance of last year at the same time. New settlers are arriving daily, not in the hordes that marked the immigration two and three years ago, but in picked parties running from 20 to 100, and all with more or less money. A larger percentage of these settlers are remaining in Manitoba than has been the case in the past. The opening of so many homesteads in the northern part of the province, has had the effect of not only bringing people to Manitoba to homestead, but it seems to have awakened interest in Manitoba lands, and the older, larger and more conservative real estate firms report some good sales, and also many inquiries, particularly for land near Winnipeg.

The season promises to be an especially active one in building, not only in Winnipeg, but in the country districts and smaller towns, and the buildings are of all kinds, shapes, sizes and costs.

Elevators Going up,

A large number of elevators are being contracted for at different points, many of them along the line of the G.T.P. A considerable amount of building on the farms is taking the form of stabling for cattle, and marks the degree to which many of the districts are departing from purely wheat farming and going in for both dairy and beef cattle.

A well-known breeder of shorthorns was asked recently when he intended to have his customary sale of surplus stock. He answered: "I am not going to have one, I have nothing to sell, the private demand has been so good all winter that I have sold everything I want to sell, and in fact I am in the market myself for some additional breeding stock."

Cattle Prices High.

Another feature was that of the high prices obtained for good males of beef type at the annual sale at Regina, in connection with the spring show, which was concluded on Friday, March 26th. Anything in the shape of a well-bred quality bull, either Shorthorn or Hereford, brought good prices and the bidding was active.

The year promises to be a record one in the matter of both cattle and horse breeding in the Canadian West; alas that it cannot be said that it will be a record one for hogs also, but as previously indicated, the farmers have taken what our Scotch friends so forcefully describe as "a scunner" at hog raising just at present, and are getting out of it with a zeal that is certainly worthy of a better cause.

Changes in Wheat Situation.

The wheat market has been both erratic and interesting, and after very considerable depression, has shown a very decided rally with an active increase in export trade. The lowering of the rates from Buffalo and the consequent lowering of rates along the Canadian route coming almost simultaneously with the advance in British markets, occasioned by light Argentine and Australian receipts made it possible to do business, and 25th, 26th and 27th of the month witnessed a very active trade with cash wheat higher than it has been all season. Receipts have been liberal and increasing, but these have come forward mainly out of interior storage, as all elevator lines report receipts very light. Country roads are in bad condition, and it is getting so near seeding as to make it doubtful as to much being delivered before that event is over. The small deliveries at interior elevators will certainly increase the full feeling of the market.—H.

Hardware Markets.

The unfavorable conditions of the weather for the past two weeks has somewhat hampered the hardware trade. The months of January and February were so encouraging in the matter of trade and cash collections that an even better business was anticipated in March. The unexpected has happened and the month of March goes on record this year as a backward one. The volume of trade done, however, is much in excess of the trade in March a year ago. Disappointment is felt generally in the weak sale of paints and builders' hardware. The majority of retailers were prepared with large stocks some time ago, but these lines have not moved in an encouraging way. The weather is largely to blame, since it has been too wet to undertake any outdoor renovating..

Wholesalers report business quiet, also, at the present time, but western trade in general is very active. Prices have not changed, and the following are quoted:

Price Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.90 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base; plain galvanized, wire, 6, 7, and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

POULTRY NETTING—57½ per cent.

HORSESHOES — "MRM" and "Bell" iron, No. 0 to No. 1, $4.50; No. 2 and larger, $4.25; snowshoes, No. 0 to No. 1, $4.75; No. 2 and larger, $4.50; steel, No. 0 to No. 1, $4.85; No. 2 and larger, $4.60; featherweight, $6.

HORSENAILS—"MRM," cold process—No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

WIRE NAILS—$2.70 Winnipeg, and $2.25 Fort William.

CUT NAILS—Now $2.90 per keg base.

PRESSED SPIKES—¼x5 and 6, $4.60; 5-6x5, 6 and 7 $4.25, ⅜x6, 7 and 8, $4.10, 7-16x7 and 9, $4.00, ½ x 8, 9 10 and 12, $3.90, ⅝x10 and 12, $3.75. All other lengths, 25c extra, net.

SCREWS—Flat head, iron, 80, 10, 10, and 10 per cent.; brass, 75 per cent.; round head, iron, 80 per cent; brass, 70 per cent.; coach, 67½ per cent.

BOLTS—Carriage ⅜ and smaller, 65 per cent.; 7-16 and larger, 55; machine, ⅜ and under, 60 and 5; 7-16 and over, 55 per cent. copper; No. 7, 29c; 8 29½c; and over, 45; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3½; small lots, 3; stove bolts, 77½.

RIVETS AND BURRS—Iron rivets, 55 per cent. copper; No. 7, 29c; 3, 29½c; 9, 30½c; 10, 31½c; 12, 34c. Copper burrs, No. 7, 39c; 8, 40c; 10, 43c; 12, 46c. Copper rivets and burrs: No. 8, 30½c; 10, 33c per lb.

SHOVELS—40 and 5 p.c.

HARVEST TOOLS—50, 10 and 5 p.c.

AXE HANDLES—Turned, s.g. hickory, $3.15; No. 1, $1.90; 2, $1.60; octagon, extra, $2.30; 1, $1.60.

Are you interested in any of the lines that are advertised?

A Post Card will bring you price list and full information.

Don't forget to mention Hardware and Metal.

MUCH TRUTH

Agencies formed many years ago are still using our product.

BECAUSE

They find it is much easier to sell at a profit a line that is recognized as a standard of perfection than to spend time and expense on introducing new lines.

WESTERN CANADA GOSSIP.

W. Manders, Bradwell, Sask., is advertising his hardware business for sale.

The hardware stock of G. O. Edwards, Sedley, Sask., is advertised for sale by auction.

H. W. Storey, Indian Head, Sask., has purchased the hardware business of Jas. Lamb, at Francis. Storey Bros. commenced business in Indian Head tow years ago, and this branch store is a very creditable showing.

The Sheffield Cutlery Co., of Sheffield, Eng., write that they are considering the advisability of opening a wholesale house in western Canada to extend their trade, and are considering Calgary as a central point, most suitable to their business.

A change has been made in the partnership of the Oxbow, Sask., Hardware & Furniture Co., by which H. C. Wylie will retire from the company and will devote his entire time to the furniture business.

SLIDING FURNITURE SHOE.

The Onward Manufacturing Company, Berlin, Ont., are introducing a new device which seems destined to displace the wheel castor on furniture, pianos, metal beds, etc., it being in the form of an oval ball of metal or glass on a spring steel stem which will fit into any hole not larger than the washer. Unlike the castor the sliding shoe will not drop out if the furniture is lifted and there being no mechanism to rust or get out of order, the shoe will always serve

Onward Sliding Shoe for Furniture.

the purpose for which it is designed. The article should sell well in hardware stores to replace castors which give trouble. Send for descriptive literature.

CIRCULAR FOR DISTRIBUTION.

A newspaper advertisement may be made to do double duty at but a few cents extra expense. After the ad has appeared, instruct the printer to run off two hundred, five hundred, or a thousand circulars from the same type.

Since there is no extra expense for setting type, the cost will be but little more than that of the paper used. Sometimes where different ads are run every week, the printer may keep the type of one week set until that of the next week is set. Then he may run off the circulars from the type of the two weeks. This will permit of a larger list of articles being mentioned and the cost will be but little more than when a single week's type is used.

These circulars may be handed out to all who enter the store by a small boy stationed at the door. Sometimes they are wrapped in every purchase made at the store.

By means of these circulars many people are reached who have not read the ads in the papers, and a double impression is made on those who have.

The Sherwin-Williams News

VOL. I — SOMETHING NEW EVERY TIME — NO I

Published by
THE SHERWIN-WILLIAMS CO.
Canadian Headquarters and Plant:
639 Centre St., Montreal, Que.
Warehouses:
Toronto, Ont. and Winnipeg, Man.
Edited by
THE LITTLE PAINT MAN.

Shake

This advertisement looks something like a magazine page, and as all magazines have an introduction in their first issue, I

am going to have one, too. I must write it myself, and bein' a paint maker, not an editor by trade, I hope you will pardon it if my language is not up to the high flowin' literchoore you read in THE GLOBE and THE WITNESS.

There really is not much to say. I am simply going to try to tell you (as entertainingly as possible) in this space as much as I have room for about the advantages of handling Sherwin-Williams Paint and Varnish Products with a few tips and bits of information mixed in for good measure.

I guess that's about all, and here's hoping you'll overlook any errors I may make in this editin' business.

I sometimes wish I was a paint seller instead of a paint maker. Bet I'd have everybody in town Brightening up.

By the way, are you prepared for early Spring trade with a complete stock of Sherwin-Williams Paints, Varnishes, Stains and Enamels?

Another Big Force Behind the S-W. Agency.

Did you know that early in March we started a campaign of newspaper advertising in 180 newspapers in all parts of Canada? It will continue through the Spring painting season. Most of the papers are of local circulation; some are national. Together they cover the *entire* Dominion, and will be a tremendous force in sending paint buyers to your store for Sherwin-Williams products.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Activity.

D. Knipfel, Berlin, will erect a new block for the Pearl laundry.

The Watt Coupler Co. may build a factory at Woodstock, Ont.

The Whitman & Barnes Mfg. Co., St. Catharines, is erecting a forge shop.

Shurly & Dietrich, Galt, report returned good business at their saw factory.

The Farmers' Elevator Co. have plans for the erection of a new elevator at Melita, Man.

The McCormick Co. propose to erect a sash and shade factory at St. Boniface costing $15,000.

The Murray Shoe Co. has taken out a permit for the erection of a factory building at London.

The Hamilton Bridge Co., Hamilton, will shortly start work upon several additions to their plant.

E. F. Hutchings, of the Great West Saddlery Company, Winnipeg, will erect a large warehouse at MacLeod, Alta.

The Joseph Bowman structural steel concern may locate in Sherbrooke if that city grants certain concessions.

A permit has been taken out for a $5,000 brick addition to the Canada Steel Goods Company's factory at Hamilton.

Construction will shortly commence at Eburne, B. C., upon a large elevator to be erected by J. C. White, of Duluth, Minn.

A Hamilton nail and wire concern and a Winnipeg metal fencing company will likely build branch plants at New Westminster.

K. Burnett, of Nanton, Alta., has secured a site at Vancouver on which he will erect a large grain elevator and warehouse.

The E. Long Mfg. Co., wants to build a new factory doubling its present capacity and has asked the Orillia council for a free site.

The Marine and General Engineering Co., Sydney, C.B., will go on with the erection of its plant and open up for business at once.

It is understood that the New Westminster Board of Trade will take active steps toward the establishing of an elevator there.

Witte Bros. & Co., of Newark, N.J., will next year build at Berlin a branch factory for the manufacture of cloth-covered buttons, and dies.

Shaw & Mason, Sydney, C.B., makers of Colonial anti-friction metal, will build a branch plant in the U. S., to look after orders arising in that country.

It is stated that Seattle capitalists are contemplating the establishment at Vancouver of a large manufacturing plant, for locomotives and logging engines.

Stewart & Witton have purchased the old Central church property, at Hamilton, on which they will erect a building to be used for light manufacturing purposes.

The Burrel-Johnson Co.'s iron works, Yarmouth, N.S., recently damaged by fire, are again getting into shape and rebuilding. Over 100 of their men have resumed work.

The Durham Furniture Co. has made a start at the biggest pile of logs Durham ever saw. It is estimated that there is probably in the neighborhood of 1,100,000 feet stocked up.

F. L. Leighton, managing director of the Vancouver Engineering Works, states that by June 1 his company will expend $100,000 in the construction of their proposed new building and plant.

It is stated that a number of St. Mary's and Owen Sound capitalists intend to form themselves into a cement company, and have taken a number of options on rock and clay land near St. Mary's.

The reported curtailment of the B. C. copper smelters is hardly correct. The Granby smelter is operating seven of its battery of eight furnaces at the present time, and has increased its capacity 25 per cent. during the past year.

That the company be at once reorganized and work at the works in Wiarton at once resume was the decision of the shareholders of the Colonial Portland Cement Co. There are assets of five hundred thousand and very few liabilities.

Representatives of a big American packing house have been in West Toronto syping out the land in the vicinity of the local abattoirs, and it is understood that before very long the foundation will be laid of another big abattoir.

The Gurney Foundry Co. have taken out a permit for the erection of another machine shop on their premises at West Toronto, to cost about $6,500. The dimensions of the new building will be 80 by 130 feet, and something like 100 more men will be employed.

It is understood that Jas. A. Moore, of the Moore Iron Works, Port Townsend, Wash., is negotiating for a site at Vancouver on which to locate immense iron works and possibly a steel plant. The investment planned contemplates an initial expenditure of at least $500,000.

New Glasgow, N.S., is to have a new industry called the Harris Forge Co., capitalized at $25,000. Modern forge shop machinery will be immediately installed, to manufacture shape and drop forgings, for which there is a great demand, and practically no competition. The drop forging industry is an entirely new one in the Maritime Provinces.

One of the new industrial concerns that will open up in Montreal this spring is a shovel and sheet iron factory. Geo. Woolfe, of Glasgow, is making final arrangements to this end, and expects to have the necessary plant shipped from Scotland early in May. It will be a branch of the Glasgow factory, which is one of the oldest in its line in that city.

Municipal Undertakings.

Cobalt is to have a waterworks system.

Owing to leakage, St. John wants to increase its water supply.

Galt's waterworks commission has asked for $7,800 for improvements this year.

Medicine Hat Council have decided to ask the ratepayers to vote $55,000 for sewer purposes.

The Goderich Council has decided to submit a by-law to the ratepayers to issue $20,000 waterworks debentures.

The Goderich Council has decided to submit a by-law to the ratepayers to issue $20,000 waterworks debentures.

It is proposed to install a gravity system of waterworks at Claresholm, Alta., at a cost estimated of $54,000.

A great many sewers will be constructed in the Deer Park district of Toronto, recently annexed to that city.

The Godson Contracting Co., Toronto has the contract for constructing the first section (6,386 feet) of that city's trunk sewer, at $138,528.

The Halifax borrowing bill has been introduced before the N. S. Legislature. It provides for items including $50,000 for the construction of new sewers.

The Pembroke Waterworks Committee will secure plans for a new waterworks system and submit same to the council at the first meeting in May.

Tenders will be received until April 7, for pipe-laying, water tower, cast iron pipe, and fire hydrants and valves for the town of Weyburn, Sask.

Tenders will be received until April 15, for the supplying of the various materials required in the extension of the new waterworks system at New Liskeard.

The Elk Creek Waterworks Co. are planning extensive improvements, including the laying of duplicate mains and the construction of a large reservoir at Chilliwack, B.C.

Tenders will be received until April 13 for all labor necessary for laying water mains and sewer pipes, and for furnishing certain materials required for the work at Edmonton.

At a recent meeting of the Vancouver Board of Works, the report of City Engineer Clement was adopted. The recommendations include the construction of sewers amounting to $6,950.

E. A. Fultz, of Lancaster, Ohio, was in Welland on Monday with a view to starting a window glass works there. There is no window glass plant in Canada at present. About 100 men will be employed.

At a meeting of the executive committee of the Northwest Winnipeg Ratepayers Association, it was decided to ask for the immediate construction of water mains on Selkirk, Pritchard, Manitoba and Magnus streets.

The Canadian Agency of London, England, has made an offer to the municipalities of South Vancouver, Point Grey, Richmond and Burnaby for the construction of a combined waterworks system through these districts.

IVER JOHNSON

Truss Bridge Bicycle

TRUST THE TRUSS

To-day there are a score or more different makes of bicycles.

Yet the Iver Johnson is in a class by itself.

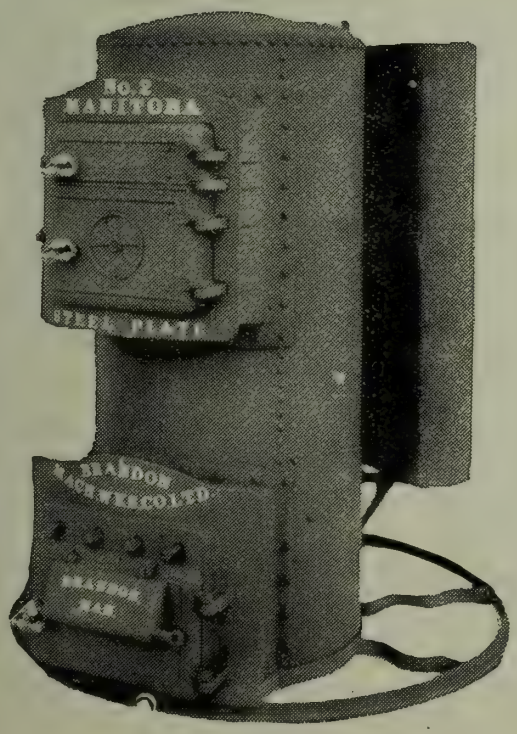
The others are all about alike except in name plates.

One of the distinctive features of the Iver Johnson is the Truss Bridge—the same principle employed in bridge construction. This holds the frame absolutely rigid—all parts in perfect alignment. This elimination of "give" and "play" makes the Iver Johnson wonderfully easy-running. Then, the extra strength given by the Truss Bridge adds immensely to the safety. Think what that means to your customers.

Besides, the prices are moderate in the beginning and as it costs practically nothing for repairs, if not mistreated, it costs least in the end.

Send for our free catalogue, a neat little booklet, which illustrates and describes our various models and gives prices and options. You will do well to look into our

AGENTS PROPOSITION



It is a good way to make good money on a good proposition. Write to-day

Iver Johnson's Arms & Cycle Works

to sell the

Manitoba Steel Plate Furnace

We want a good hardware man in every town to handle our furnace. It will burn Souris and other soft coals mined in the West, and it will burn them economically. It is the furnace Western people have been looking for. If you are from Missouri, so much the better. Ask us and we will show you.

The consumer saves 25 to 40 per cent. on fuel when he uses the Manitoba.

The Brandon Machine Works Co., Limited

Brandon, Manitoba

Railway Development.

The N.T.R. is now under contract from Moncton to Winnipeg.

An extension of the electric line at St. Thomes will be made to Aylmer.

The Nipissing Central Ry. will build and run an electric line in Haileybury.

The Peterboro Radial Ry. must complete its extensions to Lakefield and Stony Lake within three years.

The Blind River Colonization Ry. plans to build from Blind River, Ont., north to a junction with the G.T.P.

The C.P.R. are negotiating for St. John property upon which to construct yards and terminal facilities at a cost of $250,000.

The Simcoe Electric Railway & Power Company are applying for incorporation to construct an electric railway from Midland to Coldwater, Ont.

The C.P.R. will double track their line between Smith's Falls and Peterboro, a distance of 133 miles, and carry out the construction of the direct grain route about 76 miles in length.

The final location of the G.T.P. from Edmonton to Prince Rupert is completed, and engineers will shortly survey the Vancouver branch from a 30-mile radius of Fort George and Vancouver.

Representatives of the municipalities from Pickering to Cobourg and Campbellford, who are interested in the proposed Lake Ontario, Campbellford and Western branch of the C.P.R., decided to urge the C.P.R. to proceed with the construction of this railway, the charter for which was granted in 1904.

New Companies.

Lockerby & McComb, Montreal; capital, $99,000; to manufacture, pitch, coal-tar and roofing material. Incorporators, D. W. Lockerby, J. H. McComb and J. T. Fisher, Montreal.

Art Wallpaper Shop, Toronto; capital, $50,00; to manufacture and deal in wall papers, paints, oils and glass. Incorporators, T. H. McGee, A. C. Fox, and J. H. MacKay, Toronto.

The Wm. Cane & Sons Co., Newmarket; capital, $250,000; to take over and conduct the woodenware business of the United Factories at that town. Incorporators, W. H. Cane, L. P. B. Cane and V. E. Cane, Newmarket.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Lawn Sprinklers for Summer.—The approach of warm weather is brought nearer to one by the displays of "The Niagara" lawn sprinkler, manufactured by the Novelty Mfg. Co., Waterbury, Conn., makers of "Wilwear" metal goods. "The Niagara" is a heavy brass sprinkler ring, which produces a vapor-like spray from three series of holes placed at different angles in the ring. It is claimed for this ring that it does not upset; that there are no parts to get lost or out of order; that it will not wash away the fine seeds on the lawn or garden; and that it gives a refreshing atmosphere. With care "The Niagara" should last for many years. The Novelty Mfg. Co. issue catalogues of all their manufactured goods and invite the trade to send for them.

Trucks and Barrows.—The John Watson Mfg. Co., Ayr, Ont., in their "Truckology" booklet, just issued, describe the products of their factory. The company are manufacturers of trucks and barrows for all purposes. They also make kindred articles, such as skids, casters, and lawn rollers and some time ago commenced making metal flower vases and lawn settees. One of the latest lines put out by the company is an invalid table, which is a great convenience for the sick room. The company have been in business 58 years and claim to be the largest truck makers in Canada. The catalogue certainly shows some very fine specimens in the line of trucks, and should be worth having by any hardwareman.

The Green Book.—The Smith Hardware Co., Montreal, manufacturers and importers of hardware specialties, and which was recently incorporated, has just issued its first catalogue, which is appropriately called the "Green Book." The cover is green in color, and the book contains 110 pages of illustrations, descriptions and prices of articles handled by hardwaremen. In the front of the book the company has prominently placed its motto: "Quality remains after price is forgotten." One article mentioned is Devine's "Red Devil" water motor, which can be attached to a kitchen faucet for the development of power. It develops 5,000 revolutions on an 80-pound pressure, and this power can be used for polishing, buffing, grinding and running small machinery. It may be used, too, to run an electric fan, or the sewing or washing machine. There are many other uses to which this motor can be put and it looks like something more than a mere toy.

An Artistic Hanger.—A wall hanger which is worthy of a conspicuous place is that one recently sent out by the Dominion Cartridge Co., Montreal. It is the work of A. H. Hider, a Canadian artist, and the product of a Canadian lithographing company, depicting an open-air shooting scene. Few Canadians realize what a large and important industry the preference for Dominion-made shells and cartridges is building up. Their plant at present consists of 43 buildings on a 200-acre reservation. During the past few years the business of the concern has vastly increased, and this is due both to the quality of the goods and the fact that the company advertises in nearly all the principal papers and magazines of Canada, thus co-operating with the hardwareman and salesman.

The Frosting of Windows.—The Dennis Wire & Iron Works, London, who have secured the Canadian agency for the Kawneer system of metal glass setting for store fronts, offer to send catalogues and samples to any reader of Hardware and Metal. Their system is fully described in a very interesting catalogue, giving numerous illustrations, one of which is a model store front. A most interesting chapter is devoted to the frosting of windows, while other subjects treated include the lighting of windows, wind pressure on glass, sectional details of construction, etc. Any merchant intending to build or remodel his store will find the catalogue invaluable.

NEW OREGON PEDDLERS' LAW.

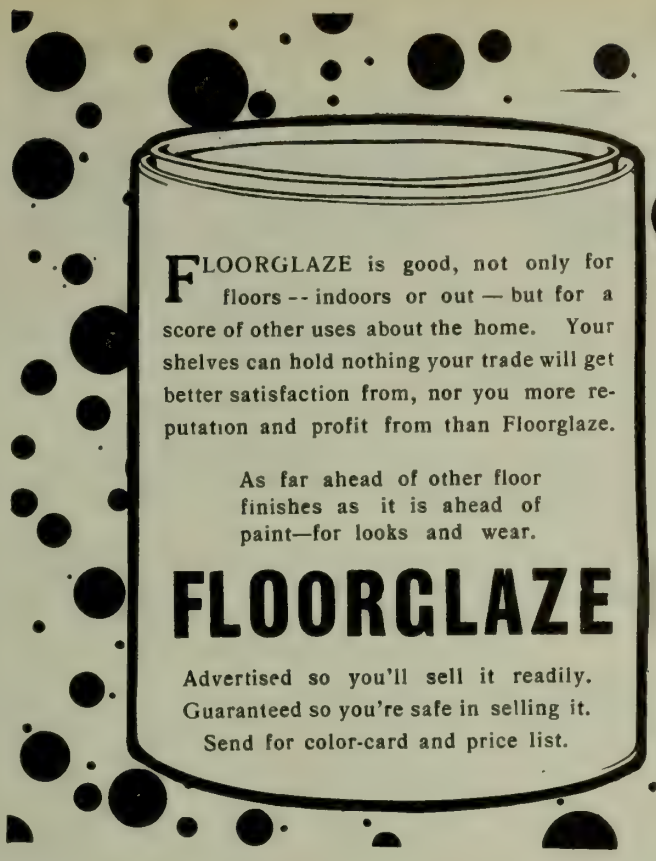
Every peddler, whether principal or agent, shall before commencing business in any county of the State of Oregon, make application in writing and under oath, to the County Treasurer for the county in which he proposes to make sales, for a county license. Such application must state the names and residences of the owners or parties in whose interests said business is conducted, the number of horses and vehicles to be used by him. He must also file an affidavit of the quantity of goods, wares and merchandise as are in the county. He shall also make a special deposit with the county treasurer in addition to the license fee. The amounts to be paid for licenses are as follows:

Peddler on foot, $25; peddler with one horse and wagon, $100; peddler with two horses and wagon, $150, and peddler with any other conveyance, $300.

The special deposit required to be made must remain with the county treasurer for 90 days after the license has been cancelled or has expired, and is subject to taxes, attachment, execution or claims that may arise under his license, etc.

Violations of the law are punishable by a fine of $50 to $500, and from one to six months' imprisonment, or both such fine and imprisonment.

Gray & Campbell have been awarded the contract for the erection of the new Fernie, B.C., city hall.



News of the Paint Trade

THE SPRING CAMPAIGN.

Having decided upon, and set into operation, his scheme of outside attack for the stimulation of the spring trade, the dealer should now turn his attention to his interior attack. It is impossible to over-estimate the value of a well-kept stock, and a judicious display of signs, and cards, in concentrating the attention of a customer upon the paint department. If a merchant wishes to get the best results from his paints he must thrust them prominently under notice. There should be no round-the-corner location for the department. No hiding away in a place where the light is so bad that a customer can hardly distinguish one tin from another. Paint is associated with everything that is bright and cheerful.

If the merchant has not already done so, let him bring his paint stock well to the front, where the surroundings will enhance the attractiveness of the colored labels on the tins, and command the attention of the customer who may have entered the store for some article totally different from paint. The merchant should remember this one great fact: that paints cannot sell themselves, they need pushing, just as any other line. With a little ingenuity a paint stock can be made the prettiest part of the hardware store. Not only do the tins lend themselves to display, but the dealer has at his disposal the artistic designs of the manufacturer to make his paint department a striking show of color among the quieter lines of hardware. Color always attracts the eye, and the customer entering the store will naturally be drawn to the display, and then comes the opportunity of the wide-awake salesman. The sight of a prettily painted house on a card may cause many a property owner to think that perhaps his house would look better for some paint. The merchant should make full use of his hangers, cards, etc.. He should take a careful scrutiny of his store. Pick out every spot where smart colored advertising matter will meet the gaze of a customer, and place something there. Use a little care in the selection of the matter. Do not place a round card where a square one would look better. Be artistic, for paint is artistic, and thus you will have a strong selling force at work immediately the customer enters the front door. An indiscriminate piling and setting up of signs on counters and show cases, or hanging up of cards on shelves and walls cannot be too strongly condemned.

No matter how attractive a window display may be, unless the interior display is equally as strong, the full effectiveness of the combination is lost. There must be no falling off in interest from the time the customer is attracted into the store by the window until he leaves it. Effective co-operation between the window display and the interior display, is the strongest selling force that the merchant can evolve.

FLOORGLAZE is good, not only for floors -- indoors or out — but for a score of other uses about the home. Your shelves can hold nothing your trade will get better satisfaction from, nor you more reputation and profit from than Floorglaze.

As far ahead of other floor finishes as it is ahead of paint—for looks and wear.

HORSE NAILS

Success has attended the sale of "M.R.M." NEW COLD PROCESS HORSE NAILS, right from the start. Some reasons why:—

They are made from the best material.

Pattern is correct and is kept so.

Every care taken in their manufacture.

Thorough inspection before shipment.

There are no better Horse Nails made than the "M. R. M."

THE MONTREAL ROLLING MILLS CO.

Paint and Oil Markets

MONTREAL.

April 2.—A strong spring feeling is now being shown in the paint and varnish trades. Orders are swinging in well, especially in ready-mixed paints, while inquiries are extremely promising, showing a stronger degree of confidence in the coming spring trade. Manufacturers and jobbers are now much more optimistic, and say that trade is at last being aroused from the lethargy which has existed for some time. With warmer weather, orders will become even better and the prospects look exceedingly healthy.

TURPENTINE — Turpentine has shown a greatly increased turnover as regards shipments compared with the output a few weeks ago. Stocks, however, have accumulated, and the demand is quickly met without any change of figure. We quote 58c for single barrels, net 30 days.

LINSEED OIL—Linseed oil continues to move in increased volume, and good trade is opening out. Complete harmony does not appear to exist in some quarters as to prices, but generally the following quotations are adhered to: Raw, 1 to 4 barrels, 59c; 5 to 9 barrels, 58c; boiled, 1 to 4 barrels, 62c; 5 to 9 barrels, 61c; strictly net, 30 days.

GROUND WHITE LEAD—Business continues good and grinders are satisfied with the prospects. With the recent strengthening movement in pig lead it was thought that a firmer tone would be displayed in quotations for the various brands of white lead, but the lead market fell away again, and prices remain the same: Strictly pure, $5.50 to $6 according to brand, and No. 1, $5 to $5.50 f.o.b. Montreal.

RED LEAD—The demand is fair, but nothing unusual for this time of the year. The holdings being light, prices are slightly firmer. We quote: Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; in less quantities, at $6 per 100 lbs.; No. 1 red lead, casks, $4; kegs, $4.50. and smaller quantities, $5.50.

LIQUID PAINTS—A spring buoyancy is now in evidence, and rush orders are numerous. As makers were extremely busy during the winter making up stocks, no delay is being felt in the shipping. All colors and sized tins are in demand.

VARNISHES—There are signs of a much better feeling in all classes of gums and varnishes. Makers are buying more freely, stating that the outlook warrants it. Household, carriage and furniture varnishes are in strong demand.

WHITE ZINC—Some satisfactory shipments are being made, especially to Western Ontario, where the spring seems to have opened out rapidly. We quote: Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5¾c.

PUTTY—All carloads of assorted paints and varnishes seem to include a good percentage of putty. The tone of the market is bright in harmony with the better business in other lines. We quote: Standard putty, 880 lbs., in casks, $1.65; in 100-lb. drums, $1.90; bladder putty, 400 lbs. in barrels, $1.90: in 100-lb. cases, $2.05; in 25-lb. drums, $2; 25-lb. tins, $2.05; 12½-lb. tins, $2.25 f.o.b. Montreal.

TORONTO.

April 2.—Comparatively quiet are all paint lines. That is to say, while business is steady and good, there has not been the advance during the past week that there has been during the past few weeks. Seasonable lines, lead, oil and varnishes, are going out in immediate sales and orders for future delivery call for these lines as well as general sorting-up goods. Brushes are active; glass is firm, but very little is doing. This condition, too, applies to putty. Oil is firm and likely to remain so for at least three months. Turps are easy, though unchanged in price quotations.

LINSEED OIL—Local quotations remain at 59c and 62c for single barrels of raw and boiled oil, and 5 barrel lots are selling at 1c a gallon less. Flaxseed is very high in Chicago and other U.S. paint centres, but the Argentine is marketing its crop in Europe, and English crushers can sell oil cake at quite reasonable rates when compared with the prices prevailing across the border. India will soon be in the market with a fair crop, and though there may be a stretch during the summer until the U. S. and Canadian crops are reaped, it is hardly likely that there will be the advance in price of oil in Canada that is ruling in the U.S. at present. Our quotations are now just below English prices, and while the market is firm and may go up slightly, the advance will not be very great. On the other hand, there will certainly be no decline for at least three months, so say the paint jobbers.

TURPENTINE—Single barrels, 58c; 2 to 4 barrels, 57c; and 5-gal. lots, 63c; the unchanged prices from last week still prevail.. The supply in the south is greater than was anticipated, and with the new crop in sight, and which is already estimated, the market is easy. There is, too, cutting being done by independents, though the purity of the cut price turps is not guaranteed. These conditions have helped to keep back any advance, if such was anticipated. This adulteration of spirits of turpentine is causing some agitation for legislation to be indulged in, and led to the Department of Agriculture at Washington taking up the matter of investigation.

WHITE LEAD—Probably the most active paint line at the present time is lead, nearly every order calling for this line. Prices are unchanged, though the tendency is for higher, or at least, firmer prices. No. 1 is $5.40 to $5.65; pure

— after all, no paint like

"English" Liquid Paint

No other Paint can be made on a higher standard — 70% pure White Lead, 30% pure Zinc White.

MURESCO

The Best Wall Finish

Only One Coat Required **Easy to Apply**

Unequalled for all classes of

WALL AND CEILING DECORATING

Muresco can be applied by any one, to any kind of surface. It will not rub off nor peel, shows no laps, spots or brush marks, and is the only material producing that flat, subdued, velvety effect, so much admired.

Ready for use when mixed with hot water

Beware of wall finishes containing lime or plaster that cannot be removed by washing when desired; they are neither practical nor sanitary and will eventually peel off, leaving the walls in a ruined condition.

Get busy after New Business

Go after the man who is building and the man whose house looks like it needed paint. But be careful which **kind** of paint you recommend to him. He's going to paint **again** some day, and he has many friends who may need paint.

If he buys paint from you that peels, cracks and wears off in a year or so, he won't come back to **you** for paint again. And his friends and neighbors are going to **hear** all about that poor paint. **Play safe—take no chances**—sell him

MARTIN-SENOUR PAINT
100 Percent Pure

A paint that you can recommend as strongly as you like and we stand back of you. Martin-Senour Paint is pure—that is why we can stand back of it—why you can stand back of it—why buyer comes back for more of it. Ask for Government investigation and see where it stands in their test of paints.

You want more good profitable paint business, and we want a few hustling dealers. Let's get together. We don't know who or where you are. If we did—we'd send you some welcome news right now. Won't you **tell** us on a postal—who you are and **where** you **live?**

The MARTIN-SENOUR CO., Ltd.,
Pioneers of Pure Paint

Montreal **Chicago**

The Winnipeg Paint & Glass Co., Ltd., Winnipeg

The Maritime Paint & Varnish Co., Ltd., Halifax, N. S.

white, from $5.80 to $6, and a superior line is offered at $6.25. Genuine red lead is quoted at $4.50 for casks and $4.75 to $4.80 in 100 lbs.

PARIS GREEN—While continuing to quote this line, practically all the green for the season has been booked. 25 lb. drums are at 21¾c, and barrels at 20½c.

STAINS AND VARNISHES — With lead, stains and varnishes are keeping the paint market steady. Ready mixed lines, too, are moving well. No change in price has yet taken place, though an advance was looked for.

GLASS AND PUTTY—Both these lines are slow sellers, and, strange to say, glass prices are firmer than they were last fall, when the line was in active demand. The expectation is that when May comes round and importations begin to arrive from Europe, the price of glass will advance. Conditions in Canada are not similar to those across the line, and while hand and machine men are cutting over the border, Canada's supply coming from Belgium and through England is retained pretty much at one price for a whole season.

PETROLEUM—The production last year of petroleum was very high all over the American continent, Canada, of course, participating in this output. Business is slightly less than, say, a month ago, but is hardly noticeable. The prices remain unchanged: Prime white is 13½c; yater white, 15½c; and Pratt's astral, 17½c.

FIRST PETROLEUM REFINER

The connection of the late Bradhurst Schieffelin with the first refining of petroleum has been revealed in his obituary notices. "As early as 1857, Abraham H. Howland, the first mayor of New Bedford, a whale oil manufacturer, purchased the Joseph Ricketson oil works and commenced experimenting in the distillation of oil from coal. A company was formed, of which Weston Howland was secretary. While in New York in 1860, Mr. Howland was told that Schieffelin Bros. desired an interview with him. At the Schieffelins he met the leading chemist of the firm, who introduced the subject of petroleum.

Petroleum had not then been refined. It had been known for years, having been collected by the Indians who took it from the Allegheny River and Oil Creek by spreading blankets upon the water and wringing them when saturated. The product was called Seneca oil and was used as a medicine.

At that time there were a few wells in Pennsylvania, and Schieffelin Bros. had about two thousand barrels of oil on hand. The Schieffelins wished Mr. Howland to undertake refining the oil, and a barrel was shipped to him. Mr. Howland procured a large kettle from his kitchen, fashioned a crude condenser, and after a few trials his attempts succeeded in part, but the oil procured was thick and muddy, with a vile odor, and had yet to be refined. Mr. Howland filled a milkpan with the oil and experimented with alkalis and water, but the result was a foggy mixture of oil and water.

He gave it up and left the pan standing on the barn floor. Returning a little later he was amazed to find the problem solved. The door of the barn had been left open and as the sun wore around, its rays touched the oil and completed the process, removing the light distillates by slow heat. This proved to be the secret that the chemists had been unable to discover.

That evening, Mr. Howland filled a lamp with oil which he had distilled from coal and another with petroleum and called in his brother, who declared the petroleum flame to be superior. As a result he was convinced coal oil could not compete with petroleum. So he bought an oil works, set up stills, and commenced the manufacture of petroleum for the market, buying fifteen hundred barrels of the stock of Schieffelin Bros. at 25c. a gallon and selling the refined oil at 75c. a gallon, at which price there was a great demand."

A DOUBTFUL PROPOSITION.

The Canadian trade has been receiving from a southern independent naval stores concern circulars offering Georgia, Florida and Carolina turpentine at a price from 4 to 5 cents lower than the present market quotations. Authorities who know the turpentine situation say they are not familiar with the company in question, and cast doubt on the proposition. A number of warehouses which this concern say they have in various centres of Canada and the United States are said to exist only in imagination, and some of the towns where they claim to do business, are not even on the map. The turpentine offered is also said to contain a large proportion of petroleum, though in primary orders a buyer may get pure turpentine.

PAINT NOTES.

D. Lamontagne will do the painting in the Pratt building at Montreal.

Colerick Bros.' paint and wall paper store, London, was damaged by fire recently.

McCausland & Son, Toronto, have the painting contract for the new Bonnick residence.

J. K. Arcand, Montreal, has the painting contract in the Sherwood residence at that place.

B. Havert will do the painting and glazing in the block of stores and dwellings being erected by Joseph Sawyer, Montreal.

Leduc & Co., dealers in paints, oils, etc., Acton, Que., have dissolved; and A. Perreault & Co., of the same place and in the same line of business have been registered,

The officials of the Peterboro House of Providence are considering the erection of a new building for the Catholic poor. If assistance can be obtained from the city council a new building may be erected at a cost of from $30,000 to $35,000.

CURRENT MARKET QUOTATIONS.

April 3, 1909

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

Read a Few of the Comments of the Leading London Dailies on the Supremacy of the Ross Rifle at the 1908 Bisley Meet.

"Long range Champion, breaks all records, a rifle of wondrous precision." *London Morning Post, July 16th.*

"Records broken at Bisley. A fine Canadian rifle." *London Daily Express, July 16th.*

"Record scoring with the Ross rifle." *London Daily Telegraph, July 15th.*

"Champion of the year." *New York Herald, July 16th.*

"Performance phenomenal by the Ross rifle." *London Field, July 18th.*

"The new Canadian rifle has made an unexpected and altogether successful appearance." *London Daily Mail, July 15th.*

"Great triumph for the Ross rifle which has beaten all the world's rifles." *London Standard, July 15th.*

"Many experts declare that Ross rifle better than new U.S. Rifle." *Nottingham Guardian, July 17th.*

"An individual triumph, the Lee-Enfield hopelessly beaten." *London Morning Post, July 15th.*

"The Ross rifle achievements were truly remarkable." *London Evening Standard, July 15th.*

"Great victory for the Ross rifle from Canada." *London Daily Express, July 15th.*

"The rifle of the future is the Ross rifle." *London Times, July 16th.*

"A'plague of possibles' with the Ross rifle." *London Sphere, July 15th.*

As to Metallics

We HAVE Protected the Trade for Twenty-five Years
--We Propose to CONTINUE to do so

Don't worry, You of the Trade, about stocking just now, but SEND IN SOME MEASUREMENTS FOR NEW BUILDINGS—we wish to do some estimating for you. If you will do a little looking around and write us the result, we will endeavor to do the rest.

"The Philosopher of Metal Town" is starting to publish evidence from twenty-five-year users of our products. He will prove an important educational factor in advertising the rapidly increasing uses for Metallics.

We Are the Largest and Oldest Manufacturers of Architectural Sheet Metal Goods in the Dominion

Note These Old Timer Testimonials:

Hamilton, Ont., April 11, 1908.

Dear Sirs,

I was the first person to use your Metallic Shingles some 25 years ago. They have always given the best of satisfaction, they are very easily put on, and I can cheerfully recommend them to anyone who may require a durable roof. I have used large quantities during the past 25 years.

(Sgnd.) JOHN E. RIDDELL,
Roofing Contractor.

Simcoe, Ont., April 9, 1908.

Dear Sirs,—

We have handled your "Eastlake" Shingles for nearly a quarter of a century. They have been on the Court House, Free Library and other public buildings in this town for 18 years. We have used very large quantities during the past 25 years, and they have always given first-class satisfaction, and have never required any repairs.

(Sgnd.) MADDEN BROS.,
Tinsmiths and Hardware Merchants.

Lucknow, Ont., April 9, 1908.

Dear Sirs,—

I take great pleasure in testifying to the good qualities of your "Eastlake" Shingles. We put your painted shingles on our Town Hall in 1885, 23 years ago, and although they have only been painted twice since that time, they are in good condition yet. I consider the lock on the "Eastlake" the very best, and believe that a roof covered with galvanized "Eastlake" will last forever.

(Sgnd.) THOS. LAWRENCE,
Hardware Merchant.

FROTHINGHAM & WORKMAN, Ltd.

Wholesale Hardware and Iron Merchants

Montreal : : : : : Canada

Galvanized Iron Sheets

Our stock of galvanized iron sheets consists of an immense tonnage of the following well-known brands in all the most usable sizes and gauges.

"Queen's Head"
"C. L. & Co. Crown"
"Apollo"

"Queen's Head" is the standard quality of English Iron and has been sold on the Canadian market for many years. It is distinguished for its fine surface, perfect galvanizing, flatness and qualities of easy working. It will fold without the galvanizing flaking off and will stand many years of exposure to the weather.

"C. L. & Co. Crown" is our private brand which we have sold for many years, during which it has steadily grown in popularity. It is not quite so heavily galvanized as "Queen's Head" sheets, but it has the same qualities of easy working, flatness and durability.

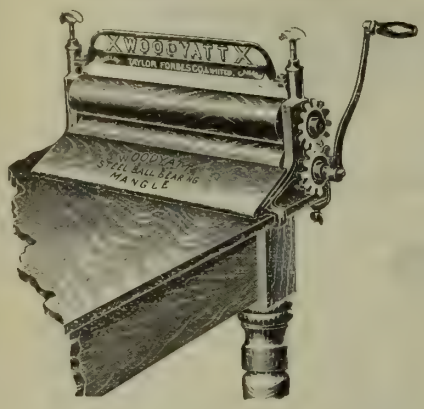
"Apollo" is the leading brand of American galvanized sheets. It is always dead flat, uniform in gauge and heavily galvanized. It bends readily and does not scale when folded.

You cannot go wrong if you stock any of these three brands of galvanized iron sheets. We have them in all the most desirable gauges and in sizes from 24 x 72 in. to 36 x 120 in.

We have also a large stock of galvanized Canada plates and galvanized corrugated sheets.

Ask us for prices when in the market for galvanized iron sheets.

Caverhill Learmont & Co

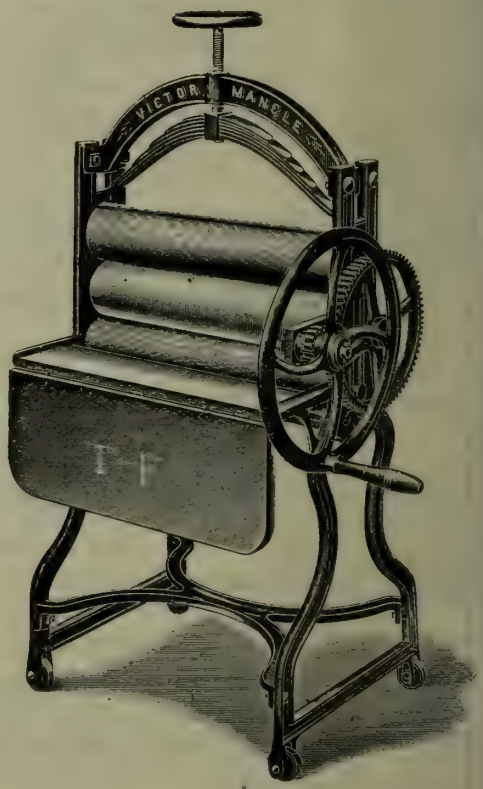


Hardware, Iron and Steel

Head Office and Warehouse, MONTREAL. Warehouse at WINNIPEG, MANITOBA.

Showrooms, TORONTO, 77 York St. OTTAWA, 111 Sparks Street, QUEBEC. FRASERVILLE.

Not how cheap, but how good; That's the Argument we have for our goods



THE WOODYATT MANGLE

Is especially designed for use in houses where the room is limited. It can be attached to a table and when not in use occupies very little space. It is made throughout of the best materials, hard maple rolls, 24 x 3½, Roller Bearings and attractively finished.

The most easily operated mangle obtainable. It saves labor, it saves time. Will mangle the clothes in one-third the time of any other method and will do its work as smoothly as an iron. It is made of the best materials, Rolls Hard Maple, Tables Hard Wood, Springs Tempered Cast Steel. Rolls 24 x 5″. Perfection in every detail of construction.

VICTOR MANGLE

Mangles are great labor savers and should be in every household. Write for prices direct if your Jobbers do not handle them.

Sold throughout the Dominion by all Wholesale and Retail Hardware Merchants.

Every Little Bit Helps!!

Mr. Hardware Man,—Don't you often find that the "little sales" of the day are a big feature in the day's receipts and are often the lever to larger sales?

The Kaiser Wax Pad and Iron Cleaner

is a "little thing"—retails at 10 cent—but it is a household necessity, something entirely new on the market, a quick and big seller, with a good profit.

Every housekeeper dreads ironing day, especially so when she has a lot of shirt-waists, men's shirts, collars, cuffs, etc. to iron, she always wants to obtain a high-grade finish, equal to first-class laundries. She of course asks the dealer for advice—in return he offers her the common wax—She knows it is impossible to do good work with the common wax—So she walks away—one customer lost.

Now where she can procure an article of this merit—that reduces ironing time by half—reduces labor to a minimum—adds to the finish of clothes—and makes ironing a day of pleasure—THERE SHE IS SURE TO DO HER BUYING—AND LEAVE HER ORDER FOR OTHER THINGS.

A post card to any of our Canadian agents or direct will bring a sample of this great little business getter.

SMALL TOOLS

Dealers, Attention :—

We have on hand a large stock of Pratt & Whitney eccentric relief reamers and taps. We would like to move a large proportion of them before our annual stock taking.

We are prepared to make special inducements to dealers who will put in a stock of these tools. They are always in demand by the high class trade and will be a good investment for you.

NOW IS YOUR OPPORTUNITY

We make this announcement advisedly, having obtained our information from authoritative sources. **The Prices of Small Tools are to be advanced during the coming year!** Take advantage of the low prices and special inducements and assure yourself of a much higher percentage than you will be able to get next year.

The Pratt & Whitney Small Tools are of the most excellent design and material. Tests have shown them far superior to anything else on the market.

Let us send you our proposition

Crescent Brand Hinges and Butts

Bright Steel, Japanned, Electro-Plated and Nickel Finishes

Crescent Brand

Registered

Is the other fellow pressing you hard for business ?

Chances are he is doing it with Crescent Brand Hinges and Butts.

Many of the successful fellows have chosen them exclusively—and they are well worth choosing too, being made for the trade that seeks the best, and who are governed by quality.

Can you risk handicapping your business with inferior goods, when the price is not lower ?

If your jobber does not keep them, we will fill your order.

WHAT SUNSHINE FURNACE DOES

Superiority to other Furnaces, and the Hot Water Boiler

¶ SUNSHINE Furnace is designed and constructed to heat a house, church, school or store, and does this more satisfactorily than any other known furnace or other style of heating apparatus.

It does this better than other furnaces because, being made from exclusive patterns, it has more commendable features.

It does this more rapidly than the hot water boiler because, as soon as the fire is started in the Sunshine Furnace, heated air can be obtained for the rooms.

(With the boiler you have to wait until the water is heated before you get any steam, which means that from preliminary fuel you get nothing.)

It does this more securely than the boiler because there are no water pipes to burst when fire goes out or is mismanaged.

It does this more conveniently than the hot water boiler because it has no radiators to take up room, congregate dust and mar the paper and woodwork.

It does this more hygienically than the boiler because pure air is admitted to the house through cold air pipes.

It does this more economically than the boiler because even air circulation keeps fuel bill low.

And these are the reasons why it pays to put a little sales effort back of Sunshine Furnace

Maritime Wholesale Hardware Association.—W. G. Robertson, Halifax, president and secretary; W. S. Fisher, St. John, vice-president; George C. Weldon, St. John; John A. McAvity, St. John; John M. Robertson, St. John, Percy Simmonds, Dartmouth, A. J. Grant, Halifax, executive.

Hardware and Metal Association of British Columbia.—John Boyd, Vancouver, president; J. A. Cunningham, New Westminster, vice-president; John Burns, Vancouver, secretary-treasurer.

Alberta Hardware Merchants' Association.—John Drewe, Calgary, president; R. L. Gaetz, Red Deer, first vice-president; J. Dowcett. Edmonton, second vice-president; L. W. Kribs, Frank; C. W. Marshall, Nanton; W. G. Stafford, Lethbridge; A. E. Clemens, Sedgwick, and C. W. Hislop, Carstairs, executive committee; A. T. Linton, Calgary, secretary-treasurer.

British Columbia Hardware Dealers' Association.—Charles Snell, Vancouver, president; T. Stearman, Vancouver, vice-president; Messrs. Lusby and Blakely, New Westminster, and Henderson, Vancouver, executive committee; Wm. J. Butt, Vancouver, secretary-treasurer.

Ontario Retail Hardware and Stove Dealers' Association.—D. Brocklebank, Arthur, president; A. Ballantyne, Brantford, first vice-president; M. S. Madole, Napanee, second vice-president; John Caslor, Toronto, treasurer; J. Walton Peart, St. Mary's; D. Cinnamon, Lindsay; R. C. Chown, Belleville; H. P. Morgan, Peterboro; J. S. Weichel, Elmira, and J. R. Hamb'y, Barrie, executive committee; Weston Wrigley, 10 Front St. East, Toronto, secretary.

WINNIPEG ASSOCIATION RE-ORGANIZED.

The retail hardware merchants met on the evening of March 23 to complete the preliminary affairs of their recent organization. On account of the absence of J. E. Thomas, the past chairman, who has retired from the hardware business, Charles Mulvey was appointed the permanent chairman of the association. The committee appointed at the previous meeting to bring in nominations for a permanent secretary, reported their choice of J. E. McRobie. The association at once unanimously ratified the recommendation and handed over the books to Mr. McRobie. Nothing of great importance was discussed at this meeting; it was decided, however, to watch the proceedings of the House of Commons regarding their action toward amending the fire-arms act, which was referred to in a recent issue. The interest and enthusiasm in the organization is greatly gratifying. Mr. McRobie says that with the exception of one or two, every hardware merchant in the city has become a member of the association. And it is expected that all will be members before next meeting. The mutual feeling that exists among all the members, and the desire to better the trade in every respect possible is an assurance that the local organization will be a decided success. The retailers are anxious to eliminate the wholesaler from indiscriminately selling to the jobbing trade. The wholesaler does not desire to do retailing to any great extent, but the fact that he occasionally sells to a contractor is annoying to the retail trade, since by doing so he disturbs prices rigidly adhered to by the retail houses. There is no doubt that the retailers and wholesalers will come to a definite understanding in this regard, but only by a mutual organization on the part of each can any such understanding be arrived at.

Mr. McRobie spoke very kindly of Hardware and Metal and expects it to be the medium of expression of the association.

HOW NOT TO DO IT.

For an example of how not to run a retail association Winnipeg should be visited and the Retail Merchants' Association of Western Canada, selected for study. The recent arrest of Secretary Coulson may not result in his conviction, but it has at least disclosed a bad state of affairs, where the secretary has evidently been in complete charge of the funds and capable of doing absolutely as he pleased.

For instance, he is said to have conducted a "pure food show" and saddled $2,200 expenses on the association. An Ottawa Old Boys' entertainment was charged to the organization and an official paper established at the expense of the association and then sold for $500. No bank account was kept and the books are in such state that it is impossible to find out where the association is at. Then a mutual fire insurance company was formed and instead of waiting for the Government to grant a charter policies to the extent of $70,000 were taken, they being absolutely worthless. For all this, and much more, the secretary was paid a fat salary and a 50 per cent. commission as organizer. Now the association is out on bail, the organization is in the receiver's hands and an effort is being made to reorganize either as a distinct body or as a branch of the Retail Merchants' Association, of which Mr. Trowern is secretary.

Truly the grocers, drygoodsmen and other merchants in Western Canada have been easy marks to allow these things to go on. And certainly the incident (backed up by the information that Mr. Trowern's association is badly in the hole, with no financial statement available at the Galt convention, with the druggists' section at war with the general merchants), proves the advisability of organizing single line associations on the same plan as the splendid retail hardware associations in the States across the border.

Contrast the above picture of the Retail Merchants' Association with the Retail Hardware Association in Ontario. Here the secretary is paid no salary or commission, a small honorarium being voted at each convention. Proper books are kept and an audit published annually. The hardware exhibits at the Hamilton convention netted a profit of over $300 to the association and the balance in hand now is about $550 after three years in existence. And instead of adopting any half scheme about mutual fire insurance the officers are content to wait until they can get a satisfactory law through the Legislature.

And that the Western Retail Hardware Association now being reorganized at Winnipeg bears no odium resulting from the Retail Merchants' Association doings, is evident by the selection of the former secretary, J. E. McRobie, for the same position in the new organization.

All this is interesting, as it shows how the two plans of organization work out. As a distinct one line association the officers and members, in addition to all other advantages, can always tell where they are at financially. The mix-up in the Retail Merchants' Association at Winnipeg does not provide any argument against the Retail Hardware Associations. It is, instead, a boost for them.

ADVANTAGES OF ASSOCIATION MEMBERSHIP.

There was a time when individual effort was a power to be reckoned with, but that is a thing of the past. To-day combinations of capital and labor hold absolute rule. Monopolies may be wrong in principle, they may be unconstitutional and illegal, but they exist and there is every indication that they will continue to exist for some time. This being the case, merchants who must buy of manufacturers and employ labor cannot expect to attain a marked degree of continued success unless they, too, combine; not necessarily to seek or invite conflict, but to be in a position to protect their interests when such are unjustly assailed.

Topics discussed during the sessions of the annual convention are of vital interest to every merchant, and these discussions enable him to profit by actual experience of others. Furthermore, the meetings make it possible for members to meet prosperous men who have made more than ordinary success in the hardware business and who are not only willing but glad to impart the secrets of their success.

Sporting Goods a Good Line to Push

Seasonable Now That Spring Has Arrived—Window Can be Used to Good Advantage—Fishing Tackle and Baseball Goods in Demand—Bicycles Again in Public Favor.

With the unmistakable signs of the break-up of the winter, the hardwareman should make certain that his sporting goods department is in the best of shape. All the new stock should be in by now, or at least not more than a week or so later. The sporting enthusiast is always in a desperate hurry when the sun first calls, and it is well to be ready for him or he will go elsewhere. Anticipate the demand by a good window display. This not only tends to hasten the trade, but to induce many a man to reconsider his decision not to get anything new this season. A sportsman likes the best on the market, and although the article he used last year may be in good shape if his eye catches something that appears better, the dealer obtains an extra customer. Here lies the great value of a good window display at the right moment. Once last year's article is used then the desire to change is not so acute.

To make the most of his sporting goods department, the dealer should not only use his windows frequently, but he should display his lines prominently in the store. Group the stock together, so that there need be no running about the store in case a customer wants a complete outfit of anything, and locate the department near the entrance so that the goods cannot fail to be seen. Above all, let them be neatly arranged, and free from dust. Sportsmen like looking over the stock, and to show them dust-marked fishing rods, or smeared boxes containing baseballs is to give them an impression that they are looking at old stock. It is essential that the goods should be constantly overhauled. Fishing rods that will not join together easily, and guns that will not work readily spoil a sale at once. Let everything be spick and span. Although the dealer may not be a fisherman himself, let him so handle this line that the customer is not aware of the fact. If the customer thinks that the dealer is as enthusiastic as himself over the sport, and can cast a line just as well as he can, if not better, and can talk of the catching of even bigger sized fish then the sale is more than half made.

The dealer should pay attention to his fishing tackle first, for it is the fisherman who starts the season. Get after the fishing clubs, and invite the members to come in and look at the stock. Get after the unattached man by judicious advertising and good window displays. Make the latter interesting and, if possible, novel. One very good design, requiring some preparation, although it is well worth the effort, is that of a fisherman in despair over a broken line, while the trout is seen, or imagined, careering off with the other end of the line in its mouth. The text that such mishaps never happen to the dealer's lines rounds off the situation. Another and more commonplace scene, is that of a fisherman indulging in his sport amid realistic surroundings, but without the moral of the first design, can be easily arranged. Forest can be depicted by a generous arrangement of artificial leaves, grass, and moss. In the rear portion of the window show a fisherman casting his line into a stained looking-glass lake. The lake can be made of a strip of looking-glass soaped over in places. This is a natural and refreshing scene, and is sure to attract considerable attention. The great value of sporting goods, so far as window displays are concerned, is that they so readily lend themselves to effect. A merchant with a little ingenuity can evolve many effective designs at little cost.

Displaying Fishing Tackle.

Fishing rods, to be properly shown, says an exchange, have to be jointed together. Except in the very cheap grades it seldom happens that a sale can be made without the rod being shown in this way. A customer will wish to see just how it balances and hangs. The more easily a rod can be shown the more sales will be made, and the customer better suited. If the clerk has to go down in a box under the counter, or even joint the rod together, he will be slow in showing fishing rods. Therefore the best way to show fish rods is to have them either on a rack or stand (jointed up) or on one of the counters or tables in the middle of the store. In this, twenty-five or thirty different rods can be shown, with the number and price marked on each rod. If not possible to show in this way, a sample of all styles and prices of rods can be carried in stock; those paying the best margin of profit should be selected. It will not be found advisable to show cheap steel rods or the low-priced split bamboo rods. These two classes of rods are sold close and sell all too easily, and can often be sold without being put together.

When a sale is made, the sample shown should be the one to be delivered to the customer. This rule should be followed in the case of reels, then there will be no accumulation of shop-worn stock. Reels should be arranged in the case according to the price and the number, and the price as well as size marked on the tag on each reel. The tag should be taken from the reel when sold, and another reel from the stock immediately put in its place.

After his fishing displays the merchant can take in the later lines, such as baseball, tennis, canoeing outfits, yachting supplies, bicycles, and automobile accessories. But over and above window displays, newspaper advertising, circulars, etc., get out after the trade personally. Interest yourself in the affairs of the sporting community. Be ready to help forward any movement to organize a club if possible offer the organizers the use of a room, stimulate to the best of your ability the sporting enthusiasm of the community, and not only will you be thought better of, as a member of your community, but you are sowing seed for the benefit of the store.

If a merchant has a small annex to his store it would be well to consider the advisability of running a repair shop, especially if he intends to work up his bicycle trade. Not only in this connection could the expenses of a mechanic be easily carried, but an intelligent workman could undertake the repairs that are always wanted in other sporting lines, and be especially useful if an automobile breaks down at a near point. Even if only the overhead expenses of a repair shop are met, the advertising advantages to the merchant can be reckoned as being sufficient profit.

MAXIM'S NOISELESS GUN.

"The smoke of battle" and the "rattle of musketry" will soon become history. We have had smokeless powder for several years and now it is the noiseless gun. Hiram Percy Maxim, who has given to the world some of its most important implements of defense, is the discoverer of a gun silencer.

At a trial made in New York City recently the new gun silencer was a complete success. The rattle of musketry, instead of sounding like battle, resembled the popping of a great many champagne corks.

The guns which Mr. Maxim used in his demonstration ranged from the little 22 repeating Winchester to the new 30-30 Springfield army rifle and included the high power Mausers and Mannlichers which the European armies use.

The gun silencer is a little black tube which screws onto the muzzle of the gun and has about twice the diameter of the

barrel. The size and weight vary according to the caliber and power of the weapon. The weight varies from six to nine ounces.

The theory upon which the silencer works, Mr. Maxim described as being identical with that of the negative turbine. The powder gases, as soon as they enter the silencer from the barrel of the gun, meet the spiral chambers in the interior of the tube and are set whirling very rapidly. The tendency of whirling bodies is to fly out from the centre, and inasmuch as the only means of exit from the silencer is near the centre of its further extremity, the gases are unable to escape until they have slowed down.

The expulsion of the gas is therefore at a very much reduced velocity as compared with its speed under the normal conditions of gunfire and the shock to the atmosphere and the consequent shock to the eardrum are relatively less.

The course of the bullet lies along a line somewhat above the centre of the tube and the noise which the bullet makes in cleaving the atmosphere is the only sound, except that of the bullet striking against its target.

If the target is at a great distance the only sound is that of the shrill ping as it passes through the air. Thus the invention complements the utilization of smokeless powder in that it makes the invisible discharge inaudible also.

SPORTING GOODS MAN RESIGNS.

H. W. Algie, for the past couple of years manager of the sporting goods department of the Miller-Morse Hardware Company, Winnipeg, has resigned to accept a similar position with Lewis Bros., Montreal.

FIREARMS BILL WITHDRAWN.

The following is the text of Bill 204 introduced in the Ontario Legislature by W. D. McPherson, Toronto, and withdrawn on April 1 after it had been opposed by Geo. C. Wilson, M.P.P., Dundas, Hon. Frank Cochrane, Sudbury, both retail hardwaremen, and R. R. Gamey, Manitoulin, formerly in the hardware business:

An 18-Year Age Limit.

1. No pawnbroker, or second-hand dealer, licensed or unlicensed, shall receive in pledge, or in any way advance any money upon, the security of any gun, revolver, pistol or other fire-arms, or any air-gun, or any ammunition, or display or advertise for sale or disposition, in any way, any gun, revolver pistol or other fire-arm, or air-guns, or any ammunition.

2. No person, firm or corporation, shall sell, or otherwise dispose of, any gun, revolver, pistol, or other fire-arm or air-gun, or any ammunition, to any person under the age of 18 years.

3. "Ammunition" shall include cartridges, bullets, shot, gunpowder, nitroglycerine, dynamite, gun-cotton, and every other explosive substance whether filled for use or otherwise.

Record of Sales.

4. No person, firm or corporation, shall sell or otherwise dispose of any gun, revolver, pistol or other fire-arm or air-gun unless on the sale or disposition of any such article, the person actually selling or disposing of the same shall, before delivery, make an entry in writing in a book to be kept for that purpose (which book shall, at all reasonable times, be open for inspection, upon request, free of charge, by any peace officer) with a true and correct statement of the date of the sale or disposition, the name and address of the purchaser or person receiving the said article, and the name and description, with such letters, figures or marks on the article sold or disposed of, sufficient to identify the same afterwards, to which entry the signature of the purchaser or person receiving the said article shall be affixed; provided that if the person selling or disposing of any such article is not a dealer in such articles with an established place of business for traffic therein, then instead of the entry in reference to the sale or disposition of such article being made in a book, as above provided, such entry shall be in the form of a receipt which shall contain the same information as if entered in a book as aforesaid and such receipt shall be deposited by the person, firm or corporation so selling or disposing of the said article with the clerk of the municipality, in which such article is sold or disposed of within one week from the date of sale or disposition of such article, and such receipt shall, at all reasonable times, be open for inspection, upon request, free of charge, by any peace officer and shall be filed and thereafter carefully preserved, as a municipal record, by such clerk.

Penalties.

5. Any person transgressing any provision of this Act, or whose clerk or agent transgresses any provision of this Act, shall, for the first offence, incur a penalty of $20 and costs of prosecution, and for each offence committed subsequent to such conviction, a penalty of $50 and costs of prosecution, to be recovered in a summary manner, before one or more Justices of the Peace, or a Police Magistrate, under the Ontario Summary Convictions Act, on the oath of one or more credible witnesses, one moiety to belong to the prosecutor, and the other to be paid to the Treasurer of the Municipality, in which the offence is committed.

6. In any prosecution for an alleged transgression of any provision of this Act, the burden of proving that the provision or provisions of this Act, alleged to have been transgressed, has or have been complied with, shall be upon the person, firm or corporation so charged.

7. Unless otherwise provided by order of the Lieutenant-Governor in Council, this Act shall come into effect on the first day of July, 1909.

Hardware Letter Box

Any questions on trade subjects will be answered by the editor in this department. Do you want any address, any special line of goods, anything relating to the hardware trade? Ask us. Letters from manufacturers, jobbers, travelers, retailers or clerks are solicited. Suggestions for trade improvement or discussions on trade evils are invited.

Bee Supplies.—McKellop & Ferguson, West Lorne, ask where they can obtain bee supplies.

H. A. Morgan, London, and J. A. Simmers, Toronto, are dealers in this line of supplies.—Editor.

Victor Churn.—Macnab Bros., Orillia, ask the name of manufacturers of the "Victor" churn, made at one time by the Hamilton Industrial Co.

The Creamery Package Co., Chicago, Ill., are now makers of the "Victor" churn.—Editor.

Lawn Fence.—C. G. McKeen, Springvale, asks for the names of manufacturers of lawn fence.

Canada Foundry Co., Toronto, and the Dennis Wire & Iron Co., London.—Editor.

Willett Washing Machine.—A. J. Walker & Son, Truro, N.S., want to know who makes the Willett Washing Machine. "We have looked for their ad. in Hardware and Metal but have failed to find it there," they write.

Enquiry fails to locate the address of the maker of this article. Can any reader supply the information?—Editor.

Engravings for Ads.—J. E. York & Co., Waterford, Ont., ask where small cuts similar to those used in mail order ads. and catalogues can be secured.

From the Iron Age, 14-16 Park Place, New York, and the National Retail Hardware Bulletin, Argos, Indiana.—Editor.

NEW METAL COMPANY.

The Hoyt Metal Co. St. Louis, Mo., has opened a Canadian branch to look after its trade in this country and has established a small plant containing six kettles on the Don Esplanade, Toronto, where are manufactured babbit metal, stereotypers' metal and solder. If the product meets with favor and the trade proves worth while it is likely a large plant will be built in Ontario within two years' time, wherein will be manufactured a great many white metal lines, especially pipe, bends, sheet lead and white lead and perhaps a shot tower will be added.

G. F. Allen, chemist and metallurgist of the company, who was, until last December, superintendent of the Hoyt Metal Co.'s plant at Granite City, Mo., is in charge of the Toronto plant.

WRITE YOUR LOCAL M. P.

Active opposition is being taken by jobbers and retailers against the proposal to so amend the Criminal Code that no person in Canada will be able to purchase a revolver unless he leaves with the vendor a permit in writing from the chief of police, a police magistrate, or a justice of the peace, allowing him to purchase a weapon. Members of Parliament are being actively petitioned, and no doubt when the bill comes before the House of Commons it will be strongly opposed.

As pointed out, apart from the point that merchants would stand to lose considerable revenue from the restriction of the sale of firearms, the amendment affects only the peaceful citizen who carries a weapon to defend his life and property against thugs because the police are not able to do it for him. The good citizen will hesitate to go through the embarrassing red tape and public explanations necessary to secure a weapon, while thugs can always get weapons from the States or by other shady methods known to them.

One jobbing house in its petition against the bill, says: "If such a bill passed, and its provisions were carried out, we would suffer from an influx of thugs from the United States and elsewhere, who would pursue their vocations without fear. Our large cities would soon become the nests of thieves and other criminals who would come, as soon as they knew that our citizens could not procure means of protection without going through the red tape appeals to the chief of police, which they would hesitate to do. Our experience has been that only a small percentage of revolvers sold pass into the hands of criminals, but that the great majority are purchased by law-abiding citizens for self-protection.

"Opposition to this bill does not come so much from the firearm dealers as from the people at large, who maintain that if this bill becomes law it would have no other result than to keep the man who should have a revolver from securing one without embarrassing preliminaries. Such a law would defeat the very ends it seeks to bring about, as the law-abiding citizen leaves his weapon at home, and only the criminal class carry theirs about with them. Then the police force in many of our communities is inadequate, while in many districts there are no police at all.

"This bill seems to have been brought forward without considering the conditions that would prevail if it became law, and we are strongly convinced that no restrictions whatever should be placed on the sale of firearms."

METAL ROOFS SAVE LOSS.

Hardwaremen who handle metal roofing, by emphasing the advantages of metal as a protection from fire, should increase their business. When a fire occurs investigate the circumstances and wherever an argument for metal roofing can be found use it in advertising in the local columns of the town paper.

The following letter from a firm whose store was burned last December is of interest in this connection :

"The fire which destroyed our stock of goods and almost the entire building on the morning of December 24, 1908, in our opinion would not have been anything like as severe had it not been for the tar and gravel roof. There was scarcely anything in the building of an inflammable nature, but owing to the inflammable character of the roof, which seemed to burn fiercely and without cessation, it necessitated by the fire department a perfect deluge of water for hours and hours in their efforts to put the fire out. The result of this was that while there was possibly not more than 25 per cent. of the stock damaged by fire or smoke, the remaining 75 per cent. was made a lob-lolly of by the drenching it received from the immense amount of water that it necessitated to be poured into the building. You can get some idea of this from the fact that the cellar, probably 40 ft. wide and 100 ft. long, had 5 ft. of water in it as a result of the drenching of the downpour of water which went into the building. This, in our judgment, could not possibly have occurred had there been a metal roof on the building. This fact is so apparent that we are simply amazed that the influence of the fire department and insurance companies will continue to tolerate such a class of roofing, and it is an unblushing menace to any community where such buildings exist."

HARDWARE IN GOW GANDA.

A profitable field for the wholesale hardwareman during the past winter was the Gow Ganda mining district in Northern Ontario, almost immediately west of the Cobalt region. That country was opened up scarcely five months ago, and to-day is more talked of, perhaps, than any other section of Ontario, and possibly of Canada. During the past few weeks, and more particularly since the beginning of March immense quantities of merchandise has been freighted into that district.

Hardware jobbers in Toronto and Montreal state the business done there this year has been little short of marvellous. The goods had to be rushed in, as being a new country there is no railway, nor even a decent roadway into the district, the freight having to be taken in by sleighs from the nearest railway point. While the snow lasts, of course, all will be well, but the railways recently issued a warning to shippers that no more freight can be guaranteed to be safely laid down in Gow Ganda.

To show what an enormous trade is being done it is but necessary to state that 600 teams from Charlton and 200 teams from Sellwood were on the way to Gow Ganda with freight on one day last week. This is on the authority of the president of Gow Ganda's Board of Trade, and when such a man makes such a statement it is easy to believe that hardware went into the district by the carload from both Montreal and Toronto.

This Gow Ganda movement, too, was the inauguration of the general revival of trade which has set in with the opening of spring.

CUSTOMERS APPRECIATE POLITENESS.

Do hardwaremen generally realize the part that store politeness plays in the success of a business. How often is the remark heard, "I do not understand how so-and-so commands the trade he does. I have a better stock, have more attractive window displays, and my

prices are the same, if not better, and yet I do not draw so well. What is the reason?" Well, the reason probably is that the other man has grasped the value of politeness.

How often is a customer in a store chilled by the lack of courtesy he or she receives. The clerks make no effort to serve promptly, the order is looked upon as a bother, while the customer is made to feel that the obligation is on the part of the merchant and not on the part of the buyer. There is no feeling of friendliness shown, no attempt to encourage a further visit, and the customer goes away with the feeling that on no consideration will he or she enter that store again.

But with the merchant who has realized the value of store politeness the experience of the customer is totally different. The clerks serve as if it is a pleasure to do so, no matter how small the order, and no trouble is spared to satisfy every requirement. In fact the "so pleased to see you" atmosphere pervading the place delights the customers, and makes them feel a friendly interest in the store that means dollars and cents to the merchant.

INTELLIGENT SALESMANSHIP NEEDED.

The successful selling of paint depends very much upon the intelligent understanding of the product and its uses. It is true that the same mixture can be used on house, barn, porch, floors, lawn furniture, exteriors and interiors; but the man who knows can easily prove to the buyer that a house paint is not economical on rough barn surfaces, and vice versa. A porch floor paint must be hard and solid enough to stand the pounding and wear of walking over and not show marks and scratches; certain colors and ingredients are especially adapted for the place. Furniture must have the finest gloss, dry perfectly hard, and should be made of special, expensive materials.

All along down the line there is a chance for the intelligent paint salesman to build trade on paint specialties which pay a good profit. Then there are brushes, varnishes, fillers, putty, etc. The selling of paint calls for a stock of extension and step ladders, paint burners, putty knives, graining tools, and other articles of like character. It is closely allied to the handling of glass and all sorts of building material. It naturally drifts toward the hardware store, and it should remain there.

Opinions About the Spring Number

Some Flattering Letters Received in Addition to Those Published in Hardware and Metal Last Week.

"Our full page ad in your Spring number met with our expectations and we are entirely satisfied with all that you have done for us. You state that you would appreciate a letter from us giving our opinion of the Special Number and stating frankly any improvements which we think could be made next year. We have this to say about your publication, that we have no criticism to make whatever. The annual Spring Number is certainly a crackerjack and if other hardware merchants in Canada cannot get some good information from this publication it will be because they are already wiser than Solomon. We find a great deal in it which interests us and we are so well pleased with the advertisement that we have decided to advertise in no other publication in Canada."—Canadian Logging Tool Company, Limited, Sault Ste. Marie.

* * *

"We believe that we are one of the oldest advertisers in the Paint Section of your most valuable paper, Hardware and Metal, and we have watched the growth of your paper year after year, especially the improvement in your Spring Number. This year we think you have surpassed all your other efforts, and we cannot let this occasion pass without extending to you our most hearty congratulations. We are greatly pleased at the manner in which our ad appearing on the back cover, was set up. It has commanded a lot of attention, and we are sure we will reap good results from it; some of our customers commenting most favorably on it. Here's wishing you continued success."—Brandram-Henderson, Limited, Montreal.

* * *

"We have received a copy of your Annual Spring Number, and want to congratulate you on its appearance. We think you have a great paper, and as far as we can see surpasses anything we have ever seen in its line. Wishing you every success."—Wheeling Corrugating Co., Chicago.

* * *

"We beg to congratulate you on the very handsome Spring Number of the Hardware and Metal. We are very much satisfied with the appearance of our advertisement and feel sure that it will do us a great deal of good in bringing forward our goods to the different hardware and metal dealers in the various parts of the country."—Sadler & Haworth, Montreal.

* * *

"Your Annual Spring Number of Hardware and Metal arrived all right and we must say it surpasses anything that you have hitherto sent out in this line. We are much pleased with the prominence you have given to our advertisement, which is perfectly satisfactory."—The Oakville Basket Co., Oakville.

* * *

"We think your Spring Number is deserving of very great praise. The cover is very representative of the trade and the advertisements are set up in a most attractive manner, while your reading matter is much to the point. Your efforts deserve the greatest consideration from those interested in hardware and stoves."—Canada Steel Goods Co. Ltd. Hamilton.

* * *

"We are very much pleased with our advertisement in the Annual Spring Number of Hardware and Metal, all of which has been read by us with a great deal of interest; the number throughout is a demonstration of what excellent work can be done by the printer. The quite apparent attention which was paid to details in making the number attractive, among which we mention the quality of the paper, cuts and type, we are sure will be appreciated by the advertisers as well as your other numerous subscribers."—P. D. Dods & Co., Limited, Montreal.

* * *

"We beg to acknowledge receipt of March issue of Hardware and Metal. This is a very fine edition and you are certainly to be congratulated."—Magnolia Metal Company, New York.

* * *

"Your Spring edition has come duly to hand, and we must compliment you on its excellence. We are surprised that there are so few stove advertisements. The stove men must be full of orders. We fancy our own advertisement you set up exceedingly well, just as we wanted it, and we thank you most cordially for your courteous and careful attention to our wishes in this respect. We have never had occasion to find any fault in our transactions with Hardware and Metal. As regards our larger advertisement, we are now having some small electros prepared, and as soon as these are ready, will have a larger advertisement running in your columns than at present."—W. J. Copp, Son & Co., Fort William.

MISUNDERSTOOD HER MEANING.

As a hardware clerk stepped forward to wait on her she trained her guileless blue eyes upon him and said:

"I wish you would give me a sponge bath, please."

The clerk was for a moment nonplussed, but at last managed to say:

"Do you prefer hot or cold water, miss?"

COLLECTION LETTERS EFFECTIVE

Mackie & Ryan, Pembroke, write the secretary of the Ontario Association as follows: "We desire to thank you for your communication of March 31 enclosing letters and remittances from some of our delinquents. This Mrs. Hayes' account, particularly, is about six years' standing."

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 74.

MARKETS IN BRIEF.

Montreal.

Turpentine—Cut of 3c.
Paris Green—Cut of 3c.

Toronto.

Turpentine—Decline of 2c.
Paris Green—3c lower.
Brass Wire—Now 60.
Copper Wire—Now 62½.
Shovels—50 p.c. discount.
Old Metals—Nearly all lines 1c lower.
Building Paper Nails—Down 2c.
Building Paper Caps—Now 6c.

Winnipeg.

Shovels—Now 40, 10 and 5 p.c.
Raw Oil—2c decline.

THE MARKET SITUATION.

Although the primary markets have been fluctuating, the tendency on the whole has been to strengthen the tone of the situation. In London there has been an absence of any important movement in tin, and the market has been without character. Consumption in New York has improved somewhat, and orders for May delivery are certainly stronger. Copper seems to be pulling itself together again a little, although the New York market is reported to be dull to the border of stagnation. But it is evident that plenty of metal is being quietly used, or else the market would not hold. The heavy production, however, is causing great apprehension. The London market, by showing greater strength, has lightened the situation a little. Lead has sagged slightly in London, and prospects are not so favorable as they were a week ago. Spelter keeps steady, although the demand across the Atlantic is reported dull. St. Louis figures are improving again. There has been no special development in the U.S. iron and steel situation. The lower prices have brought out some new business but the situation is not at all rosy. Cleveland warrants are quoted at 47s. 3d., 5d. higher than our last figures. Cable reports do not indicate any marked improvement in the situation, although stocks are not heavy. Much is expected from the better shipbuilding prospects.

MONTREAL.

April 8.—Although the markets have been fluctuating, the changes either way have not been sufficient to affect jobbing prices for ordinary lots. The only result of this movement is that the tone of the markets is not so firm as it was last week. Trade continues to improve slowly but steadily, and altogether a considerable amount of metal is being used. A sturdy confidence is shown as to prospects, and this is largely based upon the fact that no stocks are being accumulated. There are no hidden supplies of metal to upset calculations as to the amount of metal in sight. It is probable that the lower ports on the St. Lawrence will be open earlier than is usually the case owing to the rapid break up of the ice and the good work of the Government ice breaker. If this happens, it will stimulate trading for this month. Inquiries are good in all lines, and users are keeping in close touch with the markets—a very good sign.

PIG IRON—Trade is naturally very quiet in imported pig at present. Stores are practically empty, while little will be coming in until the opening of St. Lawrence navigation. Heavy consignments are then due, however, and there will be no cessation to the regular shipments. Inquiries are developing strength as the season approaches; and it is very probable that consignments already booked will very soon be exhausted. Canadian furnaces are reported to be steadily employed on their own needs, and on outside contracts at prices sufficient below imported stuff to meet the demand. We quote open water prices as follows: Middlesboro No. 3, $16.50 to $16.75; Summerlee No. 1, $18.75 to $19; No. 2 $18.25 to $18.50.

TIN—Although the primary markets have been fluctuating, the local jobbing price of tin has held at last week's quotation of 32½. The demand continues to show developing strength, with inquiries active. Users are still buying as they want the metal, and the first signs of a prolonged rally in prices in London would bring out heavy orders to cover future requirements.

COPPER—Copper is firm at its jobbing price of 14c. The slight recovery of copper in the primary market has had the effect of stiffening the markets here, and inquiries are showing much greater strength. As in tin, close watch is being kept on the markets, for there are practically no stocks, and as consumers are steadily using all the way along, they have no desire to be unduly squeezed in a rapidly rising market.

SPELTER—Spelter continues steady at $5.50. Orders are coming in freely for immediate delivery. All the metal is being consumed, and with the lightness of stocks generally, it is thought that the usual heavy spring consignments of metal will not last long.

LEAD—Trade in lead has improved during the week. Some decent sized orders have been placed while the smaller consumer has been more active. This is probably the effect of the near approach of the building season. There is no change in the markets, and we quote imported pig, $3.75; trail, $3.65.

OLD METALS—The markets are on the quiet side, with stocks light. There are no changes in prices. We quote: Heavy copper and wire, 11c; light copper, 10c; heavy red brass, 10c; heavy lead, 2¾c; wrought iron, $11; No. 1 cast, $14.50.

TORONTO.

April 9.—Not nearly so good as last week is the local metal market just now. The holidays may have a depressing effect, and the coming week may see metals back again to the firm base of a week ago. With the exception of spelter all the metals are less active. Prices are unchanged for all new lines, but old copper and brass are a cent lower and rubbers are down half a cent.

Buying is light and the quantities going out are small. Stocks are fairly large, and are ample for a sudden demand.

PIG IRON—Not a single change has come over the situation as regards this metal. Rumor is still rife concerning the buying of Michipicoten ore by U. S. interests, but beyond a slight flurry prices have not at all been altered. Buying is a little quiet, but the market is showing slightly more strength. Cleveland, $22; No. 3, Middleboro, $21; and Canadian foundry, $18.50, are yet the quotation figures of the principal pig iron lines, but some trading has been done at slightly better prices.

COPPER—Rather more quiet are all copper lines, though copper wire is asked for and shows probably the best demand. The local quotation remains at 14c., but many buyers prefer to take old copper rather than pay the figure, and large orders are either scattered over a period or placed outside.

TIN.—Unchanged in price from last week, but still holding the advance then quoted. The conditions prevailing in the market are the same as those ruling the past few weeks. The quotation is 32c.

LEAD—Still active is lead and a fair trade is passing, but hardly so much as ten days ago. This appears to be an off week, for up to the present lead line orders have been increasing steadily. The market quotation, $3.85, remains.

SPELTER—Though the business in this metal is hardly to be classed in volume to that passing in other lines, yet spelter is the only metal which has increased in saleable output during the week. A good prospect is ahead.

SHEETS AND PLATES—Continued good trading is being done. The changes in these lines are infrequent and business from week to week is steady and much the same. Prices are firm.

OLD MATERIALS — Copper and brass lines have declined. Copper wire is asked for, and some little has gone to the U.S., but the price must be low to induce buying. Brass has declined in sympathy, and old rubbers, always off in the spring, are down half a cent. Rubber stocks are usually large in spring and dealers do not care to pay a high price when supplies are plentiful. Dealers are paying for heavy copper and wire 11¼c; light copper bottoms, 10c; heavy red brass, 9¾c; heavy yellow brass, 8¼c; light brass, 6¾c; tea lead, 2½c; heavy lead, 3c; scrap zinc, 3½c; No. 1 wrought iron, $10; machinery cast scrap, No. 1, $14; stove plate, $12; malleable and steel, $8; old rubbers, 7¼c to 7½c.

HARDWARE MARKETS

MONTREAL.

April 8.—A steadily improving spring movement is now in evidence, and the shipping departments of the jobbers, while not being over-rushed, have plenty of work to contend with. All seasonable lines are swinging well, especially house-cleaning utensils, screen doors, green wire cloth, and gardening tools. The purely local trade is not perhaps so good as it might be, but the probability is that the port will be open earlier than usual, and this will tend to improve matters. Open water will also stimulate trade with the lower ports. Quebec Province is showing very good trading, while the Maritime Provinces are extremely staple. The Northwest is making the best progress, comparatively speaking, trade developing splendidly.

Some Canadian makers of builders' hardware are a little slow in dispatching goods, and are evidently feeling the stimulation in business. This is the sort of thing that dealers must take care of, for with stocks generally on the light side, a heavy demand would soon create congestion. Prices are very firm, and the tone of the markets is confident.

BUILDERS' HARDWARE—Builders' hardware is moving along briskly, some exceedingly good orders being received during the week. Delivery of certain lines is hard to get from the makers. Prices are unchanged, and we quote door sets and escutcheons, 50 and 10; escutcheon pins, steel, 50; brass, 55. Spring hinges, No. 20, $9 per gross.

SPRING LINES—Spring cleaning utensils, such as window-cleaners, carpet sweepers, brooms, scrubbing brushes, pails, mops, and polishes are in strong demand. Gardening tools, including lawn mowers and hose, are also very prominent. Green wire cloth, screen doors, and hinges are moving well. There is no change to report, and we quote: Screen doors, stained, $7.80; grained, $8.10; screen hinges, $9 a gross; poultry netting, 60 and 2½; green wire cloth, $1.70 in 100 feet rolls.

MINING SUPPLIES—Orders continue to come in well. There is no change in prices, and we quote: Miners' picks, 17c a pound; prospectors' hammers, 20c; pick handles, $1.85 a dozen; drilling hammers, 6c a pound; crowbars, 3½c; drill steel, 8c.

HARVEST TOOLS—Bookings in harvest tools are steadily accumulating, and it is evident that dealers are expecting a good demand. Some shipping has already taken place. The market is firm and we quote; Hay fork pulleys, $1.60 to $8.50 a dozen; hay carriers, hay rakes, etc., 55 off.

BOLTS AND NUTS—The market continues firm. Orders are showing up well, and dealers are evidently stocking more heavily. We quote: Discounts on carriage bolts, ⅜ and smaller, 70; machine bolts, ⅜ and less, 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

WIRE—A strong spring movement is showing, and orders are going out in increasing bulk. There is a heavy rush on in barb wire, coiled spring fencing, and in wire nails. There is no change in prices and we quote: Barb wire, car lots and mixed, $2.65; small lots, $2.70; plain, twist, car lots, $2.95; small, $3; plain wire, $2.30 base; barb wire, $2.65 in straight and mixed car lots, and $2.70 in small lots. Galvanized wire No. 9, $2.35 in straight and mixed car lots, and $2.40 small lots, f.o.b. Montreal. Coiled spring fencing, $2.65, straight and mixed, car lots, and $2.75 small lots.

BRIGHT WIRE—The movement is good, but there is no rush on. We quote: Gate hooks and eyes, and screw hooks at 60 and 20 per cent.; stove pipe eyes, screw eyes, and square hooks, 60 per cent. Wire hat and coat hooks, 40c a gross.

TORONTO.

April 8.—Hardly so good as last week is the local hardware situation to-day. The volume of business is greater than it was at this time a year ago, and retail hardwaremen are stocking larger quantities and buying with greater freedom. Taking the hardware market from week to week since the opening of the year there is noted a gradually increasing volume of business passing and a splendid inquiry.

Builders' hardware for the city trade and farm implements for the outside are the two best selling lines at present. Orders for seasonable and summer goods, however, are satisfactory. The west is buying more extensively than any other one section of the country, but the towns between Toronto and the Detroit River are taking fair quantities of stock.

On the whole prices are steady and firm. Brass and copper wire, though, have declined, and so have shovels. These are the only changes of the week.

SPRING LINES—Orders are improving, and though there is still a marked conservatism among buyers, a slightly increased volume of business is passing. Poultry netting and green wire cloth lead, and shovels, spades, rakes, hoes and the other tools used about the yard, farm and garden come a close second. The movement of lawn goods is very good for the season and mowers, hose, sprinklers, seats, etc., and ice cream freezers, paints and refrigerators are beginning to be booked. Housecleaning and household articles have let up a little, but the season is not by any means past.

SHOVELS—The price of first and second grade shovels is easier, and the discount is now 50 instead of 45 per cent.

WIRE GOODS—Sales continue good for all kinds of wire goods. Brass wire has declined from 50 to 60 per cent. and copper wire from 50 to 62½ per cent. These are the only changes of the week in the list.

BUILDERS' HARDWARE—As yet this line is one for the city trade only. True, the country has taken some good lots, but generally speaking, these were ordered early in the year for stocking-up purposes, and have been going out during the past few weeks. Now the country is inquiring only, and until the roads dry up and improve it is hardly likely that any large quantities will go out on order. Bad roads kill trade and do not at all induce building.

SPORTING GOODS—Rapidly coming to the front are a number of sporting lines. The outdoor games have the call, and baseball and lacrosse goods have passed the inquiry stage. Ammunition and guns are coming to the front again, though up to now sales have not been big.

HEAVY GOODS — Practically unchanged in condition and price. Demand is fair, but the quantities ordered are small. Bar iron is $1.95. Stove bolts are 80 and 7½. Bright and steel wood screws, flat, 85 and 10 and round head, 80 and 10 per cent. Brass screws are: flat, 75 and 10 and round head, 80 and 10 per cent. Brass screws are: flat, 75 and 10, and round, 70 and 10.

BUILDING PAPER SUPPLIES—The prices of caps and nails have been reduced from 7 cents per pound. Caps are now 6 cents per pound and nails 5 cents.

U.S. IRON TRADE.

Cleveland, O., April 8.—The Iron Trade Review says:—The lapse of practically the first month upon a reasonably defined price basis is now permitting an accurate comparative summary to be drawn from the iron and steel conditions under the open market and the result is evidence of genuine improvement. Although the abandonment of official prices dates from Feb. 19, it was not until two weeks later that the market had overcome the disturbance arising from the decisive action taken or had settled to a state of rational negotiations between buyers and sellers. Current reports of extremely low prices being made in some lines are still promoting some doubt and uncertainty, but the buying public has apparently fully discounted these at their true value.

In several of the finished lines of iron and steel, the month of March was the heaviest in point of mill orders booked since the beginning of the depression 18 months ago. This improvement has not been confined to the seasonable products or to particular companies, but has been spread over most of the list of principal rolled material, excepting rails, and has been distributed among the several makers. Marked gains in the tonnages of specifications received have been shown in steel bars, tubular goods, sheets, tin plates and structural shapes and plates.

The showing of steel bars has probably been the best. The increase in building operations in the country is plainly shown in the better running schedules of the structural mills. In pipe, especially line pipe, some companies have made heavy engagements for early shipment.

METAL NOTES.

The seventh annual report of the U. S. Steel Corporation for the year ending Dec. 31, 1908, just made public, shows the gross sales and earnings to be $482,307,840.34, a decline from 1907 of 36 per cent. The net earnings were $91,847,710.57, a decline of 43 per cent. from the previous year.

F. P. Jones, general manager of the Dominion Iron & Steel Company, Sydney, C.B., says that the report is absolutely untrue and without foundation that he stated that his company can furnish steel to the world's market at $6 per ton less than Pittsburg. This statement was first printed in the Canadian Gazette and the Gazette has now published his denial of having made any such statement.

Cuba, where are located iron ore properties belonging to the Bethlehem and the Pennsylvania Steel Companies, exported to the United States 639,000 tons in 1906; 657,000 in 1907; and 580,000 tons in 1908.

Lake Superior iron ore producers say they are not averse to a reduction of the ore duty, but they do not like to see it entirely wiped out. While they do not yet see any serious competition from the Canadian side, they realize that 40 cents a ton advantage over present conditions will encourage by that much the production of Canadian ores for sale in the United States.

One of the most important regions for copper, in spite of its unfavorable location, although at present closed because of over-production, is the source of the Tigris River, in Asia Minor, where the celebrated mines of Arghana Maden are located. The ore mined here contains from 13 to 14 per cent. copper. At the mines the ore is only cleansed before being transported on camels to Tocat, a distance of six days' journey.

A big strike of magnetic iron ore is reported to have been found at the mouth of the Campbell River, on the east coast of Vancouver Island. Prof. Hoffman, Ottawa, gauges samples running 67.47 magnetite.

HARDWARE FACTORIES DAMAGED BY STORM.

The windstorm which struck Ontario on Wednesday last, did a great deal of damage to factories all over the province. Besides smashing windows in many hardware and other stores the following concerns, manufacturing hardware lines, suffered much loss through the storm :—

In London, the London Brass Works, suffered the loss of a large chimney, while a galvanized shed near their building was blown over. The Hobbs Glass Works, at London, was damaged to the extent of $2,000 by the large chimney being blown down. The boiler room was wrecked, as well as the planing room, and many employes narrowly escaped injury. At Brantford, Ham & Nott's factory sustained damage through the smokestack being blown over.

The wheel works at Merritton were damaged to the extent of $500, by the big blow.

The big smokestack of the Belleville Hardware Co.'s factory at Belleville, was blown down, crashing through the building next door.

The upper story and a portion of the roof of the addition to the Ontario Lantern Co.'s premises, at Hamilton, were carried away.

A new building of the James Smart Mfg. Co., at Brockville, was damaged by a coal shed being lifted by the wind and smashed against its side.

MONTREAL MERCHANTS' BIG MEETING.

Whether it was owing to the inclement weather, or to the fact that members knew that they could safely leave their interests in the hands of their president and the secretary of the association, the fact remains that no one, beyond the two gentlemen mentioned, and a few newspaper scribes, attended the meeting last week called by the hardware dealers' section of the Montreal branch of the Association of Retail Merchants' of Canada to discuss the bill before the House of Commons to amend the Criminal Code with regard to the sale of revolvers. The meeting, however, did not lack enthusiasm on that account. The newspaper men were invited into the board room, and for once became active participants, instead of passive, in a real live meeting. It is true that one representative had scruples over the whole proceedings and gently murmured protests as to there being no quorum, and as to the illegality of the proceedings, but the other men quietly gathered around, while J. A. Beaudry, the secretary, holding proxies for the people who should have attended, voiced the opinions of the hardware section of the Association. Mr. Beaudry explained that as time was pressing they could not postpone the meeting, and what he and the president, Arthur Leger, thought, was naturally what the other members would think. It was a magnificent example of the best way out of a difficulty, and should be patented.

The Montreal Star, whose representative was not noticed at the meeting, came out with a graphic description of the numerous gathering of members, and of the taking part in the discussion of several of the most important hardware dealers in the city.

MONTREAL NOTES.

The Montreal Wholesale Hardware Hockey League concluded their first season with a dinner at the Welland Hotel on Saturday night. The president of the league, H. B. Seybold, took the chair. The principal event of the evening was the presentation by Lieut.-Col. Robert Starke, of the handsome silver cup given by the honorary presidents for annual competition among the league. The Canadian Fairbanks Co. were the winners this year, and the cup was received for them by R. C. Hobson, and acknowledged in a neat speech. The cup was afterwards filled with champagne and passed round the room. Speeches were made by the captains of the different teams and by others, and all expressed their satisfaction with the way the officers of the league had conducted affairs during the winter. Among the guests were Lieut.-Col. Robert Starke, A. L. Brittain, C. Earle, Gordon Seybold, J. B. Hennessy and A. McCuaig. Letters of regret were received from G. Caverhill, J. G. Lewis, W. Starke, H. J. Fuller, C. Edgar Wood, C. M. Strange and J. R. Kennedy. Among those present were E. C. Dingman, secretary; H. W. Massey, James O'Dell of Caverhill, Learmont & Co.; J. T. Smith, C. F. Walker, G. E. Chaffee, of Lewis Bros.; Fred. Gibb, L. Favreau, Starke-Seybold; and M. P. Shea, R. G. Hobson, and M. Davidson of the Canadian Fairbanks Co. The cup does not become the property of any club until it has been won by them three times, but not necessarily in three successive seasons.

THE HOTEL CECIL.

The recent completion of the new wing to the Hotel Cecil, Ottawa, makes Walter Walby the proprietor of one of the finest hostleries in Canada. It is now an ideal traveling man's home. The Cecil, since its establishment, has catered first, last and all the time to the commercial traveler. Mr. Walby, for seventeen years associated with the best Ottawa hotels, saw the splendid opening there was in that city for a house that would strive to secure and hold the trade of the commercial men. He established the Cecil, and his splendid success is proof of his wise foresight. The new wing is even more up-to-date than the rest of the house, which is quite modern. Comfortable rooms, neither too large nor too small, but just home-size, well ventilated, and above all things clean, make the Cecil a first-class house, when these features are supported by an excellent cuisine.

Running water, numerous toilet rooms, rooms with bath, electric lights, elevator service, sample rooms, all things demanded in a modern hotel by the commercial traveler are found in the Cecil. Another pleasant feature about the Cecil is the courteous attention one receives from the whole staff. There is just that much concern for one's welfare and enjoyment to be appreciated.

It is worth while going to the Cecil one trip, anyway, just to see for one's self if all the nice things said about it are true. One finds there has been no exaggeration.—Advt.

Important extensions to the northern and southern ends of the Chatham, Wallaceburg, and Lake Erie electric road are announced. The towns of Blenheim and Ridgetown on the south and Petrolea and Sarnia on the north will be tapped this summer.

Trade News From Atlantic to Pacific

Quebec and Maritime

Large Order for Rails Given by Grand Trunk Pacific—Nova Scotia Master Plumbers Asking for Incorporation —Trade Opening up Very Satisfactorily.

HALIFAX.

April 6.—The hardware trade is now quite active, and the outlook for a busy spring is most cheerful. The travelers continue to send in good orders, though not as large in some cases as formerly, but on the whole they are most satisfactory. Quite a number of the vessels belonging to the Lunenburg banking fleet arrived during the week and as a result there was quite a demand for some lines of fishing supplies, particularly nets and twines. The opening up of navigation between the shore ports and the city has also helped trade greatly. Ice on the coast, however, has interfered to some extent with navigation, as the vessels are unable to run on schedule time. This is quite a drawback as some dealers who send in rush orders for goods cannot get them on time. Prices throughout the list are very steady and no changes are looked for at present. A drop of ten cents in the price of lead pipe is the most notable change. There is a fairly good demand for oils, linseed (boiled) selling at 65c in barrel lots, and 71c in smaller quantities. Raw is quoted at 62c in cask lots and 67c in smaller quantities.

Some of the new crop of turpentine is now coming on the market. It is quoted at 70c for barrel lots and 80c for smaller quantities. Trade in poultry netting is quite brisk and there is a fair demand for tire steel and black sheet iron. Business promises to continue to keep booming at the plant of the Dominion Iron and Steel Company. This concern has been most successful in securing orders to keep the plant in operation. The Grand Trunk Pacific has just awarded the company a contract for one hundred miles of rails, and there is a possibility of securing another order for an additional one hundred miles for the same railway. All the large industrial establishments are running on full time, and business appears to be in good condition.

Faulkner & McDonald have commenced work on the $30,000 addition to the Academy of the Sacred Heart, and Contractor Lounds is now putting in the foundation for the new brick building to be used as a children's hospital.

A bill has been introduced in the House of Assembly to incorporate the Master Plumbers' Association of Nova Scotia. The bill sets out that it is desirable that those named and others who may hereafter be associated with them be incorporated into an association, having for its objects and purposes the following: Promoting the advancement of the trade in its sanitary, commercial and scientific departments. Protection against imposition, injustice and encroachment upon its common rights and interest. The education of its members and the improvement by its members of the plumbing trade generally. The dissemination, among the people, of sanitary science and its principles, and the mutual assistance of its members.

J. H.

ST. JOHN.

April 7.—Nominations for civic elections will take place on Tuesday, April 13, and the election will be one week later. Up to the present time several men well-known to the hardware trade are in the field for aldermanic honors. No opponent has yet appeared to contest Ald. Rowan's seat at the board and the north-end hardwareman is likely to go in by acclamation. Clarence B. Allan, dealer in stoves and general hardware, will oppose Ald. Vanwart in Duke's Ward and Joseph A. Wikely, lumber dealer, is out against Ald. Hamm in King's Ward. W. S. Fisher, of Emerson & Fisher, was asked to run for mayor but declined.

A special meeting of the shareholders of the H. H. Dryden Co., of Sussex manufacturers of tinware, was held in Sussex recently when the unsecured creditors were asked to accept a compromise of twenty-five cents on the dollar, failing which, the company will go into liquidation. The liabilities of the company amount in all to $68,759.71, and the total assets to $42,274.52, making an excess of liabilities of $26,484.65 over assets.

Material had been purchased from all the large creditors who have factories in Montreal and Toronto. Five of the principal creditors have claims amounting to $22,000. There are about fifteen creditors in St. John, mostly for small amounts.

The company was formed in 1906 to take over the business of H. H. Dryden and build large factories for the manufacture of tinware in Sussex. A full line of tin articles has been carried. Some thirty-five hands are employed. People in Sussex are said to be anxious that the business should continue, as, if wound up, it would be a great loss to the town. The present situation is attributed to lack of capital and to the cost of the building operations being underestimated. The company is said to be capable of doing a fine business if a satisfactory compromise can be effected and more capital is introduced.

George A. Lockhart, who for the past seven or eight years has been employed in the James Robertson Co., has severed his connection with that firm and accepted a position as traveler for W. H. Thorne & Co. Previous to the leaving the James Robertson Co., Mr. Lockhart was presented with a very fine traveling bag by employes of the company.

The city engineer at Moncton is calling for tenders for converting the opera house into city offices, according to plans and specifications to be seen at his office. Tenders closed last week but the contract has not yet been awarded.

A brick building, two storeys high, with cellar, dimensions 50x70 feet, is being built on Celebration St. It will be utilized as a bakery and knitting factory. Gay & Hamilton have the contract.

W. E. H.

MONTREAL.

April 7.—A well executed model of a residential house painted in delightful colors is being shown in one of the office windows of A. Ramsay & Son Co. The paint is well matched, and the whole design shows how effectively painting improves a house, and adds to its value as a selling proposition. The model makes a most striking advertisement.

The retail merchants here and there are commencing to give a spring-like appearance to their windows. Fishing rods and tackle are mostly in evidence, and the Cavanagh Co., Notre Dame West, have a simple little fishing window that is easily made and yet looks attractive. A small tank of water is surrounded on three sides by a wooden fence. On this fence, reels, etc., are hung, while the lines from fishing rods extending the whole height of the window fall into the water. In the water are displayed various kinds of trolling bait. Imitation moss completes a very neat window. The Durand Hardware Co. are showing yachting supplies and rope, and with tins of paint especially prepared for boats, etc., that part of the window devoted to the purpose looks very bright and seasonable.

There is no cessation in the buying of materials by the Canadian railroads and as railroad purchasing is a good barometer of general trade improvement, the action of the Canadian corporations should not be lost sight of in considering prospects. The Grand Trunk Pacific are especially active just now. They have placed an order with the Montreal Locomotive works, Longue Pointe, Que., for 25 eight wheel engines ; an order for 22,000 tons of 80 lb. steel rails with the Algoma Steel Company, Sault Ste. Marie ; and an order for 13,000 tons of 80 lb. steel rails, and 2,000 60 lb. rails with the Dominion Iron and Steel Company, Sydney, N.S. The Grand Trunk also building two steamers for service on the Skeena River, B.C.—F. J. A.

Ontario Trade News

Chatham Board of Trade Adopts a Policy Worthy of Being Followed by Other Places — Novel Advertising Scheme Being Tried at Peterboro— Interesting Gossip From St. Thomas— Good Season for Bicycles Expected —Butterworth Business at Ottawa to be Sold.

BELLEVILLE.

April 8.—W. C. McLean, son of Donald McLean, of this city, has resumed his position as western traveler for the J. H. Ashdown Hardware Company, Winnipeg, after an absence of two years, which he had spent in his old home here, having had to resign through illness. Mr. McLean was with the Ashdown firm for eleven years and knows the northwest like a book. Mr. McLean served his apprenticeship with John W. Walker in this city, and is still on the sunny side of 40 years of age.

W. T. Fleming, traveler for the Martin-Senour Paint Company, Montreal, has just returned to the city after a five weeks' trip through the Cobalt district in the interest of his firm. He reports business as booming in that district and cites one case as an example where he sold one carload to a dealer in Cobalt who manages four stores in four different places. H.C.M.

KINGSTON.

April 6.—There is at present a good deal of building going on in Kingston, and the outlook is bright for an active season. Contractors, interviewed by your correspondent, state that they have lots of work on hand. At city engineer Craig's office, it was stated that numerous permits had been taken out for the erection of new houses, or extensions to old ones. It is estimated that the cost of the work covered by the permits for this year totals about $27,000.

The bicycle repairers are already busy with work and this would go to show that bicycles will be used as much as ever this year. A leading dealer was asked by your correspondent about the prospects. "I think it will be a good season," he said. "I expect a great many sales, just as soon as the roads dry up." One dealer has sold five new automobiles so far, and this would go to show that business in that line is good.—E.G.B.

OTTAWA.

April 6.—The past week has developed an enlivenment in trade and the optimistic ones look for a steady increase from now on. However with the bright building outlook, which up to the present shows a remarkable increase over last year for the same period, trade ought to rapidly resume its former strength and attain a greater advance than in the previous year. Since the first of the year 88 permits for buildings have been issued as against 50 for last year. A large number of permits have been issued for dwellings ranging in cost from $2,500 to $5,000, and the real estate transfers are also multiplying in properties around these figures. Thus it will be seen that the demand for household hardware, fittings and bathroom furnishings should and must necessarily be far in excess of that for 1908. Not only are there numerous private dwellings to be erected, but there will be several apartment houses added to Ottawa's existing number, and these will mean business for the hardware men. Business is certain to come and with wide-awake salesmen, up-to-date ideas and strong, forceful advertising, the hardwaremen of the capital should experience a successful year.

The Butterworth Foundry is experiencing a busy time, night work being occasionally required to successfully cope with the orders being received. Shanty ranges continue in strong demand owing to the influx into the Gow Ganda district. This firm's shanty range is meeting with great favor and large shipments are being made. A big order for furnaces has just been received from the west, which is expected to prove of future favor for this firm.

A. D. Fraser of York Street is selling out his hardware business.

The Tobin Tent Co. report a goodly demand for tents by the gold seekers going up to Gow Ganda.

Hull has a new industry. It is called The Hull Woodenware Co., and its first product is "Maple Leaf" toothpicks. This is said to be the only factory of its kind in Canada and a business of promise is anticipated. It is the intention of the company to make broom handles and other wooden goods, including shoes for machinery, so soon as operations assume encouraging proportions.

Knox Brothers, plumbers and steamfitters, announce their removal on May 1 from their present stand on Bank Street to the corner of Waverly and Elgin Street. Ottawa is rapidly growing in this direction, south, and this firm is ready to meet the demands of the residents of this new section.

Announcement is made of the sale by tender of the Butterworth Foundry and the Butterworth Hardware business. Both these businesses are enjoying encouraging prosperity and the opportunity presented is one of importance to every man interested and engaged in this line of business.

The number of real estate transfers during March indicate great activity in this line and also tend to prove that money is "easier" now than it was a short while ago. With this improvement financially a corresponding advance will assuredly be noted in trade generally.

Considerable interest is aroused in and opposition is expressed in connection with the application of the Morrisburg tinplate industry for a protective tariff on tinplate and galvanized iron. One of the leading sheet metal working firms here stated that such a duty would not only affect the manufacturer, but also the retailer and consumer, and that there was really no one who would not be affected by such a tariff, It was further suggested that there would be doubt as to the capacity of this firm for supplying the needs of the Canadian manufacturers. It is altogether likely that vigorous opposition will be evidenced against such an imposition and it is hardly thought that the government will, in view of the many important facts of the situation, place such a duty on this class of metal.

G. E. M. H.

PETERBORO.

March 30.—Knox church congregation decided to erect a new church at a cost of from $25,000 to $30,000. Tenders will be called for at once.

The local hardware stores are booming their paint business. The window decorations are very attractive. The Peterboro Hardware Co. has a display of Alabastine, Muresco and similar brands, while in their other window they have a practical example of the value of good stains and oils for floor use. There is one board of a supposed floor painted with one coat, another has two of a different color, and so on to the desired stage, and the whole is given an attractive background which is catching the eye of many householders who are now out on a rampage for the goods for the annual spring cleaning work.

The Kingan Hardware Co. have a neat window of builders' tools, arranged in a pleasing manner.

Gordon Cox and Earl Weller, formerly of this city, but now of Toronto, are going to establish a hardware business in western Canada, probably in Pembina, a town 65 miles west of Edmonton. They will leave for the West on April 13th, if their present plans are carried out. Mr. Cox is a young man who learned the hardware business with the Peterboro Hardware Co.

The returns from the customs house here for the month of March exceed those for the same month last year by $4 000, being an indication of the return of commercial activity.

The work on the new armories is now practically completed and the formal opening will be held on May 24. The painting contract was carried out by Messrs. Duncan & Doupe; the plumbing and lighting by F. R. J. MacPherson Co. The Galt Art Metal Co. did the galvanized iron work and Bennett & Wright had the contract for the heating.

The Peterboro Hardware Co. have an attractive window display of the Sherwin-Williams paints, oils, etc.

Hardwaremen report a large sale of traps and other accessories of the trappers who have already begun their work.

Four miles of granolithic sidewalks will be constructed on Peterboro's streets this year.

Tenders will be called for shortly for the erection of a new public library to be built this summer.

The Goldie, McCulloch Co., of Galt, supplied the new machinery for the Peterboro Cereal Company's mill which has recently been enlarged and refitted.

The Best Hardware Co. have begun a unique advertizing scheme which was launched before the Peterboro public on Saturday, April 3. They have five prizes on exhibition in their windows to be given to the five customers whose cash purchases from the opening until the closing day of the competition reach the five highest amounts. Dealers and contractors alone are barred. The closing day of the competition is December 31, 1909. The five prizes in their order

are: 1st, a Happy Thought range; 2nd, a Radiant home heater; 3rd, a Caloric fireless cooker; 4th, a washing machine; 5th, a clothes wringer. Cash purchases alone count in the competition. Each purchaser receives a folder in which the amount of each purchase is written by one of the clerks. The cash register likewise records this amount and the name of the person making the purchase is written on the back of each slip from the register. These are kept in the office and a double record is thereby kept, the one by the company, the other on the purchaser's folder. They have advertized the beginning of their competition in the daily papers and in future it will, to a certain extent, take care of itself. They have also distributed dodgers and the attractive window "ad." has also helped to put the scheme well before the public. They state that this plan will help others as well as themselves. It is the intention of the members of the company to keep the competition before the public throughout the rest of the year in an endeavor to realize the success which they expect. Ray P. Best and W. J. Campbell, of the Best Stove and Hardware Co. are both young men and have planned the competition as something out of the ordinary advertising systems in hardware lines.

H. T.

HAMILTON.

April 6.—There is a decided activity in gardening tools, according to reports from the hardware stores. Few centers find such a ready demand for these articles as does Hamilton with its arable land and surrounding fruit belts. The fine weather of the past few weeks has been a big boom to business and the presence of large numbers of purchasers from outside places who have been brought to the city on the cheap excursions given by the Stanley Mills company, has given an added impetus to the retail hardware trade in this city.

There still continues a heavy trade in builders' supplies and articles required for spring house cleaning and the general brushing up which is peculiar to this season of the year. The boom is on in real earnest and building permits average about $22,000 a week. The official figures of the building inspector show that the permits for March exceeded in value those of the same month last year by $75,900. Last year's figures were $96,450 and this year $172,350. The demand for builders' hardware necessarily increases and the Canada Glass, Mantels and Tiles, Limited, reports a heavy business. This firm took over the local agency of the Brooks, Sanford Company last September and its business has increased so that it has had to add to its store space.

Dealers in gas piping, stoves and fittings expect this year to be one of the greatest in the history of natural gas usage in Canada and particularly in Ontario. Several local dealers were spoken to and they expect a very heavy run in gas supplies during the coming year owing to the popularity of natural gas for household purposes and the fact that new wells will be tapped all over the country. Companies which were organized years ago for the sale of natural gas are being revived and dealers in natural gas supplies are springing up very rapidly. Most of the hardware dealers in this city find these supplies a good side line to handle. At present gas piping is lower in price but it is expected to take a jump any day.

Gordon C. Wilson, of Dundas, member for North Wentworth in the provincial parliament, in a speech here last Friday night declared that it was not his devotion to the hardware trade which impelled him to speak against the bill to restrict the sale of fire arms in the house last week. Mr. Wilson is a successful hardware dealer in the Valley City. He said his utterances were instigated purely by the desire to permit every young man to use the rifle or revolver as often as he wished in order to encourage the military spirit. He believed that if a man did not learn to shoot before he was about 18 there was very little hope for him after that. D.L.

LONDON.

April 6.—London manufacturers are looking forward to a busy time the coming season. Many of them have a large trade with the West, and judging from present conditions there is certain to be a big demand from that quarter for all classes of goods. Col. Gartshore, of the McClary Manufacturing Company, states that that concern is very busy shipping to all parts of the Dominion. Not only in the West is there activity, but in Ontario business conditions are satisfactory, while in the Eastern Provinces they are rapidly improving. "We expect," Col. Gartshore says, "conditions will continue good throughout the season, while in the West they will be very good."

G. H. SMITH, LONDON,

Moved From the London to the Winnipeg District by the McClary Manufacturing Company.

G. A. MAGUIRE, LONDON,

Now Representing the McClary Manufacturing Company in Toronto District.

George White & Sons have postponed until next year the erection of their new $50,000 building, owing to Niagara power not coming here this year. Next year, Niagara power, or no Niagara power, the building will be gone on with. Meanwhile the firm will proceed with the erection of a warehouse in Brandon, Man., and a large lumber house here.

Fire did $3,000 damage to the Lamb Fence Company's plant on Bathurst St., on Saturday.

The employes of the McClary Manufacturing Company intend giving a minstrel performance in Bennett's Theatre on April 14 and 15.

The cost of the production of stoves is not affected by the recent slump in the steel market, and the selling prices will remain unchanged. As a matter of fact, iron has advanced and declined in price in the past without any change in the price of stoves. Besides, the price of moldings has been settled for this year. The buying of stoves should, therefore, proceed without any thought of a possible drop in the cost of materials used in their manufacture.

Local retail hardwaremen report trade improving, and the prospects most encouraging.

G. T. Y.

BRANTFORD.

March 30—From reports received, the spring paint trade will be better than for years past. Watt & Squire and Geo. Elliot, jr., are pushing Ramsay's paints by the use of personal talks with customers, and plenty of newspaper

publicity. Ballantyne & Son this week displayed a neat window of "Jellstone," the popular alabastine, and this economical method of treating the home attracted the attention of a large number of Saturday shoppers. In their north window they showed a fine line of mechanics' tools.

Now that the contract with the Western Counties' Electric Power Co. has been signed by the city council, and the Beck bill has been altered to allow the contract to stand, there promises to be a general boom in electric lighting, as over gas, the price of which is liable to ascend at any time. Critics all over the province have congratulated the city council upon the very low rate secured for lighting, heating and power purposes.

The Brantford Emery Wheel Company have removed to their new building on Dalhousie street to the rear of the machine shop of Herod & Company, Henry Oscomore, stove merchant, who is secretary of the Retail Merchants' Association of Guelph, spoke to a large gathering of local merchants last week; about 100 being present, including a large number of the local hardware dealers. He spoke upon the debt collection system in vogue at the Royal City. Mr. Huston, editor of The Canadian Grocer was also present and addressed the gathering. The system was discussed in all its phases, and a committee was appointed to look further into the matter. The result will probably be the appointment of a salaried collector. Some amusing stories of how they have been "done" in times past were told by some of the merchants.

As mentioned last week, the Park Baptist Church contemplate improvements. A new basement Sunday school room will be put in, and the interior of the church will be changed. A new parsonage will also be built.

Tenders will be called this week for alterations and improvements, totalling about $5,000 at the County Court House.

W. H. Turnbull, jr., has returned from an eight months' residence in Moosejaw, Sask., and has resumed his position with W. H. Turnbull & Son, Colborne street.

Harvey Wilson has opened his new hardware store in the Allchin Block, Paris.

A report from the West states that the implement dealers are greatly pushed for implements. This will greatly improve conditions in the local factories, with consequent general prosperity.

Lots of small jobs—that seems to be the general forecast of building conditions here. During the past week, permits have been issued for a large number of houses ranging from $600 to $2,500. The local plumbers feel much elated over the prospects for the season.

R. Wrigglesworth, of the Batty Hardware Co., Norwich, unfortunately cut his hand badly while opening a bottle last week. The wound required several stitches.

Tenders are being called for a new school to replace the one known as White's schoolhouse. It will be of red pressed brick.

G. C. Schultz and W. D. Schultz, of Schultz Bros. Company, have left for a trip to the Pacific Coast. A. W.

CHATHAM.

April 6.—On all hands optimistic views of the hardware outlook are voiced. The marked revival in building operations is an indication of returning prosperity. Customs receipts at Chatham for March, 1909 were $21,000, approximately $7,000 more than for the same month of 1908. The outlook for the future is brightened by encouraging crop reports, farmers stating that the wheat was never in better shape, fields thought dead a few days ago having picked up amazingly; while clover is in excellent shape, and apparently undamaged by frost. Spring goods are commencing to move out rapidly, and with good weather there should be a big boom in business. One hardwareman stated that his business for the month just closed was almost 31 per cent. more than that for March, 1908.

Mayor Westman, who, in his capacity as ex-officio water commissioner had considerable to do with the recent regulation requiring manufacturers to place their water services on meter, has been lately the cheerful centre of a small-sized storm as a result. Hot words passed at a conference of the manufacturers and the water commissioners on Tuesday called to discuss the matter, and on Wednesday evening the board of trade, after some discussion, passed a resolution asking the commissioners to defer enforcing the new ruling till the end of the year. Manufacturers claim that they have yearly contracts, and that hence the notice was insufficient. The water commissioners in turn, at their meeting, marked the resolution "received," adopted a sliding scale of rates based on the amount of water used, and asked the city solicitor to give his advice regarding the legal point raised. Mayor Westman states that his sole aim is to place the waterworks on a business basis and prevent waste.

The board of trade last week adopted a resolution to the effect "that henceforth this board of trade leave industries in other Canadian cities alone." Chatham has been accused, not always with justice, of offering inducements to industries burned out in other cities to locate here, thereby compelling the home cities to put up "inducements" in the way of loans and bonuses. The board of trade, however, has now set itself firmly against the practice.

Brisco Bros. sporting goods and bicycle store has undergone a change of management, Ernest C. Brisco having bought out the interest of his brother, F. H. Brisco, in the business. The store front has been repainted a striking shade of ultramarine blue, and the windows adorned with the new proprietor's name in neat letters. An attractive window display of bicycles and accessories was one of the inaugural features under the new management.

Spring window displays are the order of the day, paint and tool windows being a prominent feature of the hardware stores. Westman Bros. this week have an attractive bicycle and go-cart window.

W. A. Barr & Co.'s hardware store, Merlin, was last week visited by burglars, who, entering by the back door, practically destroyed the cash register to obtain a few dollars in silver, though a dollar bill was passed over. A few small articles were also taken. Though this is the third burglary in about six weeks, nothing much seems to have been done in the direction of apprehending the culprits.

L. J. Ruth, Ridgetown, has moved his tinshop into the vacant store next the Massey-Harris building.

Roy Gammage, Ridgetown, has taken the store in the Bedard block next the Laing barber shop and will carry on the plumbing and tinsmithing business there. Gammage & Co. are stocking up with autos for the coming season, this necessitating the move.

Stonehouse, Munroe & Zavitz Co., Wallaceburg, have added an up to date new safe to their store equipment.

Del Davis, who recently bought the Hargrove Bros. general store at Sombra, is putting in a plate glass front.

Wm. J. Cain of Port Lambton has repurchased his general store from Breise & Huffman, who will remain in Muskoka.

Leigh Burnett, Dresden, has severed his connection with the Carscallen hardware store, and entered the employ of Jas. McGregor, implement agent. Mr. Burnett's place has been taken by Ethridge Newman.

Andrew E. Laing, Ridgetown, who recently dissolved partnership with his brother in the hardware business, has entered the practice of the barber's art. The hardware store's firm name, formerly J. Laing & Sons, is now simply G. W. Laing.

E. S. Hubbell & Sons, hardwaremen, Thamesville, use a full page of newspaper space to boom spring goods in the line of paints, brushes and other accessories.

The difficulty of making collections is given as the reason for the recent assignment of R. J. Clements of the Tilbury Iron Works, the assignment being forced through the action of a Windsor supply house, following Mr. Clements' recent bad fire. Mr. Clements was doing a large business, much of it credit, with operators in the oil field.

Reeve T. F. Hinnegan, the Wallaceburg flax and cordage magnate, recently sustained a bad loss through the destruction of his Belle River flax mill by fire. The building and contents were valued at $10,000, the insurance being $6,500. By sheer good luck Mr. Hinnegan had shipped just a week before a carload of flax, valued at $2,500, else the loss would have been much more. At last accounts he was undecided as to whether he would rebuild.

Art McLean has joined the staff of Husband's hardware store, Wallaceburg. W. E. P.

ST. THOMAS.

April 6.—The roads in the vicinity of the city are now in good condition. Many farmers are doing their fencing. In consequence, wire and fencing are in good demand.

The trade report a good season in maple syrup supplies, some dealers repeating orders, four and five times for buckets and cans.

Albert Campbell, who has managed Crawford's Ross Street store since it was opened, has bought the business and will enlarge the store.

The Bell Telephone Co. are getting out plans for a building to be erected on their property next to the Ingram & Davey building. The plans call for a building 30' x 70' two stories and basement.

This year will see all the vacant places on Talbot street filled up, making over a mile (on the north side), of business blocks.

The Phone, Sutherland, and Hamilton & Stott buildings will soon be under way.

S. A. Potticony has secured the plumbing and heating contracts for the Engineer building.

The cycle dealers report prospects good for this season. J. B. Davidson will devote his time to autos, he having orders now on hand for six Fords.

The county council on Saturday awarded the contracts for two new bridges. The Petrolea Bridge Co. and Hamilton Bridge Co., securing the contracts.

The Board of Trade and city council are acting with similar boards from London and Port Stanley to put up a big fight for the securing of the proposed steel industry at Port Stanley. It is expected that some 1000 men will be employed and both cities will benefit by having the industry at the Port.

G. A. McMurtry, late of the McMurtry Hardware Co., London, is negotiating for a store near the city hall.

Finlay McDermaid, M.L.A., got his bill through the Legislature which will permit of the city H. L. & P. Department selling heat. The city has for a number of years been heating the municipal buildings with waste steam, and will now sell the balance. The new Engineers' building will be the first to be supplied. It is likely that all buildings in the vicinity of the power plant will look to this source for their supply.

Chas. Wonnocott has just received a sample of the McLaughlin-Buick auto, and expects to place a number of these cars this season.

A representative of a Toronto firm interviewed a dealer the other day, trying to place a stock of wood pulleys, when the dealer informed him, that should he place a line in stock, they would likely go direct to the users, and take orders. A number of manufacturers are guilty of this practice, and when questioned will allow the trade discount, but if not found out, they keep mum.

Speaking along this line the writer had brought to his attention not long ago the case of a Toronto paint traveler securing orders from a couple of painters who could not get credit in the city. It is safe to say that this firm, if they send the goods, will lose on the transaction. When the traveler left he paid his hotel bill by a cheque for $10, which the hotel man stills holds as he could not collect it.

Another case was of an oil firm, who sent their traveler to threshers direct. The party in this case refused to accept the oil, as he bought it cheaper from a local dealer. The oil company brought suit but lost and had to pay freight charges both ways.

A case is now before the court here, of a metallic roofing company, who are suing to recover for material supplied to a contractor, who failed a year ago and who could not get credit, but who had no trouble securing it from the manufacturer.

It is cases like these that retailers are up against and no wonder some think there is no use in handling material that is sold this way and very little sympathy is given when manufacturers get soaked by these fellows.

J. A. Kilpatrick, of this city, who is now manager of the Canada Iron Corporation has, with others, acquired the large car wheel works of the Geo. H. Thatcher & Co., Albany, N. Y., and is president of the new company.

F. T. Stacey, lately with F. W. Bird & Co., Hamilton, is now representing the Brantford Roofing Co. G.E.F.

The Prairie Provinces

Calgary Clerks Urging Early-closing—Alberta Traveler Dies Suddenly—Change in Management of Calgary Store.

WINNIPEG.

April 6.—L. S. Starr, a furniture dealer here, has taken over the hardware stock of J. E. Thomas and is running off a "10-Day Bankrupt Sale." The goods are being sold about cost and are moving rapidly. After 10 days Mr. Starr will move the stock to another part of the city, and he may remain in business.

Other retailers are somewhat annoyed over this cut price sale since it opened at a time when the trade generally was expected to be brighter. It may be a matter of interest at a future meeting of the hardware merchants' association to discuss the undesirable features of a sale of this kind, with a view to eliminate them.

The official building figures for March were issued yesterday afternoon showing 167 permits issued in the month covering 208 buildings being erected at a cost of $851,700. This is the largest March total in the history of the city. Following is a comparison which shows the March figures in each year since 1905.

	P'ts.	Bldgs.	Cost
March, 1906 ..	231	331	$782,800
March, 1907 ..	225	264	703,350
March, 1908 ..	64	73	114,100
March, 1909 ..	167	208	851,700

To date this year the building total is $1,059,900 as against $141,000 for the corresponding period of last year; $967,150 for that period in 1907 and $1,150 300 in 1906. The total for March this year includes a big extension to the Manitoba Iron Works plant to cost $50,000.

R. J. Younge, sales manager for the Canadian Rubber Co., and formerly secretary of the Canadian Manufacturers' Association, is in the city inspecting the local branch.

The G. F. Stephens, paint and varnish manufacturers, of this city, have almost completed their spring order shipments, which are all of April 1, dating. The sales manager reports an exceedingly heavy business this spring, and it is interesting to note that compared with one year ago, business has increased about 25 per cent. The shipments call for 60-day payments, which will make June their collection month. The Stephens' products are rapidly taking the place of American paints, which have been used here very extensively. L. C. H.

CALGARY.

March 30.—The retail merchants of the city met this afternoon to consider a petition sent in by over seventy-five per cent. of the retail clerks asking for a weekly half-holiday. A motion was carried that the clerks pass a petition around, and it will require the signature of seventy-five per cent. of the merchants in order to bring the half-holiday in force.

The City Commissioners are calling for tenders or estimates for valves, connections and hydrants for the season's work.

The Winnipeg Paint & Glass Co. will add this summer three additional stories to their present warehouse on Eighth Avenue West.

Building permits have been issued to J. A. McPhail for a residence in Hillhurst $1,700; Geo. W. Rae 5th Ave. $1,700 residence; F. Vickers, South Calgary; J. A. Kneoppfle, Eleventh Ave. East; Wm. Scott $1,800 residence opposite Victoria Park, and to F. X. Stahle for a three-storey cement block, double residence on Thirteenth Ave. east.

A. M. Terrill has commenced the erection of a new $5,000 greenhouse in East Calgary, near Cushing's factory.

W. H. Waugh, of the Coner Hardware Co. has returned from a trip to Prince Edward Island.

The growth of Calgary and the increasing business is becoming more evident every day. The continued opening of homestead lands makes a steady increase in the enquiry for all lines of building goods, tools and barb wire. The Calgary district still looks pretty good to the thousands of settlers who come annually to the west. During March there were 436 homestead entries made in the local land office.

Clearing house returns for the month of March show the ever-growing prosperity of this city. They reach a total of $6,740,041 as against $3,957,877 for the corresponding month last year.

The value of the building permits issued during the month of March call for an expenditure of $94,900, against last year's figures of $42,100.

More evidence that building operations will be active and extensive in Calgary this year is shown by the number of building permits applied for. J. McLeod applied for a permit to erect a four-storey stone and brick business block on First Street west, just south of the subway, and expects to commence building operations at once. G. H. McCaskill for a $3,000 residence on Fifth Ave. west; E. H. Crandell a $2,000 residence on Thirteenth Ave. east.

Work has commenced on a business block for Thurber and Giles on First Street east, just back of the Cameron block. The work is under the supervision of contractor Brocklebank.

John Drew, who has had charge of The J. H. Ashdown Hardware Co. in Calgary, for the past four years, left for Winnipeg on Tuesday last, where he will still be connected with the same firm. We are very sorry to lose Mr. Drew from our hardware circle, but he felt called upon to make the change on account of the ill health of Mrs. Drew. Mr. Drew is succeeded here by Walter Nancara, who has been representing the Ashdown Co. through this province.

Regret is expressed at the sudden death of Arthur Ireland, late traveller for G. F. Stephens & Co. Mr. Ireland had been in his usual health until the latter part of last week when he was attacked with tonsilitis, which resulted in diphtheria. He was removed to the General Hospital on Monday, and everything possible done, but all efforts were fruitless, as he passed away on Tuesday night. He leaves a wife and one small child. A. R. A.

British Columbia.

Aluminum Replacing Copper in Electrical Work—New Industry at Nelson—Vancouver Building Shows Big Increase—Victoria Hardware Firm to Build New Store.

VANCOUVER.

March 27.—Steel construction in buildings in this city is very apparent at present, and in the down-town portion huge skeletons several storeys high are in shape awaiting the clothing of masonry. Three of the notable instances are the Winch building, adjoining the new post office, the Carter-Cotton building, and the new court house. In addition to these others are proposed. The new style of construction comes with the growth of the city and make the buildings practically fireproof, which is no mean point, since the underwriters consider any city liable to be wiped out in a conflagration.

C. Ross McAdam, formerly of Hamilton, but now representative of the Exshaw Cement Co., of Exshaw, Alta., is in the city. Mr. McAdam has the distinction of securing the record orders at Fernie, where he took business for 300 cars of cement, used in rebuilding that city. He also secured orders for 20 cars at Kamloops, while on his way to the coast. This cement won out in tests at Spokane, Wash., and although a Canadian article is now specified in contracts there.

Fred Stork, ex-mayor of Fernie, who is now in the plumbing business in Prince Rupert, is down on a trip. He reports having all he can do in the new terminus.

Emar Goldberg, of Seattle, manager of the Great West Smelting and Refining Co., of Seattle, was in the city this week. He proposes to establish here a small smelter and refinery for the production of babbit metal, and looked over several likely sites.

Something new altogether in the way of sawmill machinery has been invented by J. W. Bell, of this city, an old-timer in the industry. It is a gang oscillation, which, it is claimed, will do its work with absolute perfection, something never before attained in the working of a gang. This new action is known as the double oscillation movement, both the top and bottom slides being rocked or oscillated, and the slides being pivoted below the upper end of the stroke. Briefly, the new movement consists in receding the saws at the commencement of the down stroke, instead of advancing them as is done in all previous movements. This receding movement is necessary and essential to obtain a uniform cut and avoid the undue strain caused by the continuous feeding of the log or cant while the saws are at rest or slowly moving at the commencement of the down stroke. The principle of Mr. Bell's new oscillation is the hanging of the slides or pendulum, at a point below the hornpin in the saw frame, so that when the lower portion of the slide is advanced by the rocker arm, operated by the eccentric motion, the upper end is moved in the opposite direction giving a receding motion to the gate which is at the top of the stroke entering the cut. Owing to the perfect oscillation secured, the cutting efficiency of a gang will be greatly improved, thinner saws may be used, with a corresponding saving in kerf, the cost of upkeep of the machine reduced, and it is believed that the weight and extra construction of gangs now in use will be materially lessened as with this new gang motion there can be no undue strain or jar as the saws enter the cut and absolute uniformity of cut is maintained, giving the highest possible efficiency.

Figures for the month show an unprecedented increase in all lines of business, which speaks well for the general trend of trade. Building for the month is well on for double that of March last year, while for the quarter it was $1,574,035, as against $1,209,465 for the first three months of 1908. Land registry returns are about 50 per cent. greater than the highest record of any month previous while there is also a large increase in bank clearings. Business men are very sanguine, and conditions generally are very good. Permits for the past week amounted to $112,300, there being forty-two permits issued.

The B. C. Electric Railway Company has decided to use aluminum in place of copper for transmission purposes on its Chilliwack line, and has let a contract for 390 miles to the Northern Aluminum Company, Montreal, for $45,000. This company is a Canadian branch of the Pittsburg Reduction Company, and has its works at Shawinigan, Quebec. This is the first time that aluminum will have been used in this district. Its cost is about 25 per cent. cheaper, and although double the quantity is required in the wire it even then weighs only about half of that of the requisite amount of copper. At Nelson, B.C., a contract was let recently for 20 miles of aluminum wire which will be used for transmission purposes also.

There is steady talk of the establishment here of an iron works by James A. Moore, who has a plant at Irondale, Wash. An immense amount of iron is required here for various purposes, all of which is imported. Since the raw material can be obtained locally, and Government assistance is promised to the first concerns starting up, there is considerable inducement.

The new plumbing by-law which will be shortly considered by the city council, is based on the open-shop principle as regards the city's relations with plumbers. Under present by-law, provision is made for the examination of persons desiring to be registered as plumbers by a civic board of examiners, and parties engaging in the trade as master plumbers must be possessed of a city license and pay an annual fee to the treasurer. The new regulations will do away with these licensing provisions entirely, and merely stipulate the standard of work which must be maintained in plumbing in the city, leaving it open to any man to perform the work, providing he does it to the satisfaction of the plumbing inspector. The only examination as to proficiency mentioned relates to the inspector and his assistants, who must pass a satisfactory examination.

VICTORIA.

April 3.—The wave of prosperity still continues to wave over Victoria. The buildings under way and planned for the next few months, point to a banner year. In addition to those previously mentioned. Watson & McGregor, hardware and stove dealers, have been forced by the increase of trade and need of floor space to build new two-storey and basement block of about fifty feet front, by over a hundred feet depth.

Other blocks planned are a fine block for the Royal Bank of Canada, to be built on the site of the premises now occupied by W. Bownass, hardware dealer, who will be forced to look up new quarters. The B. C. Land Investment Co. are to erect a three-storey building to be fitted up for stores and offices, nearly all of which are already taken. Cameron & Calwell are to erect an up-to-date livery stable premises with a basement and two storeys to cost about $12,000.

The new six-storey block to be erected by Pemberton & Sons, is to be a very fine structure. When completed it will be the finest office structure in Victoria, and will cost about $200,000.

E. G. Prior contemplates having a switch line from the E. & N. Ry. run into his warehouse.

Nanaimo city council have been asked for cheap water and exemption from taxation for a few years by Wilson & Flumerfelt for the Vancouver Briquette Co., which is to build a $35,000 factory in Nanaimo, work to start immediately. Briquettes are manufactured from slack, the waste from coal mines. They

are used for heating purposes and are cheaper than coal. A market has been secured for 100 tons a day in Victoria and Vancouver.

Victoria was visited this week by Chas. F. Jackels, American representative, and Erwin Krusius, partner of the firm of Krusius Bros., manufacturers of cutlery, Solingen, Germany. Both gentlemen have a practical knowledge of the making of all lines of cutlery and your correspondent had an interesting conversation with them on the relative merits of German and English cutlery.

A by-law is being prepared and will be presented for the approval of the ratepayers of Oak Bay municipality to raise $50,000 for the water distribution, an agreement having been come to with the Victoria city council to supply the water at the city boundary. Tenders are also being called for the construction of sewers.

L. H. Fleischaeur who has succeeded Hy. Martin as Pacific Coast representative for H. S. Howland, Sons & Co., was in town this week. He reports trade very good.

A new theatre is to built here. A local syndicate has been formed and a site has been decided upon. The building will cost over $100,000.

A new coal company is almost ready to put coal on the market. The mines are situated on the northern end of Vancouver Island. A shaft has been sunk and a spur line of railway will be built to deep water, where the coal will be shipped to all points on the coast. The Pacific Coast Coal Mines Co. are the owners of the new property.

W.B.C.

NELSON.

April 3.—Frank Cellner, of this city, has established the Cellner Electric Company, to manufacture dry cell batteries. He has embarked in this venture because of the large number of gasolene boats in use on the Kootenay, Slocan and Arrow Lakes, and with the knowledge gained by long experience that he could produce a battery equal to the best and at a price that will compare very favorably with the imported article. The cells are of the usual size, in three brands, and by actual test are equal if not superior to any brought in. The material in the cells is Mr. Cellner's own formula and is the result of much experiment on his part. Already about 200 cells have been shipped to outside points. Three men are employed and 100 batteries per day are turned out. It is expected that this number will have to be increased shortly.

The Saskatoon high school board have purchased 3¼ acres of land on the south side of the river for a site on which to build a collegiate institute. The price paid was $18,000. It is the purpose of the board to erect a $100,000 building this year. The public school board will also have to extend their premises, while plans are out for a new school in Nutana.

HARDWARE TRADE GOSSIP

Ontario.

A. D. Bullock has purchased the hardware stock of L. E. Nix & Co., Brighton.

J. D. Burk's hardware store at Amherstburg, was damaged by fire last week.

A. M. Bell, hardware merchant, Halifax, was a delegate to the Missionary Congress in Toronto last week.

The Page Wire Fence Co., Walkerville, report sales for March showed a 40 per cent. increase over the same month in 1908.

M. S. Chapman Pickering, and J. Henry, of Henry & Son, Orono, were hardwaremen visitors to Toronto during the week.

The hardware and grocery business of P. H. Gamble, Grimsby, has been bought by E. S. Johnson. The purchase price was between $7 000 and $8,000.

A. Brodie who for the past two years has been with the Young Estate, Gravenhurst, has accepted a position in Frank A. Child's branch store at Cochrane.

The Montreal Rolling Mills Company, represented in Toronto by John H. Webber, have moved their offices from 60 Victoria St. to room 79, Home Life Building, corner Adelaide and Victoria Sts.

Jos. T. Henderson, Niagara Falls, sustained several thousand dollars' loss through a fire resulting from a gasolene explosion in his hardware store last week.

T. S. Hobbs, Toronto, W. M. German, M.P., Welland, and several officials of the Welland plant of the Plymouth Cordage Co., attended the golden anniversary celebration of the company at North Plymouth, Mass., on March 27.

Harvey McCullough, who is leaving the employ of the Peterboro Hardware Co. to accept a position with the Wm. Hamilton Co. at Peterboro, was presented with a handsome gold-headed umbrella and a eulogistic address by his fellow-employes a few days ago.

Fred W. Karn, Woodstock, Ont. has issued his sixth annual illustrated catalogue. Mr. Karn believes in good advertising and in addition to his regular newspaper space, of which he is a large user, sends this catalogue to 5,000 farmers and others throughout the territory surrounding Woodstock.

James Rolston, Dunnville, has disposed of his hardware business to Congdon & Marshall. Mr. Rolston will give his attention to the Electric Light Company, of which he is the general manager. He has been in the hardware business for over thirty years, and has made a marked success of it.

J. A. Hossack, sales manager of the Lufkin Rule Company, of Canada, Windsor, has returned from a six weeks' trip to the Maritime Provinces and Newfoundland. He reports the trade outlook very bright on the Atlantic seaboard, while Newfoundland is also experiencing prosperous times. Mr. Hossack leaves in about a week on a trip to the jobbing points in the West, going as far as Victoria.

Rice, Lewis & Son, Toronto, are getting their King St. store into shape again. The temporary warerooms on Wellington St. have been closed and the stock removed to the old King and Victoria Sts. stand, which is undergoing a thorough renovation. The ground floor will be devoted to sporting goods, ammunition, cutlery and brass goods; the second floor to builders' hardware, the arrangement of which is to be unique; and the other floors to heavy goods, household utensils, and garden tools.

Quebec.

Cote & Frere, hardwaremen and dealers in paints, etc., St. Johns have assigned.

William H. Evans, of the Canada Paint Company, is spending Easter at Lakewood, N.J., and New York.

Robert Munro, of the Canada Paint Co., who has been attending the Laymen's Mission at Toronto, has returned.

H. W. Aird, of the Canada Paint Co., Montreal, has returned to headquarters after a trip to Chicago and the Western States.

C. Dietrich, of Shurly & Dietrich, Galt, has returned from a visit to the Maritime Provinces, and has been visiting Montreal hardware circles.

James Reid, of Caverhill, Learmont & Co., Montreal, is away from business suffering from a bruised back sustained in a street car accident. Mr. Reid hopes to resume work in a few days.

The plant, machinery and stock of the Canada Horse Nail Co., Montreal, has been purchased by W. Mann, president of the Montreal Stock Yards Co., and also a member of the firm of Mann & Turner, contractors. It is understood that Mr. Mann has bought the property as a speculation. The purchase price has not been made public.

TEMISKAMING DISTRICT ASSOCIATION.

A hardware merchant at Cobalt writes: "Would be pleased to see an association formed in this district and do not think it would be hard to manage. I think if a dinner was arranged and have all the dealers attend it would go a long way to bring all parties together."

This suggestion is a good one and will likely be adopted by the Ontario Association officers.

The Dietrich block, when completed, will be probably the handsomest business block in Galt. It is now ready for the heating and other interior arrangements.

46c. Commission

for selling a

$6,000 Business

is not a very exorbitant charge and when you add to this statement the fact that the sale was made within a space of

4 Days

you must admit that the proposition is one that is worth looking into.

Here is the Advertisement

HARDWARE, stoves and tinware in city of London, Stock new, $6,000. Splendid opportunity, Good reasons for selling. Apply 111, Dundas Street, London, Ont. (8)

This advertisement appeared in Hardware and Metal, Feb. 13, '09 issue.

The following letter was sent to us Feb. 17, '09 :—

HARDWARE AND METAL,
Toronto.

Dear Sir :

Kindly cancel advertisement in Hardware and Metal "Business For Sale," as we disposed of same yesterday just four days after ad. appeared in your paper.

Yours truly,

McMURTRY HARDWARE CO.
per G. A. McMURTRY.

Have you not some proposition in which some hardware dealer or his clerks would be interested?

RATES—2c. per word for first insertion.
1c. per word for subsequent insertions.
5c. additional each insertion when box number is required.

Send advertisement and cash remittance to our nearest office.

HARDWARE and METAL

MONTREAL	TORONTO	WINNIPEG
232 McGill St.	10 Front St. E.	511 Union Bank Bldg.

CONDENSED OR "WANT" ADVERTISEMENTS.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost must accompany all advertisements. In no case can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

AGENCIES WANTED

A TRAVELER, calling upon the stove, tin and hardware trade, wants one or two side lines. Well posted in metals. Address Box 824, HARDWARE AND METAL, Toronto. (17)

ARTICLES FOR SALE.

Don't keep any fixtures or tools around your store for which you have no further use. They are worth more to-day than they will a year hence. Don't keep money tied up which you could use to secure discounts from your wholesaler.

ELLIOTT-FISHER STANDARD Writing-Adding Machines make toil easier. Elliott-Fisher Limited, 513, No. 83, Craig St. W., Montreal, and 129 Bay Street, Toronto.

THE WALES VISIBLE ADDING AND LISTING MACHINE is superior to any other machine for these reasons, among others:—Visible Printing, Flexible Keyboard, Columns Space Bar, Automatic Clear Signal, Adjustment for Carbon Copies, Eliminating Keys, enabling the operator by the mere pressure of a key to add without listing or list without adding. 30 days free trial to responsible people. Write us for free illustrated catalogue. Adder Machine Company, Wilkesbarre, Pa.

BUSINESS CHANCES.

IF YOU ARE LOOKING FOR A BUSINESS opening in the West, state particulars of your requirements to P. O. Box 1752, Winnipeg. (17)

WELL established general hardware business in a central Ontario town, surrounded by excellent farming district. Two railways. A good opportunity for young man. Best of reasons for selling. Box 825, HARDWARE AND METAL, Toronto. (19)

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, 129 Bay Street, Toronto.

MISCELLANEOUS

A MARKET OF BUYERS, backed up by money to spend, is open to you in the Busy Man's Magazine. Every territory in Canada is represented. If you have something to sell, want to buy something, a condensed advertisement in the Busy Man's Magazine will put you in touch with the classes you wish to reach. Four cents per word will carry your message from Atlantic to Pacific. Send copy of your advertisement along with order to cover cost of insertion before 10th of month preceding date of publication. Your announcement will appear under a special heading. BUSY MAN'S MAGAZINE, Montreal, Toronto, Winnipeg.

HIGH CLASS COLOR WORK; Commercial Stationery, Posters. The Hough Lithographing Co. Limited, Office—No. 3 Jarvis St., Toronto, Telephone, Main 1576. Art, Good Workmanship; Business Methods.

IF YOU are looking for a side line to add to your business there is none better than COLUMBIA GRAPHOPHONES. Double Disc Records (which means two records for a single price) and Indestructible Records (that will not break or wear out no matter how much you abuse them). The Columbia Phonograph Company is the only firm that manufactures both Disc and Cylinder Machines and Records, therefore, a Columbia dealer has the advantage over all others, as he can furnish his customers with what they want, while his competitor has to sell them what he has or lose the sale, which he generally does where there is a Columbia dealer. Are Columbia goods sold in your town? If not, why not? Do you want the exclusive agency? (remember exclusive). You had better write to-day or someone else in your town will read this advertisement and beat you to it. A postal will bring catalogues and full information free. Write to-day. Do it now. Toronto Phonograph Company, Limited, Exclusive Columbia Jobbers, 40 Melinda St., Toronto, Canada.

NOTICE—Users of Pitner Gasoline Lamps are warned against being induced to purchase parts of other makes of lamps to be used on the Pitner. The most vital part of any lamp is its generator, and the Pitner generator has been granted a patent in Canada, the United States and other countries, on the principle of its improved method of generating gasoline vapour. Supplies and parts for the Pitner lamps can be received by return mail by applying to our representatives or direct to THE PITNER LIGHTING CO., Limited, 36-38 Lombard St., Toronto, Ontario.

650,000—Not one of the 650,000 retail merchants who have bought a National Cash Register would think of doing business without it. The National Cash Register Co., F. E. Mutton, Canadian Manager, cor Yonge Street and Wilton Avenue, Toronto.

Western Canada Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected by Telegra ph up to Noon on Friday.

Winnipeg Hardware Markets.

One fine day last week, the first for several weeks, was sufficient to encourage local dealers, who have been waiting long for trade to open up in builders' hardware and paints. These are the goods on display in almost every hardware store in the city. The enormous list of building permits issued during the past few weeks has yet to be materialized. Dealers have stocked up heavily in anticipation of an extra good trade, but the "extra" has not been realized so far, nor can it be said that the trade is very good at present. One thing is certain, if one-half the building is done that is expected during the coming summer, the hardware business will be the best the dealers have ever experienced in this city. The wholesalers report very heavy shipments all over the west and the local wholesale output is almost double that of one year ago.

This week will be an excellent one in the paint and varnish business. The housecleaning season is open now, and the paint contractors have a busy season before them.

It is intimated that nails will be advanced very soon, but as yet orders are being filled at the prices quoted. The features in this week's quotations are the sudden decline in shovels and linseed oils.

Price Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.90 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base; plain galvanized, wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

POULTRY NETTING—57½ per cent.

HORSESHOES — "MRM" and "Bell" iron. No. 0 to 1, $4.50; No. 2 and larger, $4.25; snowshoes, No. 0 to No. 1, $4.75; No. 2 and larger, $4.50; steel, No. 0 to No. 1, $4.85; No. 2 and larger, $4.60; featherweight, $6.

HORSENAILS—"MRM," cold process—No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

The FOUNTAIN Sprinkler

NOT merely a round box with holes punched in it to let the water out —BUT a perfect Lawn Sprinkler.

NOT merely a group of straight round streams working with mathematical precision—BUT a natural shower of spray.

The Sprinkler with the "MIST LIKE SPRAY."

No other Lawn Sprinkler can produce the beautiful—The perfect results like the "FOUNTAIN."

The name "FOUNTAIN" is plainly marked in raised letters on the bottom of every Genuine, Original FOUNTAIN Sprinkler.

When you think of Lawn Sprinklers — Think FOUNTAIN
When you buy Lawn Sprinklers — Buy FOUNTAIN
And insist on getting the FOUNTAIN
Stick to the Sprinkler you KNOW is right.

Do you want a sample for comparative test.

WESTERN CANADA GOSSIP.

Doull & Banbury, hardwaremen and implement dealers, Stoughton, Sask., have sold their implement business to A. L. Rigney.

Watson & McGregor, Victoria, have for a long time felt the necessity of increased accommodation for their growing hardware business, and have decided to build a new business block. The building is to be equipped with a modern elevator. The first floor will have a storage gallery and the offices will be on the upper floor.

ADULTERATED TURPENTINE.

Last week Hardware and Metal referred to the efforts of a U.S. concern to sell Florida, Georgia and Carolina turpentine on the Canadian market four or five cents below regular market quotations. The proposition looked questionable and later developments verify the first impression.

A Toronto firm received five barrels in February and not being pleased with the odor, drew a sample out of a barrel in the presence of three witnesses and forwarded it to the Department of Inland Revenue at Ottawa. The report of the analysis is as follows:

Referring to your sample of turpentine, I beg to inform you that the same has been examined with the following results viz.:

1. Sp. grav. at 15.5 deg. C.....0.8606
2. Refractive index, at 20 deg. C..1.4644
3. Hubl iodine number..... 227.4
4. Insoluble in acetic acid.
5. Refractional distillation, from

146 deg. C. to 156 deg. C.....18 p.c.
From 156 deg. C. to 180 deg. C.70 p.c.
Above 180 deg. C.....12 p.c.

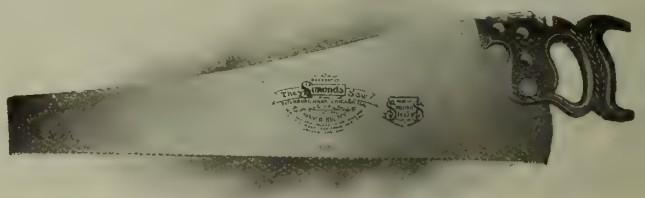
These results indicate a considerable addition of a petroleum adulterant, the amount of this adulterant being at least 30 per cent.

(Signed) Acting Deputy Minister
Inland Revenue, Ottawa.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Foundry Supplies. — The Osborn Manufacturing Company, Cleveland, Ohio, in their catalogue No. 122, give a description of their varied line of brushes for stove polishing, furnace cleaning, foundry use, painting, etc., over 200 pages being devoted to outlining the various uses for their hundreds of varieties. Interesting novelties, shown in inserts, are their "sure death" fly-killer, and kitchen brushes mounted on stands for displaying a dozen for sale. The catalogue is too comprehensive to describe in detail but it is well worth having on file in every stove foundry or hardware store.



Floor Finishes.—The International Varnish Co., Toronto, has issued a booklet devoted to coverings for floors. The subjects of carpets and wax on floors are treated of as well as the right and wrong kinds of varnishes to be applied.

Hollands' Vises and Tools.—The 1909 catalogue of vises and plumbers' tools just issued by the Hollands Mfg. Co., Erie, Pa., is a neatly-printed and finely-illustrated booklet, the best and most complete ever issued by the company. Hollands' vises and tools are the product of twenty years' experience, and they are now used in many of the large industrial and railway shops in the United States and Canada. The vises have cold rolled steel screws with electric-welded steel heads. The company aims to keep their lines up-to-date on the basis of first-class workmanship and modern methods, and guarantee all their high-grade tools. Photogravures of the works in 1890 and as they are to-day occupy the back page of the booklet.

The Gurney-Oxford Way. — "Gas cooking with modern apparatus" is the name given the gas stove catalogue for 1909 published by the Gurney Foundry Co., Toronto. A chapter headed "Some New Facts" gives, by means of picture and pen, a description of the notable parts and new features of the gas stoves and ranges made by this firm. The valves, air-mixer, manifold, burner, oven door and oven lighter are treated of, and the improvements in the new series of Oxford gas ranges are prominently noted. A new stove this season is the 1909 natural gas range, and the Oxford Cabinet Gas Range for artificial or natural gas use is also a new line. A number of other varieties of gas stoves, ranges and appliances are also shown.

Hammers, Hatchets, Sledges, Axes.—The James Smart Mfg. Co., Brockville, have issued in separate form a catalogue of articles made in their tool department. Immediately on opening the book a handy index meets the eye. The various tools described therein are nicely grouped. Hammers of all kinds are shown from the tiniest tack hammer to ponderous blacksmiths' sledges. There are also chisels and wedges; axes and hatchets of all shapes, sizes and conditions. A useful memorandum for noting any special lines takes up the back pages of the book.

New Handsaws.—Catalogue pages announcing two new handsaws added to their hardware line are now being sent out by the Simonds Mfg. Co., of Fitchburg, Mass., and Chicago, Ill. Simonds No. 9 is a narrow-bladed, skew back ship saw and has been made in answer to a strong demand from carpenters. Simonds' No. 10½ is a skew back saw added for the purpose of giving dealers a wider range of choice when placing stock orders.

New Simonds Hand-saw.

TRAVELERS' TAX IN B.C.

There is no tax on travelers doing business in the cities of British Columbia. There used to be a provincial tax but this is not now in force. Travelers going into unorganized districts are taxed but this is more of a pedlar's tax and varies according to wares. With the exception of a few from Vancouver and Victoria, however, travelers do not go into these unorganized districts. The above only holds good in connection with merchandise other than liquors and cigars. The tax on travelers selling these in British Columbia is $50 for six months.

F. O. Lewis, president of Lewis Bros., Montreal, is expected back this week-end from England.

THE LITTLE PAINT MAN.

The Weather

As in the past, weather of various kinds will prevail in all parts of the country during the Spring and early Summer months. The rain is going to fall on the houses of the just and the unjust, but it will only affect the ones that are not painted. The sun will shine impartially for all, but the man whose conscience is cloudless and whose business is healthy and growing will have nothing but bright days, rain or shine.

Taking it all together, 1909 is going to be a great year for the paint man.

The Little Paint Man

561

Little beds of flowers,
Little cans of paint,
Make a pleasant cottage
Out of one that aint.

Remember our Spring Advertising Campaign in 180 of the best newspapers throughout the Dominion is going busily on. Have "the goods."

Be sure to have your window well trimmed to pull early Spring business. Have you received our new Spring Window Trim? If not, write for it today. It is the best we have ever sent out to the trade. It shows the Little Paint Man (that's me) and partner on a scaffold, painting the side of a house, and is reproduced in five colors. Again I say be sure to send for this trim today if you haven't already received one.

Brighten Up Finishes are going to be a money making proposition this Spring for every merchant who handles them. Some Brighten Up locals in your newspaper will help wonderfully in moving these goods.

S. W. P. the Best Paint to Handle

You cannot afford to overlook the advantages afforded a dealer by handling a well known, high quality paint like S. W. P.

It is half sold before you buy it.
It gives satisfaction.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Activity.

The stamp mills at Hedley, B.C., are again running. Forty stamps are in operation.

Permits for twenty-two factories, costing $234,000, were issued in Toronto last year.

R. D. Rorison & Son are starting a sawmill and shinglemill just across the Fraser River from Eburne, B.C.

A machine and repair shop is to be established in Selkirk, Man., this spring. The promoters are C. Cornish and W. Overton, of Selkirk.

The East City Furniture Factory, Peterboro, is to be enlarged during the coming summer. An addition one-half the size of the present building will be built to the rear.

An official intimation from the British Columbia Copper Company, Greenwood, states that owing to better copper market prospects, in place of a close-down, as announced work will go on as usual.

The American Steel Range Corporation of Norfolk, Va., with a capital of $300,000, intend to commence manufacturing in Canada and establish a plant at Welland if arrangements can be made. The Canadian factory will be called the Stanford Steel Range Co.

It is stated that Campbellford is to have a pulp manufacturing company, which will employ a large number of hands, and that the building will be erected in the proximity of the Northumberland Paper Mills, operations to commence in the near future.

A number of passenger depots will be built along the line of the G.T.P. this summer. They have already been built at divisional points, but the next move will be to supply all the towns that have shown reasonable development. This work will be started in a few weeks.

There will be between 30 and 35 new elevators under construction along the G.T.P. within a few weeks, according to a statement made by J. E. Dalrymple, assistant freight traffic manager of the road. Mr. Dalrymple has just returned from an inspection trip as far west as Battle River.

The Dominion Government has accepted the tender of Haney, Quinlan & Robertson for the construction of the National Transcontinental terminal shops at St. Boniface. The amount of the tender, which was the lowest of those submitted, figures out to a total of about $869,000.

New Companies.

National Iron Works, Toronto; capital, $200,000; to manufacture iron and other metals. Incorporators, A. Mullin F. Lane and T. A. Silverthorne, Toronto.

St. Clair Construction Co., Toronto; capital, $40,000; to do construction business. Incorporators, J. L. Ross, A. W. Holmsted and W. L. Carr, Toronto.

The Ontario Lime Assn., Toronto; capital, $50,000; to manufacture sewer pipe, cement, etc. Incorporators, G. H. Kilmer, J. A. McAndrew and W. H. Irving, Toronto.

Maple Leaf Portland Cement Co., Toronto; capital, $50,000; to manufacture cement, oils, paints and stones. Incorporators, H. Riley, J. E. Riley and E. C. Ironside, Toronto.

Ontario Sanitary Mfg. Co., Windsor; capital, $40,000; to manufacture plumbing and sanitary supplies. Incorporators, F. A. Black, R. H. Evans and H. L. Evans, Detroit.

Muskoka Sand and Gravel Co., Toronto; capital, $40,000; to manufacture cement. Incorporators, W. Sandford, New York, and G. A. Marchant and H. L. Dunn, Toronto.

Simoneau et Dion, Sherbrooke; capital, $150,000; to construct buildings and manufacture sewer pipe and cement. Incorporators, J. Simoneau, A. Dion and E. D. Kelly, Sherbrooke.

The Wizard Furnace Co., Toronto; capital, $100,000; to manufacture heating apparatus of all kinds. Incorporators, J. E. Denise, C. E. Howarth and W. M. Weekes, Toronto.

The Blakely Oil Co., Chatham; capital, $25,000; to develop and treat ores, metals and minerals. Incorporators, S. L. Blakely, R. L. Gosnell and P. S. Shillington, Blenheim, Ont.

The Parry Sound Mica Felspar Co., Toronto; capital, $100,000; to crush and treat ores, metals and minerals. Incorporators F. L. Young, A. Bergquest and J. G. Harris, Minneapolis, Minn.

Welland Tin Plate and Sheet Co., Welland; capital $150,000 to manufacture tin plate, terne plate, Canada plate, polished blue steel for stoves, galvanized sheets and steel sheets. Incorporators, J. Huxley, Pittsburg; A. B. Spencer and B. J. McCormick, Welland.

General Building Notes.

London's building permits average 25 weekly.

A Y.M.C.A. building will be erected at Nelson, B.C.

Scott Griffin will build at Toronto a $14,000 residence.

W. D. Tummis, Toronto, will erect a $18,000 residence.

Ottawa's building permits last week totalled $30,900.

J. J. Downey, Toronto, will erect a $12,000 block of dwellings.

Scott & Mackay, Toronto, will erect a $11,000 block of dwellings.

R. N. Baldwin, Saskatoon, will erect a three-storey tenement block.

Grand Forks, B.C., reports building construction there very active.

R. J. Mattice will build a $100,000 apartment block at Winnipeg.

The Winnipeg Golf Club contemplate the erection of a large club house.

The Canadian Northern Railway will build a $250,000 hotel at Port Arthur.

Preliminary sketches have been prepared for the new Builders' Exchange, Toronto.

A new depot will be erected at Indian Head this summer at a cost of $17,000.

A. E. Playter will build a $20,000 public hall and business block at Toronto.

Stewart & Raymo, Toronto, will build an apartment house to cost $25,000.

Queens Avenue Methodist Church, New Westminster, will erect a new parsonage.

Henry Nixon will build at Toronto a row of stores and dwellings to cost $16,000.

The licensees of the Sherman house, Vancouver, will erect a four-storey structure.

Building permits are being granted at present at Vancouver at the rate of ten per day.

Elgie & Page, Toronto, have the contract for a $10,000 residence for W. M. McLaughlin.

The Y.W.C.A. are stated to be planning the extension of their building at Vancouver.

The Bank of Hamilton will erect a new bank building at Kamloops, B.C., to cost $30,000.

The Union Bank have purchased a site at Brandon for the erection of their new building.

J. H. Russell, Winnipeg, has just taken tenders for a new residence for J. J. Windrum.

The Bank of Montreal are contemplating the erection of a new bank building at Fredericton.

Alderman R. C. Vaughan, Vancouver, will build 24 houses in the north end of that city this season.

Jas. Morisen, Montreal, has the general contract for the erection of a $25,000 residence for R. B. Angus.

J. A. Powell, Edmonton, has taken out a permit for the erection of an office building to cost $12,000.

G. E. Williamson, Vancouver, has obtained a permit for the erection of an apartment house to cost $20,000.

W. C. Barnes, Moncton, N.B., has prepared plans for a store to be erected for R. N. Wyse at a cost of $10,000.

Northwood & Noffke, Winnipeg, have plans under way for several residences, the average cost of which is $10,000.

Wm. Wallace Blair, Winnipeg, has prepared plans for a six-storey and basement brick building to be built there.

Hall & Son, Toronto, have the contract for a $16,000 apartment building to be erected there for Thos. McIlwain.

Daoust & Lafont, Three Rivers, have prepared plans for the erection of a bank building for the Bank Nationale.

Edward Hobson, Vancouver, has prepared plans for a three-storey store and apartment building to be erected there.

Parr & Fee, Vancouver, have awarded to Peter Tardiff the contract for the Filion building to be erected at a cost of $20,000.

A permit has been issued covering the erection of a three-storey brick block at Vancouver for F. Fuller. Estimated cost, $24,000.

Simpson & Young, Toronto, have prepared plans for a residence and stable to be built there for W. T. Harris at a cost of $16,000.

to sell the

Manitoba Steel Plate Furnace

We want a good hardware man in every town to handle our furnace. It will burn Souris and other soft coals mined in the West, and it will burn them economically. It is the furnace Western people have been looking for. If you are from Missouri, so much the better. Ask us and we will show you.

The consumer saves 25 to 40 per cent. on fuel when he uses the Manitoba.

The Brandon Machine Works Co., Limited

Brandon, Manitoba

New Works of Enterprise Foundry Company

A Complete and Modern Plant at Sackville Replacing the Works Burned Last July.

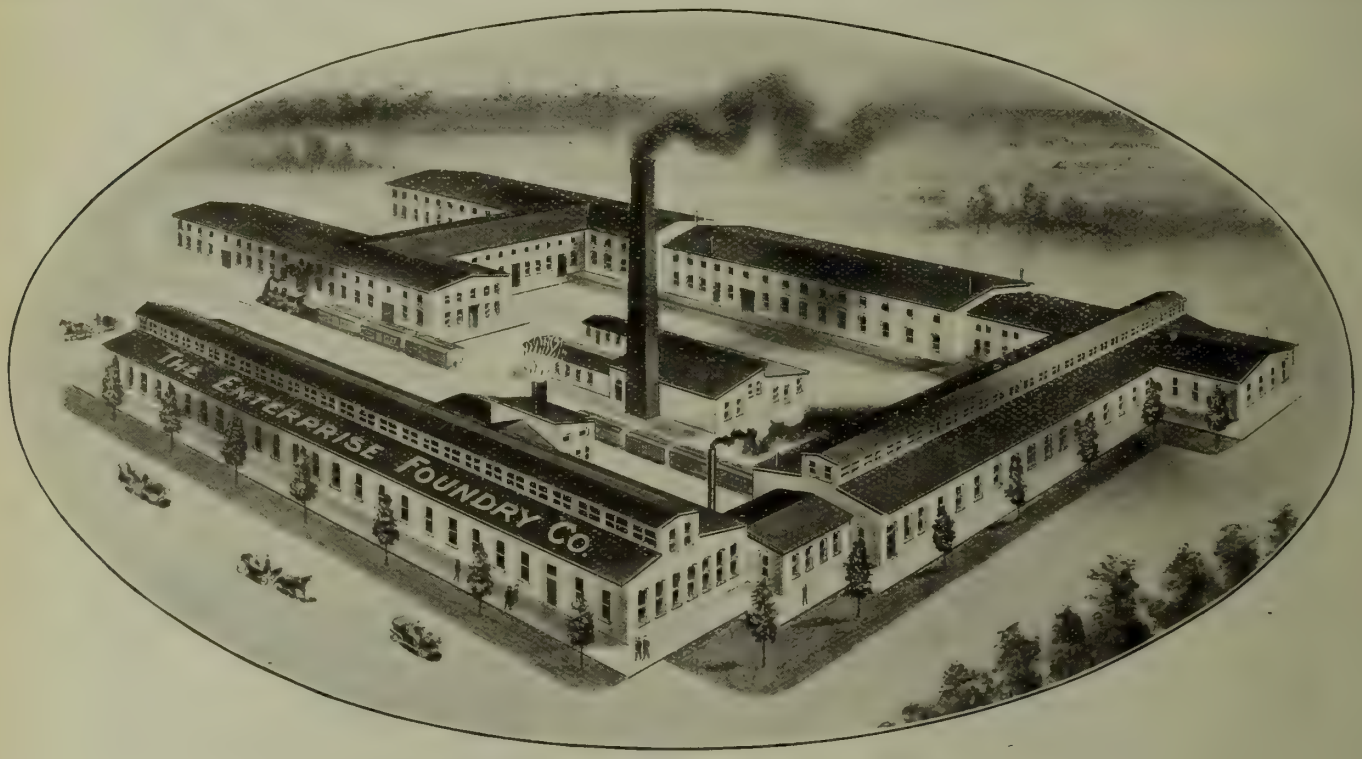
Readers of Hardware and Metal who are interested in the industrial development of the Maritime Provinces will be glad to learn of the opening of the up-to-date stove plant which the Enterprise Foundry Co. have erected in Sackville to replace the one established in 1887 and destroyed by fire on July 29, 1908, when, during a thunder storm, lightning struck the buildings and the whole plant was swept away with the exception of a new brick power house.

The fire came at the worst possible time, in view of the fact that the company had an immense stock of stoves, ranges and furnaces made up in preparation for fall trade; and most discouraging of all, their carefully-selected and costly stove patterns were included in the ruin.

Less than two months after the fire, the Enterprise Foundry Co. started rebuilding on the old site, the magnitude of which may be gained from the fact that over 1,000 tons of stone and 553,000 bricks were used in its construction, and that it covers an acre and a half, leaving about the same amount of land for further extension.

The buildings, which are ranged in the form of a hollow square, as shown in the view given, are of brick and all one storey with the exception of the warehouse. The floors throughout are of concrete, covered in some cases with wood to facilitate working upon them. Substantial fire walls extend through the roof, separating the different departments, so that in the event of a fire occurring in any one building, it can be prevented from spreading to any of the others, the heavy tin-lined doors shutting off all communication.

The town has supplied very complete water protection, with a hydrant on each street in front and in the rear of the works, and one in the centre of the yard. Stand-pipes with hose attached are scattered throughout the buildings, so that every known safeguard from fire has been provided.



The departments are so arranged that the pig iron and other raw materials deposited from the cars at the foundry end of the square, are moved forward and through a most interesting process, re-appearing at the warehouse end in the form of a finely finished stove or range, securely crated and ready for shipment.

For the comfort and convenience of its large corps of workmen the company have made every provision. The workshops are roomy, well-lighted and ventilated. The buildings are comfortably heated a fan system being installed for distributing the warm air and promoting ventilation. The foundry has its own lighting equipment, but owing to the splendid light prevailing throughout the entire works, it is hardly necessary even in the middle of the largest room on the darkest day to use artificial light.

The power house, the walls of which were left standing in the big fire, is in the centre of the hollow square. Adjoining it is the pattern shop, where since the fire a large staff of men have been preparing patterns for the new and artistic line of stoves which the company are producing.

The moulding shop is 200x65 feet, and is fitted with the most modern devices procurable to lighten labor. Although adjoining the moulding shop, the cupola house is in reality entirely separated. It is 40x20 feet, and is connected with the yard by an inclined railway, through which are drawn the supplies of coal and iron. The cupola's melting capacity is seven tons of iron an hour, and frequent tests of the melt are made by analysis to ensure the castings turned out being smooth and tough, which means in the finished stove durability and beauty. The stage or charging floor surrounding the cupola is made of reinforced concrete.

Next to the moulding shop is the milling room where the castings from the moulding shop are put into heavy revolving cylinders which remove the sand and thoroughly clean each piece. When the castings are taken from the mills, all defective pieces are rejected and the perfect ones are then ground off and are ready for mounting. In the mounting and finishing shops, which are 150x70 feet, the process of making the complete and perfect stove is further advanced, each piece being carefully fitted and bolted into its proper place.

Enterprise Foundry Co.'s New Plant at Sackville, N.B.

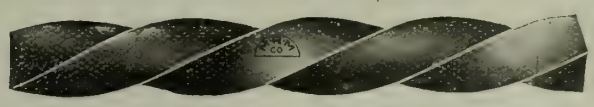
In this department also is the machinery for constructing Enterprise Monarch Steel Ranges. The steel sheets are cut, bent, punched and rivetted; all by heavy machines, no heat being used at any stage of the process. The necessary copper and tin-work are also carried on here, each part being examined to see that it is perfect in workmanship, fit and finish, before continuing in its forward course.

Next in the chain of buildings comes the plating room, 50x50 feet, where the platers take the plain black castings in hand; and after many immersions in the different tanks and baths, produce brilliant plated work.

Then comes the final process of cleaning and crating, which is done in a building 50x25 feet, before removal to the warehouse where the completed stoves are stored until required for shipment. The warehouses are two-storey, to give greater capacity for storage, and the various entrances open out on a siding of the railway which runs into the works; so that the raw materials are deposited and the finished product loaded directly on cars for shipment.

On the whole, the plant is a model one, as complete and up-to-date as any on the continent President Fisher having visited a score of stove foundries in Canada and the States for ideas before rebuilding. Every known idea which makes for increased efficiency, lightening labor and reducing cost of product has been adopted, and the result is a stove foundry which is a credit to the company, to Sackville and to Eastern Canada.

In addition to the large business done by the company in the east, they have depots in Montreal, Toronto and Saskatoon. In Toronto Stewart & Co., 178 Victoria St., have been secured as Ontario agents (west of Peterboro), while at Saskatoon, the agency will be held by the Enterprise Hardware Company, a branch of Emerson & Fisher, St. John.



The officers of the Enterprise Co. are: W. S. Fisher, president; R. B. Emerson, vice-president; F. A. Fisher, manager; and A. E. Jubien, secretary, and to this progressive company and its staff Hardware and Metal extend congratulations upon the opening of their modern stove manufacturing plant.

CATALOGUES WANTED.

Hardware jobbers and manufacturers are requested to send copies of their catalogues to Frank A. Child, hardware and iron merchant, Cochrane, Ontario.

J. T. Henderson, hardware merchant, plumber, etc., whose store was practically destroyed by fire last week, will be pleased to receive new catalogues, price lists and discount sheets from jobbers and manufacturers, as he intends to continue business with as brief an interruption as possible.

Cold Twisted Steel Bars

For Concrete Reinforcement.

Concrete is now so important a factor in all work that contractors have on hand that it will pay the hardwareman to look carefully after this branch of trade.

For concrete reinforcement there is a demand for a bar possessing high elastic limit, great tensile strength and of such shape as to permit a close bond with the concrete.

Our Cold Twisted Steel Bar meets these requirements and has been found to give entire satisfaction.

We shall be glad to furnish full particulars regarding elastic limit, tensile strength, etc., and samples if desired.

The Montreal Rolling Mills Co.

Paint and Oil Markets

MONTREAL.

April 8.—The spring movement is more than ever in evidence and most satisfactory trade has opened out. Shipments are going ahead with a swing, while orders are getting more bulky as the time goes on. The strong efforts being made by various dealers throughout the country to induce painting are undoubtedly having a marked effect upon the consumer, and with the co-operation of the manufacturer, a fine spring season is anticipated. Ready-mixed paints continue greatly in evidence.

Turpentine and Paris green have been reduced this week 3c each, while the other lines are unchanged, and for the time being firm.

TURPENTINE—Owing to the accumulation of stocks noted in our report last week, and the further pressure of new supplies, turpentine has experienced a sagging movement, and quotations are down 3c. We now quote 55c for single barrels, net 30 days.

LINSEED OIL—Heavy shipments of linseed oil are being made. This is only natural as stocks are extremely light, most of the dealers having hitherto sent in orders to supply immediate wants only. The market is unchanged and we quote: Raw, 1 to 4 barrels, 59c; 5 to 9 barrels, 58c; boiled, 1 to 4 barrels, 62c; 5 to 9 barrels, 61c; strictly net 30 days.

GROUND WHITE LEAD—Satisfactory business is reported by nearly all the grinders, and with pig lead in its present state, quotations remain the same. We quote: Strictly pure, $5.50 to $6, according to brand, and No. 1, $5 to $5.50 f.o.b. Montreal.

RED LEAD—Red lead, litharge, and orange mineral, are all in good demand, litharge especially so. Prices are buoyant, and business is good. We quote: Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; in less quantities, at $6 per 100 lbs.; No. 1 red lead, casks $4; kegs, $4.50; and smaller quantities, $5.50.

LIQUID PAINTS—A steady stream of orders testify to the increasing popularity of ready-mixed paints. The strong advertising efforts of the manufacturers have had a most stimulating effect in the demand for all colors.

VARNISHES—Orders may be reported as being fair to moderate, but the outlook is bright, and makers are most cheerful. Household, carriage and furniture varnish continue in best demand.

WHITE ZINC—White zinc is on the dull side, but prices are unchanged. We quote: Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5¾c.

PARIS GREEN—Owing to sales of Paris green having been hardly up to expectations, and the pressure of outside competition Paris green quotations have been reduced 3c per lb., and we now quote: In 50-lb. drums, 17c per lb.; 1-lb. packets, 100 lbs., in case, 18c; 1-lb. tins, 100 lbs. in case, 19c.

PUTTY—A fair quantity of putty is now being shipped, but as there will not be an overabundance of whiting until the opening of navigation, grinders are not especially anxious to push sales at present for immediate delivery. We quote: Standard putty, 880 lbs., in casks, $1.65; in 100-lb. drums, $1.90; bladder putty, 400 lbs., in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb. drums $2; 25-lb. tins, $2.05; 12½-lb. tins, $2.25 f.o.b. Montreal.

TORONTO.

April 9.—A very satisfactory volume of business is passing at present, and some paint lines are decidedly active. In this class might be classed lead and oil in which two lines there is a very big movement going on. Alabastine and wall finishes of all kinds are splendid sellers, being a distinctively spring line; varnishes, brushes, veneers, bluestone for spraying are also in seasonable demand. Mixed paints are called for in repeat orders and during the week orders have been very brisk.

Retail hardwaremen say Good Friday is the best day in the year for the sale of ready-mixed lines. Spring cleaning is on, and Good Friday being the first spring holiday, the man of the house avails himself of the opportunity to brighten things up. As a consequence the few days before the holiday are particularly good paint selling days.

In turpentine there is an easier feeling, and prices have declined two cents. Paris green, too, has come down, the decline amounting to three cents. All other prices are steady and unchanged though in the case of lead there is a firmer tendency.

TURPENTINE—Very easy this week is turpentine. Though the producing is turpentine. Though the producing season is backward, more so than for some years, and supplies are not coming forward rapidly, the speculation that has been indulged in in regard to accumulated old stocks, together with the cutting that has been going on in the south, has brought down local prices. Single barrels are 56c; 2 to 4 barrels, 55c; and 5-gal. lots, 61c, a decline of two cents. This makes the price at the lowest figure prevailing during the past six months, and within a cent of the lowest price since the depression struck the business world.

LINSEED OIL—There is a very big movement in this line just now. Prices are yet 59c for raw and 62c for boiled in single barrels, and the market is firm at the price. Five-barrel lots are selling one cent a gallon less than these figures. While there is a scarcity of seed the world's crop of last year was close up to that of 1907. India yielded about

All of the 70% Pure White Lead in

"English" Liquid Paint

is Brandram's B.B. Genuine.

All paint men know that Brandram's B. B. Genuine White Lead has been, for over a century, the standard lead of the world, and commands the highest market price.

Because we are corroders and make Brandram's B. B. Genuine White Lead by the original process, we can and do put this large percentage of white lead in "English" Liquid Paint, and give you the highest grade paint on the market at a moderate cost.

"English" Liquid Paint is guaranteed pure paint. The formula on the can shows that the paint is made on a base of 70 per cent. pure White Lead, 30 per cent. pure Zinc White mixed ready for use with pure linseed oil, pure turpentine and dryer.

Backed by unique forceful advertising, including a big newspaper advertising campaign this spring.

High Grade Paints, Colors and Varnishes

TORONTO NEW YORK CHICAGO CLEVELAND

Keep the Pot Boiling.

Stir up the fire and keep the paint business boiling hot in your town, Mr. Dealer. There's nothing like a steady fire of facts to **"warm-up"** consumers to your proposition. So don't spare the fuel nor let the fire smoulder and die down so long as there's a building in your town that needs painting. Wherever there's a house that needs paint there's a possible customer for **Martin-Senour 100 Percent Pure Paint.**

And there ll be money in it for you to convince that customer, supply the **Martin-Senour Paint** and pocket the profit. A permanent, growing paint business can only be built on **quality paint.** That's why **Martin-Senour Paint** dealers do a bigger, better business year after year. That's why it will pay you to get our plan and let us help you kindle the right sort of fire under your pot. Remember that more depends upon the paint than upon the poker, so write today for the only way.

The MARTIN-SENOUR CO., Ltd.

Pioneers of Pure Paint

MONTREAL
The Winnipeg Paint & Glass Co., Ltd., Winnipeg

CHICAGO
The Maritime Paint & Varnish Co., Ltd., Halifax, N. S.

the smallest crop known, and the United States was only able to sparingly meet domestic requirements. Russia and Argentine produced largely, and Canada came up fairly well. The world's present consumptive requirements are estimated at 1,500,000 tons.

WHITE LEAD—This line is going out probably better than any other one paint line to-day. Prices are unchanged, but there is a firmness noted in the markets. No. 1 is $5.40 to $5.65; pure white from $5.80 to $6, and a superior line is offered at $6.25. Genuine red lead is quoted at $4.50 for casks and $4.75 to $4.80 in 100 lbs. Considering the present price of pig lead these quotations are new prices for Ontario: Barrels (600) lbs.), 16½c per pound; arsenic, kegs (250 lbs.), 16¾c; 50-lb. drums, 17¼c; 25-lb. drums, 17¾c; 1-lb. packets (100 in case), 18¼c; 1-lb. packets (50 in case), 20¼c; 1-lb. tins (100 in case), 19¼c. These rates are f.o.b. Toronto, Hamilton and London.

PARIS GREEN—New prices are quoted this week and are to hold good for the whole month of April. These quotations, which are about ¼c higher than Montreal, show a decline locally of three cents. The terms are net three months, 2 per cent. 30 days. The pushing of English green at a low figure is said to be the cause of the cut.

STAINS AND VARNISHES—Being seasonable lines these goods in common with alabastine wall finishes, veneers, etc., are selling well. Brushes, too, are included in nearly every order, and bluestone for spraying purposes is very active. Prices unchanged.

GLASS AND PUTTY—Rather dull. Inquiry is slight. Unchanged quotations rule.

PETROLEUM—Conditions and prices the same as a week ago. Prime white is 13½c; water white, 15½c; and Pratt's astral, 17½c.

THE SPRING CAMPAIGN.

If the paint dealer has thoroughly digested, and acted upon, the advice that has been given him in these columns as to his spring campaign, he should be in the best shape to exact the fullest amount of success from the painting needs of his district. But there is one other point—and a most vital point, too—which has not been touched upon, and that is salesmanship. The paint dealer may have strictly set himself to follow out our advice—he may have educated the district as to the needs of paint; he may have planned a series of window displays; he may have trimmed the interior of his store so that paint gleams from all sides, but unless he backs up all this silent salesmanship with good direct talking points, then he greatly discounts his other efforts.

Not only should the merchant be ready to use those arguments which he employed in his schemes of educating the district to the value of painting, but he should add to those arguments so that he can deal with direct cases, and can grapple with any doubting customer who may enter the store, driving home the necessity of paint, paint, paint, with sledge hammer force. Just the same as in most lines of hardware, paint requires the brightest salesmanship to obtain the best results. Certainly there are very few articles in the purchasing of which, the customer displays a greater desire to get the advice of the merchant.

Very few people know anything about paint. They have little knowledge of what color will best suit, and less knowledge of how to apply the paint. There is no one to turn to but the dealer himself, and if through lack of enthusiasm in his paint department, the latter is not able to impart this information, the customer is disheartened. If the merchant wishes to prime himself upon all the selling points, he need have little difficulty in so doing. The paint manufacturers have brought them down to a fine art, and the merchant has only to read the matter sent him, and commit it to memory.

The dealer, however, may possess these pointers, and yet if he lacks enthusiasm they lose their force at once. He must believe in paint, and in the quality of his brands to make the most of his arguments. Nothing is more convincing than enthusiasm, and if he can radiate enthusiasm the customer will believe in him, and take his goods. The merchant must likewise see that his clerks are equally posted. He must inspire them with such enthusiasm until they cannot take up a tin of paint without launching out into the strongest tribute to the merits and virtues of its contents.

As we have pointed out before, paint selling, to be most successful requires a familiarity with the product, with its composition and with its method of manufacture. In addition a knowledge of the best color to use to meet individual cases, the most suitable brush to employ, and plenty of sound pointers as to applying the paint to its best advantage are necessary. The merchant cannot use his spare time to better advantage than in educating his clerks in paint salesmanship, and above all he must give them enthusiasm. Arguments from a mere talking machine are of little worth, but arguments delivered with real conviction, and inspired with the force of knowledge, are irresistible. If a merchant believes in his paints, he is bound to make a success of them, for the field is there, and wants but energy and tact to make it fruitful.

PAINT NOTES.

The Master Painters' Association of Scotland numbers about 200 members.

Arthur Ireland, Calgary representative of the Winnipeg Paint and Glass Co., died last week.

DEAD—but Not Buried

Whiting and glue, kalsomine, etc., are DEAD ONES for wall decorative purposes. People don't want them. Yet, in spite of this, whiting and glue, kalsomine, etc., REFUSE TO BE BURIED. They get themselves into fancy boxes, take fancy names, and masquerade as imitations of Alabastine, which is as different from them as a diamond is from a glass imitation.

Alabastine

is a cement wall coating, made from gypsum rock. Alabastine is the line people want—

Giving Old Furniture A New Lease of Life

Every housekeeper who comes into your store is a good prospect for

LACQUERET

There's hardly an attic in your locality that could not be made to yield up some article of furniture to which an application of Lacqueret would give new life and beauty.

Make the suggestion to your customers. Tell them it is not a paint, stain or varnish—but a translucent Lacquer of unique composition that you are willing to guarantee. You are absolutely safe in guaranteeing Lacqueret to do all we claim for it—we stand back of every claim and our stand is based on actual, accomplished results.

We will mail you prices and advertising matter on request.

ONLY ONE RUBEROID

300 Substitutes

Don't be deceived by the looks or by the name of a roofing. In the 17 years Ruberoid has been on the market, more than 300 substitutes have sprung up. Many of them are named like Ruberoid. Many are made to look like it, in the hope of deceiving you and your customers. But there is only ONE Ruberoid. And no other roofing is even half as good.

No other roofing can possibly be so good as Ruberoid, because no other roofing maker can use the processed gum we utilize in the manufacture of Ruberoid. It is our exclusive product—used only by us.

And when this remarkable gum is forced into the fibres of the best wool felt we can buy, it makes the felt perfectly weather-proof, fire-resisting, acid-resisting, a good insulator, tough and flexible enough to withstand the severe torsional strains every roof is subjected to.

Easily Laid--Lasts for Years

Besides, Ruberoid is extremely convenient, for any unskilled man can lay it without the slightest difficulty. And once it is laid, it makes a one-piece roof that is positively proof against all the assaults of the weather. The wind cannot get through. The rain, the snow have no effect on it.

And Ruberoid will last for years. The first Ruberoid roofs ever laid—in 1892—are giving the utmost satisfaction —cost practically nothing for upkeep—and are good for years to come.

Ruberoid in Colors

Ruberoid can be had in red, brown and green—rich, permanent shades that are suitable for roofing the finest dwellings, public buildings, etc. And the colors will not fade or wash off because they are impregnated in the roofing when it is made. The coloring is a part of the roofing itself.

How We Help You

But we go further than merely make the Ruberoid the BEST roofing obtainable. We are creating a demand for it—helping YOU to sell it. We are spending thousands of dollars in the best Canadian home and farm papers to arouse that demand. We are telling the wonderful story of Ruberoid in the most striking, the most convincing, the most truthful way we can.

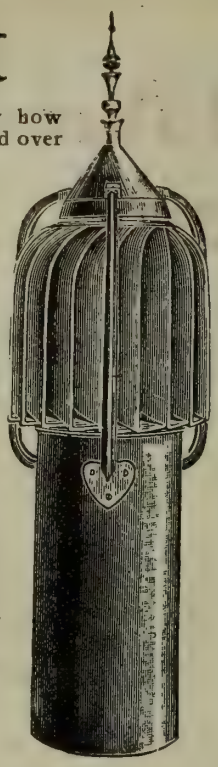
You get the benefit of this advertising. The direct sales are yours, for every enquiry, every order that comes to us will be promptly turned over to you.

Be ready to share in the rich harvest of profits this advertising campaign is going to create. Be ready to co-operate with us to make it the greatest of all roofing campaigns. Write to us immediately—TO-DAY—for the special proposition we make in connection with this campaign. Ask, too, for our new roofing book, "All About Roofing." Address Dept. 92.

The Standard Paint Co. of Canada, Ltd. Imperial Bank Building MONTREAL - CANADA

The White Lead Association of Canada

This Association was formed in 1889, for the purpose of removing abuses in the sale of White Lead, and was successful in securing legislation which has contributed to securing that White Lead, marked "Pure" or "Genuine" must be absolutely free from adulteration. The Association adopted the following label, which is used by its members on all pure White Lead issued by them.



This label, the Association believes, is being imitated in several quarters, and the copy label is here shown in order that dealers may be careful to avoid imitations and secure White Lead bearing the guarantee of the Association.

This label is registered at Ottawa and action will be taken against all parties using any imitation thereof.

All enquiries will be answered by the Secretary, JOHN HYDE, Chartered Accountant, 304 Merchants Bank Chambers, Montreal

Free Trip to "Toronto National Exhibition"

and Return, with Six Admission Tickets thrown in for Good Measure.

To anyone, living in Canada, who sends us new, full-year, paid-in-advance subscriptions as per schedule below, will be furnished Free First-Class Railway, or Steamship, Transportation (as preferred) to Toronto and Return, over any Canadian Railway, or Steamboat Line, together with Six Regular Admission Tickets to the Toronto National Exhibition this fall. Tickets good during the Exhibition, subject to the regulations of the transportation company issuing them.

Begin now, and see how easy it is to earn this outing. Subscriptions may be sent in any time before July 15th next, but not later, as the remaining time before the fair is required to complete arrangements for traveling accommodation for those who respond to this offer.

There is no competition, or other element of chance or risk about this offer. The distance you reside from Toronto regulates the number of subscriptions you must send. When you have sent that number you may rest assured that our undertaking will be carried out to the letter. The regular railway time-tables will be used to determine the distance, which is to be calculated by the shortest passenger route. By consulting your railway time-table you will get this information, or we will supply it. Should you fail to secure the full number of subscriptions required, proper remuneration will be made by sending you, in lieu of the tickets, their pro rata equivalent in cash.

Notify us early of your intention to accept this offer; for convenience you may use the form below. This offer is open to ANYONE, whether a subscriber or not.

THE BUSY MAN'S MAGAZINE,
10 Front St. East.
Toronto, Ont.

Gentlemen:

I hereby accept your offer of "Free, First-Class Transportation to the Toronto National Exhibition and Return; together with Six Regular Admission Tickets to the Fair-Grounds," in consideration of which I will undertake to send you the number of new, full-year, paid-in-advance subscriptions to The Busy Man's Magazine, indicated by my X, on the schedule below. I reside no further from the city of Toronto than is indicated in the schedule opposite my X.

"The Busy Man's Policy is as Wide as this Great Dominion"

The offer on the opposite page is the broadest one ever attempted by any publication in Canada. Only a magazine with unbounded faith in its merits, in the people and in the country, backed up by ample resources, could attempt such an offer as this. Without restrictions, anyone living in this wide Dominion, whether in Nova Scotia, British Columbia, or any place in between, can have this trip by First-class regular trains. "No special excursion crowding at second-class rates." These tickets will afford you every comfort that any first-class ticket will or can afford during the Exhibition.

The management of this trip is in the hands of a committee who will handle it carefully, liberally, and to the satisfaction of all who accept it. This great offer is made to popularize Busy Man's Magazine, and every detail will be carried out in a manner to insure this end.

Busy Man's is only two dollars per year; any Man, Woman, Boy or Girl can earn this trip at a very small tax on their time. Send in your acceptance and we will send you sample copy and order forms.

This announcement first appeared a few days ago; already we are receiving acceptances from all parts of Canada. Take this offer at its face value, accept it and win the trip. We'll help you and carry out the offer in its entirety.

Busy Man's is a high-class monthly, in which topics and events of immediate interest are ably treated.

It is easy to sell because it bears the imprint of worth on every point that counts in good magazines.

Read what others say of it, in the letters on the margin. Then make up your list of those you think should subscribe, and see them and others without delay. Don't forget the "others," sometimes they are the best.

The Busy Man's Magazine

Toronto - Canada

UNSOLICITED TESTIMONIALS

I consider The Busy Man's Magazine the best I have yet come in contact with.
HENRY WILSON, Toronto.

We have subscribed to many British and American magazines, but found none to equal yours as a Business or Busy Man's Magazine. The articles are so admirably selected that one can start at the first and read right through to the last page and enjoy superior reading all the way.
AULD & CO., South Dunedin, New Zealand

We would not like to miss the future copies of The Busy Man's Magazine.
INGERSOLL PACKING CO.

The Busy Man's Magazine is the best magazine I have had the pleasure of perusing. If my subscription should lapse, do not stop it; jar me up on remitting.
A. B. BURRETT, Amigari

It is pleasing to record that Canada can boast of such a publication, whereby the man, who can devote only a short time to reading each day, may become thoroughly conversant with all that the brightest minds are producing, and what the world's leaders of thought and research are doing, discovering or planning.
Such a publication is The Busy Man's Magazine, which is replete with the latest contribution of the world's centres in political and commercial affairs, science and invention, labor, business, industry, art, etc. The Busy Man's Magazine is a Canadian publication, and places before its readers the greatest amount of instruction and profit in the handiest form and most attractive manner. It indeed fills a long felt want. — Peterborough *Daily Review*.

The Busy Man's Magazine takes first position in my opinion. It has more interesting, concentrated, common-sense information in one issue than most periodicals have in a whole year.
C. C. NASH, D.D.S., Bath.

The articles in The Busy Man's Magazine are just what we want, short and so well written that a busy man can afford time to read them and feel benefitted for the short time given to each article.
WM. THOBURN, Almonte

The Busy Man's Magazine is the only publication that I keep a file of; in fact I have to, because practically every article in the various issues has been blue pencilled by me for future reference. You have certainly succeeded in obtaining all of the articles of value from the principle magazines of the world, and as a consequence I have not only been able to save a great deal of time by reading your magazine, but also a good deal of money. For instance, I had subscribed for 32 different publications. I now find that Busy Man's Magazine covers the gist of the majority of them.

Amatite ROOFING

TRADE B MARK

FIVE ROOFINGS TESTED

GENTLEMEN:- OAKFORD, Pa., February 15, 1908.

The Amatite Roofing you advised me to try has proved to be the best roofing I have on any of my chicken houses, having tested it for two years with four other roofings. Consequently, when I was compelled to buy a new roof on my wagon house, I used Amatite.

If you see fit to use this letter as a testimonial, you will be doing the chicken fanciers a great benefit.

If anyone wishes to see how the roofing lasts I will be pleased to have them visit my farm.

Yours truly,

HILL CREST FARM, WILLIAM F. FOTTERALL.

This is the kind of letters which we get daily regarding Amatite

When it was first put on the market a great many people were attracted by it, but did not wish to spend all their money in a new type of roofing, so they used some Amatite with the old-fashioned "smooth-surfaced" roofings right alongside so as to get a good comparison of their durability Now they are finding that Amatite WITHOUT ANY PAINTING lasts longer than other roofings that need CONTINUAL PAINTING, and they are writing in letters like the above.

Amatite has a surface of REAL MINERAL MATTER which will not rub off or wear off, as the coal tar pitch which holds it in place is a powerful adhesive.

The price of Amatite is very low. The smooth-surfaced roofings sold at the price of Amatite are usually a one-ply or half-ply grade which is very flimsy and light in weight, and do not compare with Amatite, which is FIVE-PLY. Amatite has a double layer Coal Tar Pitch, a double layer of wool felt, and A REAL MINERAL SURFACE.

Send for a sample of Amatite and see what the mineral no-paint surface looks like. You'll then understand why it is so much better than "painted roofing."

FOR 25 YEARS

FOR 25 YEARS the dealers of Canada have made good profits and secured permanent customers through handling our lines of Metallic shingles, sidings, ceilings, conductor pipes and all metallic building materials.

FOR 25 YEARS we have supported and protected the trade in every way—advertising extensively to create a market, etc., and upholding prices.

FOR 25 YEARS our metallic goods have stood the test of time—weather, fires, wear, tear—and are just as good to-day.

Send to us your specifications or problems for your customers' buildings or alterations and we will gladly figure them out for you.

Are You

selling the wonderful Thermos bottle ? It is one of the most remarkable inventions of recent years, and has become a necessary article to the traveller, the railroad man, the autoist, the yachtsman, the hunter, and is widely used in the home, in the sick-room, and in the nursery.

The Thermos bottle sells all the year round. In the summer the demand is especially large.

In the Improved Thermos Bottle sold this year, the inner bottle can be easily and cheaply replaced in case of accidental breakage. The Thermos is the only bottle in which this separable feature has been patented.

I DO SOMETHING THAT NEVER WAS DONE BEFORE

If you are not selling the Thermos Bottle you are losing a good opportunity for making money. Write us for catalogue and prices or, better still, order two or three bottles and show them to your customers. They will sell.

Long Distance Phone No. 87

Sold throughout the Dominion by all Wholesale and Retail Hardware Merchants.

Every Little Bit Helps!!

Mr. Hardware Man,—Don't you often find that the "little sales" of the day are a big feature in the day's receipts and are often the lever to larger sales?

The Kaiser Wax Pad and Iron Cleaner

is a "little thing"—retails at 10 cent—but it is a household necessity, something entirely new on the market, a quick and big seller, with a good profit.

Every housekeeper dreads ironing day, especially so when she has a lot of shirt-waists, men's shirts, collars, cuffs, etc. to iron, she always wants to obtain a high-grade finish, equal to first-class laundries. She of course asks the dealer for advice—in return he offers her the common wax—She knows it is impossible to do good work with the common wax—So she walks away—one customer lost.

Now where she can procure an article of this merit—that reduces ironing time by half—reduces labor to a minimum—adds to the finish of clothes—and makes ironing a day of pleasure—THERE SHE IS SURE TO DO HER BUYING—AND LEAVE HER ORDER FOR OTHER THINGS.

A post card to any of our Canadian agents or direct will bring a sample of this great little business getter.

Is the other fellow pressing you hard for business ?

Chances are he is doing it with Crescent Brand Hinges and Butts.

Many of the successful fellows have chosen them exclusively—and they are well worth choosing too, being made for the trade that seeks the best, and who are governed by quality.

Can you risk handicapping your business with inferior goods, when the price is not lower ?

If your jobber does not keep them, we will fill your order.

Canada Steel Goods Company, Limited

Hamilton, Ontario

Leave the Money in the Country Wherein You Expect to Make Yours

A MATTER OF PROFIT

IN SELLING BURMAN'S CLIPPERS

THEY ARE THE BEST KNOWN CLIPPERS IN THE WORLD.

The dealer who eliminates QUALITY and gives preference to price is taking a huge downward step. It robs SELLING POWER and DESTROYS the PROFITS.

BURMAN'S CLIPPERS HAVE THE QUALITY that will stand BACKING UP.

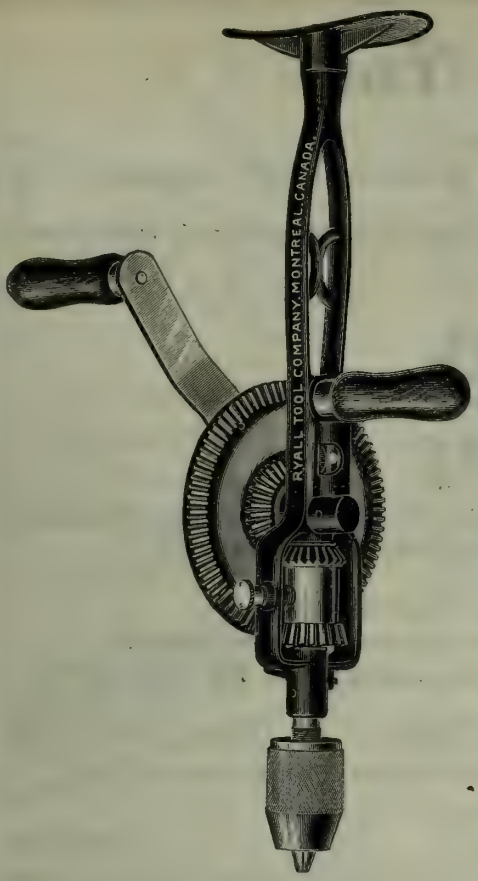
IT WOULD BE USELESS TO ADVERTISE If BURMAN'S did not stand behind it all with CLIPPERS that for THIRTY YEARS HAVE LED THE TRADE.

What clipper is known so well as BOWN'S NEWMARKET? It always brings repeat orders to the dealer. Jobbers recommend it because it's sound.

The "GRAND" Clipper is another leader. The only ball bearing clipper produced to-day.

The "Handicap" is so made as to suit the pockets of every man. It is very reasonable in price, but the QUALITY has not been sacrificed.

OUR CATALOGUE is copious with information—just what you should know in order to talk to the trade about BURMAN'S of BIRMINGHAM, ENGLAND.



THE STEEL, THE EXPERIENCE, THE CRAFTSMANSHIP of centuries are behind BRITISH CLIPPERS, and BURMAN'S MAKE CLIPPERS FOR THE MONARCHS OF EUROPE.

No. 17 power clipper has met with unusual success owing to the superiority of its CLIPPING HEAD, its wonderful CUTTING QUALITIES, its anti-frictional design and its perfect balance. The gearing that runs the machine is in a dust proof gear box and it sells on sight.

Profit to you and satisfaction to your customer.

B. & S. H. Thompson & Co., Ltd., St. Paul St., Montreal

SOLE CANADIAN AGENTS

No. 60

No. 60 Breast Drill

Manufactured by

Ryall Tool Company, Montreal, Canada

RYALL TOOL CO. Breast Drill is carefully designed and proportioned, durable, easy working and strong.

FRAME—Finished in black and yellow enamel.

HANDLES—Polished Hardwood.

BREAST PLATE—Adjustable to any position.

GEARS—All gear teeth cut from solid metal, and the small pinions from rolled steel bars. Double gears equalize the bearing.

CHUCK—Nickel-plated, three-jawed chuck with knurled sleeve, holding round straight shank drills No. 0-½ in. in diameter.

LEVEL—Is set in perfect alignment with the chuck and handle, which enables the drill to be held true. It is set in solid iron where it can be seen while in use, and is protected from all but intentional injury.

SPEEDS—Two speeds, one approximately three times faster than the other; readily changed to fast or slow by turning the knurled nut on the frame marked "F" and "S," at the same time turning the large gear slowly so the clutch may drop in.

SPINDLE—Runs in case-hardened, anti-friction cone bearing.

Length: 16 inches over all. Weight: 61 lbs. per doz.
Packed one drill only in a linen reinforced cardboard box.

IT'S THE QUALITY

that sells a "Pansy" Broom and pleases your customer. We can sell you brooms of all grades at all prices. But in the

"PANSY" BROOM

we offer you something extra good in quality, that will make a friend of every woman who buys one from you. Just right in size, weight and springiness, splendidly made from the very finest broom corn. Its wearing qualities will keep your customers loyal to your store.

BUY FROM THE MAKERS

H. W. NELSON & CO., Limited

TORONTO CANADA

It Depends On You

Big business in Genasco Ready Roofing is yours if you want it.

We have created the demand by persistent vigorous national advertising, and it behooves every dealer to satisfy this demand in his territory.

Lots of dealers are meeting the demand, for the sales of Genasco have increased enormously in the last few years.

Genasco
Ready Roofing

is the roofing everybody wants, because everybody knows it's made of Trinidad Lake asphalt. We don't make a secret of it. We tell why Trinidad Lake asphalt is the greatest weather-resister known.

This gains the confidence of customers and helps sales.

The economy of such long-lived roofing also appeals to customers. That helps sales, too.

Are you looking for bigger business? Then stock up with Genasco and meet the local demand.

Mineral and smooth surface. Every roll guaranteed. Write for samples and full information.

HAMILTON (22 Calibre) RIFLES

Money Makers

Models 27 and 027

Prices $2.00 and $2.25

We Specialize on Boys' Rifles

We build our rifles under patents exclusively our own and confidently claim to make the **best rifle ever built for the money.**

MODEL No. 27 is an efficient sporting rifle, with hammer action, of few parts and exceedingly simple, using 22 calibre short or long cartridges. The barrel is bronze, rifled and steel jacketed, finished in blue black gun finish. Breaks down for loading and ejecting shells. Flat stock and forearm of gun of gum wood. A beautiful model, symmetrical and well balanced. Barrel is 16 inches long, length of rifle over all, 30 inches. **Price $2.00.**

MODEL No. 027 is exactly like No. 27, except the stock and forearm, which are of genuine walnut, turned and beautifully finished. **Price $2.25.**

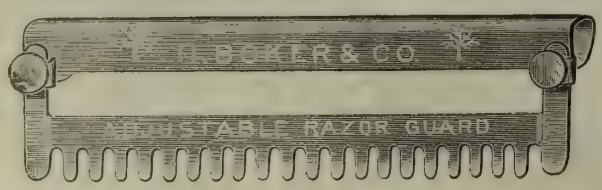
Other models are Nos. 15 at $2.00, 19 at $2.50 and 23 at $3.50, each a winner in its class.

Our continuous advertising in the boys' papers will bring the business to you, as every boy will want one and you should have a stock on hand. **Write for catalogue and net trade prices.**

THE HAMILTON RIFLE CO., Box 202, PLYMOUTH, MICH., U.S.A.

Our Electric Welded Chains

have shorter links than the knotted chains and are also smoother. They are thus more flexible and easier on the animal. No kinks of any kind to catch the hair. We guarantee they are 50% stronger.



They cost no more; so why not insist upon your dealer supplying them?

McKinnon Dash and Metal Works Co.

ST. CATHARINES, ONT.

Martin's Store Ladder
Low Down High

For all merchants that carry merchandise on shelves enquire of E. R. CASE, Toronto

A Few Testimonials

Rockford, Ill., May 27, 1908.

Mr. S. B. Martin, Dalton, Ohio,
Dear Sir,—Ladder is very satisfactory—the new track holds up and were we fitting a "string of stores" we should place your ladder in each one of them.
Very truly,
Hunter Hardware Co.

Toronto, Ont., Sept. 28, 1908.

Mr. S. B. Martin, Dalton, O.
Dear Sir,—We are well pleased with the "Low-Down-High" Ladder you installed in our warehouse some weeks ago. We find same works very easily and smoothly and makes the work of filling orders from the shelves a very easy matter compared with the old style of ladders. We will be glad to receive quotations for Ladders for other parts of the Warehouse.
Yours truly, T. Woodbridge & Co.

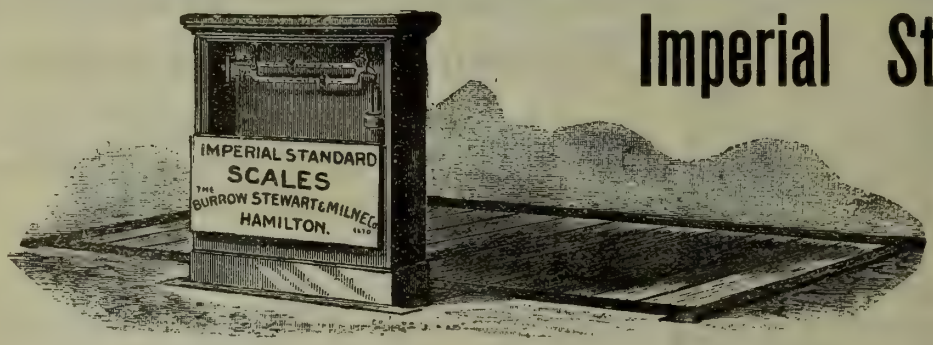
CONGO ROOFING

A SURETY BOND GUARANTEE with every roll

Congo 3-ply Ready Roofing is so good that a *Surety Company* is perfectly willing to guarantee it for *ten years*. It is generally known that a Surety Company doesn't take any extraordinary risks, so in backing Congo they made pretty sure it was the best ready roofing to be obtained at the price. And *we* know it is also.



In buying Congo you take no chances. Follow directions, and there your responsibility ends. Congo 3-ply will give the right kind of protection for ten years. Whether you buy one roll or a dozen rolls you get the same guarantee, for a Bond goes *with every roll*.

Furthermore you have the privilege of examining the bond before buying Congo, for a sample bond as well as a sample of Congo will be sent free for the asking.

Write to-day. It will pay you to investigate this offer.

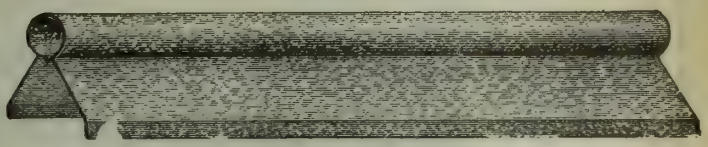
One Kind of Competition is the Death of Trade

Every dealer expects legitimate competition—and is prepared to meet it. But unfair competition—where a manufacturer goes direct to the consumer and competes with his agent—is the death of trade.



Brantford Roofing Company does not enter into competition with its agents—but it finds prospects for them and helps them get orders.

Ask us how we propose to help you increase your roofing trade this season.

LONDON, CANADA

HOUSE CLEANING TIME

Suggests

The Ideal Duster

THIS SUGGESTION is not because the article depends upon any particular season for its uses, nevertheless the approaching cleaning time creates a profound interest in more useful appliances than have been.

THE IDEAL DUSTER

AS { a high reaching duster
an outside Window Washer
a Polished Floor Duster
a Porch and Grill Duster }

has a principle excelled only by the human hand.

It is a MECHANICAL HAND, closing automatically, opened by a wire pulling cord. The user may change wiping cloths with practically the same facility as in hand cleaning—without stooping or climbing. THE HAND AND WRIST SHAPE gives the hand action, to wipe tops of doors, mouldings etc., and gives 11 square inches like the hand on top the cloth for surface rubbing—WHEREAS ALL MOPS HAVE ONLY A STRAIGHT LINE RUBBING SURFACE.

The wholesale trade will supply you at prices right to enable you to sell with a proper profit at 50 cents for the Duster complete in the two parts, or with a proper, a very proper, Dust Cloth at 60 cents.

The consumption of these Dusters in some towns, where introduced the past year, has been enormous and this demand shows no abatement. Retail Price :

1st section, 5 ft., carrying the head, 35c. ***2nd section, 5½ ft. Extension Handle, 15c.***
Ideal Dust Cloths, 10c. ***Sold separate or ensemble.***

Any dealer can obtain this line with the same facility as

Sunshine Furnace is Superior to Other Furnaces
Because of Greater Firepot Weight and Longer Firepot Life

The firepot naturally bears the brunt of a furnace's work, and it bears it just in proportion to its original strength.

We take the firepot question seriously. Hence the reason why Sunshine firepot lasts longer.

Then because common experience teaches us that the upper portion of a firepot, being subjected to "red coal" heat (not ash heat, as is the case with the lower portion), expands sooner than the lower portion, we make Sunshine furnace firepot in two sections—so contructed with fins that they throw off every unit of heat, so constructed with straight walls that it is impossible for ashes to gather and intercept the heat, so constructed that the upper section can expand independent of the lower, thus making it impossible in a Sunshine Furnace for any heat to loaf around the firepot, any heat to be nullified by ashes, any cracks to take place as a result of the shock following contraction or expansion.

Then because common experience teaches us that steel is more powerful than gray iron we make Sunshine Furnace firepot of semi-steel. This is an exclusive feature, and indicates that in Sunshine Furnace firepot alone your customers find smooth-as-glass surface, secure maximum fire-resisting strength, can rely on only minimum disintegration and can be assured of long life.

All of which spell DOLLAR VALUE FOR DOLLAR PAID.

Farmers Hoarding Money in Banks

Merchants Claim That They Are Not Getting Their Fair Share From Agricultural Districts and That Some Farms Are Being Stinted as a Result of Bankers Encouraging Farmers to Foster Savings Accounts.

The merchant in the manufacturing town does not have to wander far afield in order to locate the causes for apparent scarcity of money in his particular centre. He figures that the stringency, due in some considerable measure to the tightening up of credits, had its effect in curtailed output, that a general policy of conservatism adopted by manufacturers during the depression resulted in scarcity of labor, and that the shopping public practised economies not heard of in more prosperous times.

When there has been a falling off in business in a country town, surrounded by a good farming district, however, the same diagnosis will not serve. The farmer has been having fairly good years and prices have advanced very considerably in many respects. When there are few, if any, factories, the merchants must look to the farmer for a reasonable patronage. They realize that he should be in a position to buy well, and that with the generally good footing which Ontario's agricultural community is now occupying, there should be a commensurate flow of ready cash from that direction.

Building Up Deposits.

How is it working out? Discussing the situation recently with Hardware and Metal one merchant contended that the banks, in their untiring zeal to build up deposits, were educating the farmers in the wrong direction—to hoard their earnings from the farm unreasonably—and that the tendency was being further encouraged by the introduction and use of cheques as mediums of payment, first, as between the buyer of farm produce and the farmer and second, as between the farmer and retail merchant. Once a bank account had begun to develop proportions, he argued, most farmers hated to see it shrink. It appears to be a condition which demonstrates that the bank and the farmer are a strong combination, but the complaint in the present instance is that it is not conducive to the greatest good to the greatest number deserving.

"When the farmer has money in his pocket," said the merchant, "he is a different man. A few years ago his house was rarely without cash. The banks had not begun to spread out. The farmer bought readily enough, then, but this present day custom of carrying nothing more tangible than a blank cheque book in his pocket and an inordinate disinclination to disturb a fat bank deposit, is creating an undesirable merchandizing proposition. I think I may safely say, from instances I have encountered, that it is having a demoralizing influence upon the farmer's business principles. He does not draw the line. He keeps on depositing, and I contend that some of the money belongs to us. Backed by an account in the bank, there are those who apparently consider that they may demand an unlimited amount of credit. They expect the merchant to stand for it.

Frame Up Excuses.

"Not having the ready cash, some of them frame up excuses for postponing payment, even though they know that our store is run on the cash plan. This man puts forward the plea that his money is deposited in another town and that he will settle up next time. Another man's wife says her husband filled out a cheque at home to make a withdrawal but that he came away and forgot it. The husband, of course, doesn't show up. These are some of the excuses and I claim it is demoralizing. Of course there are exceptions—very notable exceptions I am grateful to be able to say.

"I have noticed this condition developing for the past three years and I claim that it is not only having a serious effect upon business, but that the farm itself is not getting all that it is entitled to in order that the highest standard in agriculture might be developed. A few years ago, when the farmer brought his hogs, his cattle, his hay or other produce to market, he received the cash. His wife comes to market with butter and eggs it is true, and receives cash in payment, but that represents a very small part of the proceeds from products of the farm. Nowadays, when the farmer brings his hay or hogs to town, he either receives a cheque or a ticket which is as good as a cheque. He then goes to the bank and deposits it. The entire system is one which plays into the hand of the banker.

"The competition for these deposits has developed a plan which appeals to most farmers. He has been told that it is more businesslike to use cheques. The banks have accordingly equipped him with the means, but it is evident that the willingness to draw is not in it with the willingness to deposit. The bank book is the farmer's visible financial thermometer, and naturally, he likes to have the indicator soar as high as possible above zero.

Withholds More Than He Should.

"'Do you not think it a good thing for a farmer to have a bank account?' was the question asked of me recently by a banker and I agreed with him that it was, but I pointed out that the banks had so campaigned after the farmer's money, that he was now withholding more than he should from the merchant as well as from his own farm and even his own household. The agriculturalists of Ontario are, on the whole, now in a position to live more comfortably than was the case in the early days. Nowhere will you see tables so well supplied as in some of our farming districts. A man's ambition, however, should create in him a desire to be something more than a hewer of wood and a drawer of water. Farmers' wives have told me repeatedly, however, that it is now very difficult to secure money from their husbands. They state that the farm itself is being stinted by this regardless craze for bank accounts. True, the money is there for investment, but should the farm be neglected? Should the agriculturist cut himself down to a purely hand-to-mouth existence? The country requires something better of him than that. The banks, I claim, are responsible.

Trade Picked Up.

"Here is an example. A merchant in a small town remarked to me some time ago that trade there had picked up wonderfully. He could not explain it, but when he told me that the only bank in the place had gone out of business I said, 'If any man comes to you to sign a petition for another bank, kick him out of the store.' There is a bank in that town now and trade has again gone back.

"The farmer will feel it; of that I am sure. The other day a farmer whom I knew to be very well off, came into my store and I asked his opinion of the outlook. He replied that while the year just closed had been very good, so far as he was concerned, the following year, he said, would fall short. I couldn't understand it and asked him why. His answer was that he would have no stock to sell.

"'Why not buy more stock?'" I asked, "You have plenty of money in the bank?"

"'That is the trouble!'" replied his wife. "'Everything has gone to swell that bank account. He will not draw out the money necessary to re-stock the farm.'"

"We are doing what we can by friendly talks to the farmers and bankers," said the merchant, "to combat this evil, but it looks to me that the only remedy is a crop failure or a collapse of prices."

The story is told of a farmer who, though he had $10,000 in the bank, asked to have a note for $125 discounted.

"But you have plenty of money here," said the banker, "why should you want to discount a note and pay 7 per cent. interest?"

"Well," said the farmer, "I don't want to draw out any money just now."

The paint supplies required for the Brooklyn navy yard for this year call for 36 pounds muriatic acid, 600 pounds nitric acid, 300 pounds camphor gum, 100 gallons durable metal coating, 5,000 pounds marine glue, 100 gallons gold size, 2,000 pounds mineral lubricating grease, 3,000 pounds chrome green, 3,000 pounds lampblack oil, 9,000 pounds red lead, 3,000 pounds yellow ochre, 3,000 gallons lard oil, 3,000 gallons mineral oil, 500 gallons tar oil, 3,000 pounds tallow, 3,000 gallons turpentine.

Retail Hardware Association News

Official News and Correspondence on Association Matters Should Be Sent to the Secretary of the Ontario Retail Hardware Association, 10 Front Street East, Toronto, and Matter for Publication in This Department Addressed to the Editor of Hardware and Metal, Toronto.

Canadian Wholesale Hardware Association—William Starke, Montreal, president; A. Jeanotte, Montreal; W. J. Lawson, S. R. Kennedy, Toronto, J. G. Lewis, Montreal; A. Prudhomme, Montreal; directors; James Hardy, Toronto, secretary-treasurer

Maritime Wholesale Hardware Association.—W. G. Robertson, Halifax, president and secretary; W. S. Fisher, St. John, vice-president; George C. Weldon, St. John; John A. McAvity, St. John; John M. Robertson, St. John, Percy Simmonds, Dartmouth, A. J. Grant, Halifax, executive.

Hardware and Metal Association of British Columbia.—John Boyd, Vancouver, president; J. A. Cunningham, New Westminster, vice-president; John Burns, Vancouver, secretary-treasurer.

Alberta Hardware Merchants' Association.—John Drewe, Calgary, president; R. L. Gaetz, Red Deer, first vice-president; J. Dowcett, Edmonton, second vice-president; L. W. Kribs, Frank; C. W. Marshall, Nanton; W. G. Stafford, Lethbridge; A. E. Clemens, Sedgwick, and C. W. Hislop, Carstairs, executive committee; A. T. Linton, Calgary secretary-treasurer.

British Columbia Hardware Dealers' Association.—Charles Snell, Vancouver, president; ——— Stearman, Vancouver, vice-president; Messrs. Lusby and Blakely, New Westminster, and Henderson, Vancouver, executive committee; Wm. J. Butt, Vancouver, secretary-treasurer.

Ontario Retail Hardware and Stove Dealers. Association.—D. Brocklebank, Arthur, president; A. Ballantyne, Brantford, first vice-president; M. S' Madole, Napanee, second vice-president; John Caslor, Toronto, treasurer; J. Walton Peart, St. Mary's; D. Cinnamon, Lindsay; R. C. Chown, Belleville; H. P. Morgan, Peterboro; J. S. Weichel, Elmira, and J. R. Hambly, Barrie, executive oommittee; Weston Wrigley, 10 Front St. East, Toronto, secretary.

ONTARIO EXECUTIVE MEETING.

The executive committee of the Ontario Retail Hardware and Stove Dealers' Association met at the Queen's Hotel, Toronto, on Thursday, April 8, the meeting being called to order at 2 p.m. by President Brocklebank. Others present were M. S. Madole, Napanee; J. R. Hambly, Barrie; D. Cinnamon, Lindsay; R. C. Chown Belleville; J. S. Weichel, Elmira; H. P. Morgan, Peterboro; John Caslor, Toronto, and Weston Wrigley, secretary, Toronto.

The secretary made a report showing the number of members on the books, the number of travelers enrolled as honorary members and the number of firms using the "cartage charges" stamp. He also reported 124 members using the collection letters supplied by the association.

Treasurer Caslor reported a balance on hand in the treasury of $534.

Montreal Trip Decided Upon.

The secretary reported a favorable response from the members on the referendum vote on the question of holding the excursion to Montreal in August. Over three-fourths of the members voting had favored making the trip and with few exceptions they reported that they would take their wives along.

It was suggested that arrangements be made for special railway rates to Toronto, Kingston, Prescott and Montreal, as many as possible being centred at Toronto to make the trip to Montreal by boat, picking up others at Kingston and Prescott, while those desiring to do so could go by rail to Montreal. The return trip could be made by rail or boat as preferred. Definite rates have not yet been secured from the railway and boat companies so a committee composed of Messrs. Hambly, Cinnamon and Wrigley were selected to complete the details, the trip to be made preferably in the week beginning August 23 or 30.

The secretary suggested that a meeting be arranged at Montreal with the claims agents of the G.T.R. and C.P.R. and a discussion held on the best methods of settling freight claims.

District Associations.

Three requests having been made to organize a district association at Brantford, four at Toronto, two at Belleville, two in Waterloo County, two at Cobalt, two in the Chatham district and two at North Bay and about fifteen other members having asked to have district associations formed in their neighborhood, it was decided that the association endeavor to organize Toronto and Waterloo County at once and other places as soon as possible afterwards.

Next Convention at London.

The secretary reported having visited London and Peterboro and finding that the latter place was not able to supply suitable halls, while good arrangements can be made at London, the city providing, free of charge, the city hall for exhibits, and board of trade rooms for the convention.

On motion it was decided that London be selected as the place of holding the 1910 convention.

Joint Committee Appointed.

Last fall the Canadian Wholesale Hardware Association appointed a joint committee to meet representatives of the Ontario Retail Hardware & Stove Dealers' Association to discuss matters of interest to members of both organizations. The appointment of a similar committee was left to the 1909 executive by the recent Hamilton convention.

The wholesalers' committee is composed of four for the west, composed of T. G. Dexter and W. J. Lawson, Toronto; Wm. Vallance, Hamilton, and C. A. Whitwam, London, and for the east Thomas Birkett, Ottawa; T. H. Newman, A. Jeannotte and A. Prudhomme, Montreal.

The retail committee will now be composed of A. Ballantyne, Brantford; W. G. Scott, Mt. Forest; G. A. Binns, Newmarket and S. L. Adolph, Listowel; for the west, and M. S. Madole, Napanee; R. C. Chown, Belleville, C. F. R. Taylor, Carleton Place, and W. A. Rankin, Ottawa, for the east.

This joint committee might consider, it has been suggested, matters of legislation affecting the trade as well as controversial matters arising between jobbers and retailers.

One matter referred to the retailers' representatives for consideration along with the cartage charges matter, is the weighing of parcels by jobbers before shipment, cases frequently occurring where the railways charge retailers for overweight. One member spoke of being overcharged 80 lbs. on two boxes recently while another on a car of wire was overcharged 800 lbs.

Cartage Charges.

A letter was read from Jenkins & Hardy stating that the Wholesale Hardware Association had reaffirmed their decision not to allow cartage at point of shipment.

Another letter was read from the Clauss Shear Company, Toronto, advising the association that in future all goods shipped to members of the Retail Association will be shipped f.o.b. Toronto, cartage prepaid. The company also asked for support on the ground of their maintaining a Canadian office and desiring to establish a Canadian factory as soon as trade makes this possible.

A third letter was read from E. W. Evenson, Spokane, Wash., secretary of the Inland Empire Hardware Association, as follows:

> Our experience in the matter was practically as follows:
>
> We felt that the charge was unjust, unfair and arbitrary and also that it was one that should rightfully be borne by the jobber and not by the retail merchant. Our members objected to a direct charge for case and cartage.
>
> In convention assembled we adopted the attached set of resolutions and served same upon the Pacific Coast jobbers with the result that they announced through the mails to their customers that they would withdraw charges for case and cartage, and hence we are no longer paying this unjust charge.
>
> Our attorneys advised us that in purchasing goods, the purchaser did not agree to pay case and cartage charges, and hence he would be perfectly justified in withholding same from remittances. This plan was followed out. The amounts were small and one jobber made the statement that he would sue in order to collect, but suit was

never entered, and he was one of the first to withdraw them when the crucial test came.

Hoping that we have thrown some light upon this subject for you and that we may serve you similarly in the future.

E. W. EVENSON, Secretary.

Spokane, March 24.

Still another letter was read from F. C. Moys, Boulder, Col., secretary of the Colorado Retail Hardware Association, in which he said: "No wholesalers charge dealers in this state for package or cartage."

After discussion the executive resolved:

Whereas, all hardware jobbers in the United States have now discontinued, not only the charge for cartage at point of shipment, but also the charge for packages, and

Whereas, Canadian hardware jobbers have never advanced reasons to show why retailers should pay cartage from jobber's warehouse to railway depot (other than that they have been doing so for some years), and

Whereas, we consider this charge upon retailers as unfair and unjust, being rightly an item of expense chargeable to the jobbers' cost of doing business, and

Whereas, the executive has knowledge that some retailers are being allowed this charge for cartage by Canadian hardware wholesalers and manufacturers, be it therefore

Resolved, That we urge all members of the Retail Hardware Association to persist in their request that the charge for cartage at point of shipment be discontinued and all retail hardwaremen be treated alike in this matter.

Mutual Fire Insurance.

It having been found impossible to have a bill drafted satisfactorily and brought before the present session of the Legislature, the secretary was instructed to have the bill prepared in plenty of time to be acted upon at next winter's session.

Co-operative Store Legislation.

It being understood that a bill introduced and withdrawn in the dying hours of the recent Legislature, will be brought up again next year, the secretary was instructed to write Attorney-General Foy, expressing the opposition of the members of the association to its provisions.

The bill originally passed Parliament and was defeated in the Senate, it being held that it infringed on the rights of the provinces. Now it is being brought up in the Provincial Legislatures. It aims to make it possible for promoters to sell stock in co-operative stores without securing a charter to do business and, whether intended or not, is calculated to aid promoters more than legitimate co-operative enterprises. And in its workings out it is likely to prove a disturbing factor in trade, doing injury to legitimate merchants without giving any real advantage to farmers or workingmen.

Division Court Act Amendments.

A committee composed of Messrs. Morgan, Cinnamon and Weichell was appointed to recommend changes in the Division Court Act to make the collection of small accounts easier.

Anti-Revolver Legislation.

The secretary was instructed to secure copies of existing laws governing the sale of firearms and ammunition and report to the executive.

A motion was adopted approving of the enforcement of existing laws requiring a record of sales of fire-arms and preventing their sale to minors but condemning the attempts being made to establish laws which would practically prohibit the sale of revolvers. It was felt that existing laws, if enforced, go far enough to safeguard life and prevent crime.

Trade Grievances.

A complaint was received of a wire fence company selling to farmers in Kent county at wholesale prices while also selling to the hardware trade.

Another was of a tinware manufacturer selling a quantity of 10-quart flaring sap buckets to a Victoria county farmer at $9 per 100. The same firm's traveler is said to have sold a hardwareman a bill of goods and then secured information about the location of a nearby village where he stocked up a general storekeeper with his goods.

The secretary was instructed to take the matter up with the firms complained of.

White Lead Marking.

The manufacturers of white lead having taken no action regarding the association's request to discontinue marking second-grade lead as "No. 1," it was decided to arrange for a meeting with the lead association at the time of the excursion to Montreal.

Other Business.

The question of securing a permanent button to be worn by members was left over until the next meeting of the executive.

A suggestion that members print on their letter heads the words "Member of the Ontario Retail Hardware & Stove Dealers' Association" was thought favorably of and the secretary was instructed to write the members urging that this be done. It was felt that the members would gain in prestige by doing this, and customers buying on credit would be more likely to pay their bills promptly.

It was decided to renew the subscriptions of the executive members for the National Retail Hardware Bulletin, Argos, Indiana., at a cost of $7.50. The Bulletin has been found to give much information helpful to executive members.

It was also decided to send Vice-President Ballantyne and Secretary Wrigley as fraternal delegates to the annual convention of the National Retail Hardware Association of the United States, at Milwaukee, on May 25 to 28. At this meeting the executive officers of about thirty State associations will be present as delegates.

As suggested at the Hamilton convention, the secretary was authorized to have forms printed and supplied to the members about January 1 with the purpose of securing data as to the cost of doing business. The forms are to be returned unsigned and the data compiled for discussion at the next annual convention in an effort to arrive at what per cent. of the turnover it should cost to do business.

It was decided that members attending executive meetings be paid an allowance to cover their hotel expenses as well as their railway fares, as in the past, this not to apply, however, to the annual convention meeting when each member must pay his own railway and hotel expenses.

The meeting adjourned at 6 p.m.

TORONTO MEMBERS MEET EXECUTIVE.

On Thursday evening the Toronto members of the association and the provincial executive had lunch at the St. Charles' Cafe and a discussion ensued on the advisability of organizing a Toronto branch of the association. Many trade evils were referred to and it was found that certain firms which sell to the trade outside the city make a practice of selling to contractors and consumers in the city. It was felt that members in the city and outside could co-operate in having such firms choose whether they desire to sell to hardwaremen or consumers. The executive promised to supply an organizer to help in forming a Toronto association and a committee composed of R. J. Bruce, West Toronto; George Mathewson, Queen St. east, and S. M. Burt, Yonge St., was appointed to take charge of the work of organization in the city.

REFUSED REVOLVERS TO ITALIANS.

Three Italians entered J. R. Hambly's hardware store at Barrie a fortnight ago and asked to see samples of revolvers. Mr. Hambly refused to show them, whereupon they displayed their money and said they wanted to buy. They were firmly told, however, that they could not buy revolvers in that store and had to leave with their wants unsupplied. As Mr. Hambly said: "If any other dealer wants to take the responsibility of selling weapons to foreigners and blood is spilled, the responsibility is not on my head."

PUBLISHED EVERY SATURDAY.

APPOINT EXPERIENCED TRAVELER.

The Quebec Government may appoint an inspector whose duty shall be the inspection of the hotels throughout the province. It is to be hoped that official action will be taken, and promptly, too. Not alone in the interests of the commercial travelers should such an officer be appointed, but for the better accommodation of the general public as well. The commercial traveler, however, is the man who suffers the greatest discomfort and inconvenience if hotels are not properly run. He spends ten to eleven months of the year on the road, and must, naturally, spend more time in the hotels than any other Canadian. It is his right, and only just, that accommodation should be good. Some proprietors take pride in keeping up the reputation they have won for their house. But an inspector is required because there are too many owners who do not give a continental for the "drummer," who chiefly supports him. The only way to keep up the standard is to appoint an inspector.

We would suggest the appointment of a commercial traveler, say, between the age of thirty-five and fifty, and preferably one speaking French as well as English. The position must not be filled by any peanut politician for $800 a year, but by a good, practical, sober, level-headed traveler, who knows from experience the life led by the commercial man. He must be able to understand the wants of the traveler, and at the same time he must be able to fairly consider the hotelman's position. A first-class man will fill this responsible office to perfection, and will do a great deal to improve the standing of many of our hotels. He should be paid $2,000 or $2,500.

If the Government contemplates following in the footsteps of Ontario, in choosing a politician for this position the situation had better remain as it is, for unless the inspector be thoroughly equipped with the necessary knowledge, which can only be gained through having gone through the mill, he will do more harm than good.

STORING BAR IRON AND PIPE.

Douglas & Co., Amherst, N.S., who are contemplating the erection of a fireproof hardware warehouse, are in search of ideas for the most economic handling of bar iron, black and galvanized pipe, etc.

For economy of space and convenience of handling the method described in the description of the Ingram & Davey store at St. Thomas, in the spring number of Hardware and Metal, March 20, is considered as combining the most modern ideas although opinions vary as to the best depth for the pit. In the metal warehouse described two sides of a square building were given over to a pit about two feet in width and varying in depth from three to six feet. One metal warehouse recently built in Toronto has a pit of a uniform depth of three feet while others are uniform at six feet.

The length of the stock carried has much to do with the depth desired. For instance, if bars or pipe of 20-foot length are stood on ends in a pit a six-foot depth would bring the centre close to the shoulder of an average man, but in raising heavy bars or bundles of pipe the assistance of a man is necessary in the pit. Where bars and pipe of a shorter length are stocked and where the services of only one man are desirable, a shallower pit will probably give better satisfaction.

Pitting is admittedly the best method of storing this class of material, both for saving floor space and convenience in handling the stock. The various sizes can be separated by short lengths of pipe or rod driven into a scantling in or on the wall, while the cement sides and bottoms of the pit can be protected by boards where desired. It is desirable also to arrange the warehouse so as to allow a driveway for teams into the building, and it is a good plan to cover the cement base for the driveway with blocks in order to preserve the floor.

One Toronto firm considers that iron pipe can best be handled in racks owing to the pipe coming in bundles. The majority, however, treat pipe in the same manner as bars and angles by storing on end in a pit.

NO TAXES ON TRAVELERS.

The recent abolition of the tax on travelers in Prince Edward Island makes Canada a clear field now for those knights of progress and introducers of new ideas and goods, the traveling salesmen.

Two or three years ago Quebec and British Columbia imposed taxes on travelers and the obstacles to doing business caused many merchants to go from Montreal to Ottawa to buy from a salesman rather than have the salesman enter Quebec and sell in the natural way.

This method of raising funds was not based on sound business principles and had to go by the board, the Dominion Government arranging with the Provincial legislators for more equitable means of raising funds.

Foreign manufacturers locating branches in Canada must, of course, pay taxes and the fly-by-night salesmen who do a peddling business in opposition to tax-paying merchants are also called upon to help pay their share towards the government of the community. But all barriers are now removed and there is nothing to prevent legitimate traveling salesmen from entering any Canadian province and selling goods to wholesale or retail merchants.

BARGAIN TABLES.

Many hardware merchants in the small towns are successfully adopting the methods which have made the 5 and 10-cent stores in the cities paying propositions. City department stores have found that competition with the 5 and 10-cent stores does not pay, but the dealer in the small town will find it advantageous to offer 5 and 10-cent bargains with small margins of profit.

A western dealer writes that he maintains two tables in the centre of his store. One contains an assortment of goods, choice of which can be had for five cents and the other has a ten-cent assortment upon it. Among the articles on the ten-cent counter are many real bargains—dishes, pans, etc.—for which the merchant paid nine cents each at wholesale prices. About half of the assortment consists of this class of goods The rest is made up of articles which cost three or four cents each.

The hardware merchant who uses this plan says that he has kept track of his sales and he finds that the two tables net him a nice profit every year. But better than the mere profit, he says, is the fact that these bargain tables actually draw customers into his store daily who do not stop with the purchase of a five or ten-cent article.

BROOM CORN PRICES UP.

The three advances of twenty-five cents each in the prices of brooms since December, have not, according to prices quoted this week, covered the advance in the price of the broom corn, the material used in the manufacture of brooms.

One manufacturer, for instance, bought two cars of broom corn this week, paying $130 and $135 per ton for the material, whereas, last fall the same stock could be secured for $60 to $65, the advance being over one hundred per cent.

In a standard line of maderate-priced brooms it requires at least 23 pounds of corn to make a dozen brooms and this at present prices of 3½c. per pound would equal about 81c. per dozen, or six cents over the advance made by manufacturers, lines which formerly sold at $2.75 having advanced to $3.50. The manufacturers, therefore, are being hit by the advance as well as the consumers, and as the market is cornered in strong hands, no relief is in sight until a new crop is marketed next fall.

ENTERPRISING SALESMANSHIP.

A good story is told about J. R. Hambly, Barrie, one of the executive committee of the Ontario Retail Hardware Association, who attended the executive meeting at Toronto last week.

While in a builders' hardware store in Toronto before the meeting, seeing about a special line, he saw a customer pick up a copy of Hardware and Metal and overheard him ask if they handled horse clipping machines, pointing to the advertisement of the Chicago Flexible Shaft Co., on page 10 of the April 3 issue. The clerk replied that his firm did not stock the line and referred him to two or three stores. "I've been there," replied the customer, "and could not secure one."

Here was Mr. Hambly's chance and he was equal to the occasion. He extolled the merits of the "Stewart No. 1," and advised it as a good machine to buy, following up with the remark that if the customer could not get it elsewhere he could supply one on short notice. The customer was a farmer from out of town and said he wanted the machine at once, so Mr. Hambly took his order at the regular retail price and telephoned his wholesaler to send the machine by express c.o.d. to the purchaser.

Hardware and Metal has frequently urged hardwaremen to go out after business, to canvass the farmers and builders, and thus head off the competition of catalogue and builders' supply houses in the large cities. We have not urged dealers to invade the territories of other hardwaremen, but no one will object to Mr. Hambly's invasion of the mail order houses' home territory, but rather will they recognize his enterprise in making the sale as an example of good salesmanship.

ESTABLISHING A ONE-PRICE TRADE.

A young man who had served a severe and disciplinary apprenticeship as salesman in a store where there was never any deviation in price under any circumstances, purchased a place of his own in a small town, where he soon discovered that he was in advance of his age, as measured by the customs of those about him.

The universal rule of the merchants was to have an asking price and a selling price. The successful clerk was the one who could so average his sales that the goods would bring a figure nearer the top price than the bottom one. It took much haggling; some prevarication, and a lot of time, for salesman and customer to come to a bargain; and then the man who bought, left the store with an unpleasant question in his mind as to whether or not he had secured his goods at a bedrock price.

The new man who entered this field of strife knew nothing of these conditions before he made his venture. But having made it he had the courage to stand for what he knew to be a sound principle, and which he believed would win in the end. He announced a one-price system, with positive declarations that no deviation would be made under any circumstances. The customers smiled, and winked, after the manner of men who had called such bluffs before.

Time after time, the farmer who came in and learned the price of an article of which he was in need, exhausted his powers of argument in favor of a concession, and as the same was not given, took himself and his purchase-money elsewhere. Again and again some good housewife, after the manner of her education in bargaining, endeavored to supply her kitchen and culinary needs at a figure less than the merchant had marked upon his sales ticket. Unable to knock three cents off this article and five off that, she would vacate the store, with the declaration that, as she could do better elsewhere, she would go there and do it.

The young merchant was patient, long-suffering, and argumentative. He explained the basic principles of honorable trade, and set his wisdom and experience against the haggling and bargaining custom from which the community suffered. But it was neither his argument nor experience that won him the fight.

It was because he was right. Because people discovered that they saved money by coming to him Because there is a satisfaction to a buyer to know that he has received as good a price as that given to any one else. When Farmer Jones learned from his boastful neighbor that the latter had paid a dollar less for the same make and size of a plow than Jones paid, it was natural that Jones should feel a sense of disappointment in his heart, and a loss of one good dollar from his pocketbook. Naturally, he was the more inclined to go to a place where but one price prevailed.

It took about a year for the people of the community to waken to the fact that the one-price system was not only reliable, but that both money and time were saved by taking the merchant at his word that he was asking only a fair profit, and that the buyer was paying just what everybody else paid. But a year made a great change.

"I am glad I made the fight," said the merchant in commenting on the facts related above. "I have won my case. No one now asks me to cut a price, and no one tells me how the other fellows are ready to cut. In fact, the other fellows are beginning to do as I do. A sale now is a sale, and not a series of arguments and negations."

SIZE UP EACH CUSTOMER.

The hardware clerk should study every customer. Have good talking points for all your goods, but do not talk too much. Say a few good things and let them sink in. The average customer will ask questions if he wants to know more. There is an occasional customer of course, who hasn't very much of an idea about anything. The clerk can get rid of a great deal of his "canned talk" for that customer's benefit.

It is always well for a clerk to avoid too strong urging of goods upon a customer if he does not seem disposed to buy after having inspected what is shown. Do not make the customer feel that he is committing any crime if he leaves the store without making a purchase. Assure him that you are glod to show goods and that if he doesn't find something he likes better elsewhere to come back.

A salesman's business is to use good judgment in the things he sells. But he should not attempt to influence a customer because of his own personal taste. It is the purchaser who is to be pleased, not the salesman. If a man steps into the store and seems to know pretty well about what he wants, try to give him the exact style or something as nearly like it as you can. It will appeal to a man's vanity if you let him know that you think his idea is good. Give him what he wants unless you are pretty sure he is going to be dissatisfied with the selection he has made.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 74.

MARKETS IN BRIEF.

Montreal.

SPELTER—Now $5.75.
TIN—Firmer.
IRON FINISHED STEEL—Cut of 10c.

Toronto.

LEAD—Advanced 5 cents.
TIN—Up one cent.
STEEL AND IRON SQUARES—Slight advance.
CORRUGATED STEEL HINGES—Declined.
IRON FINISHED STEEL—Lower prices.
LAWN MOWERS—Cutting on U. S. machines.
WRENCHES—Changed prices.

THE METAL SITUATION.

Easter naturally affected the primary markets, but despite the interruption to trading, figures held fairly well with the exception of copper which showed a sagging again. As a matter of fact all the markets are disappointing with the exception of spelter. The demand keeps off, and with speculation quiet the markets are dull and without character. The consumption of tin in New York has improved a little. With regard to copper there is a growing opinion that the larger producing interests are determined to shut the smaller ones down. Smaller consumers are more interested in the market, but the big concerns are still holding off. Prices are sagging a little with the non-support of the English market. Lead still continues to fall away, and the market is reported quiet. Spelter continues remarkably steady in the English market, and has advanced at St. Louis. Supplies are being very firmly held, in the face of a fair demand. The English pig iron and steel markets are showing improvement. The home business is better, while exportation has improved. Makers decline to sell for extended deliveries at to-day's prices. There is a feeling of great disappointment in the States that business in pig iron and steel is not better. Large contracts for rails or structural material are few and far between, but the smaller buyers have increased. Some of the furnaces are however holding out for higher prices, and this with the restriction in the pig iron output should improve the situation.

The Iron Age of April 15, says: The leading interest is expanding its pig iron production, under the stimulus of larger demands from the steel works, the stocks having been reduced to a very small quantity. At the present time 63 per cent. of the furnace capacity is in operation, but this is equivalent to 71 per cent. of the rated capacity a year ago.

Some activity is reported in the lake ore market. Most of the transactions of the past week, amounting to several hundred thousand tons, have been in the nature of allotments of certain ores to furnace companies that have regularly used them, with the understanding that the price is to be adjusted later, when tariff uncertainties are over. In a few cases settlement will be made on the basis of average price for the season.

Steel bars have developed more irregularly, and 1.15c. Pittsburgh has become general, with concessions for attractive business.

Lower prices are being made in the wire industry. The tin plate mills are very busy.

Record breaking production is the disquieting feature of the copper industry. Still, the market during the week has been firm, although inactive, at 12¾c., cash for electrolytic. How much of the exported copper is shipped merely because it can be financed to better advantage abroad is the grave question. The situation does not inspire confidence.

Lead has been advanced to 4.15c., New York, and spelter is firmer at 4.77½c., St. Louis.

The Iron Trade Review of April 15, says: Encouraged by the substantial tonnage in finished material which has been placed on mill books in the past six weeks, iron and steel makers are inclined to look more hopefully upon conditions, and to express the belief that continued improvement is very probable. Compared with March, the manth of heaviest mill orders in finished lines, excepting rails, since the beginning of the depression, April is showing further gains in actual rolling specifications. The fact, however, that the increased tonnage has been drawn out at the expense of prices, is not being overlooked. As the mills are laying the foundation for consistent operations by accumulating orders upon books, they are showing less aggressiveness in naming or meeting favored inside quotations, for which the open market has been offering most favorable opportunities, and are holding more closely to the nominal level.

MONTREAL.

April 16.—Easter had the effect of slackening off trade somewhat, although business improved again towards the end of the week. Despite this however, a fair quantity of metal went into consumption, and jobbers anticipate good increase with the opening of navigation. All metals have been in demand, although perhaps spelter has been the best seller. This, combined with the firm position of the metal in the English and St. Louis markets, has advanced local prices, and spelter is now quoted at $5.75 for ordinary jobbing lots. All the other metals are unchanged. The markets appear a little firmer than they did last week. Quotations in London and New York generally are stronger, and this has influenced the local markets. Inquiries are fair, and consumers are keeping good watch over the development of events. There has been a strong movement in pig iron.

PIG IRON—There is a hopeful tone locally. The demand is improving although consumers are now being compelled to pay somewhat higher prices than they were a few weeks ago. It is understood that Eastern Canadian furnaces, being in receipt of good orders for steel, have practically withdrawn from the pig iron market, the result being a general stiffening in the situation. Heavy sales of imported pig have been made, delivery being booked in some cases up to August. Clarence is in prominent demand at $16.75 to $17 in carload lots f.o.b. Montreal. Good Scotch brands have also been sold in considerable quantity, but these, of course, realized considerably higher figures. The first sailing of imported ore from Glasgow and Middlesboro took place this week. We quote: Middlesboro No. 3, $16.50 to $16.75; Summerlee No. 1, $18.75 to $19; No. 2, $18.25 to $18.50.

TIN—With a firmer tone in the primary markets, tin locally is stronger again, but there is no change in the local quotation of 32½c for ordinary jobbing lots. Inquiries are fair. Orders improved toward the end of the week, and jobbers anticipate a better movement with open water.

COPPER—Although copper showed a sagging tendency again in the primary markets, locally the price of 14c has been held for jobbing lots. Shading for large size lots is being done. Orders have been good, and show a developing tendency. Consumers seem to be getting more interested in the market and the tone generally is brighter than it was.

SPELTER—Good trade combined with a steady English market has advanced the price of spelter locally from $5.50 to $5.75. Inquiries are good, and with the lightness of stocks in consumers' hands heavier business is anticipated.

LEAD—There is no change in the market, lead being quoted at $3.75 and trail at $3.65 for ordinary jobbing lots. The demand continues to improve, and the outlook is more promising.

TORONTO.

April 16.—Again on the up-grade is the metal situation this week, and with few exceptions the metals all partake of splendid orders and sales. Tin has advanced one cent and lead is up five cents. Copper is firmer and iron is unchanged. The past week was one of the best since the opening of the year. Stocks are fairly large. The indications for the future are more than hopeful.

PIG IRON—There has been little increase in the volume of new business this week, and there is a more favorable feeling abroad as to a revival of industries using iron. Prices are unchanged from last week. Canadian foundry is yet $18.50; No. 3 Middleboro, $21 and Cleveland, $22.

COPPER—A firm tone is noted in copper. Demand abroad has increased, and with the lowering of visible stocks, the price went slightly higher in New York. This to a slight extent affected the local market, and while the quotations did not advance, yet a much firmer tendency and strength was added to the conditions of sales here. The market price is yet 14c. Consumers have been buying satisfactorily, though in moderate quantities.

TIN—This metal has advanced a cent and is now quoted at 33c. Trading has been pretty active all the week. There was a fluctuation about the middle of

the week when tin went up and down, but the market recovered itself within a day. Although fair quantities have been received in England, only light lots have come to this side of the ocean, and there was a tightening of the market in consequence.

LEAD—The so-called lead trust across the border having boosted lead prices in the U.S., there was a sympathetic advance quoted locally, and lead is now at $3.90 in Toronto. Very good trading business has been done, although orders have been placed sparingly. Supplies while fair, are not nearly so large as a fortnight or three weeks ago.

SPELTER—This metal is rather quiet this week, no doubt due to the firmer tendency and prospect of higher prices, which have already taken place in outside markets. Spelter all along has shown strength, even when the other metals were dragging somewhat. Now when there is activity in lead, spelter has become easy again.

SHEETS AND PLATES—No apparent change in the market conditions of these two lines. Demand keeps steadily up, and supplies seem able to meet all requirements. Prices are unchanged.

OLD MATERIALS—Heavy copper wire is down ¼c., though the tone of the market is firmer than a week ago. Stocks continue large, though there is no further accumulating. Dealers are paying for heavy copper and wire 11c.; light copper bottoms, 10c.; heavy red brass, 9¾c.; heavy yellow brass, 8¼c.; light brass, 6¾c.; tea lead, 2½c.; heavy lead, 3c.; scrap zinc, 3½c.; No. 1 wrought iron $10; machinery cast scrap, No. 1, $14; stove plate, $12; malleable and steel, $8; old rubbers, 7¼c. to 7½c.

HARDWARE MARKETS

MONTREAL.

April 16.—Spring trade has come in with a sudden rush, as many expected it would, and jobbers are hard set to cope with orders. Every merchant wants his goods at once, and the result is that the shipping departments are working overtime to keep up with the demand. Orders are of an assorted character showing the general lightness of stocks. Reports from travelers are now of a very confident nature. Roads are getting into good shape, while merchants are much more hopeful as to a strong steady consuming demand continuing right through the summer. The North West looks extremely promising. Seeding is already taking place in some districts, and the general feeling is very bright. Some of the lower ports on the St. Lawrence are already doing business and this has helped forward the trade movement.

Builders' hardware, and the usual spring lines are in excellent demand. Wire goods are also moving splendidly. The tone of the markets is firm, and no change is reported in general hardware lines.

A small reduction is announced on iron finished steel of 10c., while the other steel lines are reduced 5c. This reduction is not unexpected, and is due to the cheapness of raw material and to some extent to the low prices obtaining in the States for such goods.

BUILDERS' HARDWARE—A fine spring movement has developed in builders' hardware. With the local permits increasing rapidly, city orders have shown corresponding stimulation. Outside points are improving, but not perhaps so rapidly. We quote door sets and escutcheons, 50 and 10; escutcheon pins, steel, 50; brass, 55. Spring hinges, No. 20, $9 per gross.

SPRING LINES—Rush orders for window cleaners, carpet sweepers, brooms, scrubbing brushes, washing machines, wringers, etc., are swinging in and jobbers are hard psessed to keep up with the movement. Gardening tools, green wire cloth, screen doors and hinges are also feeling the rush. Ice cream freezers, and refrigerators are showing good stimulation. The markets are firm and we quote: Screen doors, stained, $7.80; grained, $8.10; screen hinges, $9 a gross; poultry netting, 60 and 2½; green wire cloth, $1.70 in 100 feet rolls.

MINING SUPPLIES—A strong movement characterises mining supplies, especially in picks and hammers. There is no change in the markets, and we quote: Miners' picks, 17c a pound; prospectors' hammers, 20c; pick handles, $1.85 a dozen; drilling hammers, 6c a pound; crowbars, 3½c; drill steel, 8c.

HARVEST TOOLS—Bookings are somewhat slow, but prospects look very healthy so far as future trade is concerned. We continue to quote: Hay fork pulleys, $1.60 to $8.50 a dozen; hay carriers, hay rakes, etc., 55 off.

BOLTS AND NUTS—A strong demand has developed from all parts of the country. We quote: Discounts on carriage bolts, ¾ and smaller, 70; machine bolts, ⅜ and less, 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

WIRE—The heavy spring movement in wire continues, and jobbers are shipping promptly as orders are mostly rush ones. There is no change in the markets and we quote: Barb wire, car lots and mixed, $2.65; small lots, $2.70; plain, twist, car lots, $2.95; small, $3; plain wire, $2.30 base; barb wire, $2.65 in straight and mixed car lots, and $2.70 in small lots. Galvanized wire No. 9, $2.35 in straight and mixed car lots, and $2.40 small lots, f.o.b. Montreal. Coiled spring fencing, $2.65, straight and mixed car lots, and $2.75 small lots.

BRIGHT WIRE GOODS—Orders have improved this week, especially in screw hooks. We quote: Gate hooks and eyes, and screw hooks at 60 and 20 per cent.; stove pipe eyes, screw eyes, and square hooks, 60 per cent. Wire hat and coat hooks, 40c a gross.

TORONTO.

April 15.—Hardware is again in the turmoil of the rush season. Not only are the cities and larger towns buying extensively, but the country has now entered the lists. The roads are improving and are more passable than was the case some few days ago, and building is showing activity.

Builders' hardware is going out freely, and heavy goods ordered early in the year are being sent forward. Nails are particularly strong. Farming tools and agricultural implements continue to go out in large volume. Spring goods and household utensils are in good demand, and splendid sales of housecleaning articles have been made.

Prices have been changed on some lines, and cutting has been and is indulged in on lawn mowers, some U.S. mowers having been sold as low as 10 per cent. below current quotations. Steel squares, corrugated steel hinges and iron-finished steel for manufacturing purposes are lower. Various makes of wrenches are offered at new figures, below the old quotations in some cases and above in others. Churns are somewhat easier in price.

SPRING LINES—Sales are very good and orders continue to be received for good quantities. Children's garden sets have been very active during the week, and so have lawn mowers, some U. S. makes having been offered at a cut figure, a small-sized price war resulting. Lawn rollers and shears, hose nozzles, reels, couplings and bands, garden tools, barrows and hose and pruning knives, and poultry netting are splendid sellers. Green and black wire cloth have gone forward in large quantities during the past ten days, and demand is becoming brisk for window screens and screen doors. Household articles in tin and enamelware for kitchen use are included in most orders, and housecleaning utensils have been well to the front.

BUILDERS' HARDWARE—One of the particularly pressing lines just now. The country trade has augmented the city business and this week all the jobbing houses had as much as they could do to fill orders. Building tools, too, have received an impetus. Planes, saws, hammers, screw drivers, braces, drills, taps and dies, wrenches, etc., have been frequently asked for. Some price changes have been noted this week in some of the tools and builders' hardware lines. Steel and iron squares are now at 75 and 8 per cent. discount, instead of 75 and 12½. Steel corrugated T hinges are lower; the small size is 72c, was 80c; No. 4, $1, was $1.10; No. 6, $1.30, was $1.40; No. 8, $1.60, was $2.35; No. 10, $2.40, was $3.35. Alligator wrenches have advanced: No. 2 are $3.25 instead of $3.00; No. 3, $6.45, instead of $6.00; No. 4, $9.75, instead of $9.00; No. 5, $14.40, instead of $13.00. Whitman & Barnes' wrenches, Nos. 6 to 12, were 40 and 5 per cent., now 40 and 10.

WIRE GOODS—Brass wire which declined a week ago remains at the low quotation, 60 per cent., and now copper wire is a little easier, 100-lb. lots being offered at a special addition discount of 5 per cent.

SPORTING GOODS—Baseball lines have jumped into demand actively this week, and balls, bats, mitts, etc., are going out with a rush. Guns and ammunition are coming to the front, and lacrosse and football supplies are asked for in a satisfactory manner.

HEAVY GOODS—Nails which have been booked fairly well since beginning of the year, are now going forward in delivery. Screws, too, are decreasing stocks because of demand. Bar iron, stove bolts, etc., are frequently inquired for.

MANUFACTURING STEEL—An easier tendency is noted in the market and

some houses are quoting a reduction from 5 to 10 cents on iron-finished steel lines, notably machinery steel (domestic), tow calk steel, sleigh shoe steel and mild and band steel.

U. S. TARIFF BILL.

The Payne tariff bill, passed by Congress and now before the senate, has had the following important changes suggested in the Aldrich substitute bill before the senate :

	Payne bill	Aldrich bill
Red lead	2⅝c	2⅞c.
Ultramarine wash blue	3¾c.	3c.
Varnishes	25 p.c.	35 p.c.
Vermillion	4½c	5c
White lead	2⅝c	2⅞c
Iron ore	free	25c ton
Whiting	⅛c	¼c
Scrap iron	50c. ton.	$2.50 ton.
Bar iron	4-10c lb.	3-10c. lb
Blooms, billets, etc.	$10 ton	$8 ton
Beams, girders, etc.	3-10c. lb.	4-10c. lb
Iron and steel sheets	45 p.c.	40 p.c.
Polished sheets	1⅜c. lb.	1½c lb.
Steel ingots, etc	10 p.c. 6c lb.	to 20 pc
Steel wol	40 p.c.	11c lb.
Wire (under 4c.)	4-10c. lb.	3-10c lb
Wire (below 16)	1½c lb	1⅝c lb
Axles	1c lb	⅞c lb
Bolts	1¼c lb	1⅜c lb
Cast iron and irons	8-10c lb	½c to 35 pc
Malleable castings	9-10c lb	7-10c lb
Horse shoe calks	1½c lb	$7.50 per M
Spikes and nuts	¼c lb	⅜c lb
Fish hooks	nothing	45 p.c.
Antimony	⅜c lb	1½c lb
Lead dross, etc	1½c lb	2½c lb

HARDWARE TRADE GOSSIP.

Ontario.

D. Cinnamon, Lindsay, has secured the contract to supply the town with Lehigh cement during 1909, the price being $1.25.

J. A. Hossack, sales manager of the Lufkin Rule Company of Canada, Windsor, has been confined to his bed at Toronto, with grippe during the past week.

The Peterboro Hardware Company, Peterboro, have the contract to supply that city with Lakefield cement this year at $1.28½ and expect to handle 15,000 barrels during the year.

Courtright, Ont., will vote on April 19 on a proposition to loan $2,000 to the Courtright Stove Company, a company promoted by Fred C. Wilson, Sarnia, to manufacture stoves and furnaces.

Bradley & Bradley have established a manufacturers' agency at room 108 Peterkin Building, Bay St., Toronto, one of their lines being axes, handles, logging tools, etc., made by H. Walters & Sons, Hull Que.

J. B. Adamson and E. H. Sproule, hardwaremen of Orangeville, trading under the style of Adamson & Sproule, have mutually dissolved partnership. Mr. Sproule has disposed of his interest in the business to Mr. Adamson, who will continue under the name of the Adamson Hardware Co.

T. G. Rice, president of the T. G. Rice Wire Mfg. Co., Toronto, died rather suddenly at his home through a heart affliction on April 7. His grandfather was the first wire manufacturer in Canada. His father followed the same pursuit, and Mr. Rice's own sons make the fourth generation engaged in that industry.

Quebec.

W. G. Charleson, Ottawa, has been on a business trip to Montreal.

A. W. Bullock, of Georgeville, Quebec, has been on a visit to Montreal.

R. A. Smart, of R. H. Smart & Co., Brockville, has been on a visit to Montreal.

Alex. Ramsay, Montreal, has been elected president of the Plate Glass Underwriters' Association.

E. K. Spinney, of Yarmouth, N. S., paid a visit to the Montreal offices of Hardware and Metal.

A. E. Peters, president of the Record Foundry, Moncton, N.B., is visiting the Montreal offices and factory.

J. R. Terrill represented Caverhill, Learmont & Co., Montreal, at the funeral of A. J. Gelineau, at Sorel.

C. Frank R. Taylor, representing Taylor Bros., Carleton Place and Almonte, has been visiting hardware jobbers at Montreal.

Archie Macfarlane, Montreal, has returned from a trip to Vancouver and Winnipeg. Jobbers are extremely satisfied with prospects, and there is generally a confident feeling that the North West will have a good business year. Seeding has already commenced in some places, and harvest prospects look very favorable.

A. J. Gelineau, senior member of the firm of C. Labelle & Co., Sorel and Three Rivers, died on Saturday last after a long illness at the age of 40. Mr. Gelineau was deeply respected by all classes of the community, and his loss will be greatly felt, as he threw himself heartily into all matters affecting the public interest. He was a warm hearted friend of all commercial travelers.

HOW NAILS WERE NAMED.

Several accounts are given of the origin of the terms "sixpenny," "eightpenny," "tenpenny," and so on, as applied to the various sizes of the old-fashioned nails. According to one statement, when nails were made by hand, the penny was taken as a standard of weight, and six were made to equal the weight of a copper penny. Another explanation is that tenpenny nails originally sold for tenpence a hundred, sixpenny nails for sixpence a hundred, and so on, the smaller nails selling for a lower price. Still another explanation is that 1,000 nails of the tenpenny size used to weigh ten pounds, 1,000 of the sixpenny size six pounds, and so on. Of the ordinary sixpenny nails there are eighty to the pound ; of the eightpenny there are fifty ; of the tenpenny, forty-four ; of the twelvepenny, thirty-nine.

According to the preliminary report of the U. S. forest service the production of more than 36,500,000 gallons of turpentine and more than 4,000,000 barrels of rosin, with a valuation of more than $14,000,000 for turpentine and nearly $18,000,000 for the rosin, summarizes the output of the naval stores industry in that country for 1908.

PUZZLE WINDOW AT VANCOUVER.

During a horse show at Vancouver last year a prize of $20 was offered for the most original window display by grocers, hardware and other retail stores, it being won by F. S. Lockett, of the George Hunter Hardware Company, with a "rebus" window, which, he reports, attracted as many as 60 people at one time to the window to study out the intended wording of the many puzzle signs displayed.

The windows were built up in the form of a platform and horse show colors were used for draping. Following are some of the "Horse show pointers in hardware language," shown on the various cards, the words in capitals being in hardware articles from stock :

We do not wish to bore you at AWL, but we believe a great deal HINGES upon the success of Vancouver's first Horse Show. Under the direction of the capable gentlemen who have taken the affair in hand, we feel that everything AUGERS well for the show, and that it will be conducted on a high LEVEL and strictly on the SQUARE.

Our ad-VISE is to obey the RULES and regulations laid down, act on the SQUARE and it will not be necessary to FILE any complaint.

As hardwaremen we believe in good ADZES, and if this is not such, it has at least served to display a few of our STAPLE lines.

It will BRACE you up, to go to the show, hear the music, mix with the crowd and watch the Vancouver BELLS in the BOXES.

Many smart TRAPS will be seen at the Horse Show, and it is the part of wisdom to take the girl you like best to SPOON with. There is no way you could make a GRATER hit.

If a horse BOLTS in the RING, or WRENCHES his leg, don't get PAIL, but go out and take a SHOT of something in a good-sized GLASS.

Beware of PICK pockets. Don't let the HANGERS on HOOK your valuables.

The Horse Show has booked a splendid list of entries, but there will be some old SKATES on exhibition.

The Horse Show will be held in the DRILL Hall, and in order for it to be a complete success all the KNOBS should attend.

Wear swagger hats and horsey clothes, but remember it is a BIT early yet to set the fashion for SPRING SHADES in HOSE. Good taste absolutely governs Horse Show raiment.

As there are no race track events, there will likely be no WRINGERS, except the class we back here, and they always PAN out well.

FORT WILLIAM'S WATER SUPPLY.

March 2.—Your correspondent took advantage of an offer from James Piper, of the Water, Light and Telephone Commission, to visit the work now in progress on the Loch Lomond water supply for the City of Fort William. Mr. Piper, who is the senior member of the hardware firm of J. & T. M. Piper, has served on the commission for several years and has especially identified himself with the Loch Lomond water service, which he will have the satisfaction of seeing inaugurated in June of this year.

The lake, known as Loch Lomond, lies about eight miles from the city, and has an altitude of about 350 feet above the level of the plain on which Fort William is built. The water is the purest possible, and has been pronounced to be perfect for all domestic purposes. The engineering work of bringing this water into town has been done by day labor under the City Engineer, and will involve an expenditure of over $300,000 before it is completed. To bring the water down required a tunnel through the rocky ridge on the north side of the lake 5,000 feet in length, from the mouth of which the water is to be piped down to a reservoir calculated to hold ten hours' supply for the city, and situated at a lower level than the lake itself so as to reduce the pressure on the city mains, and at the same time permit of the tunnel being closed and inspected at any time that it may be necessary. From the reservoir an eighteen-inch iron main brings the water across the lands of the Indian Mission to the bank of the Kaministikwia River, where it is carried across the river by a double series of flanged steel pipes, laid thirty feet below the surface of the water, in a trench excavated for the purpose. Thence the eighteen-inch main is continued to the centre of the city whence the water is distributed.

At Loch Lomond the in-take pipe runs 750 feet out into the lake drawing the water from a depth of over twenty feet and from a clear, clean gravelly bottom. It will be conducted into the tunnel through a 36-inch pipe with flexible joints, by way of a gatehouse with concrete base and granite superstructure, built of granite boulders gathered from the glacial drift along the shore of the lake. For two hundred feet from the gatehouse the tunnel is lined with concrete, after which the nature of the rock is such that no lining will be required.

The tunnel, 5,000 feet in length, is the portion of the work upon which interest is mostly concentrated at present. Of the total length there now remains a strip less than 500 feet long, and at the breast of one drift one can now hear the air drills in the other drift at work, the sound being like the distant chugging of a gasoline launch. The drilling is being done by Rand air drills, driven by a Rand compressor, at a pressure of 80 pounds, the machinery being all driven by electricity conveyed across from the city power station. For about 800 feet at either end of the tunnel the drilling was easy, and as much as 200 feet per month was driven, but as the tunnel approached the centre of the hill the rock changed from a volcanic slate, formed by the compression of volcanic ash beds, to a hard trap formation in which progress was cut down to almost one-fifth of what it had been. Here it sometimes takes five new drills to start a hole, and after it is started a drill is worn out every six inches. At the time of our visit a new process of tempering was just being tried with a view to lengthening the life of the drills. The whole tunnel is lighted by electric lamps, and arc lights are installed at the outside workings.

At the commencement of the enterprise the design was to convey the water from the reservoir to the river bank in wooden pipes built in British Columbia, but they proved very unsatisfactory and the experiment resulted in a lawsuit between the company supplying them and the city, in which the city has proved the winner. Since then the pipe line has been relaid with cast iron eighteen-inch pipe, supplied by the local branch factory of the Canadian Iron & Foundry Co. These pipe are giving great satisfaction, and it is extremely gratifying to be using material of local manufacture for the city work, on a scheme as extensive as the one now under way.

Until the work is visited personally it is hard to form a true conception of the big problems involved in carrying this water through the tunnel and across such a distance of broken and rocky country, and the success with which it has been so far accomplished will reflect great credit on City Engineer Hancock, who has designed and carried it through.

When the connection is made the area of Loch Lomond will supply water sufficient for a city of 100,000 people for two years, without allowing for any inflow or rainfall. Added to this, the damming of the outlet of the lake at Carp River, can be made to raise the water of the lake an additional six feet, giving three times the amount of water in storage.—F. T. L.

RAILWAY DEVELOPMENTS.

The Great Northern will enter Winnipeg this season.

The Montreal Street Railway contemplates making several extensions to its lines.

The Toronto Railway Co. will lay heavier rails on some of its routes this season.

Residents of Ladner have asked the B. C. electric road for a more direct route to Vancouver.

The C.N.R. have a force of men building the big approaches to the traffic part of the bridge on the north side of the river at Prince Albert.

The Hamilton Street Railway Company has made formal application for permission to start the work of laying the new tracks on James Street, that city.

Extensive improvements will be made this summer to the Duluth extension of the C.N.R. Among other changes to be made, the track will be re-tied and ballasted and put in good shape generally. The bridges will also be repaired.

Grading on the Alberni branch of the E. & N. railway between Nanaimo and French Creek, B.C., is about completed. It is expected that the rails on this section will be laid before the end of June, when train service will be inaugurated.

Cobourg town council has granted the request of the Provincial Steel Company to construct a line of railway from its plant to the lake front. The Cobourg, Port Hope and Havelock Electric Railway Companies have also been granted franchises to enter that town.

A new lease was given the Toronto Suburban Railway. It proposes to continue its line at present built to Weston, up to Brampton and along through Peel, Wentworth and Welland Counties, to Port Colborne. It also proposes to continue its line at present built as far as Lambton Mills along to Hamilton, and on through Wentworth and Lincoln Counties to Niagara Falls.

The Cobalt Range Railway Co.'s bill was reported by the Commons Railway Committee. The company is authorized to construct the following lines: From Haileybury to Elk Lake via Bucke, Firstbrook, Barr or Hudson, Lundy, Auld, Cane or Henwood Barber, Tudhope or Bryce and James, thence to Gow Ganda Lake. From Ville Marie, Que., to Opasilica Lake, and thence to the N.T.R.

STOVES IN THE WINDOW.

In the show window set up a base burner and run a pipe from it to the wall and arrange a cosy parlor scene. Put a cat in the window to make the place look homelike. Animals in a show window are very attractive at any time. A dealer in the West set up a base burner last fall in the show window, strewed some oak leaves and acorns about it, decorated with oak leaves, and turned three or four squirrels loose in the window. There was a crowd about the window nearly all day long, and the display was the talk of the town.

Set a base burner about the centre of the window. Get long strips of red, white and blue ribbon and run them from the legs, foot rails, wings, urn, etc., to the window, hanging on the ends of ribbons a small card calling attention to certain features.

SITUATION WANTED.

HARDWARE SALESMAN desires position in retail business; 3 years' experience; both languages. West preferred. Box 13, HARDWARE AND METAL, Montreal. (18)

Quebec and Maritime

Glass Import Orders Being Received at St. John—New Hardware Store Opened at Halifax.

HALIFAX.

April 12.—The hardwaremen are now busy filling spring orders, a general improvement being noted in business with the opening of the season and the better condition of the roads. Prices are fairly steady throughout the list and collections are about an average.

Building operations promise to be brisk again in Halifax this season, and work has already been started on several large contracts. The Nova Scotia Government has just awarded the contract to Longard Bros. for the heating of the Technical College at Halifax.

Morton & Cragg opened their new hardware store on Barrington St., on Saturday. The store is well stocked and as the proprietors are both popular young men, they will no doubt receive a good share of the public patronage.

The lumber industry is booming and all the mills are busy cutting the logs. In some districts the cut promises to be heavy. Clark Bros., who have been operating at Bear River, will cut in the vicinity of four million feet. Large shipments are now going forward to European ports.

The new Burrill-Johnson Iron Company's buildings at Yarmouth, will be of brick and they will be equipped with the most modern machinery. Providing that the company secures certain concessions from the town they will engage in steel shipbuilding on an extensive scale. The company ask to have their rate of assessment fixed at a sum not more than $20 000, free water, and a free site for their shipbuilding plant.

A steamer which arrived here yesterday from Mexican ports had 5,600 bales of sisal for Upper Canada. The same steamer also brought a large quantity of asphalt.

W. Home, representing the firm of Berry Bros., varnish manufacturers, Walkerville, spent the Easter holidays with friends in Truro, N.S.

ST. JOHN.

April 13.—The Frank B. Gilbreth Co., of New York, which has the contract for the building of the big power development at Grand Falls, N.B., for the Grand Falls Power Co., has awarded a contract to the William G. Hartramft Cement Company, of Montreal, for 60,000 barrels of cement, the price being in the vicinity of $100,000. This order covers the entire cement requirements for the work. Good progress is being made in the erection of the preliminary plant at Grand Falls.

The spring business is reported very good. The wholesale houses are busy rushing out orders and getting in new stock. Shipments of glass were rereived during the past week or so from the C.P.R. direct steamers from Antwerp. The retailers report a brisk demand for all kinds of housecleaning materials, such as brooms, brushes, mops, paints, etc. It is expected that as soon as the river opens, which will probably be in about a week or two at the latest an impetus will be given to trade.

R. W. W. Frink, D. J. Purdy, James R. Ferguson, Joseph Court, H. R. McLellan, Clarence H. Ferguson, Harold Climo, C. W. Brennan and George H. Waring, of St. John, and John A. Calhoun, of Savannah, Ga., are applying to the Provincial Government for incorporation as the Maritime Engine Company. The object and purposes of the company as set forth in the application are to construct, rebuild and repair engines driven by gas, compressed air or other motor fluid, and boats. They will place on the market the Strickland-Mowry engine. The capital stock of the company is $125,000.

The Bank of New Brunswick, which a couple of years ago built a branch office in the north end of the city and is now completing a branch in the west end, has purchased a site on Charlotte St. in the uptown district, and will build a branch there. These branches are of a similar design, being built of sandstone and are very attractive looking structures. Work on the new building will be commenced in May and when completed the bank will have four offices in this city. W. E. H.

Ontario Trade News

Smith's Falls Growing Rapidly—Brantford Store Opens New Department—Leamington Stove Manufacturers Secure Good Contract—Hardwaremen Encouraging a Revival in Bicycle-riding.

SMITH'S FALLS.

April 12.—The assessment roll for 1909 is $1,724,007, with a population of 5,812. Steps are being taken by the council to annex a part of Atironto, a suburb, which will bring the population over the 6,000 mark.

Last year 46 houses were erected and prospects for 1909 are still brighter and hardwaremen and plumbers are enthusiastic about the outlook. Last fall 140 men were moved by the C.P.R. from Carleton Place to Smith's Falls. Many of these men have families and are anxious to move them to Smith's Falls as soon as accommodation can be secured. Besides a number of private residences many houses for rent are talked of, to take care of the added population. Several houses are ready having foundations excavated for them.

The annual meeting of the Frost & Wood Co. was held recently when Senator Francis T. Frost was elected president and Charles B. Frost vice-president. The company have now over 500 men on the roll and the shops are running until nine o'clock each night. This is found necessary to take care of the increased business. Among their orders is one for 3,000 mowers from Europe.

The Smith's Falls Malleable Castings Co. opened their new foundry on Monday, April 12. The old one is working to its capacity and cannot conveniently handle the present business. This foundry was acquired about two years ago, but owing to the slump of 1907 this foundry was closed. It is now found necessary to open it and the two will be run to their capacity, giving employment to about 150 more hands.

The water commissioners have paid to the town treasurer $1,500, the surplus for the first quarter of 1909 on the municipal waterworks. G. C. K.

HAMILTON.

April 13.—The most important topic in hardware circles this week is the sudden abandonment of the scheme to erect a large hardware store building by the Mills Hardware Company on South John Street. The proposition fell through last night as the result of the T.H. & B. Railway Company purchasing the site on which the proposed building was in the course of erection for the object, it is proposed, of building a large union station. So far there is no intention on the part of the company of resurrecting the scheme and it looks as though what it was felt would prove an important experiment, would not be carried out. The idea was to cater more directly to the large farmer trade which is obtainable from that location and to extend the business section of the city. As the deal with the railway company was put through in a little over two days and as it was such a surprise to the Mills interests the company has so far not had time to decide whether the proposition will be carried out on another site or not. It is understood the hardware firm got a good price for the property.

However the purchase of the property by the railway company is a source of satisfaction to the populace generally as it is taken as a positive intimation from the company that it intends building a new station. It is believed that the T. H. & B. in conjunction with the C.P.R., Southern Ontario Pacific, the Canadian Northern and possibly the Grand Trunk,

will enter into a scheme to erect a handsome big station extending over several blocks. The property is a block and a half east of the present station and on the opposite side of the street.

The Ontario Lantern Company was a severe loser by the big storm of last week. The wind carried away the roof of a new addition which was in the course of erection. The accident will not interfere with the firm's business.

Wood-Vallance and Company secured the contract from the city for supplying 800 feet of six inch wrought iron pipe for the connection between the city sewer and that on the mountain.

J. W. Jamieson, office manager of Bowes, Jamieson and Company, has severed his connection with the company and will likely go into business for himself. D. L.

LONDON.

April 13.—A brisk demand for gardening tools and builders' supplies is keeping hardwaremen busy and dealers generally look for a continuance of business activity throughout the season.

"McClary's Wireless,' 'is the name of a monthly publication, the first issue of which has just appeared. It is published by the company whose name it bears; is edited by Austin A. Briggs, the company's advertising manager, and consists of 16 pages 6x9 inches. It contains, in addition to much trade news, bright and breezy articles and squibs by the editor and others, and taken altogether, the publication is most creditable.

The building occupied by the Purdom Hardware Company, on Dundas St. suffered severely during the storm of last week, a portion of the front being blown out. The stock, however, escaped damage, and the firm were able to continue business without interruption. The damage is being repaired.

R. S. Wilson, for several years head of the purchasing department of the McClary Manufacturing Company, and who recently retired from the company's service in order to engage in business in Vancouver, was last week presented by the office staff with a handsome china cabinet. A nicely-worded address was read by F. Irwin, the sales manager, and in reply Mr. Wilson made a neat speech, in the course of which, he spoke of the many friendships he had made during his twenty-three years' connection with the McClary company. F. T. Y.

BRANTFORD.

April 13.—At a splendidly attended meeting of the Retail Merchants' Association of this city, held last evening, at which the hardware and allied merchants were well represented, D. A. Scroggie, official debt collector for the Guelph Retail Merchants' Association, spoke on the system of overcoming the "dead beats" and paying up of old debts, hitherto called: "bad debts," as in force in the Royal City. He pointed out the merits of the system and the great advantages which have accrued to the merchants interested by the system. The cost was but slight when compared to the advantages, as it was distributed according to the amount of bad debts for each merchant or the size of his business. The Brantford merchants, after some discussion, expressed themselves as being in favor of a cash basis for their business, but they felt it was impossible to do this, and accordingly an executive committee was appointed to complete details for the establishment of the system here. In speaking with some of the merchants who were present, your correspondent learned that the point which was thought by the local retailers to be the greatest value was the "black list," so-called, by which chronic credit-seekers became known to each and every merchant. This feature will be pushed locally, it is expected.

A small fire occurred at the Scarfe Varnish Works on Tuesday morning. The damage was small and covered by insurance.

A handsome new department has been added to the already spacious store of Turnbull & Cutcliffe, hardware and stove merchants, Colborne and King Streets. The second storey has been entirely re-arranged, and in future will be devoted to kitchen, dairy and laundry utensils. A complete range of these articles has been added to the stock, and it is now one of the finest in the city. A large new stairway has been erected in the front of the store, to give access to the new department. A. W.

CHATHAM.

April 13.—The Easter week trade is on all sides reported to have been excellent, and the spring and summer outlook is exceedingly bright. Farmers, on whom the prosperity of local hardware men largely depends, are well ahead with their plowing and seeding and wheat is reported as looking good. The optimistic outlook has a natural tendency to loosen the farmer's purse strings.

Hardwaremen are giving considerable attention to bicycles this spring. The trade seems to be a slow but steady one. The collapse of the bicycle craze some years ago flooded the market with second hand wheels, in addition to which the bicycle and repair trades were allowed to drift out of the hands of regular hardwaremen. Westman Bros. and Stephens & Douglas are both handling bicycles, and have recently put on window displays.

The fact that the Chatham Wagon Co. has practically decided to double the capacity of its present factory is taken as an encouraging sign of industrial recuperation. Tenders have been asked, and the contracts will probably be let this week. T. J. Rutley is the architect. A two storey building 200 by 56 feet is contemplated. The present capacity is 4,000 wagons and sleighs yearly, but with the building of the new addition and the installation of new machinery the company will discontinue the manufacture of sleighs, and devote its sole attention to wagons, the output of which will be increased to 8,000 a year.

An important deal recently took place whereby the East Tilbury Canada Oil Fields, an English concern, took over about a dozen oil properties. A big movement toward the development of the field is anticipated. Last Wednesday's big storm wrecked probably 50 derricks, involving a loss approximating $15,000.

Dresden will submit a by-law to the ratepayers authorizing the expenditure of $20,000 on a new public school.

Jas. Brown, who formerly conducted a hardware business in Thamesville later run by Graves & Sims, has started a hardware business in Kincardine.

Frank Jones has joined the hardware staff of W. H. Goodhue & Co., Ridgetown.

J. G. Crosby, the Highgate hardwareman, has completed a contract for the plumbing and furnace for Alfred Spencer's residence at Ridgetown.

The Chatham Gas Co. is carrying on an energetic campaign with a view toward extending the use of electric light and electric irons, considerable newspaper space being devoted to well written "readers."

Gammage & Co., Ridgetown, are pushing the bicycle and auto business hard, using considerable newspaper space. They have a full line of new bicycles and accessories, and report quite a few auto sales.

Reissner Bros., Leamington, are making good progress with the manufacture of their new steel range, having just closed a contract to supply the Northwest with $2,000 worth a month, with prospects for an increase. They intend to build a new factory and are now looking for a suitable site.

Industrial building is looking up. In addition to the Chatham Wagon Co. extension here, there is to be a new flour mill built at Dresden this year. The St. Thomas Canning Co. also purpose establishing a branch factory at Ridgetown this summer.

The Dresden basket factory, which hitherto has carried on operations in the Hicks block, has been compelled to move into larger premises near the Mahler evaporator, the company having been rushed with orders.

Alex Voissard, the Wallaceburg bicycle dealer, is stimulating interest in the bicycle business by offering a fine silver cup as a trophy in a series of bicycle races to be held as soon as the condition of the track permits.

The Sydenham Glass factory at Wallaceburg was visited at an early hour this morning by a disastrous fire, in which nearly the entire plant was destroyed. The office, flint house, box factory and the new building in course of construction were the only portions saved, some ten buildings being burned to the ground. Manager T. B. Dundas estimates the loss at $125,000, which is understood to be entirely covered by insurance. V. L.

GAS APPLIANCES WANTED.

Siege Social & Ateliers de Construction, 106 and 108 Rue de Lourmel, Paris, France, write Hardware and Metal stating that their company owns 36 gas works in France and desiring to increase the consumption are in search of all appliances for lighting, heating or other domestic or industrial purposes. They ask for particulars and price lists from any Canadian firms who wish to introduce their goods in France.

The Prairie Provinces

Many New Railway Branches—Grand Trunk Pacific Nearing Edmonton—Building Trade Active—Bright Prospects for Winnipeg Retail Hardware Association.

WINNIPEG.

April 11.—The busiest office in the city is that of the building inspector and from new construction work already in sight it looks as if the year would be a record one. The buildings planned or commenced on Portage Avenue alone will pass the three million dollar mark, this including the twelve-storey block for the Grand Trunk Pacific. The local agents of Lord Northcliffe, who already is heavily interested in Winnipeg property, have received $625,000 from the millionaire publisher for investment.

F. W. Cardno, who has been engaged in the retail department of the J. H. Ashdown Hardware Company in the city for the past four years, left on April 2 for British Columbia, where he will occupy a more responsible position in the Nelson branch of the same company.

Mackenzie Johnson, late of Miller-Morse hardware department, has left on a trip to attend the World's Fair at Seattle before returning to his home in Montreal.

The retail hardware merchants of the city should be congratulated upon the splendid spirit which prevails among them. They are, at the present time, perhaps the most enthusiastic association in the city, and their energy is not all exerted along the line of conservation of prices. This is, of course, a part of their concern, but it is by no means the most important part.

No organization can be formed to compel each member to abide by any rigid rules that might be scheduled. But when an association is formed to cultivate a spirit of brotherhood half the purpose of the organization has been realized. One member of the association put the idea of the association in a nut-shell when he said: "It does not matter what line of business a man is pursuing, if you get his heart you have him all the way. and if the retail merchants meet as an association of friends and brothers in business all the petty differences which so often arise in business will melt away as dew before the morning sun.

The good fellowship feeling among the members runs high and at the meeting of the association to take place on the evening of April 12 this side of the association's life will be emphasized in a way that it has never been before.

The J. H. Ashdown retail department are making some large alterations in their store. The sporting goods department of the business has been growing so rapidly this past few years that their old space has become too small to make a satisfactory display of the stock, consequently this stock is being moved to the second floor, where some 600 square feet more will be used by the department. To make the change t' silverware department is to be moved downstairs where a seven-section mahogany case, 60 feet long, will be built along the wall to contain these attractive goods. The sporting goods trade is heavy in this store. The skate trade during the past winter has exceeded any other season's trade in this line. Footballs and outfits as well as baseball outfits are the order of the day.

James A. Boyd, western traveler for the Imperial Oil Co., of Winnipeg, is in the city over the holidays. Mr. Boyd has been in the oil business for about eight years, being formerly manager for the British Petroleum Company's branch in Belfast. The products which he represents for the Imperial Oil Co. are refined oils, lubricating oils, greases, wax goods and lighting, heating and cooking oil lamps. He reports business much livelier than one year ago.

Wilkinson Kompass & Hawkey Co., Limited, of Hamilton, Ontario, have opened a wholesale carriage hardware business in this city. H. R. Hawkev who was at one time a buyer for D. Ackland & Son, of Winnipeg, is manager of the new concern, and L. T. Pemberton, formerly manager of the Sterling Bank, Toronto, is secretary-treasurer. They are capitalized at $40,000, and they are very optimistic regarding the future of the business in Western Canada.

A. H.

EDMONTON.

April 10.—Trade has been fairly active during the past two weeks, the principal demand being for enameled ware, galvanized pails churns, poultry netting, clevises, hoes, rakes bluestone, etc.

The Canadian Northern Railway have already started work on branch lines in this district, on which the Provincial Government are guaranteeing the bonds. One branch will run from Vegreville on the main line of the C.N.R. to Calgary, another is the completion of the branch from Edmonton, north to Athabasca Landing. The latter will place Edmonton in direct communication with the waterways of the northern part of the province.

Building operations in the city are in full swing. Permits already taken out are far in excess of last year.

Work has been going on steadily at the Parliament Buildings, and also the Post Office. It is expected the latter building will be completed in June. Work has started on Hallier and Aldridge's new warehouse, which will cost $35,000. Pheasey & Batson have been awarded the contract for the Edmonton Iron Works new building, contract price $35,000. The same firm have also secured contract for Dr. McLean's business block valued at $35,000. Work has started on the John Kelly block contract price $30,000.

An event of importance to Edmonton, will be the arrival of the Grand Trunk Pacific. The steel is now less than one hundred miles away. It is expected that the line will reach Edmonton early in June .

E. Brosseau, Brosseauville, is in the city for a few days.

Jack McMullen, an old Toronto boy, is now covering part of the C.P.R. between Edmonton and Calgary for Ross Bros., Limited. J. H. H.

British Columbia.

League Formed to Promote the Development of Vancouver Island—Business Transfer at Vancouver—Large Imports of Tin for Salmon Canneries.

VANCOUVER.

April 10.—With the opening of the fine weather, the Board of Works is getting busy with its pavement, and at its meeting on Tuesday evening passed the recommendations of the engineer for wood block paving on Seymour, Richards, Homer, Howe, Dunsmuir and Harris streets, the total approximate cost of which is $71,000. Wood block is the favorite pavement here, as it has stood the test of time. In laying the Cordova street extension of the street railway, which runs a block on Granville street, the wood block pavement that was laid there sixteen years ago was torn up in the centre of the street. This block is the most travelled in the city, being the only thoroughfare to and from the C.P.R. depot and steamers, yet with all this traffic, the blocks are as good as when they were put down, with the exception of showing wear on top. The cement foundation was also in very good condition, requiring hard work to tear it up.

Nelson street was the first street in residential district to be paved with asphalt, and it has stood very well there. At present, Frederick Beckett is here from Toronto and in the interests of the Barber Asphalt Company is endeavoring to secure petitions for the paving of other streets in the west end.

The Water Committee will advertise shortly for tenders for the supply of four miles of six and eight inch cast iron pipe.

Nearly two million and a half dollars' worth of steel construction buildings are going up at present, indicating the substantial character of the city's progress. Those on which work is proceeding are: The Winch building adjoining the new post office, $380,000; Bauer & Harrison hotel, immediately opposite, $200,000; new post office, $450,000; Mercantile building, $180,000; Arcade structure, $500,000; Carter-Cotton building, $225,000; Exchange Building, $75,000; Crowe & Wilson building, $50,000; P. Burns & Co., building, $25,000; B. C. Electric Railway Company's new offices, $250,000. This does not take in the new court house, which will involve an expenditure of half a million, as it is located three or four blocks from the others, which are included in the strict down town area, and all are within a

few blocks of each other. The court house building is of stone and iron, and is now up to the second story.

As an instance of the trade into this port, shipments by the Blue Funnel liner Oanfa, now unloading at Evans, Coleman & Evans' wharf, might be mentioned. On the manifest are 3588 ingots of pig tin, worth $105,560; 49,924 boxes tin plate, worth $250,000; 720 slabs of tin and 244 pieces of pig lead.

Mr. Patterson, who for some time held a position in Henry Humphrey's store, has purchased from F. F. Furse, the hardware business on Ninth Avenue, at at the corner of Grenville street. The business was established about a year ago by Dorward and Furse.

J. G. Martin is on a visit to the Okanagan. Mr. Martin for a number of years was connected with the pioncer hardware firm of Martin Bros., Vernon.

C. T. Rolston, of the staff of Tisdall's sporting goods store, has returned from the east. He spent two months in the New England states visiting the plants of manufacturers, whose goods are handled by Mr. Tisdall, to familiarise himself with the processes.

Miss B. Dunn, daughter of Thomas Dunn, manager of the Prince Rupert Hardware Company, and an old resident of Vancouver, has come to the hospital here suffering from appendicitis.

NELSON.

April 10.—Sam. J. Gorman, the new vice-president and managing director of the Canadian Marble Works, of this city, has returned from a trip to the east, and when away inspected the principal marble quarries in the States. He is very much pleased with his purchase of the quarries at Lardo. It is the intention of the new owners to immediately establish a large sawing and finishing plant at the quarry from where shipments will be made to all parts of Canada. It is the intention to retire from the retail monumental business entirely, and to devote their efforts to the requirements of the building trade both for interior and exterior work. The company, will, however, continue in the wholesale monumental business and expects to be able to ship as far east as Toronto and Montreal. The new plant will be in operation in a couple of months, and already the company has been asked to quote estimates for material for several large buildings, some as far away as Winnipeg. There is every assurance of a good business.

VICTORIA.

April 8.—Trade for the past week has been very good in most lines of hardware, more especially builders', most of the hardware houses reporting a good steady demand. Local wholesale stores are very busy filling outside orders, the shipping departments having to work overtime to get the goods out, which speaks well for the trade on outside points.

Things are looking good for the development of Vancouver Island. With a strong and enthusiastic development league just formed, and reports coming in of industrial activity from all points, there are good things in sight. At Nanaimo a large amount of building is being done. At Comox, the lumber mill has to install new machinery, which will double the capacity of the mill, to meet the growing trade. A new wharf is to be built for the town at Union Bay. At Quatsino a new hotel is to be built. About $8,000 will be spent on the structure. The advancement of the district fully warrants the erection of the new hotel.

W. B. C.

Hardware Letter Box

Any questions on trade subjects will be answered by the editor in this department. Do you want any address, any special line of goods, anything relating to the hardware trade? Ask us. Letters from manufacturers, jobbers, travelers, retailers or clerks are solicited. Suggestions for trade improvement or discussions on trade evils are invited.

Fruit Jar Wrench. — Emerson & Fisher, St. John, ask for the name of a manufacturer of a satisfactory fruit jar wrench, adjustable, to fit all sized jars.

We have been unable to learn of a satisfactory wrench for this purpose.—Editor.

Sheet Aluminum. — Stevens-Hepner Company, Port Elgin, Ont.. ask where thin sheet aluminum can be obtained.

From the Aluminum Company of America (formerly the Pittsburg Reduction Company), Pittsburg, Pa.—Editor.

Car Ticket Holder.—The Novelty Mfg. Company, Hamilton, ask what firm in Toronto makes or sells a small pocket car ticket holder ejecting one ticket at a time.

The Aikenhead Hardware Company, Temperance St., Toronto.—Editor.

Iron Stakes.—G. D. Dahmer, Conestogo, Ont., asks where iron stakes for wire fences can be obtained.

The Dennis Wire & Iron Company, London; Canada Foundry Co., Toronto; Owen Sound Wire Fence Company, Owen Sound; Banwell-Hoxie Wire Fence Co., Hamilton; and the Page Wire Fence Co., Walkerville.—Editor.

Feet for Jardinieres.—J. H. Worsell & Son, Goderich, ask where they can buy feet for making old brass kettles into jardinieres.

Fletcher Manufacturing Company, 442 Yonge St., Toronto.—Editor.

Geo. D. Dahmer, Conestogo, Ont., asks where he can procure iron stakes for wire fences.

The Page Wire Fence Co., Toronto, are makers of these stakes and other supplies.—Editor.

ADULTERATED TURPENTINE.

Another Ontario hardwareman has written Hardware and Metal that he has been sold turpentine by an American firm which painters claim is not pure. The name of the firm he gives is the same as the one referred to in recent issues of Hardware and Metal, and an analysis of whose product was given in Hardware and Metal of April 10. An analysis can be secured from the Department of Inland Revenue, Ottawa, for $5. One firm has refused to pay for the adulterated turp and others may follow suit.

TO ERECT LARGE SHOT TOWER.

The Canada Metal Company, Toronto, have purchased from Somerville, Limited, Toronto, the shot tower and machinery located at the works on Richmond street east, and will remove the plant to their new factory site near the Exhibition grounds. A tower 200 feet high, the largest in Canada, will be erected and the machinery will be brought thoroughly up-to-date in order to produce a superior quality of shot.

While it is understood that loaded shells are replacing shot as an article for sale in hardware stores, Mr. Harris, junior, of the Canada Metal Company, states that his company are making plans which will make them an important factor in the shot trade.

One large building has already been built on the new site and, in addition to the shot tower, the company will erect other buildings there during 1909.

WAITING FOR THE FREIGHT.

By A. S. Corey.

At a lone and dreary station
Of a little country town
That lies dreaming on the mountains
While the sleepy sun goes down,
I am sitting in the twilight
Writing you this little song;
Waiting, waiting, idly waiting
For the freight to come along.

One by one, far up above me,
Little stars begin to glow—
Soft night winds are gently rising
Whispering so sweet and low—
As if bringing me a message
From the lips I know of late,
Just a tender thought to cheer me
While I'm waiting for the freight.

And I think how many thousands
Fellow travelers on the road,
Like myself are sad and lonely,
Bearing manfully their load,
Far away from those who love them,
Toiling early, toiling late,
And my heart goes out to greet them
While I'm waiting for the freight.

A despatch from Grand Forks, N.D., states that D. W. Hines, of Hannah, contemplates the construction of a line from Duluth to Hudson's Bay, by way of Regina. It is stated that the Canadian Government will grant assistance. Application will shortly be made for a charter.

THROW A SPRAT TO CATCH A MACKEREL

You can't fish without good bait.

It's not the cost of the bait, but the knowledge of just what bait to use to catch the kind of fish you are after.

A want ad. in HARDWARE AND METAL is the right kind of bait to use when you have any proposition of interest to Hardware, Stove and Tinware dealers, clerks or travellers.

The cost of advertisement will be very small compared with the results you will secure. 25c. or 50c. per insertion will pay for a want ad. which may prove worth dollars to you.

Every day you delay you are handicapping your business.

If it is a set of tinner's tools you have to sell, why not get them out of the way and get the money for them which you can use in your business?

If you want to sell your business, let the men know about it who would be interested in buying it, and you will realize a higher price than if you only negotiate with two or three people.

If your proposition has anything to do with the hardware trade, try a Want Ad. in HARDWARE AND METAL. Address our nearest office.

HARDWARE AND METAL

MONTREAL: 232 McGill Street TORONTO: 10 Front St. East

WINNIPEG: 511 Union Bank Building

CONDENSED OR "WANT" ADVERTISEMENTS.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost **must** accompany all advertisements. **In no case** can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

AGENCIES WANTED

A TRAVELER, calling upon the stove, tin and hardware trade, wants one or two side lines. Well posted in metals. Address Box 824, HARDWARE AND METAL, Toronto. (17)

ARTICLES FOR SALE.

Don't keep any fixtures or tools around your store for which you have no further use. They are worth more to-day than they will a year hence. Don't keep money tied up which you could use to secure discounts from your wholesaler.

ADDING TYPEWRITERS write, add or subtract in one operation. Elliott Fisher, Limited, 129 Bay Street, Toronto.

MISCELLANEOUS

A MARKET OF BUYERS, backed up by money to spend, is open to you in the Busy Man's Magazine. Every territory in Canada is represented. If you have something to sell, want to buy something, a condensed advertisement in the Busy Man's Magazine will put you in touch with the classes you wish to reach. Four cents per word will carry your message from Atlantic to Pacific. Send copy of your advertisement along with order to cover cost of insertion before 10th of month preceding date of publication. Your announcement will appear under a special heading. BUSY MAN'S MAGAZINE, Montreal, Toronto, Winnipeg.

HIGH CLASS COLOR WORK; Commercial Stationery, Posters. The Hough Lithographing Co. Limited, Office—No. 3 Jarvis St., Toronto, Telephone, Main 1576. Art, Good Workmanship; Business Methods.

IF YOU are looking for a side line to add to your business there is none better than COLUMBIA GRAPHOPHONES. Double Disc Records (which means two records for a single price) and Indestructible Records (that will not break or wear out no matter how much you abuse them). The Columbia Phonograph Company is the only firm that manufactures both Disc and Cylinder Machines and Records, therefore, a Columbia dealer has the advantage over all others, as he can furnish his customers with what they want, while his competitor has to sell them what he has or lose the sale, which he generally does where there is a Columbia dealer. Are Columbia goods sold in your town? If not, why not? Do you want the exclusive agency? (remember exclusive). You had better write to-day or someone else in your town will read this advertisement and beat you to it. A postal will bring catalogues and full information free. Write to-day. Do it now. Toronto Phonograph Company, Limited, Exclusive Columbia Jobbers, 40 Melinda St., Toronto, Canada.

NOTICE—Users of Pitner Gasoline Lamps are warned against being induced to purchase parts of other makes of lamps to be used on the Pitner. The most vital part of any lamp is its generator, and the Pitner generator has been granted a patent in Canada, the United States and other countries, on the principle of its improved method of generating gasoline vapour. Supplies and parts for the Pitner lamps can be received by return mail by applying to our representatives or direct to THE PITNER LIGHTING CO., Limited, 36-38 Lombard St., Toronto, Ontario.

AN EXTRA 1 PER CENT.—A National Cash Register will earn at least an extra one per cent profit for any retail merchant. The National Cash Register Co., F. E. Mutton, Canadian Manager, cor. Yonge Street and Wilton Avenue, Toronto, Ont.

Western Canada Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected by Telegraph up to Noon on Friday.

Winnipeg Hardware Markets.

The local stores have all the goods of the season on display but that is as far as they get. The past week has been quiet even in those lines that would naturally be in demand. The season is opening up almost as slowly as that of two years ago and although there were a few good promises some weeks ago yet the season is a backward one. The beginning of almost all the building in the city is to take place yet and the hardware goods for this line of activity have not been moving. The whole west is suffering from the continued unfavorable weather and the seeding time will be late in some quarters.

It was expected that a decline would take place in the price of nails but that has been postponed. We quote the following unchanged prices.

Price Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.90 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base; plain galvanized, wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

POULTRY NETTING—57½ per cent.

HORSESHOES — "MRM" and "Bell" iron. No. 0 to 1, $4.50; No. 2 and larger, $4.25; snowshoes, No. 0 to No. 1, $4.75; No. 2 and larger, $4.50; steel, No. 0 to No. 1, $4.85; No. 2 and larger, $4.60; featherweight, $6.

HORSENAILS—"MRM," cold process—No. 3, $4.30; 4, $3.80; 5, $3.55; 6, $3.30; 7, $3.05; 8, $2.85; 9, $2.75; 10, 11 and 12, $2.65 in 25-lb. boxes.

WIRE NAILS—$2.70 Winnipeg, and $2.25 Fort William.

CUT NAILS—$2.90 per keg base.

PRESSED SPIKES—¼x5 and 6, $4.60; 5-6x5, 6 and 7, $4.25; ⅝x6, 7 and 8, $4.10; 7-16x7 and 9, $4.00; ½x8, 9, 10 and 12, $3.90, ⅝x10 and 12, $3.75. All other lengths, 25c extra, net.

SCREWS—Flat head, iron, 80, 10, 10, and 10 per cent.; brass, 75 per cent.; round head, iron, 80 per cent; brass, 70 per cent.; coach, 67½ per cent.

BOLTS—Carriage ⅝ and smaller, 65 per cent.; 7-16 and larger, 55; machine, ⅝ and under, 60 and 5; 7-16 and over, 55 per cent. copper; No. 7, 29c; 8, 29½c; and over, 45; machine set screws, 65; plough bolts, 50; square and hexagon nuts, cases, 3½; small lots 3; stove bolts, 77½.

RIVETS AND BURRS—Iron rivets, 55 per cent. copper; No. 7, 29c; 3, 29½c; 9, 30½c; 10, 31½c; 12, 34c. Copper burrs, No. 7, 39c; 8, 40c; 10, 43c; 12, 46c. Copper rivets and burrs: No. 8, 30½c; 10, 33c per lb.

SHOVELS—No. 1 and No. 2, 40, 10 and 5 p.c.

HARVEST TOOLS—50, 10 and 5 p.c.

AXE HANDLES—Turned, s.g. hickory, $3.15; No. 1, $1.90; 2, $1.60; octagon, extra, $2.30; 1, $1.60.

AXES—Bench, 40 and 5; broad, 5½ to 7½, $21 per dozen; 7¾ to 8¾, $23 per dozen; Royal Oak, per dozen, $6.50; Maple Leaf, $8.25; Model, $8.50; Black Prince, $7.25; Black Diamond, $9.25; Standard flint edge, $8.50; Copper King, $8.25; Columbian, $9.50; handled axes: North Star, $7.75; Black Prince, $9.25; Standard flint edge, $10.75; Copper King, $10.50 per dozen.

FILES—Arcade or Eagle, 70-10-5 p.c.

SOLDER—23c per lb.

WRINGERS—Royal Can., $38 doz.

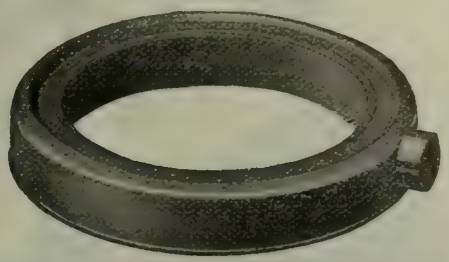
CHURNS—45 p.c.

ROPE—Sisal, 11c per lb.; British manila, 12c; pure manila, 15c.

BUILDING PAPER—Plain, 62c per roll; tarred, 78c per roll.

The FOUNTAIN Sprinkler

NOT merely a round box with holes punched in it to let the water out —BUT a perfect Lawn Sprinkler.



NOT merely a group of straight round streams working with mathematical precision—BUT a natural shower of spray.

The Sprinkler with the "MIST LIKE SPRAY."

No other Lawn Sprinkler can produce the beautiful—The perfect results like the "FOUNTAIN."

The name "FOUNTAIN" is plainly marked in raised letters on the bottom of every Genuine, Original FOUNTAIN Sprinkler.

When you think of Lawn Sprinklers — Think FOUNTAIN
When you buy Lawn Sprinklers — Buy FOUNTAIN
And insist on getting the FOUNTAIN
Stick to the Sprinkler you KNOW is right.

Do you want a sample for comparative test. Post paid to any dealer at the wholesale price.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Catalogues Wanted.—J. T. Henderson, Niagara Falls, Ont., whose store was damaged by fire a fortnight ago, would like to receive catalogues from jobbers and manufacturers.

Spring Catalogue.—The Novell-Shapleigh Hardware Co., St. Louis, Mo., who are making an effort to secure Canadian trade, have issued a spring catalogue showing sporting goods, bicycles, cutlery, tools, harness, sewing machines, lawn goods, etc., the issue making 304 pages and cover. Copies will be sent free on request.

Springs and Metal Novelties.—Herbert Terry & Sons' Novelty Works, Redditch, England, have issued their new trade catalogue for the season of 1909. This firm are patentees and manufacturers of springs and novelties in steel of all descriptions, and these articles are fully illustrated in the catalogue under review. Springs of infinite variety and in countless number are treated of, and lock nuts, cotter pins, pipe clips, levers, spanners, umbrella racks, bicycle carriers, coat hooks, and many other novelties find a place in the booklet. The catalogue is in a neat and handy form, and may be hung conveniently near the desk for ready reference. The matter contained in the booklet is copyrighted.

Luther's Diamond Grinders.—A man grinding a piece of metal with the golden sparks flying about is the appropriate illustration on the cover of a catalogue put out by the Luther Bros. Co., Milwaukee, Wis., makers of Luther's Diamond grinders and grinders of every description, as well as manufacturers of gas engines, floor scrapers and hardware specialties. Catalogue No. 16 is devoted to the "diamond grinders" lines and they are very numerous, more than firty pages being devoted to them. These grinders are made of carborundum, and a chapter at the beginning of the booklet tells an interesting story of its manufacture. The various uses to which these grinders may be put; the attachments that go with them, and the motive power employed are all described and illustrated in this catalogue.

Novelties for the Hardwareman

NEW GOODS FOR FISHERMEN.

Among the large assortment of fishing tackle being brought out this year by the Enterprise Manufacturing Co., of Akron, O., makers of the well-known "Pflueger's" goods, the most prominent goods are their German silver tournament reel, tandem spinners and feather buck fly spinners.

Tandem and Buck Fly Spinners.

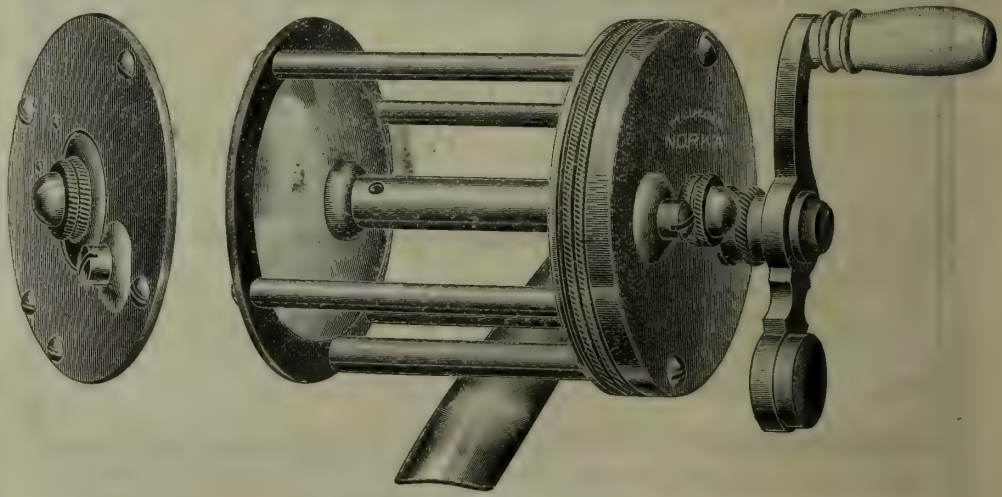
The Norka tournament reel is made of fine quality German silver, satin finish, round wide pattern and has quadruple, adjustable, front sliding click, while it is furnished with or without jewels in oil cups. The handle is white and the crank is fancy balanced.

The luminous tandem spinners are mounted with special strong, long shank hollow-point hooks, heavily feathered, and the combination of colors are guinea red and white, arranged in an artistic manner. The spinners revolve freely in opposite directions and are said to be very effective.

Pflueger's original feather buck fly spinners are a combination of fancy feathers and bucktail tied to elastic spring, steel, hollow-point hooks, and are offered in the following patterns: Red buck, yellow buck, white buck, guinea buck and brown buck.

RAZOR BLADE STROPPER.

As illustrated here, the Mossberg "Diamond" razor blade stropper is strong, simple and practical. It holds the blade perfectly rigid, and at the desired angle to produce the keenest edge. The handle is long enough to give a firm, easy grip, thus avoiding all likelihood of slipping or turning in the hand.



Diamond Razor Blade Stropper.

It gives a perfect edge for every shave; no more shaving with a blade gradually growing dull through use from day to day until a new blade becomes a necessity. It is a money-saver because it makes it unnecessary to throw away old blades. Mossberg "Diamond" razor blade stroppers are packed one in a box, one dozen boxes in a container or carton to be displayed on the dealer's show case or counter. They are made by the Frank Mossberg Co., Attleboro, Mass.

PLUMBER'S NEST OF SAWS.

A new nest of saws being put out as No. 83 by the Simonds Mfg. Co., of Fitchburg, Mass., and Chicago, Ill., is made up specially for the use of electricians and plumbers. The feature about this nest is that with a keyhole and a compass blade there is included a nail or metal cutting blade. The Simonds handle offers a simple but effective patented adjustment. Either one of the three blades can be readily adjusted to any working position that may be desired.

THE LITTLE PAINT MAN.

Editorial

There's goin' to be lots of linseed oil sold this Spring—good, bad and worse. The good oil that's sold is goin' to make lots of warm friends for the dealers who sell it. The other kinds are goin' to "queer" the whole paint business of the merchants who have the misfortune to handle it.

While it's not always easy to determine between good oil and poor oil, there's one way you can always depend on. That is to handle only a well known reputable oil like Sherwin - Williams Scrictly Pure Screw Press Linseed Oil, whose makers have a forty-years' reputation for makin' good goods to uphold among the trade.

The Little Paint Man

566

The first and one of the most important steps in the manufacture of S-W. Screw Press Oil is the selection of the flaxseed. We use only the choicest of No. 1 Northwestern flaxseed, which is exceptionally large, heavy and rich in oil.

Although the seed has been cleaned when we buy it, we carefully reclean it to make sure that all dirt and foreign substances are removed.

Our special "screw press" extracts the oil at a lower temperature than is usually employed, so that the mucilaginous matter which usually finds its way into the oil is left in the cake or dry crushed seed.

After the oil is extracted we carefully filter it and allow it to age and settle in great storage tanks, where the impurities and any sediment which has escaped other processes go to the bottom of the tank and are drawn off, leaving only clear, clean oil.

House cleaning time should be the paint dealer's harvest. Here's one thing worth remembering, however—a lot of people think that the only thing paint can be used for is the outside of houses. Tell them in your advertising and in conversation how the handy man or woman with a few cans of S-W. Brighten Up Finishes can work wonders around the house. Don't be afraid to give your customers too much information on *how* to Brighten Up. And, as I have remarked before, have "the goods."

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Activity.

Clatworthy & Co. will erect an $8,000 machine shop at Toronto.

W. C. Belina is opening a machine shop at Cartwright, Man.

The Otis-Fensom Elevator Works will enlarge their plant at Hamilton.

The T. Eaton Co will build a twelve-storey factory to cost $250,000 at Toronto.

Geo. Pedlar, of the Williams Organ Co., Chicago, proposes building an organ factory at Sarnia.

The Maritime Engine Co., with a capital of $125,000, is a new industrial concern opening up in St. John.

Chas. Robertson, Winnipeg, will build a 35,000 bushel elevator at Claresholm, Alta., for the Vancouver Milling Co.

The Canadian Industrial Company, of Vancouver, B.C., will erect a large paper and pulp mill on a site on the Powell river.

The Courtright Stove Co. is the name of a new stove and furnace manufacturing concern which proposes to locate at Courtright.

The Speight Wagon Co., Markham, Ont., is having some difficulty in getting hands, so great is the pressure of work at their factory just now.

The McLeod Pulp & Paper Mills have started to make box board at Milton, Ont., and intend to manufacture paper in the near future. The pulp mills of the company are busy and are turning out about 80 tons of pulp a day.

An indication of the gradual improvement of the lumber business on the coast is the starting again of the Pacific Coast Lumber Mills, one of the largest plants in Vancouver. The mill has been shut down for several months, and during that time has fallen back on its stock. This is about depleted. "If conditions were not better, we would not be starting so soon," was the remark of G. F. Gibson, manager.

Municipal Undertakings.

New sewer work has been commenced at Brantford.

The Guelph waterworks system is almost completed.

A $1,250 sewer will be constructed on Dundas Street, Woodstock.

$20,000 will be spent for waterworks extensions at Fort Frances, Ont.

The Edmonton city council has passed a by-law authorizing the expenditure of $40.000 for sewer improvements.

The Alberni Waterworks Company has been incorporated to supply water for domestic uses to the town of Alberni, B.C.

At a recent meeting the Glace Bay, N. S., water committee recommended that $7,000 be borrowed for repairs to the town reservoir.

Montreal's new waterworks system is expected to be completed in three months' time. Another million dollars will be raised to finish the work.

The Toronto city engineer's department will require $190,000 to extend the city water service along St. Clair, Danforth, Riverdale and Carlaw Avenues, and along Gerrard Street East from the present terminus of the existing main.

Engineer Burwell has outlined to the Vancouver civic water committee a proposal for the extension of the waterworks system, including the construction of the Little Mountain reservoir, and its connection with the Seymour mains.

The Winnipeg civic board of works have granted the request of the National Transcontinental Railway for permission to lay a sewer emptying into the Red River. The length of the outlet is about 400 yards and it will cost $20,000. The cost of the sewer, five miles in length, which will be laid by the commission to the shops at Transcona, will be about $170,000.

Public Buildings.

A new city hall is proposed for London.

A new library will be erected at Calgary.

A high school may be erected at Duncan, B.C.

A public school will be built at Richibucto, N.B.

A public hall will be built at Grandview, B.C.

A new school will be erected at Ville Emard, Que.

The Free Methodists of Galt will erect a new church.

Knox Church, Peterboro, will build a new edifice.

A $10,000 separate school will be built at Prince Albert.

A Carnegie library will be erected at Preston shortly.

A new school will be erected this year at Revelstoke, B.C.

A fireproof hospital building will be built at Lethbridge.

A new hospital is proposed to be built at Nelson, B.C.

A new public school will be erected at Port Granby, Ont.

$40,000 will be spent on an addition to Victoria Hall, Toronto.

A $7,000 Lutheran church will be built at Fort William.

Chatham will build a $15,000 addition to its Collegiate Institute.

A new Roman Catholic church will be erected at Mt. Pleasant, B.C.

A new exhibition building will be erected this season at Collingwood.

An eight-room public school building will be erected at Haileybury.

The Y.M.C.A. are thinking of putting up a new institute at Victoria.

The C.P.R. will erect a new station at Welwyn, Sask., this spring.

It is preposed to erect a new Anglican church at Ottawa this season.

A six-room addition will be made to Stratford's Collegiate Institute.

The University of Toronto will erect a building for the Faculty of Education.

Tenders are being received for the new Vancouver Board of Trade building.

A new post office will be erected this spring by the Government at Elmwood Man.

A $75 000 library will be built at Toronto as an addition to Victoria College.

Tenders are to be invited for the erection of Essex County Asylum at Sandwich.

A site has been selected for the proposed new Mount Forest, Ont., post office.

The refinery at the Royal Mint, Ottawa, will be completed at a cost of $30,000.

A modern school building may be erected at Chipman, Alta., at a cost of $15,000.

A new city registry office will be erected at the rear of the City Hall, Toronto.

The Presbyterian building committee will secure plans for a new church at Winnipeg.

The city hall at Sydney, C.B., will be remodelled. A new fire hall will also be erected.

The Methodist Social Union have selected a site in Ottawa East for a new church.

Another wing may be added to the General and Alexandria Marine Hospital, Goderich.

Preliminary sketches are being prepared for a new school building at Dresden, Ont.

The Central Congregational Church Winnipeg, are considering the extension of their building.

A site has been secured in the north end of Vancouver by the Hindus for the erection of a temple.

A new school section has been formed at Cumberland and a building will be erected this spring.

A national tower to commemorate the birth of British Government in Canada will be built at Halifax.

The public works department has purchased a site for the erection of a public building at Uxbridge.

Grants have been made amounting to $300,000 for a new wing to the Parliament Buildings, Toronto.

A fine radial station is proposed to be built by the Brantford and Hamilton Electric Ry. at Brantford.

Plans are being prepared for the erection of a new Anglican church at West Burnaby, near Vancouver.

The Salvation Army are thinking of putting up a new building at a cost of $5,000 at Woodstock, Ont.

It is stated that the Lutheran church are contemplating the erection of a new building at Woodstock, Ont.

IVER JOHNSON

Truss Bridge Bicycle

In building bicycles, as in building anything else, the laws of mechanics must be observed.

The Iver Johnson Bicycle has been constructed after the methods used in bridge building. The truss has been employed.

That it will not sag when you push hard on the pedal. That the wheels will not spread. That it will stand the greatest strength, with the least exertion and effect.

These are some of the reasons why the Iver Johnson bicycles are so popular with those who own them.

to sell the

Manitoba Steel Plate Furnace

We want a good hardware man in every town to handle our furnace. It will burn Souris and other soft coals mined in the West, and it will burn them economically. It is the furnace Western people have been looking for. If you are from Missouri, so much the better. Ask us and we will show you.

The consumer saves 25 to 40 per cent. on fuel when he uses the Manitoba.

The Brandon Machine Works Co., Limited

Brandon, Manitoba

General Building Notes.

Hooper & Watkins, Vancouver, have prepared plans for a six-storey office building to be erected for Geo. E. Bower.

Building Inspector Rodgers, Winnipeg, estimates the amount of building to be done in that city this year at $8,000,000.

Miller, Spencer & Cannell, Edmonton, have taken out a permit for the erection of a $30,000 store and office building.

Ross & McFarlane have prepared plans for the erection of a branch bank building for the Dominion Bank at that place.

Dr. O. M. Jones, Victoria, will erect a $10,000 residence near Oak Bay. Plans for the structure have been completed.

A permit has been issued to C. S. Boon to erect a two-storey and basement warehouse at Toronto, to cost $20,000.

It is stated that the projected improvement to the Castle hotel, Edmonton, will involve an expenditure of $100,000.

C. B. Piper, vice-president of the Winnipeg Elevator Company, has obtained a permit for a new residence to cost $10,000.

Darling & Pearson have prepared plans for a fire-proof building to be erected at Toronto for the Bank of Montreal.

Wright & Son, Montreal, have completed plans for a three-storey apartment house, to be erected at a cost of $35,000.

H. A. Magoon, Edmonton, has prepared plans for a double house to be erected for George Stevenson at a cost of $8,000.

A permit has been issued for the new three-storey brick block to be erected at Vancouver for Joseph Reade, at a cost of $27,000.

Wilkie Allen, Vancouver, has completed plans for the new Grandview hall to be erected by Harry Evans at a cost of $10,000.

It is understood that a large building will shortly be erected at the southwest corner of Yonge and Richmond streets, Toronto.

It is stated that the new building to be erected by the Banque Nationale at Montreal, will be ten storeys high and will cost $1,000,000.

Plans have been prepared for the erection at Bonaventure, of a frame club house for La Cercle Pie, at an estimated cost of $12,000.

D. W. Bellhouse, Winnipeg, has prepared plans for the erection of three new residences in Crescentwood, estimated to cost $6,000 each.

Theo. Daoust, Montreal, has prepared plans for a four-storey villa to be erected at Outremont, for Joseph Gravel. The building will cost $40,000.

J. S. Helyer, Vancouver, has completed plans for an eight-storey structure to be known as the "Exchange Building," to be erected there.

D. Gagnier, Wallaceburg, Ont., has decided to erect a large departmental store on the property adjoining his hotel, work to be commenced at once.

Parr & Fee, Vancouver, have prepared plans for a three-storey and basement structure, to be known as the Banfield Building, to be built at a cost of $20,000.

Jos. Sawyer, Montreal, has prepared plans for a three-storey building to contain stores and dwellings, to be erected there for F. Harel. Estimated cost, $55,000.

Ross & Macfarlane, Montreal, have awarded D. G. Loomis & Son, the general contract for the erection of a block of stores and offices for Southam, Limited.

Willoughby & Duncan, Regina, will erect a large business building this coming summer. The building will be five storeys in height, and the main floor will be laid out for stores.

A summer hotel to contain 36 rooms will be erected by Frank Rushton at Sportsman's Resort, on Jamieson creek, 17 miles up the North Thompson river from Kamloops, B.C.

It is stated that plans have been practically completed for the erection of a new $3,000,000 hotel on Phillips square, Montreal. The present lesses of the St. Lawrence Hall are stated to be interested.

It is reported that the T. Eaton Co. has secured lots at Calgary, with a view to erecting a large departmental store. It is expected that the sum of $500,000 will be expended on site and building.

Plans for a new synod hall for the Anglican churches of Ottawa have been submitted to the authorities by Colborne P. Meredith. The new building will be three storeys high. Building operations will be commenced as soon as the site is secured.

Present Winnipeg building operations include large offices and structures for the Canada Permanent Loan Co. and the Great West Life Insurance Co.; the new Union Depot; a new hotel; the G.T.P. shops and the Bank of Nova Scotia building.

G. E. Fairweather, St. John, is working on plans for a large new building to be erected by the proprietors of the Royal Hotel. The building will be an addition to the present hotel and will contain 30 rooms. Construction will be started about May 1.

SOME FURNACE DON'TS.

Don't put your furnaces in too small—it is poor economy and expensive in the long run.

Don't fail to give the owner a few instructions before turning the job over to him—a word in time often saves angry words later and a dissatisfied customer.

Don't fail to damper all pipes and connect up the drafts to the chain plate upstairs. These are little things, but it is the little thing in the heating business that counts.

Don't fail to examine the chimney carefully when estimating; a good draft is absolutely essential—a poor draft will condemn the best of jobs. No furnace flue should be smaller than 8 in. and from that to 12 in.

Don't leave heat pipes uncovered—asbestos paper is cheap and coal expensive.

Don't let the mistress of the house or the owner tell you where the registers should be placed—you know and they only think they do.

Don't guess on the size of the cold air box—be exact. More mistakes are made in cold air supply than in any other part of hot air heating. With inside air have full capacity of heat pipes; with outside air, one-third less.

Don't locate cold air faces in side walls, under stairs, or in airbound corners—many have already tried it unsuccessfully.

Don't agree to heat the building with "very, very little coal"—the age of fuelless heaters is still far distant and your promises are apt to come back to you when the bill is presented for payment.

Don't take some pipes off the top of the casing and some off the side—it won't work.

Don't fail to elevate all pipes as much as possible—hot air will not travel horizontally, and all pipes should have a gradual and appreciable rise from the furnace to the register.

Don't set the furnace at one end of the cellar—locate it centrally, about one-third nearer the exposed side of the building, and have all pipes as near the same length and as short as practical. However, pipes running to exposed rooms should be larger and if possible shorter than the others.

Don't make short bends in the heat pipes and avoid all unnecessary elbows.

Don't run pipes in outside walls unless absolutely necessary in order to reach the upper rooms—oval pipes can be run in partitions and round pipes in closets and chimneys.

Don't cut down the size of registers—they should be of even greater capacity than the pipes supplying them.

Don't neglect to pack carefully all joints, and to cement around the door frames—the furnace which leaks gas is an abomination.

Don't take the job unless you can get a price which will enable you to do it right—better to lose the work than to install an unsatisfactory job.

Don't use smaller than 7-in. round pipe for any cellar connection, no matter how small the room—the usual residence size is 1 in. to 12 in.

Don't forget that air travels with a spiral or circular motion, therefore round pipes are better conductors of hot air than square pipe.

Don't run round cellar pipes directly into the square pipe—use a boot or foot piece. All pipes should be on a level when they leave the casing, no matter what the size.

News of the Paint Trade

THE SPRING CAMPAIGN.

One more word to dealers in regard to the spring trade, which is now practically upon them. Be enthusiastic. Have confidence in your goods, and confidence in your power to sell them. Make consumers regard your store as the paint store of the district, and trade is bound to come in freely. But there must be no cessation in the efforts to stimulate the desire for paint. Because orders are swinging in nicely, merchants must not think that they have done sufficient promoting work, and that it would be waste of energy to go on educating the district to the value of paint. No matter how thoroughly the merchant may have covered the district with his canvassing there is always room for further efforts.

Many people are hard to be convinced, and a true appreciation of the value of paint is not acquired in a day or a week. A property owner may, on the strength of a merchant's advertising campaign, decide to paint his house, but may by no means be a convert to the belief that this painting should be kept up regularly every two or three years. If the merchant therefore, slackens off in the case of this property owner, he will have the same preparatory work to do over again when the time comes round for repainting. If, however, he keeps after this man until the latter is thoroughly converted as to the value of paint, then the merchant's work in the future is considerably lightened. Spasmodic effort may stimulate trade for the time being but it does not do the educative work that will bear fruit in the future.

The merchant should not be content with a spring campaign. Let him resolve upon a summer campaign, and an autumn campaign, and a winter campaign. Let him preach paint at all times and at all seasons, for there is never a day that paint, varnish, enamels, stains, etc., could not be applied in some direction or other by a property owner or householder to the great benefit of all concerned. Drill into your community that paint is valuable at all times, get them to understand the insurance side of the question, and if the merchant keeps pegging away he will so get his community into shape that every house will sparkle with paint. But he must work hard in his canvass he must not slacken off when the spring rush is over, but keep at his paint campaign all the year round. He will then realize how valuable his paint department is to the general prosperity of the store.

Hughes & Co., have the contract for painting the addition to Riverdale High School, Toronto, at a price of $1,800.

R. J. Wray, Toronto, will do the painting of the Kent School there. The contract is worth $2,590.

Cold Twisted Steel Bars

For Concrete Reinforcement

Concrete is now so important a factor in all work that contractors have on hand that it will pay the hardwareman to look carefully after this branch of trade.

For concrete reinforcement there is a demand for a bar possessing high elastic limit, great tensile strength and of such shape as to permit a close bond with the concrete.

Our Cold Twisted Steel Bar meets these requirements and has been found to give entire satisfaction.

We shall be glad to furnish full particulars regarding elastic limit, tensile strength, etc., and samples if desired.

The Montreal Rolling Mills Co.

Paint and Oil Markets

TORONTO.

April 16.—Steadily increasing orders are being received for almost all lines. Seasonable goods, especially, are active. Oil, leads, ready mixed lines, enamels and varnishes are in demand, and improvement is noted even in glass, which all along has been very quiet.

Prices are unchanged from last week. Paris green is continued at the low figure, and turpentine is a little unsteady. The other goods, particularly spring lines, are decidedly firm.

LINSEED OIL—For this line the market remains steady. There has been a slight advance in England in the price of flaxseed, but linseed oil to the present does not seem to be affected materially, but is still at a point where the Canadian trade are not at all likely to import, as Canadian crushers keep their price as low as the price at which the English oil can be laid down for. 59c and 62c for raw and boiled, respectively, are the prices for single barrels, and these prices are firm, no change being anticipated for at least two months, when the new crop is expected.

TURPENTINE—The market is very low for this season of the year, said to be caused in the southern States by a small quantity of old stock that was put in tanks some years ago being still on the market, but as the weather has been unfavorable for the production of new supplies, the past few days has seen an advance of a cent, and the market seems likely to stiffen, as the quantity coming forward from the producers is not quite as large as was expected and the demand has improved at Savannah. The future seems to depend on the state of the weather very materially. There are 5,000 barrels of turpentine less at Savannah than there were last year. Single barrels are 56c, the quotation of last week, though it is said some has been offered locally at 55c.

WHITE LEAD—Continued firmness is shown by white lead, and the orders received for this line call for very large quantities. There is not even a shadow of a hint of change in price to lower figures; rather the other way. No. 1 is $5.40 to $5.65; pure white from $5.80 to $6, and a superior line is offered at $6.25. Genuine red lead is quoted at $4.50 for casks and $4.75 to $4.80 in 100 lbs.

PARIS GREEN—The lower prices quoted last week have upset the market considerably and some good bookings were made at the new figures. Those who bought earlier in the season, however, have made some outcry at being asked to pay the old price. 25-lb. drums are at 17¾c.

STAINS AND VARNISHES — With enamels, alabastine and other kindred lines, stains and varnishes being seasonable goods, are especially active just now. Orders call for very satisfactory quantities of these lines.

GLASS AND PUTTY—Glass is moving more freely just now than for many weeks. Supplies are low and the market is firm at prices that have been ruling since the beginning of the year. Putty, too, is called for more freely.

PETROLEUM — Prices unchanged. Business still good. Prime white is 13½c; water white, 15½c, and Pratt's astral, 17½c.

MONTREAL.

April 16.—Despite the interruption of Easter, orders have been coming in freely and in large bulk this week. Undoubtedly the spring movement in developing good strength. Dealers are showing much better confidence as to their trading prospects, and in consequence are losing that cautiousness in buying which characterised them last yeat. Especially is this noticed in ready mixed paints of all kinds. Orders are well assorted and stocks must be commencing to assume much better shape. The markets for the time being are firm and unchanged. The recent reduction in turpentine seems to have stimulated buying. Ground white lead is also in good demand.

TURPENTINE—Orders have shown improvement since the reduction, but stocks are still on the heavy side. There has been no further change this week however and we quote 55c for single barrels, net 30 days.

LINSEED OIL.—Orders show improvement, and trade is opening out well with the spring movement. The market is steady, and the following quotations are generally followed. Raw, 1 to 4 barrels, 59c; 5 to 9 barrels, 58c; boiled, 1 to 4 barrels, 62c; 5 to 9 barrels, 61c; strictly net, 30 days.

GROUND WHITE LEAD—Business continues to go ahead with a swing, and grinders are very confident as to the spring trade. Stocks are not heavy, and the market is firm. We continue to quote: Strictly pure, $5.50 to $6 according to brand, and No. 1, $5 to $5.50 f.o.b. Montreal.

RED LEAD—Stocks are on the light side, and will continue so until navigation opens. Orders are coming in freely and well. The market is firm, and we quote: Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; in less quantities, at $6 per 100 lbs.; No. 1 red lead, casks, $4; kegs, $4.50, and smaller quantities, $5.50.

LIQUID PAINTS.—The spring movement is strongly in evidence. Orders are not only coming in freely, but in better bulk, and are well assorted. Makers' stocks are in good shape. All size tins continue in request.

VARNISHES.—With the improvement in industrial activity, varnishes are in much better request. Household lines are also forging ahead. Household, implement, and furniture varnishes are in most prominent request.

WHITE ZINC.—A better movement is apparent in white zinc, the market in consequence showing more vitality. There is no change in quotations. We quote: Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c;

St. John **Winnipeg**

What is it?

MURESCO

What does it do?

It is the finest preparation ever applied to a wall and is more economical, pound for pound, than any other mural finish on the market. In covering capacity, more material and easy working quality MURESCO stands alone and takes about thirty per cent. more water than any other wall product. That's what MURESCO is.

It does better work with less outlay and trouble. It kills suction and can be used on new lime walls and ceilings and soft porous plaster. It hides all smoked and stained surfaces and will not show laps. After a coat has been once applied others may be applied without washing off or sizing the surface. That's partly what MURESCO does.

Dealers Should Push This Profitable Line.

Are You Awake?

Don't let competition catch you asleep at the switch on the paint proposition, Mr. Dealer. Don't be satisfied with what trade straggles into your store. Be a live one and make a robust bid for the bulk of the business in your town. Why not? There's a way to get it. Get a paint you can enthuse over, and then make a noise that will wake up every paint consumer in your community. Show them the money-saving advantage of using a better paint. We'll help you convince them that

Martin-Senour 100 Percent Pure Paint

is the paint they ought to use. It is noticeably so much better than other paints that customers once using it become audible advertisements for the dealer who supplied them. They talk out loud for **Martin-Senour Paint.** The neighbors hear the story and see the evidence with their own eyes—that starts them too to the dealer's store, and the good work and the good news spreads.

If you want to be the liveliest paint man in your town our plan for turning the paint trade your way will interest you. Write for it today.

white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5¾c.

PUTTY.—Putty continues to improve, and good trade has opened up. Stocks in dealers' hands have been on the light side, but this is being rectified. We continue to quote: Standard putty, 880 lbs., in casks, $1.65; in 100-lb. drums, $1.90; bladder putty, 400 lbs., in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb. drums, $2.00; 25-lb. tins, $2.05; 12½-lb. tins, $2.25 f.o.b. Montreal.

FLAXSEED FROM CANADA.

United States crushers of flaxseed are now figuring closely on the possibilities of importing seed from Argentina or Canada, says the Paint, Oil and Drug Review. The upward tendency of the seed market makes it desirable to provide for supplies in the event that seed goes to prohibitive values in the Northwest as well as in the East. Canadian seed is not much of a factor in the possible importations, as only 500,000 bushels will be available for export. Of this it is said that 200,000 bushels have been bought for shipment to Buffalo, which, if true, would take nearly one-half the Canadian surplus out of the Western market. Flaxseed is now quoted at Winnipeg at $1.23½ for spot and $1.29¼ for May delivery. Adding the duty of 25 cents a bushel gives $1.54¼ as the cost of May seed, to which must be added freight to crusher. This would make the cost of seed at the mill close to $1.60 a bushel. The probability is that prices in the Northwest will go high enough to attract all the surplus of Canadian seed to American markets.

A noticeable effect of seed importations is to depress the market, but this depression is only temporary. Continued good demand puts quotations up again. The same effect is produced by heavy speculative selling, but the market shows great strength even when battered down by speculators. It recovers quickly. If all the seed in Canada were dumped on the Duluth and Minneapolis markets it would have only a temporary effect on prices.

It has been suggested that a drawback of duty on seed should be allowed on exports of cake. If that were done, there would be no difficulty in absorbing all the seed Canada can produce. The objection to such an arrangement is that it would injure the American farmer, and if it were extended to include imports of seed from Argentina, which would probably be necessary, no doubt at times seed would sell lower because of this drawback. However, the general principle that a material imported and manufactured and then exported is entitled to a drawback applies as surely to flaxseed as to anything else, except that it is not possible to identify in the cake the exact seed imported. On this purely technical ground the courts have held, we understand, that no drawback can apply. There is an arrangement whereby a rebate on duty may be claimed for the percentage of foreign seeds not oil seeds that are found in imported flaxseed; and a further consideration is that imported seed will make from one to one and a half pounds more of oil per bushel than domestic seed. These are points in favor of the importer which in the purchase of large quantities of seed are worth careful consideration.

WOMEN AS PAINT BUYERS.

Writing in the American Paint and Oil Dealer on the subject of selling paint, Thos. Dreier, refers to women as paint buyers. Hardwaremen are recognizing that the womenfolk as buyers are getting stronger every day, and that they are a force which must be attracted. But have they thought much of the paint side of the question? This is what Mr. Dreier says:

"They will tell you that women are not great paint buyers. Ordinarily they leave that work to their husbands or sons or the painter. But women should be encouraged to buy. A special appeal should be made to them. In the first place, the paint department should be made clean and shiny and attractive. The ordinary paint department is sickening. Oil and paint and varnish are smeared over everything, and only one who is reckless of clothes dares venture there. What attraction is there in such a place for a woman? If paint is supposed to add to the cleanliness of a place, why in heaven's name don't the merchants advertise that fact by putting into practice some of the glittering truths they preach? It is easy to preach either a religion, a philosophy or a business theory. But to practice—most men give that absent treatment. After the paint department is cleaned up so that an ordinarily brave woman may venture into it, an educational campaign should be waged.

"Paint is no good to the world unless it is used. Paint on the shelves may be all right, but no one knows how all right it is until it has been tested. Women should be shown how paint and other like products can be used around the home. The floors might be improved. Some old furniture may be retouched. Perhaps away down in the cellar is a place where paint could be used to advantage. Women should be taught to analyze their homes. They should be taught to sort of take their homes apart and as they look at each part they should be made to ask themselves: 'Can I use paint to advantage on this?'"

PAINT NOTES.

Geo. Mellor, Victoria, must remove his paint warehouse from its present location to another part of the city, owing to the inflammable nature of its contents.

Thirty-five men are kept constantly employed cleaning and painting the great Forth bridge in Scotland, which presents twenty-five acres of surface to the action of the elements. Two hundred and fifty tons of paint are required to cover it.

A.F.E.

Amberite Floor Enamel. If the floor is rough, give it a coat of the Priming Paint made by the Canada Paint Company and one coat of Amberite Floor Enamel.

Amberite Floor Enamel. If the floor has been stained and looks "streaky," sandpaper and give it a coat of Amberite Floor Enamel.

Amberite Floor Enamel. If the floor has been painted and a nice glossy finish is desired, give it a coat of Amberite Floor Enamel.

Amberite Floor Enamel. If the floor has been carpeted, discard the carpet and give the floor a coat of the Canada Paint Company's Priming Paint and a coat of Amberite Floor Enamel.

Amberite Floor Enamel. If the floor has never been painted or stained, use the Canada Paint Company's Crack and Seam Filler and give one coat of the Canada Paint Company's Priming Paint and finish with Amberite Floor Enamel.

Amberite Floor Enamel. If you favor the use of rugs, try a deep border of Amberite Floor Enamel.

CURRENT MARKET QUOTATIONS.

April 17, 1909

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

Read a Few of the Comments of the Leading London Dailies on the Supremacy of the Ross Rifle at the 1908 Bisley Meet.

"Long range Champion, breaks all records, a rifle of wondrous precision." *London Morning Post, July 16th.*

"Records broken at Bisley. A fine Canadian rifle." *London Daily Express, July 16th.*

"Record scoring with the Ross rifle." *London Daily Telegraph, July 15th.*

"Champion of the year." *New York Herald, July 16th.*

"Performance phenomenal by the Ross rifle." *London Field, July 18th.*

"The new Canadian rifle has made an unexpected and altogether successful appearance." *London Daily Mail, July 15th.*

"Great triumph for the Ross rifle which has beaten all the world's rifles." *London Standard, July 15th.*

"Many experts declare that Ross rifle better than new U.S. Rifle." *Nottingham Guardian, July 17th.*

"An individual triumph, the Lee-Enfield hopelessly beaten." *London Morning Post, July 15th.*

"The Ross rifle achievements were truly remarkable." *London Evening Standard, July 15th.*

"Great victory for the Ross rifle from Canada." *London Daily Express, July 15th.*

"The rifle of the future is the Ross rifle." *London Times, July 16th.*

"A'plague of possibles' with the Ross rifle." *London Sphere, July 15th.*

Dealers, Take Notice!

25 Years Ago we began manufacturing Metallic Roofing. The first years were trying ones, but our policy, adopted at the start,—PROTECTION TO THE DEALERS—together with the fact that only the highest quality material is used in the manufacture of our roofing, won out, and placed us at the top.

Our Strong Protection Wall surrounds the trade. We want your co-operation. Success for you means success for us.

Our Extensive Advertising creates a market. Don't let your competitor reap all the benefit. Get your share.

Our Metallic Roofing stands the test. 25 years has proved it. Send us measurements and get our estimates.

F.xW.

The New Yale Night Latch No. 44

At last a **night latch** that is, when the door is closed, a **deadlock** as well.

As revolutionary an improvement in night latches as the original Yale principle was in locks.

The new No. 44 embraces the security of a deadlock with the convenience of a night latch.

The important difference between No. 44 and the well-known Yale No. 42 (which it resembles in size and appearance) is that the No. 44 has a sliding "protector" on the latch bolt.

As the bolt enters the strike, this slide or "protector" presses against the face of it, and is held back. The holding of the "protector" automatically and absolutely deadlocks the bolt, so that it cannot be forced back, and can be withdrawn only by the key or knob.

Put in a sample order for this latch and ask for advertising matter that will help you to sell it.

Long Distance Phone No. 87

Sold throughout the Dominion by all Wholesale and Retail Hardware Merchants.

Every Little Bit Helps!!

Mr. Hardware Man,—Don't you often find that the "little sales" of the day are a big feature in the day's receipts and are often the lever to larger sales?

The Kaiser Wax Pad and Iron Cleaner

is a "little thing"—retails at 10 cent—but it is a household necessity, something entirely new on the market, a quick and big seller, with a good profit.

Every housekeeper dreads ironing day, especially so when she has a lot of shirt-waists, men's shirts, collars, cuffs, etc. to iron, she always wants to obtain a high-grade finish, equal to first-class laundries. She of course asks the dealer for advice—in return he offers her the common wax—She knows it is impossible to do good work with the common wax—So she walks away—one customer lost.

Now where she can procure an article of this merit—that reduces ironing time by half—reduces labor to a minimum—adds to the finish of clothes—and makes ironing a day of pleasure—THERE SHE IS SURE TO DO HER BUYING—AND LEAVE HER ORDER FOR OTHER THINGS.

A post card to any of our Canadian agents or direct will bring a sample of this great little business getter.

Crescent Brand Hinges and Butts

Bright Steel, Japanned, Electro-Plated and Nickel Finishes

Crescent Brand

Registered

Is the other fellow pressing you hard for business ?

Chances are he is doing it with Crescent Brand Hinges and Butts.

Many of the successful fellows have chosen them exclusively—and they are well worth choosing too, being made for the trade that seeks the best, and who are governed by quality.

Can you risk handicapping your business with inferior goods, when the price is not lower ?

If your jobber does not keep them, we will fill your order.

Export Trade

Represents the Great Future Market for American Goods

Manufacturers that cultivate the field **NOW** are assured of the largest share of this trade in the future.

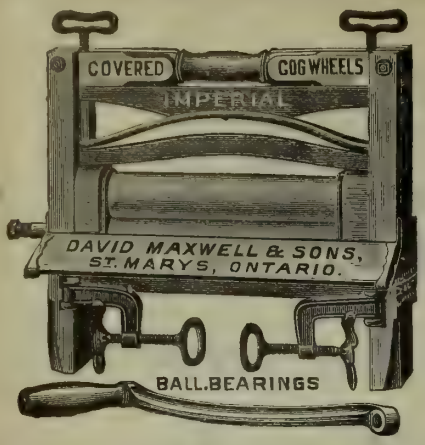
Our service, the greatest single power in Export Trade, enables manufacturers to get their products prominently before the trade abroad. An efficient service, covering all export markets at minimum of expense.

The aim of the **American Exporter** is and has always been the up-building of a world-wide demand for American machinery and goods. Issued in two editions each month, one in English, and other in Spanish **(Exportador Americano.)** The two together cover all countries that import American goods.

It is the only journal of foreign circulation which regularly publishes its exact circulation every month in its editorial pages.

Stronger evidence of the AMERICAN EXPORTER'S strength in its chosen field could not be brought forward than the phenomenal growth in its advertising pages during the past three years. The AMERICAN EXPORTER in net volume of advertising business carried three years ago 52 pages of net advertising; two years ago 88 pages; one year ago 116 pages; carries to-day 122 pages. Its number of regular advertisers three years ago was 325; two years ago 400; one year ago 550; and to-day 650. It is seen that notwithstanding a "panic," there is a growth in the last 12 months.

An increasingly important feature of the **American Exporter** is the Foreign Trade Service maintained on behalf of its advertisers. This service includes the sending of our representatives into foreign markets to study conditions in the interest of our clients, the furnishing of selected names of possible customers or agents in any country, commercial ratings on prospective foreign customers, translation of foreign correspondence from and into any and all languages resulting from or pertaining to the advertiser's announcements.



Representative space regularly in the **American Exporter** gives you all the export advertising you need, for this publication covers every foreign market for your goods. This publicity, coupled with our Foreign Trade Service, provides you with the necessary facilities for conducting intelligently an export trade.

May we send more particulars?

AMERICAN EXPORTER

135 William Street, New York City

Established 1877 **Conducted by Export Specialists**

"MAXWELL" WRINGERS

have for many years been known to Canadian women as the most satisfactory on the market.

"ROYAL CANADIAN"—best solid rubber rolls, improved guide-board, double gear, moderate price.

The "IMPERIAL"—enclosed gear, ball bearings, best solid rubber rolls, swivel tub attachment. The finest wringer made at any price.

Why not handle the best, for yourself and your customers?

DAVID MAXWELL & SONS, - ST. MARY'S, ONT.

Growing Bigger Than Their Business

The hardwareman, if he is alert, is quick to take advantage of all extensions of trade. Many of them to-day are handling metal roofing, agricultural implements, silverware, sporting goods and other profitable lines. The latest opportunity is by selling structural steel. You do not have to carry a stock but simply get in touch with the building trade and seek to close some business where steel is required. We have an interesting proposition to submit. Be the first in your town to take up this work.

Sunshine Furnace is Superior to Other Furnaces because of the Invulnerability of the Grates

Some furnaces go on to the market with a one-piece grate, other furnaces go it a little better by a two-piece grate, other furnaces go it RIGHT by a four-piece grate. Of this latterly distinctive class, Sunshine Furnace is the outstanding figure. In Sunshine Furnace you get what is called the Quadrangular Triangular Grate; that is, there are four distinct pieces, each having three distinct sides. In the single piece and two-piece grate no such like provision is made for expansion or contraction and a waste of coal always follows a dumping in the centre.

Nothing could conduce towards greater economy in coal consumption, and greater simplicity in furnace operation than Sunshine Grates. It is just the easiest thing imaginable to remove the grates from a Sunshine Furnace. On the left and right hand sides are cotter pins, which, when loosened, permit the grates to slide out. These four grates are made of heavy cast iron, and are finished up with bull dog teeth. They will grind up the toughest clinker, and because they are made in sections, not only can nothing but dust and ashes pass through, but after each shaking a different side can be presented to the fire. Also with these Sunshine Grates there are no back-breaking movements attached to the shaking. By gently rocking the lever first on the left and then on the right the ashes are released on both sides, and fall through into the pan. This ash pan in Sunshine Furnace is a distinct feature that does away with shoveling ashes, and along with perfect tightness of all the parts and a large dust pipe leading directly from ash pit to feed door, helps to see that dust goes into either one of the only two correct places—out the chimney or into the pan.

Hardware Convention at Vancouver

Eighth Annual Convention of the British Columbia Hardware Dealers' Association—Question Box Discussion Held for the First Time—New Officers Elected.

The eighth annual meeting of the British Columbia Hardware Dealers' Association held on the 10th and 11th inst., in the Board of Trade rooms, Vancouver, was well attended by the hardware merchants from Vancouver, New Westminster and surrounding districts, but although personal invitations were sent to all hardware merchants in British Columbia, very few responded. This is to be regretted, as the trade can accomplish much more when city and provincial merchants are united, the results

CHARLES SNELL, VANCOUVER.
Retiring Pesident of the B. C. Hardware Dealers' Association.

secured in legislation such as the "lien law," being mutually beneficial.

President Charles Snell, Vancouver, opened the meeting and after the minutes of the last meeting had been read and confirmed, Mr. Snell read his annual address, as follows:

PRESIDENT SNELL'S ADDRESS.

Gentlemen.—It is a great pleasure to meet you all in this the 8th annual convention of our association and although the past year has not been the brightest in our history from a business standpoint, we have very much to be thankful for in the pleasant relations toward each other, brought about by the good work of our association. There is no doubt if we had not held together we would have had a very much more unsatisfactory year and when we compare our lot with that of our fellow hardwaremen in any part of the world we will find we have made a much better showing, and have not a single failure to report among our members during the hard times, which is proof that business has not fallen off to any great extent and that the prices we receive for our goods enable us at least to make a living.

In speaking of prices I would like to impress upon you the great importance of making a good profit on your goods. This suggestion is intended more for our Vancouver members than for our Westminster friends, as their trade is not so much cut up and the hardwaremen of the Royal City have the reputation of getting all they can and then some. But in Vancouver we have more hardware stores to the population than probably any other city in America, and, although our great city is growing very rapidly, the trade has to be divided among so many that it is very important that we keep up our prices or we will not be able to meet our payments. As the city grows our expenses increase, rent becomes higher with the advance in valuation of property, the improvements carried on by the city will have to be paid for by higher taxes, the salaries of our employes increase every year and numerous other expenses creep in to eat up our profits. We must remember that no one house can hope to get all the trade and we will have to be contented with our share, but we should make it a point to get a good price for our portion.

I do not refer particularly to the prices governed by our association, but to hundreds of the small shelf goods that will often bring a much better price than is asked for, some of which have a very slow sale and are carried in stock for months at a time. It should also be remembered that every time a price is cut to get business some of your competitors are going to hear of it and they will not only meet the price, but will cut under it for spite, with the result that everyone will follow suit, and when once a price is down it is a hard matter to get it up again.

However, outside of the builders' hardware trade we have had very few complaints of price-cutting during the past year, but I would like to impress upon the members for the benefit of my successor to the honored position of president, that all complaints should be made to the secretary and not to the president, as the secretary receives a salary for that purpose and it is not fair to ask any business man to spend his time taking up such matters. I contend that the president of the association should be really a figurehead whose duties should be to preside at the meetings.

If any member has any complaint or suggestion he should make it a point to attend the monthly meetings of the association and take the matter up there. These meetings are always open to discussion and especially the annual meeting, when the policy of the year should be thoroughly outlined, and I hope that at some time during the two days of this meeting that each member will take part in the proceedings, whether he has a kick to register or not.

I also think the present salary our secretary and treasurer receives is entirely too small for which to expect him to spend much of his time and I am sure none of the members would object to increasing their donation as the adjusting of these differences and the holding together of the association will save them hundreds of dollars in a year.

Should Help the Secretary.

I am informed by the secretary that small as is the amount we are asked to contribute towards the expense of running the office, a number of the members have not paid their last year's subscriptions. This, gentlemen, is a very deplorable state of affairs, for if any one does not receive more than $10 a year benefit

W. C. STEARMAN, VANCOUVER.
Elected President of the B. C. Hardware Dealers' Association.

from this association and does not take enough interest in it to pay his dues, it is time he woke up. No doubt it is due to an oversight, or with the expectation that the secretary will call around again and collect it, but it is rather much for the sake of a mere pittance of $10 a year to ask the secretary to chase around from store to store several times to collect the amount. We should all take such an interest in our association that we would

be glad to remit our dues and help the good work along. You will probably think this address a series of grouches, but I am through with that and will endeavor to take up some of the brighter sides of our work.

Now, there is the nail question. Some of us think we have a great grievance in supporting our jobbers in keeping the market from being flooded with nails, but we are fortunate in being able to make a fair profit on nails, rather than having to sell them at cost, as so many dealers are compelled to do. No member should take advantage of other members by buying outside the sizes of nails manufactured in the local factory.

We will have a report on the lien law question from the committee appointed for that purpose, but I would like to say that although our committee did not achieve as much as they would have liked to, they put in a lot of good time on the matter and as president of the association, I would extend to the committee the sincere thanks of the members for the interest they took and the work they did in our behalf in trying to get a satisfactory measure passed in the Provincial Legislature. I would particularly mention H. H. Welch, in this work, as he was practically a disinterested party and not a member of our association but he worked just as conscientiously as though it were in his own work.

We will also have an interesting report from the committee on the credit system, and I am sure you will all agree that this is a very important question and one it will pay us to go into thoroughly.

The outlook for the coming year is much more promising than the last. We have a number of railroads buying suitable terminal locations; we expect to see the work of dredging False Creek and the Narrows taken up this year; the building of large elevators to handle the grain output of Alberta; hundreds of fine residences and modern office buildings under the course of construction using a better class of hardware, the milling and logging interests looking up and everything points to a good year for the hardware business.

I thank the members of the association and the retiring members of the executive for the kind assistance they have given me during the past year, and I trust you will all enjoy a prosperous year in 1909.

CHARLES SNELL.

SECRETARY'S REPORT.

Nine general meetings were held during the year, while over thirty special committee meetings were held, The average attendance, both at the regular, special and committee meetings increased over 100 per cent. over the previous year. This shows a good healthy interest taken by the members in the association's work and Secretary Butt predicted that next year's report will show even greater progress.

Committee on Credit System.

Mr. Anderson, of Anderson & Warwick, made a brief report regarding the "Credit System," and asked that a new committee be appointed, as the old committee had not been able to make as much progress as they would have liked.

Lien Law Committee.

Mr. Owens, of J. A. Flett, Ltd., then reported on behalf of the lien law committees, which has taken up the most important work of the year, holding many meetings and going to Victoria several times to interview the Government.

In this they received able support from W. H. Welch, of the British America Paint Co., Victoria, and Mr. Welch was tendered the thanks of the association for the assistance given.

The committee had also the assistance of Mr. Woodward, who drafted the proposed "Lien Law," from the suggestions of the committee, and in this connection we received the hearty co-operation of the Lumbermen's Association, the Sheet

WM. J. BUTT, VANCOUVER,

Re-elected Secretary-Treasurer of the B. C. Hardware Dealers' Association.

Metal Workers' Association, and the Electrical Association.

While the committee was not successful in getting the measure through the House, they were promised that at the next session the Government would bring in an entirely new act that would meet the approval of the hardware and supply men throughout the province.

Price Committee Appointed.

Upon motion made by Mr. Paine, seconded by Mr. Lusby, a permanent price committee was appointed, their duties being to follow the market prices and conditions and offer recommendations at regular or special meetings.

The second afternoon's proceedings were opened by an address by H. H. Welch, Vancouver, representative of the British-America Paint Co., which was so interesting that the delegates ordered it to be sent to Hardware and Metal for publication. It will appear in next week's issue.

ELECTION OF OFFICERS.

W. C. Stearman, of Hodgson, Stearman & Co., Vancouver, was elected president; H. T. Kirk, New Westminster, vice-president; Wm. J. Butt, Vancouver, secretary-treasurer, with the Executive Committee composed of H. Martin, Geo. Hunter Hardware Co., Vancouver; G. Blakely, T. J. Trapp & Co., New Westminster, and W. R. Owen, J. A. Flett Co., Vancouver.

The newly elected president then took the chair and a vote of thanks was tendered the retiring officers for the able way they had conducted the work during the past year.

QUESTION BOX DISCUSSION.

A new departure in this year's convention was the "Question Box," with H. Martin, of the Geo. Hunter Hardware Co., answering the questions.

The following questions were read and the answers given at the Thursday session.

Mail Order Competition.

If a list of tools, etc., covered by our retail prices, be shown could be bought from an eastern departmental store at a lower figure, should we meet their price?

Replies were made by Mr. Snell and Mr. Owens, who were both of the opinion that if the matter were gone into by the merchant he could readily show the purchaser where the prices he would pay in the east would cost him more after paying freight and cartage, etc., to bring it in than he could buy it from him and that there was very little of this done around Vancouver.

Stoves on Instalments.

Should we have a minimum first cash payment on all stoves, ranges, etc., sold on the instalment plan, say at a value of $35 and upwards?

This question was replied to by Messrs. Lusby and McKenzie, and in their opinion it was not advisable to sell stoves, ranges, etc., on monthly instalment plan as it is a well known fact that once a fire has been placed in a stove its sale value decreases 25 to 50 per cent., and that if sold at all on the instalment plan at least a 50 per cent. payment should be collected and the balance as soon as possible.

Margin on Shelf Goods.

What do the members of this association consider a fair margin on shelf goods?

Replies were made by H. Martin, F. W. Cunningham, Mr. Lewis and Mr. Paine, and in the opinion of each of these members the present margin on shelf goods was entirely too low as a number of the merchants neglected to take into consideration that it takes nearly 20 p.c. of the gross sales to run a retail store and while 40 p.c. on certain articles may seem to be a large profit, yet when it was remembered that these articles were all of small value and would amount to only a small proportion of the gross sales (made up

of heavy goods, etc., on which the margin is very close) would show a greatly reduced gross profit, and further that there can be no hard and fast rule for a standing per centage on any line of goods and that the merchant must learn from experience.

Saturday Half-Holiday.

Shall we take Saturday afternoons off?

Mr. Snell said that his firm would arrange to only keep the sporting goods department open on Saturday afternoons and would not have any one in the hardware department.

Hardwareman in Politics.

How does Alderman McTaggart like his new position?

Alderman McTaggart replied that he was quite satisfied with his new position as an alderman of the city of Vancouver.

Margin on Poultry Netting.

Does the present margin on poultry netting tend to decrease the use of this article?

After discussion by the Westminster members this question was referred to the price committee.

Percentage for Advertising.

What would be a reasonable monthly amount for a retail hardware store to expend on advertising and is $25 per $1,000 gross sales too much?

Mr. McKenzie, of Wood, Vallance & Leggatt, was of the opinion that this amount was not in excess provided results were obtained, but as there were so many avenues to advertise it was impossible for anyone to say just what amount should be expended for this purpose. As a matter of fact the merchant could as easily spend $1,000 as $25 in advertising purposes providing he got results and this seemed to be the opinion of the members.

Dealing With Price Cutters.

What is the best method of finding out what members, if any, are cutting prices, and what should be done when such is the case; also what can be done with merchants who do not belong to the association and who are cutting prices?

Lengthy replies were made by President Stearman, Mr. Owens, Mr. Smith, Mr. McBride and Mr. Nesbitt, and it seemed to be the general opinion that if the members met more often and got to know each other better there would be less contention regarding price cutting, etc.

Picnic in the Summer.

Would it be advisable for this association to hold a picnic this summer and would it promote a more social feeling between the members?

Consideration of this matter was left over until a future meeting.

Extension of Membership.

What can be done to get the country stores into the association?

Mr. Owens suggested that an effort be made to interest the country merchants in the association work through the aid of Hardware and Metal.

Promoting Better Feeling.

What can be done to promote more harmony amongst the members and promote the interests of the association?

This was replied to by Mr. Martin of the Geo. Hunter Hardware Co., whose remarks were well taken and were to the effect that business as carried on to-day is really a matter of personal honor, and that if the members would get together and discuss different business matters that came up among themselves and visit one another's place of business any feeling at present existing would be eliminated.

THE BANQUET.

The attendance at the banquet at the Hotel Metropole was the largest on record and a very enjoyable epening was spent. R. P. McLennan, of McLennan & McFeely, ably acted as toastmaster. Songs, speeches, stories, etc., were given and an exceedingly pleasant evening spent. Amongst those who were on the programme were Mr. McIntyre, Mr. Main, Mr. Welch, Mr. McKenzie, Mr. Anderson and Mr. Martin.

The committee in charge of the entertainment acknowledge the kindness of the Thos. Davidson Mfg. Co. for souvenirs, as well as Messrs. McLennan & McFeely, Wood, Vallance & Leggatt and Caverhill, Learmont & Co., who helped to make this convention one of the most successful ever held in British Columbia.

MacLEAN COMPANY'S NEW OFFICE IN MONTREAL

The Montreal offices of The MacLean Publishing Company, which for several years have been located at 232 McGill Street, have during the past week been removed to the handsome office structure erected by the Eastern Townships Bank. The new building is one of the finest in Montreal, standing ten storeys high. It occupies a commanding position at the corner of Victoria Square and St. James Street. It has been especially designed for commercial purposes and is one of the most costly and capacious in the Canadian metropolis. The edifice is of absolute fire proof construction and is built of granite and Ohio sand-stone. Some idea of its character and importance may be gauged from the fact that the Builder's Exchange of Montreal have taken the whole tenth floor where they will have a permanent exhibit of building materials.

The corridors throughout the building are finished with Mosaic floors and marble wainscotting. The offices are finished in mahogany and possess an abundance of light. From every quarter the out-look is delightful one and from the suite of apartments for business and editorial purposes, which have been leased for a term of years by The MacLean Publishing Company, a fine perspective of the harbor and the new piers is obtained, while from the front the beautiful green sward, splendid trees and stately monuments of Victoria Square are in full view.

Commodious Quarters.

The new offices of The MacLean Publishing Company have been specially fitted up for their convenience with every degree of comfort and facility for the transaction of business. The ceilings are high while there is an abundance of floor space for the members of the large staff, the business and editorial rooms being separate yet within easy reach of each other. There is a special elevator accommodation, three high speed traction elevators being installed. This is the only installation of its kind in Montreal, a feature of which is the rapidity and ease with which they can be operated. The cars can be reversed at top speed without any noticeable discomfort to the passengers.

Each floor of the magnificent new building has its own vaults. There are mail chutes, electric light, telephones, electric bells and other modern features on every floor which make the new premises of The MacLean Publishing Company, which are within a few yards of the late offices, ideal and central from every standpoint.

Other Firms There.

Some of the most influential and oldest established commercial, insurance and manufacturing firms in Canada have secured quarters in the new Eastern Townships Bank building. Among them may be mentioned, the North American Life Insurance Company, The Prudential Life Insurance Co., The Canadian Light & Power Co., The Montreal Cotton Co., The Mount Royal Spinning Co., The Clinton Fire Proofing Co., The Montreal Printers' Board of Trade, The Canadian Consolidated Rubber Co., Stinson-Raeb Builders' Supply Co., The Builders' Exchange, The United States Consul Offices, and many others.

In its removal to brighter and more modern premises the Montreal office of The MacLean Company is only keeping step with the constant development and expansion, which has been characteristic of the greatest publishing house in Canada since its inception.

The members of the large staff will be pleased to meet all their old friends in their new quarters or any visitors who may be in Montreal on business or pleasure. They will find a warm welcome at the MacLean offices in the new and handsome Eastern Townships Bank building.

THE TRAVELERS' HOTEL.

A fine room will make up for a whole lot of deficiencies in other departments of an hotel, but when, besides, a splendid room, one gets excellent service in every respect, then, that hotel is well worthy of patronage. Walter Walby's hotel, the Cecil, in Ottawa, is one of the most modern in Canada. The bedrooms are all most modern. The beds are equipped with Astoria box springs and Ostermoor mattresses, and each and every room has running water, while a large proportion of the rooms are provided with bath as well, and such a room may be had for the asking. The newly arranged dining-room is certainly one of the best in Canada, the food being substantial, well cooked, and offering a variety that does not get monotonous. As it stands to-day the hotel has cost a quarter of a million dollars. It is Mr. Walby's aim to make it the finest commercial hotel in Canada. The traveling salesmen who patronize him think he is succeeding.—Advt.

VAULE OF A TRADE-MARK.

H. H. Stevens, of the Stevens-Hepner Co., Port Elgin, Ont., manufacturers of brooms and brushes, gave a striking example a few days ago of the value of trade-marking a line and then making this trade-mark stand for something to the trade.

Mr. Stevens recently sold a Canadian jobber a very large order of brooms. The jobber wished his own private brand on each of the various grades with the exception of the Klondike.

Why was this exception made?

The Klondike is a high-priced broom and the jobber realized he would only be able to get the price he would have to charge for this broom by convincing the trade it was the very highest quality. This work had already been done by the manufacturer who had advertised this brand in Hardware and Metal since it was first placed on the market and the jobber decided to take advantage of the favorable impression that had already been created for this line.

IRON BOUNTIES TO EXPIRE.

In his budget speech on Tuesday, Hon. W. S. Fielding made a significant allusion to the steel, iron and lead bounties. He said that the iron and steel bounties would expire next year, and the lead bounty in 1915, so that whatever might be said with regard to these bounties, the heaviest item would expire shortly, and there was hardly room for contention as their proper place in the accounts.

Interviewed on the question, T. J. Drummond, of Drummond, McCall & Co., Montreal, stated that he thought that if the bounties on iron and steel were abolished, a readjustment of the duty on iron and steel imports should be made to provide for home producers' adequate protection. The bounty on pig iron constituted a sort of protection of this product. If the bounty was removed it would be only fair to Canadian producers to raise the actual tariff on pig iron coming into Canada. Nothing definite could be said as to the interests concerned asking the Government for a continuance of the bounties.

CANADA'S IRON AND STEEL PRODUCTION.

Although the pig iron and steel returns for Canada for 1908 show a decrease over the figures for the previous year, it cannot be said, considering the restricted buying of the railroad and other large concerns, that the falling off was very remarkable. Last year was not a good year for iron and steel in any country. In the States there was a considerable reduction of output, lower prices, and a general slow consumption. It is evident from the fact that Canadian pig iron production was only 25,000 tons less than the previous year's total, that we did not feel the general setback so acutely as our neighbors, and in addition producers held the prices more firmly.

It is interesting to note that the tot output of finished steel for the second half of last year showed an increase of 43 tons over the first half, proving that buying improved towards the end of the year. Although many authorities claim that copper now reflects more accurately trading conditions, there is no doubt that the pig iron and steel returns are still the best barometer of the trading of the country.

According to unpublished returns gathered by Hardware and Metal from the six large producing corporations in Canada, the total production of pig iron in Canada for 1908 was 556 044 tons which compares very favorably, considering conditions, with the amount returned for 1907, which was 581,146, a decrease of about 25,000 tons. Of this total for last year, basic comprised 155,734 tons, foundry 170,388 and bessemer 155,734. Comparing the figures for the first and second half of the year the totals were 281,329 tons, against 274,715, a decrease for the latter term of 6,614 tons.

The returns from eight companies making steel showed an output of ingots, etc., of 558,763, compared with 706,982 in 1907, a decrease of 148,219. The total output of finished steel, comprising rails, bar steel, railroad spikes rods, plates, etc., was 538,842 tons. The first half of the year produced 247,803 tons, and the second half 291,039, an increase for the second term of 43,236 tons.

The total tonnage of rails amounted to 268,439 blooms to 153,541, finished rolled iron and steeel 45,411 and castings, 9,676 tons.

BRITISH COLUMBIA HARDWARE CONVENTION.

Readers of Hardware and Metal throughout Canada and in British Columbia particularly, are urged to read the report of the B. C. Hardware Dealers' Association convention elsewhere in this issue.

Although the membership is confined largely to two or three coast cities the association is doing work beneficial to the trade in all parts of the province. The lien law, for instance, which they have been promised by the Government, will be valuable alike to the dealer in the coast city, the Okanagan Valley or the Kootenay or Crow's Nest mining camp. And the elimination of price cutting in the large cities is also helpful to the trade throughout the province.

The president's address, with its tone of optimism and its statement that the trade is in such excellent shape as to be able to report "no failures," makes good reading, while the other work done by the association, coupled with the advantages of listening to the interesting "Question Box" discussion and fraternal fellowship with other hardware retailers, all help to make the convention a feature few who attend once will miss again except under unavoidable circumstances.

If British Columbia can have a successful retail hardware association surely Manitoba, Saskatchewan, Alberta and the Maritime Provinces ought to be able to make a success of a similar trade organization.

The fishing season, for most varieties, opens about the first of May. The progressive merchant will anticipate the demand by making early displays of fishing tackle.

Stepladders, slop pails, mops, etc., will be in demand soon for house cleaning. These articles should be where the customer will see them. The mere unspoken suggestion will make sales.

Make a window display of articles for putting the lawn in shape for spring. It will catch the eye of the householder and get the business.

PEDLAR AGENT MAKES CHARGES.

Editor Hardware and Metal:

During the past three months you have seen fit to condemn my principles for the policy they had pursued in marketing their product in this country. I have read every article that appeared in your journal, and was many times prompted to answer same, but my better judgment prevailed and I treated the articles with silence.

Fully appreciating the reasons that prompted you in criticizing any act of any manufacturer that was detrimental to the merchant whose mouthpiece you are supposed to be, I felt all along and do so yet, that you were prompted to criticize the Pedlar People only because they were not then using your paper as an advertising medium, whereas you were displaying the advertisement of three other firms in this country, whose sins I can prove were as great and as many as our own. I have been many years engaged in this business, a great many more than 90 per cent. of those who are now associated with it, and my memory is good, and I can fill every column of your journal for the next fifty weeks with specific cases, wherein other manufacturers have undersold the hardwaremen and the tinsmiths to the farmer direct, and they are doing so to-day. It is only last week that Messrs. Lacroix & Leger, of Montreal, and Lariviere Incorporated, also of this city, complained to me a certain manufacturer was selling his product to the residents and carpenters in their district at a cheaper price than they could buy at, asking me at the same time to reduce my price below cost to them, so that they could meet this unfair competition. Don't take my word for it; but send one of your young men to interview Messrs. Lacroix & Leger, Lariviere Incorporated, Francis Martineau, Maison Jean Paquette, or any other wholesale jobber in Montreal, and ask them the question, "Who has protected the trade in your city in the last ten years?"

W. E. RAMSAY.
Montreal Office, Pedlar People.

The writer of the above letter has asked Hardware and Metal to verify charges that other metal roofing manufacturers have sold to consumers at prices lower than quoted to the retail trade. This verification is being sought and Mr. Ramsay's letter is, in the meantime, being published. It might be said, however, that the only time the name of any manufacturer has been published in connection with charges of unfair methods of selling was when a subscriber supplied us with the copy of a letter written by a branch manager of a metal roofing concern, the letter stating that his traveler should keep away from hardwaremen and tinsmiths.

Mr. Ramsay does not stop at charging other manufacturers with treating the trade unfairly, but also charges Hardware and Metal with criticizing his company because they were not advertising in our pages. If Mr. Ramsay will take the trouble to turn up page 43 of Hardware and Metal, March 27, the issue the Pedlar People placed a two-page announcement in our advertising pages, he will find that Hardware and Metal reiterated its former criticism of roofing manufacturers who endeavor to cater to the hardware trade while also seeking custom at the same prices from consumers.

It is a long time since Hardware and Metal has been charged with being the representative of special interests in the manufacturing or jobbing branches of the trade, and Mr. Ramsay, if he looks upon Hardware and Metal as a blackmailing newspaper, is not likely to find many who agree with him.

The strength of this paper is in its position as a representative of every branch of the hardware industry, manufacturing, wholesaling and retailing. Recognizing that the retail branch is the backbone of the trade, and upon their success or failure rests the prosperity or depression of the other branches, Hardware and Metal has not hesitated to criticize, or give space in its columns for subscribers to criticize, any tendency in the trade to weaken the resources and influence of the retailers.

This metal roofing controversy is a case in point. One manufacturer had apparently deserted the retailer to seek the trade of the consumers, and conditions were rapidly developing to a point where other manufacturers would have to follow the example, the result being to take away from the retailer a profitable branch of his trade. Hardware and Metal criticized (1) the manufacturer who was openly seeking trade from the consumer at cut prices, and (2) the retailers who were neglecting their opportunities to develop sales for metal goods, helpful suggestions being given as to means of securing additional trade. In its endeavor to hold the metal roofing business in the hands of hardwaremen and tinsmiths Hardware and Metal considers that it was acting in the best interests of the manufacturers, as well as the retailers.

If the firms Mr. Ramsay names can make good his charge that other manufacturers are selling to consumers at wholesale prices, giving specific instances, of course, Hardware and Metal will freely give space to statements from the firms concerned as well as to communications on the subject from any member of the trade.

DEPARTMENT STORE SCHOOL BOOKS.

In giving a practical monopoly of the school book business of the Province of Ontario to the T. Eaton Company of Toronto, the Whitney Government have dealt a smashing blow at the retail trade of the province.

The department store octopus, having secured the contract for publishing the new Ontario readers at a ridiculously low price, will now proceed to corner the distribution of the books. The contract entered into with the government calls for the sale of the books to any one at twenty per cent. discount.

Retailers are on precisely the same footing as the public and it is easy to see that the public will buy where it can get the books cheapest.

The government boast that they have broken up the school book ring. They have practically created a worse monopoly than ever, ignoring the just claims of the retailers and depriving thousands of merchants throughout the province of a legitimate source of income.

When the government ranges itself on the side of department stores and mail-order houses and openly attacks the retail merchants, it is time something was doing.

Every book that goes out will bear the name of the T. Eaton Co. By charging a portion of the cost of printing to the advertising account it is no wonder that such a company could do the work cheaply. This, however, does not aid the general merchants all over the province of Ontario.

SPRING ROLLERS FOR AWNINGS.

The spring rollers for awnings now being installed for several customers by Wm. Bartlett & Son, Toronto, are something of a novelty in Canada. They are built of thick tin tubing on the principle of the window shade roller, having a powerful steel wire spring in one end. As with the window shade roller, they are set up on two brackets—one a slot and the other a ring. The slotted bracket has a cotter pin to prevent the roller jerking out. The chief advantage of these spring rollers appears to be the ease with which the awning may be raised and lowered. With a very minor expenditure of effort they may be lowered in the same way as a window blind. In raising them a slight pull downwards starts them going up of their own accord. They are very nicely counterbalanced by adjusting the spring when the awning is put up. To prevent the wind lifting them a simple ratchet attachment is fixed to the wall which effectually prevents accidental raising. It is claimed that whereas with ordinary awnings rollers more or less effort is used in raising the awning, with the spring roller whatever little effort is required is expended when lowering the awning.

Lawn mowers will soon be the style again. It will not be long before spring flowers and the green grass will begin to spring up.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 66.

MARKETS IN BRIEF.

Montreal.

Tin—Firm.
Spelter—Unchanged.
Shellac—Lower quotations.

Toronto.

Middlesborough Pig Iron—Down $1
Pig Lead—Decline of 15c.
Bright Wire Screw Hooks—Greater discount.
Gate Hooks and Eyes—Now 60 and 20
Spring Hinges—Some lines lower.
Awls—Some makes 10c lower.
Cow Bells—Drop on some lines.
Shellac—Lower prices.

THE METAL SITUATION.

There has been very little change in the primary markets. Consumption has been apathetic, except in the case of spelter, and large users are still holding off with a great amount of patience. Tin has fluctuated but little in price in London, and considering the absence of speculation has shown surprising firmness. New York has shown a livelier interest in the metal. Copper has been weaker again. The New York market has been dull and easy, a condition not improved by lower figures in London. It is estimated that exports from New York for the first half of the month were 14,500 tons, which is better than any previous month this year. This should help things considerably, especially if the rate is improved as time goes on. It will clear off some of the heavy stocks. Spelter continues to advance both in London and St. Louis. Consumption is good, and stocks none too heavy. Lead has shown signs of sagging again. Irons and steel conditions are much brighter in the Old Country. Exportation has improved as well as the home consumption. Cleveland warrants are quoted at 47 shillings and ninepence. Scotch brands have advanced 2 shillings a ton. While pig iron in the States is dull, there is a decided improvement in finished steel orders, and the prospects are that April will show a big increase on March, making the former the best month of the year. Prices are far from being uniform, but they are being held better than at any other time since the open market.

MONTREAL.

April 23.—There has been a decided improvement in trade this week. The falling off noticed round Easter has more than been made up, and the month promises to be a good one in the aggregate. In the circumstances the tone of the markets is naturally strong. There are no changes in prices, although with any help from the primary markets, tin and spelter would probably be advanced. First hands are somewhat quiet, and will be until the heavy spring shipments come in. Jobbers are not yet through with the metal they ordered some time back, but with the improved demand the remaining stocks will not last long. Consumers are still disinclined to cover future requirements. All metal ordered is being used at once, and this puts the markets in the best possible condition, presuming the foreign metal situation recovers itself strongly. Inquiries are better, and it is evident that consumers are keeping in close touch with conditions. They have this much confidence in the markets that they are suspicious of being squeezed on rising quotations.

Tin and spelter sold well during the week. Copper has not been so good. This metal at present is about the weakest of all, brought about largely by the sagging in New York. Lead is in good demand, but the English market is falling and that may slacken things off a little. Imported pig is quiet, and will be so until the heavy consignments arrive at the Port. The Canadian furnaces in the open market are firming their prices, and doing fair business.

PIG IRON—The lull before the arrival of the heavy shipments is now being experienced, and little imported pig is moving. The consignments on their way from Glasgow and Middlesboro are considerably heavier than they were at the opening of the season last year. Scotch brands are now up 2 shillings in the Old Country, so that these grades of pig iron will be advanced in price to those who have not already contracted. The withdrawing of the Eastern Canadian furnaces from the pig iron market, has improved the situation for the rest of the plants, and the market is much firmer. We quote imported pig, Clarence $16.75 to $17 ; Middlesboro No. 3, $16.50 to $16.75 ; Summerlee No. 1, $18.75 to $19 ; No. 2, $18.25 to $18.50.

TIN—Tin has been in much better demand. Orders have shown a tendency to improve in bulk, and the result is that the market is firm. Prices are unchanged at 32½c. for jobbing lots. The firm tone to the English market, and the absence of speculation, has given a much brighter aspect to the situation. The demand from Quebec Province shows distinct improvement, while West there has been good business moving. Consumers keep in close touch with the market, and plenty of business is ready to break in.

COPPER—Trade, although not so good as in tin or spelter, is improving and a stronger tone in New York would strengthen the situation considerably here. Prices are unchanged from the jobbing quotation of 14c. although the shading on large lots still continues. Orders are on the light side, but swinging in freely. Inquiries are good, and the market is being watched carefully. A stronger tone in New York would help to bring in a lot of business. The McDonald copper mine in Weedon Townships, Wolfe county, has been purchased by the Eastern Canada Smelting Co., who propose to erect a smelter and vigorously prosecute the development of copper production. It is not so much the prosecution of production, however, as the stimulation of consumption that is desired at present.

SPELTER—Spelter is firm at its increased price of $5.75. The advance has not checked consumption, and very good business has been done during the week. In fact spelter has been practically the best seller. The developing uses of the metal are opening up a fine consumption field. Again the firm character of the London and St. Louis markets gives a strength to the metal that is not lost sight of by consumers. Supplies are on the light side, and the whole situation is a strong one.

LEAD—Lead is unchanged, and we still quote jobbing lots for imported pig at $3.75 with Trail at $3.65. The demand continues to improve, but the sagging in the English markets prevents the home market from having the firmness that would otherwise obtain.

TORONTO.

April 23.—Trading is not at present showing the improvement it did some few weeks ago, though it is not unsatisfactory on that account. More buyers are in the field, but they are taking small quantities and buying from hand-to-mouth for work actually in hand.

Pig iron is easier, English pigs showing a decline in price owing to the opening of navigation in the St. Lawrence and the consequent lowering of freight rates. The advance noted in lead a week ago has gone off, and lead is back to the position it occupied during the first three months of the year. All the other lines show unchanged prices.

Brass tubing is easier; in some cases as much as 4c per pound. Copper bars and sheets, too, show a decline of about a cent a pound.

Some of the larger iron-working concerns of the province show improved business, but the newer and smaller works continue to be conservative and overly cautious. Stocks are in consequence accumulating, though not rapidly, as dealers have learned the lesson taught during the past year.

PIG IRON—The lower prices across the border have induced easier prices here. Although the quotations in the U.S. and those ruling here have not actually changed, local buyers could not be induced to take large quantities of pig as they could not be persuaded that the cut prices across the border would not affect the markets in Canada. Then Middlesboro pigs have dropped $1 a ton, because of the shorter rail haul and consequent cheaper freight rate, following the opening of navigation in the St. Lawrence. Canadian foundry is yet $18.50; No. 3 Middlesboro $20, and Cleveland $22.

LEAD—After going up to $3.90 a week ago, due to the activity of the market, lead has dropped back again to the rate prevailing for many weeks past. $3.75 is again the local quotation, and trading is fair. Bar lead has advanced ¼c per pound.

COPPER—The red metal is firm and active, and if it were possible for an advance to take place it would come right now as demand is good. Production is so far in advance of requirements however, that higher prices are not likely to take place for some little time. The local quotation is still 14c, which is a tempting figure, compared with the 23c prevailing some 17 months ago.

TIN—Unchanged in condition and still holding the 33c market quotation of a week ago, tin continues to be fairly active.

SPELTER—This metal has again become active and the price while remaining at the figures of the past two months, shows a firmer tendency. Consumers are none too well provided with metal and there is a very noticeable revival.

SHEETS AND PLATES—Good business is passing this week. Imports are expected in a couple of weeks' time when shipping can conveniently get up the St. Lawrence. No changes are anticipated in the selling prices of these lines for next season. There is not the same fluctuation in sheets or plates among the Canadian trade, that there is in other metals, because of the few and large importations early in the year.

OLD MATERIALS—Scrap zinc is the only metal showing a change, and that is a little firmer. Stocks are fairly large. Demands are frequent enough, but the orders call for small lots. Dealers are paying for heavy copper and wire, 11c; light copper bottoms, 10c; heavy red brass 9¾c; heavy yellow brass 8¼c; light brass, 6¾c; tea lead, 2½c; heavy lead, 3c; scrap zinc has gone up from 3⅛c to 3¼c and 3½c; No. 1 wrought iron, $10; machinery cast scrap, No. 1, $14; stove plate, $12; malleable and steel, $8; old rubbers, 7¼c to 7½c.

HARDWARE MARKETS

MONTREAL.

April 23—There is no mistaking the fact that the spring demand has come in strongly. Every day sees an improvement in the orders, and jobbers are hard pressed to get the goods out. Shipping however is being rushed as it is recognized that dealers, owing to their shortness of stocks, are in pressing need of fresh supplies. Heavy lines are moving better, but it is in shelf hardware that the greatest improvement has been shown. It is true that orders are still on the light side, but they make up for this in numbers. The essentially spring goods are in best demand, but as orders are of a very assorted character, all kinds of hardware are generally moving. Travelers, with the improvement in the roads, are getting about much better, and in consequence are booking more business. Quebec, as a whole, is improving but it is the northwest which relatively shows the greatest advance in buying. The maritime provinces are showing a steady demand.

House cleaning lines, gardening tools, especially hose and lawn mowers, and builders' hardware are moving splendidly, and the season for these goods promises to be a heavy one. Harvest tools are slow, while miners supplies have dropped off in the rate of movement, although a fair amount of trade is being done. Booking ahead is quiet, and dealers are still content to order cautiously, and at the last moment.

The markets generally are firm and unchanged. American prices on bright wire goods have advanced 10 per cent. and this will probably influence the Canadian market. At present no changes are announced.

SPRING LINES—The unmistakable spring rush has caused a steady drain on house cleaning utensils and gardening tools. Lawn mowers and hose are especially prominent, but all lines are moving, and even now there is a scarcity commencing to be felt by jobbers in some articles. Screen doors and hinges, green wire cloth, and poultry netting are also good movers. Ice cream freezers, refrigerators, and water filters are showing stimulation. We continue to quote: Screen doors, stained, $7.80; grained, $8.10; screen hinges, $9 a gross; poultry netting, 60 and 2½; green wire cloth, $1.70 in 100 feet rolls.

HARVEST TOOLS—Bookings continue on the quiet side, and it is evident that the demand in this, as in other lines will not be heavy until the consuming call is close at hand. We continue to quote: Hay fork pulleys, $1.60 to $8.50 a dozen; hay carriers, hay rakes, etc., 55 off.

WIRE—The rush movement in these lines continues, and there seems to be a feverish anxiety on the part of dealers to get their new stock. We continue to quote: Barb wire, car lots and mixed, $2.65; small lots, $2.70; plain, twist, car lots, $2.95; small, $3; plain wire, $2.30 base; barb wire, $2.65 in straight and mixed car lots, and $2.70 in small lots. Galvanized wire No. 9, $2.35 in straight and mixed car lots, and $2.40 small lots, f.o.b. Montreal. Coiled spring fencing, $2.65, straight and mixed car lots, and $2.75 small lots.

BRIGHT WIRE GOODS—There is a strong movement showing in all lines. American prices have advanced 10 per cent., but the local market has not yet been affected. We quote: Gate hooks and eyes, and screw hooks at 60 and 20 per cent.; stove pipe eyes, screw eyes, and square hooks, 60 per cent. Wire hat and coat hooks, 40c a gross.

TORONTO.

April 23.—"The hardware business is in first-class shape this week," said a prominent local jobber in discussing the trade situation. "It is improving right along, and while we could look after further and larger orders, we are fairly well satisfied with the trade that is passing."

Judging from the present number of orders calling for rakes, hoes, spades, etc., this should be called "garden tool week." The quantity of the heavier lines of agricultural implements going out has decreased somewhat, but the devotees of the little garden plot must be increasing rapidly, judging from the immense number of lighter tools going out to various portions of the province.

Prices are much the same as in the past. If anything, there is, on the whole, a firmer tone abroad, and while some odd lines show a decline, jobbers rather look for a general advance, than a slowing down. No important change is expected within the near future. The lines which show a lower price are bright wire screw hooks, gate hooks and eyes, helical spring hinges and an odd line of cow bells. Hickory neck-yokes, too, are at an easier figure. Scratcher awls show an advance.

SPRING LINES—Garden tools have the immediate call, immense quantities of rakes, spades, hoes, shovels and the smaller tools for garden beds being shipped this week. Fences of all kinds are asked for, especially wire and barb fencing. Poultry netting, too, is in splendid demand, and green wire cloth figures in every city and town order. Summer goods for lawn and house are being inquired about. A large number of screens for doors and windows have been booked for delivery later ion and a trade in summer lines fully equal to what is passing in spring goods is anticipated. Hickory neck yokes are slightly easier in price and Navajo cow-bells show a decline for No. 13 size from $1.95 to $1.25 a dozen. These are the only changes in seasonable goods this week.

HEAVY GOODS—Nails are going out still, though hardly so freely as last week. Stocks, however, are very low in the jobbers' hands. The season is yet early and the present year's indications are that the demand for nails will be equal to any previous year. Bar iron, rivets, bolts, nuts and other heavy lines are active, but screws are perhaps the best sellers just now in this class of hardware.

BUILDERS' HARDWARE—This past week has been a splendid one for builders' hardware goods. Building paper is particularly active. Cortland's helical spring hinges for screen doors have declined within the past few days. All sizes between 3-in. and 6-in. being affected. 3-in. has dropped from $10.80 to $9.75 a dozen; 3½-in. from $12.60 to $11; 4-in. from $15 to $13.45; 4½-in. from $18 to $14.90; 5-in. from $25.20 to $22.25. Bright wire screw hooks and gate hooks and eyes which were 60 per cent., are now 60 and 20 per cent. Builders' tools are fairly free in movement. One size (No. 2) handled scratch awls have advanced from 45c a dozen to 55c.

Trade News From Atlantic to Pacific

Quebec and Maritime

Winter Exports From St. John Show an Increase—Contracts Let for Many New Buildings.

ST. JOHN.

April 21.—A glance at statements published here last week shows that St. John's export trade is increasing very materially. Up to Saturday last, the exports to Great Britain and South Africa in the winter steamers amounted to $21,118,510 which is an increase of $526,114 over the same number of steamers a year ago. Indications point to 1908-09 being the banner season and the total value is expected to reach the $25,000,000 mark.

The export of lumber to the United States for the quarter ending March 31, 1909, is the largest in the port's history. The value of the product of American logs in that period is given as $224,881.99 as compared with $42,539.32 for the corresponding period in 1908. The total value of exports to the United States for the March quarter 1909 was $858,716.39 as compared with $280,700.21 in 1908, a gain for this year of $578,016.18. The exports of lumber to transatlantic ports for the first quarter this year show a falling off of 7,500,000 feet in deal shipments while there is a slight increase in the birch timber trade.

With the advent of milder weather building operations have opened up in earnest. Tenders are being called for by the provincial public works department for repairs to be made to the Provincial Hospital, Lancaster, St. John county. Plans have been prepared by H. H. Matt, architect.

The contract for the extention to be built to the Royal Hotel has been awarded to B. Mooney & Sons. The sub-contractors are :—carpenter work, J. Drury & Son ; painting, J. J. Johnston ; sheet metal work, J. E. Wilson Co., cast and wrought iron, James Flemming & Sons. The work includes a four-storey brick building on Germain to replace the old wooden building and a new storey on the Kaye building adjoining. The new addition will give the Royal thirty or more rooms, a number of which will have baths.

James H. Hogue has secured the contract for the extension to the Emerson & Fisher building, Germain Street. The extension will be in the rear of the building and will be thirty-eight feet long by eighteen feet wide, with offices upstairs and wareroom below.

Tenders for the construction of the wharf for the Francis Kerr Co., have closed, but the contract has not yet been awarded. The wharf will be 100 x 140 feet.

The Bank of New Brunswick has let the contract for its new building at North Head, Grand Manan, to A. E. Hamilton, of St. John. The building will be of wood, 35 x 30 feet.

The contract for the Elmira Branch Railway has been let to Whitehead Bros., Grand Falls, N.B., and work will be started very shortly.

The Maritime Oil Fields Co., is boring for oil at Leger's Corner and another well is projected about twelve miles east of Moncton, between Dover and Memramcook.

Merchants and manufacturers in the south end of the city are petitioning the I.C.R. authorities to establish a building office on their railway line near the Ballast wharf, to facilitate the handling of shipments in less than carload lots.

W. E. H.

HALIFAX.

April 19.—With the price list steady and the travelers sending in good orders the hardware business is in a most satisfactory condition. Collections are also very good, and on the whole the outlook is most favorable. Coasting vessels are now coming in in large numbers and trade with the outports is opening up well. The fishing vessels are also buying supplies, rope, hooks, trawls and such lines being in fairly good demand. The various industries are all working full time and the prospects for building operations are excellent.

The Dominion Iron and Steel Company's plant made a record output for the month in two of the most important items of production, namely, blooms and billets, and also in the matter of shipments, leaving far behind all previous figures, the total shipments being 30,000. All the departments of the big plant are working smoothly and the management look forward to still better records in the near future.

The mechanical staff of the Dominion Coal Company are busily engaged in the work of putting No. 12 colliery in a condition for an active summer's work. Practically all the heavy machinery has been assembled at the new colliery and is being placed in position at the various buildings. The work on the new bankhead is going ahead satisfactorily, and will soon be completed. Halifax men are largely interested in a syndicate of Toronto capitalists who have purchased large areas of pulp lands in Newfoundland. It is understood that in the near future the syndicate proposes to establish large pulp and paper mills.

Thomas A. McKay and Darwin Higginson, of Pictou, have formed a partnership and opened a hardware store.

Among the cargo landed here by the steamer Lake Michigan on Saturday was 2,400 boxes of glass from Antwerp.

The city Board of Works have just awarded to H. H. Fuller & Co., the contract for supplying the city with hardware for the present civic year. The contract calls for various supplies and totals annually from $4,000 to $6,000.

The following are the names of the master plumbers attached to the bill now before the Legislature: G. A. Wooten, George Perrin, W. S. Craig, John O'Toole, Richard Kinsman, James Farquhar, all of Halifax; Frank Dexter, of Truro, and John Ritchie, of Dartmouth. A clause in the bill states that the association shall have the right to purchase real estate to the value of $10,000 and to have such other powers as are usually held by such incorpoated associations.

Charles L. Jobb, representing the Consolidated Iron Co., of Canada (formerly the Canadian Iron and Foundry Co.) was in Sydney on business recently. This company manufacturers ingot molds for the Dominion Iron & Steel Co.

J. C. Turner, representing the A. R. Williams Machinery Co., of Toronto, was a visitor to Sydney last week.

The Nova Scotia Board of Fire Underwriters intend to bring an expert here from the United States to lecture. with illustrations, on the instalation and maintenance of electric light wiring, and the different systems. The idea is to get business men together and point out to them different defects in wiring systems and to give an insight as to how one may satisfy himself as to the non-defectiveness of wiring. There will be a series of four lectures.

Ontario Trade News

Chatham Merchants Considering a Plan for Co-operation in Collecting Accounts—Peterboro City Council Gives Local Merchants a Chance to Tender on Supplies—Building Active and Trade Reported Very Good.

OTTAWA.

April 20.—The remarkable activity in building operations is being more and more evidenced every day and last week more than a score of permits were issued. For the month of March this year the number of permits issued aggregate $144,174, as compared with $69,775 last year, a decided increase.

With this residential building, new stores are rapidly being erected and opened up in the new sections of the city. In Hintonburgh a new hardware store is being opened by D. Gosselin, on the corner of Wellington and Garland Sts. It is a bright store and is to be fully equipped so as to competently cater to the trade. Associated with Mr. Gosselin are J. Brisbane, formerly with Purvis Bros. in Sudbury, and Harold des Rivieres, who was last year with W. Graham and latterly with Butterworth & Co.

The local hardware association at its next meeting on the first Tuesday in May will have some impotant business to transact. Keen interest is being maintained in the euchre competition, but it is hoped all of the members will endeavor to be present at the remaining sessions before the summer recess, so as to not only increase the enjoyment of the contest, but to aid in the discussions launched at the meetings, and assist in the promotion of good business methods. One night a month spent in the interests of their calling and with a view of strengthening the fraternal ties should be profitable and enjoyable.

Council has decided on the erection of a new steel and concrete combined grand stand, sub-police station and fire station for the Exhibition grounds, at an estimated cost of $85,000. It is the intention to rush the work so as to have it completed in time for this year's fair, and in this connection are calling for tenders up to May 3. Tenders are also being asked for a 25-h.p. steam boiler, locomotive type.

A campaign of advertising is being planned by the Ottawa Paint Works, in the towns of the Ottawa valley, and local hardware dealers should take advantage of such publicity to increase their own trade.

The Canadian Gazette announces the incorporation of the Horwood Glass Mfg. Co., Limited, with a capital stock of $20,000. Head offices to be in Ottawa.

Charles Watt has secured the local agency for the McClary refrigerator, manufactured in Kendalville, Ind.

Lewis Acheson, who has been connected with the Ottawa Hardware Co. for ten years, is leaving to accept a position in Kenora. Last evening he was presented with an engraved gold locket by the young people of Stewarton church, and by the choir with an umbrella.

G. E. M. H.

KINGSTON.

April 20.—Merchants report the spring business rather quiet, although there has been quite a sale of dairy utensils. This week there was a demand for gardening tools and builders' supplies. The merchants say that they will be busier in a couple of weeks.

The sporting goods men are very busy, placing their stock in a prominent place, and dressing windows. Nearly all the amateur baseball leagues, and there are a great many of them, have organized and are busy looking after bats, balls, gloves, etc.

It would appear as if Kingston is about to experience a building boom, as the returns at the city engineer's office show that already sixty-five permits have been issued for buildings, and fifty permits have also been issued for plumbing alterations.

Ald. Carson stated to-day that he would erect a block of six cement houses on the corner of Queen and Clergy Streets. The block will be two storeys high.

Lemmon Bros. will establish a knitting mill on Earl Street.

The big bell for the new city hall dome is expected to reach here in a week or so. The fact that a Baltimore foundry company secured the contract for the bell caused a great deal of comment. The bidding for the contract was between English, Canadian and American firms, but as the American firm was the lowest among eight other bidders, they received the contract.

E. G. B.

PETERBORO.

April 20.—The Peterboro city council is inclined to be thoughtful of its merchants, and particularly the hardwaremen. A supply of sewer pipe was to be secured and while it was at first suggested to buy it direct from a Toronto firm, it was decided to give the hardwaremen a chance to obtain the contract, which was enlarged to include the supply of sewer pipe for all the work that is to be done this summer. One firm will get it, or the supplying will be equally divided.

F. R. J. MacPherson, R. MacGregor and Mr. Miller waited on the fire, water and light committee of the city council last week with regard to a petition for the licensing of electricians. They ask that a by-law be passed providing that all persons doing wiring and fitting for the purpose of providing the city with light and heat be compelled to secure from the city a license to do such work for which they shall pay fee of $25, and that each contractor shall be compelled to attach to the job or the contract a label bearing his license number and name, and such contract shall be open to the inspection of the board of fire underwriters and any person doing work without the above license shall be liable to a fine or imprisonment. This is as much to protect the public as it is to keep only properly qualified men doing the work. The men mentioned are plumbers as well as electricians and are among the foremost in the city.

H. T.

HAMILTON.

April 20.—An important deal was put through a few days ago whereby Walter Woods & Company took over the building of the Skedden Brush Co. The latter building is a new one and is of good size. It will be devoted to the broom-making industry.

The "Boom Hamilton" organization is settling down to work in real earnest and promises to bring good results for the business interests of the city. The society has been prefected and committees have been appointed on membership, publicity, transportation, convention, finance, civic improvement and legislation.

W. B. Champ, secretary of the Hamilton Bridge Works Company, and president of the Board of Trade, was married on Saturday last to Miss Jessie Coates, youngest daughter of Mr. and Mrs. John Coates, of Ottawa. The directors of the Hamilton Bridge Company entertained him at a dinner at the Hamilton Club last week and presented him with a solid silver tray.

The merchants here have taken a step which it will behoove their brethren in other cities to benefit by. They have been instrumental in preventing the opening of any more moving picture shows on the principal streets. The city did not have the right to compel those already doing business to close up, but owing to the agitation of the merchants they put the plug in so that no new ones can start up. These shows are a great eye-sore and detract very much from the beauty of a location. They also interfere with trade as people do not wish to stop to look in show windows adjacent to them.

Bowles Bros., Toronto, will open a five, ten and fifteen-cent store on the market square.

Havers Bros., tinware and hardware, have opened up their new store on Macnab Street, in the market square, with a full line of up-to-date goods. The site is one of the best in the city for such purposes as it is within convenient reach of all the farmers who come to the central market.

D. L.

LONDON.

April 20.—Retail hardware trade continues to pick up locally, and there is every reason to believe it will still further improve as the season advances. Owing to bad roads business in the country towns was not any too good last week. However, with a few days of settled fine weather things will brighten up considerably.

The employes of the McClary Manufacturing Company gave two ministrel performances in Bennett's theatre last week.

The farewell banquet tendered on Saturday night to R. S. Wilson, who for the past eight years has been buyer for the McClary Manufacturing Company, on the occasion of his severing his connection with that concern to engage in business in Vancouver, was enjoyed by all present. Mr. Wilson left this week to take up his new work, being accompanied on the trip by Col. Gartshore, who goes west on business.

F. T. Y.

WOODSTOCK.

April 20.—W. J. Taylor, contractor, Woodstock, has been awarded the contract for the new post office at Welland.

The Russell Harvesting Machine Co. have issued a prospectus, the capital being quoted at $200,000. The proposed site is Woodstock and the charter calls for the manufacture of a new invention for shocking sheaves as they leave the binder.

Work has been commenced on the new factory of the Oxford Knitting Co., Woodstock.

The Watt Hose Coupler Co., Woodstock, have issued their prospectus. The coupler is a new invention and hose can be coupled instantly. It will mean a great saving of time to all fire departments throughout the United States and Canada.

The James Stewart Co., Woodstock, have started to manufacture several

new styles of ranges and heaters. They report business picking up in the west.

Fred W. Karn, Woodstock, has just issued his annual catalogue, and the distribution has taken place. Mr. Karn places these with all builders' and farmers throughout the county and claims it is a great help in business. This should be a hint to other hardwaremen who are anxious to double their business.

Gardner & Co. report the hardware trade very brisk at present with a good outlook for the rest of the year.

A. H. Gingerich can show most hardwaremen an example in the way of dressing a hardware store window. He has always something catching to the eye and claims it brings results.

T. J. O. R.

GALT.

April 19.—Galt manufacturers are exceptionally busy at present. The number of orders coming in are greater than ever before, and from present indications it would seem that the prospects are for a banner year in industrial lines. The Goldie & McCulloch Company have recently completed the instalation of several large safes and vaults nn the Maritime Provinces, and all departments are working full time. The same condition of affairs prevails at the MacGregor works.

The Galt Art Metal Co. recently received an order for a carload of shingles from Port Trinidad, Spain, and with hundreds of orders to fill the plant is kept running 24 hours.

Both brass factories in Galt are running overtime and taken altogether industrial affairs are in a much better condition than before the depression.

J. H. LeFavor, general manager of the Canadian Brass Co., is in northern Ontario in the interests of his firm.

The water commission is providing work for the plumbers. At a meeting on Tuesday evening it decided that all water pipes leading to closets should be fitted with a shut-off, which would be used in cases of leakages. As there are more than 500 services in Galt it will be quite a job to install all the shut-offs.

The commission will also ask for tenders on two tons of lead pipe.

One hundred new houses will be built in Galt this spring and already the builders are hard at work

B. E. C.

CHATHAM.

April 20.—The debt collection problem here is still unsolved, though since the March meeting of the Retail Merchants, it has received the earnest consideration of the special committee appointed to look after it. At last week's meeting of the association, in the absence of Chairman Hodges, Peter Cunningham reported that the committee had taken the matter up with a number of professional collectors. None seemed to be in a position to accept the post at present, though several were willing to consider it later on. The feeling seemed to be that, instead of asking the collector to name terms, the association should frame a definite proposition. Quite a number agreed with this view. The subject was earnestly discussed. It was thought by some that while the collector bore the title of official collector for the association, he should make his arrangements with the merchants individually as to remuneration, same to be based on the amount of business truned over to him. That merchants might at present have individual collectors whom they would be loath to relinquish for the official collector was also urged. On the suggestion of Wm. Anderson, who gave an outline explanation of the Guelph collection scheme, the secretary was authorized to ask Mr. Scroggie, the Guelph collector, to visit Chatham and address the merchants with regard to the system in vogue there. In the meantime the committee was continued in office, President Westman warmly commending their work.

Fishing tackle is in vogue just now. Westman Bros. have a timely window display in one of their small corner windows, a catchy feature of which is a number of lines suspended from the top of the window, with hooks hanging from the lines. Articles of fishing tackle are scattered on the bottom of the show window.

There is a big demand for grass seeders in Chatham this spring. This afternoon a hardwareman stated that at the present moment he knew of only one seeder, and that a second-hand, for sale in the city. Seed is cheap this year, and farmers are planting instead of selling. Though one would hardly imagine the dictates of fashion as having anything to do with the demand for seeders, such is stated to be the case. Clover seed forms the base of a number of colors. These colors are unfashionable this year. As a result, clover seed has dropped in price from $9 or $10 a bushel to about $4, and farmers are planting it instead of selling it. Further result, a rush for seeders, the like of which hardwaremen have not known in ten years.

The old shed in the rear of J. C. Wanless' store has been pulled down, and the ground on which it stood will be cleaned up, levelled and made attractive. The store (particularly the office) has a much better light as a result.

Westman Bros. have adopted the idea of arranging wide show tables down the middle of the front of their store, and displaying smaller articles of hardware and tinware thereon in bargain counter style. Price tags are a feature, and the idea seems to be working very well.

Building prospects are excellent. Two large contracts have been let in the last two days. Yesterday the contracts for the new Ursuline College auditorium were signed, the major portion of the work going to the Blonde Lumber & Manufacturing Co. To-day Moore & Stephens were awarded the contract for a big extension to the Chatham Wagon Co., practically doubling its capacity. The first contract is stated to be $27,000, while the other is pretty nearly as much. Throughout the country much building is going on.

There ought to be considerable work for plumbers this season, in instaling sanitary conveniences in residences here. While there are still plenty of houses without them, experience is rapidly showing the owners that a house for rental without sanitary conveniences is practically a drug on the market.

J. E. Guild, of Highgate, has received the contract for a metallic ceiling for the Muirkirk school.

W. R. Waghorne, manager of the Consumers' Gas Co., of Wallaceburg, has been appointed manager of the Premier Electric Light Co., of the same place, in succession to H. A. Stonehouse.

Geo. Laing, the Ridgetown hardwareman, attended a shooting tournament in Exeter last week.

Deputy Inspector Skelton, of London, visited Blenheim recently and inspected a number of gas meters, in response to complaints. The test, however, proved very favorable to the gas company.

The Prairie Provinces

Winnipeg Retail Hardware Association Complains of Unfair Competition—Conditions in the Western Stove Trade.

WINNIPEG.

April 19.—The stove trade in Winnipeg and throughout the west is far from being as encouraging as one would naturally expect. At present the booking for spring shipments is much smaller than in previous years and the sorting shipments for spring and summer use are very light. The reason for this may be largely from the fact that many settlers bring their effects with them. This is true, at any rate, of the Ontario and American settlers. In the fall season many of these will require stoves for heating purposes, but just now the demand is very weak. The European settlers are not in a position to procure good stoves and ranges when they arrive, and they use the cheapest lines obtainable for the first year or two, when they usually invest in a more expensive article.

Although the trade at present is not very good yet the outlook is quite encouraging. The small spring shipments will inevitably mean large fall shipments, and if the coming crop is on a par with that of last year, there will be an excellent trade in cooking and heating stoves. On the whole the stove situation has improved over previous years.

J. J. Foot, manager for the local branch of the McClary Foundry Co., in referring to the competition between American and Canadian stove companies, said, "One of the worst features in the trade here is the competition which comes from the United States in the shape of their offering large western buyers stoves of all kinds at prices f.o.b. manufacturing point

from 40 to 70 p.c. below their home trade price, which is in many instances higher than for similar articles in Canada."

F. W. Morse, vice-president of the Miller-Morse wholesale hardware house, is leaving the city on Wednesday, April 21, for a three months' trip to Europe.

The Manitoba Rolling Mills Company of this city is prepared to expend $200,000 on extensions to its property and plant. This means increasing the capacity of the plant to four times what it now is. Initial plans have been prepared which call for four furnaces. With these it will be possible to work double gangs on both the night and day shifts, giving a total output of from 75 to 100 tons of finished iron per day.

G. F. Stephens, head of the paint and varnish firm of that name, has been touring the southern states during the past winter and is expected home next week.

Robert Wyatt, sr., who has been in the retail hardware business in this city for over thirty-one years, returned last week from a pleasure trip in southern California, where he has been for the past four months.

At the last meeting of the retail hardware merchants association held on the evening of April 12, a committee was appointed to interview the wholesalers regarding the competition which has existed between them. The retailers request specifically that the wholesale houses cease selling to contractors. The committee has conferred with several wholesale managers and they have been very much encouraged with the compliance which was granted their request. The retailers will have little to fear in the future if the wholesalers generally concede to this request, since it was their chief annoyance for some time. J. H.

EDMONTON.

April 17.—Trade has been fairly good this week, although backward spring weather seems to have retarded business to some extent. The situation has been saved for the farmers, by several light snowfalls, which it is claimed will help take the frost out of the ground.

The principal demand has been for nails, wire, green wire cloth, poultry netting, galvanized pails, enameled ware, shovels, clevises, etc.

A. A. Andrews, vice-president of the Winnipeg Rubber Co., called on the trade here this week.

M. H. Souch has sold out his hardware business at Stettler to The Skinner Hardware Co. J. H. H.

British Columbia.

Victoria Hardwareman to Build New Store—New Power Company at Vancouver—Quartz Mining to be Developed in the Yukon District.

VANCOUVER.

April 17.—At last it appears as if there will be something doing with the proposition of the Stave Lake Power Company on Stave river, about thirty miles from this city. For some years past, development of this waterpower has gone on slowly, but it is now announced that work will be active since eastern Canadians are to put up $2,500,000. C. H. Cahan, a leading lawyer of Montreal and Halifax, A. R. Doble and A. M. Aitkens, of Montreal, are here this week and are spending a couple of days at Stave river, looking over the property. Just what this will ultimately mean to the lower mainland of British Columbia is difficult to prophesy. With other and cheaper power producing methods coming into vogue, by the time this is ready for operation, waterpowers may have taken second place. This, however, is only supposition. Still, the situation in Vancouver and vicinity will be an interesting one with two companies in the field. The B.C. Electric Company now controls with lines of railway in Vancouver and New Westminster, and suburban and interurban lines, including the one under construction to Chilliwack. It controls the electric lighting and gas franchises in Vancouver, and the electric lighting in and around both cities. It also supplies power, all of which comes from the large plant at Lake Buntzen, which is to be so improved as to give much more power. With such a hold on the communities, it will be a hard job for another company to get into the game. It has been stated that the Stave Lake Power Company will make a specialty of supplying power for industrial purposes, and in this line there will be considerable room with the number of large and small enterprises that are being established. With more companies in the field, the better it should be for the manufacturer, who can stand all the cheap power he can get.

Hardware dealers as a whole report trade good with prices firm. Conditions are all that can be desired, with the exception perhaps of the lack of marked activity in the lumber industry. Business, though, is ahead of last year's with the spring trade opening up better and with outward shipments from wholesale houses exceptionally heavy.

E. J. Chamberlain, general manager of the Grand Trunk Pacific, left for the east on Wednesday, after a trip to Prince Rupert. He expressed himself as quite satisfied with the outlook in the north. Before going away, he stated that exploratory parties would be placed in the field shortly to ascertain the shortest route between Vancouver and Fort George, as for some years to come this would be the principal centre of activity. He did not think the contract for the second 100 miles of the coast section would be let before September.

Building permits for the last week are larger than usual, the total value being $356,625. Four fairly large items were included in the list, namely, the Mount Pleasant Presbyterian church, $40,000; Seabold's brick apartment house on Thurlow Street, $20,000; two-storey addition to Evans. Coleman & Evans' building on Cordova Street, $25,000; office biulding for Dr. Tunstall, on Granville Street, $20,000. The remainder were dwellings and repairs.

News of more than passing importance is brought to Vancouver by Chas. Black, a young lawyer, who has been living in Dawson for some years, and who will take up his residence here. It is that rich quartz has been discovered on the Dome, the place in the Yukon where a large number of gold-bearing rivers rise. The values have been assayed very high, and if the find pans out to what it is anticipated it will mean the discovery of the mother lode, which must necessarily be very rich since such large quantities of gold were found in the creeks. If quartz mining sets in, it will mean renewed activity there and a corresponding activity in business circles in the coast cities. It will be just what Prince Rupert needs to give it a good start.

VICTORIA.

April 15.—Building still continues brisk. Forty new houses can be counted in one new section just opened up last fall and at a low estimate these houses will represent a building value of $100,000. All this building means activity in many lines of trade, and the hardwareman and plumber come in for a good share of it.

A company has been formed with a capital of $25,000, for the purpose of taking over the business of J. Colbert, plumber, who was burnt out in the recent fire in the Pemberton block.

Wm. Bownass, hardware dealer, 1106 Government Street, has bought a building lot on Broad Street, next to D. Spencer's. Mr. Bownass is to build a handsome building which he will occupy on its completion. The premises occupied at present have been acquired by the Royal Bank, which will erect a new office building on the site. This is the reason Mr. Bownass has secured this new property. Mr. Bownass says it was a case of either buying or going out of business, as it was impossible to secure a store of any sort at all suitable to his requirements. The new block will be used entirely by Mr. Bownass in his hardware business, which has grown to a great extent since he began business here some years ago.

Building permits to the value of $24,950 were issued yesterday. Of that amount $18,000 will be spent on the erection of a business block to be built by Lee Cheong, Lee May and Lee Yan You on the corner of Broad and Johnson Streets, work on which has already commenced.

Extensive improvements have been made to the premises of Dixi H. Ross & Co. A new kitchen has been put in and new machinery has been installed to make the plant up-to-date.

It is proposed to extend the present fire limits to permit of manufacturing and business blocks to be built in what is at present an exclusively residential district. W. B. C.

THROW A SPRAT TO CATCH A MACKEREL

You can't fish without good bait.

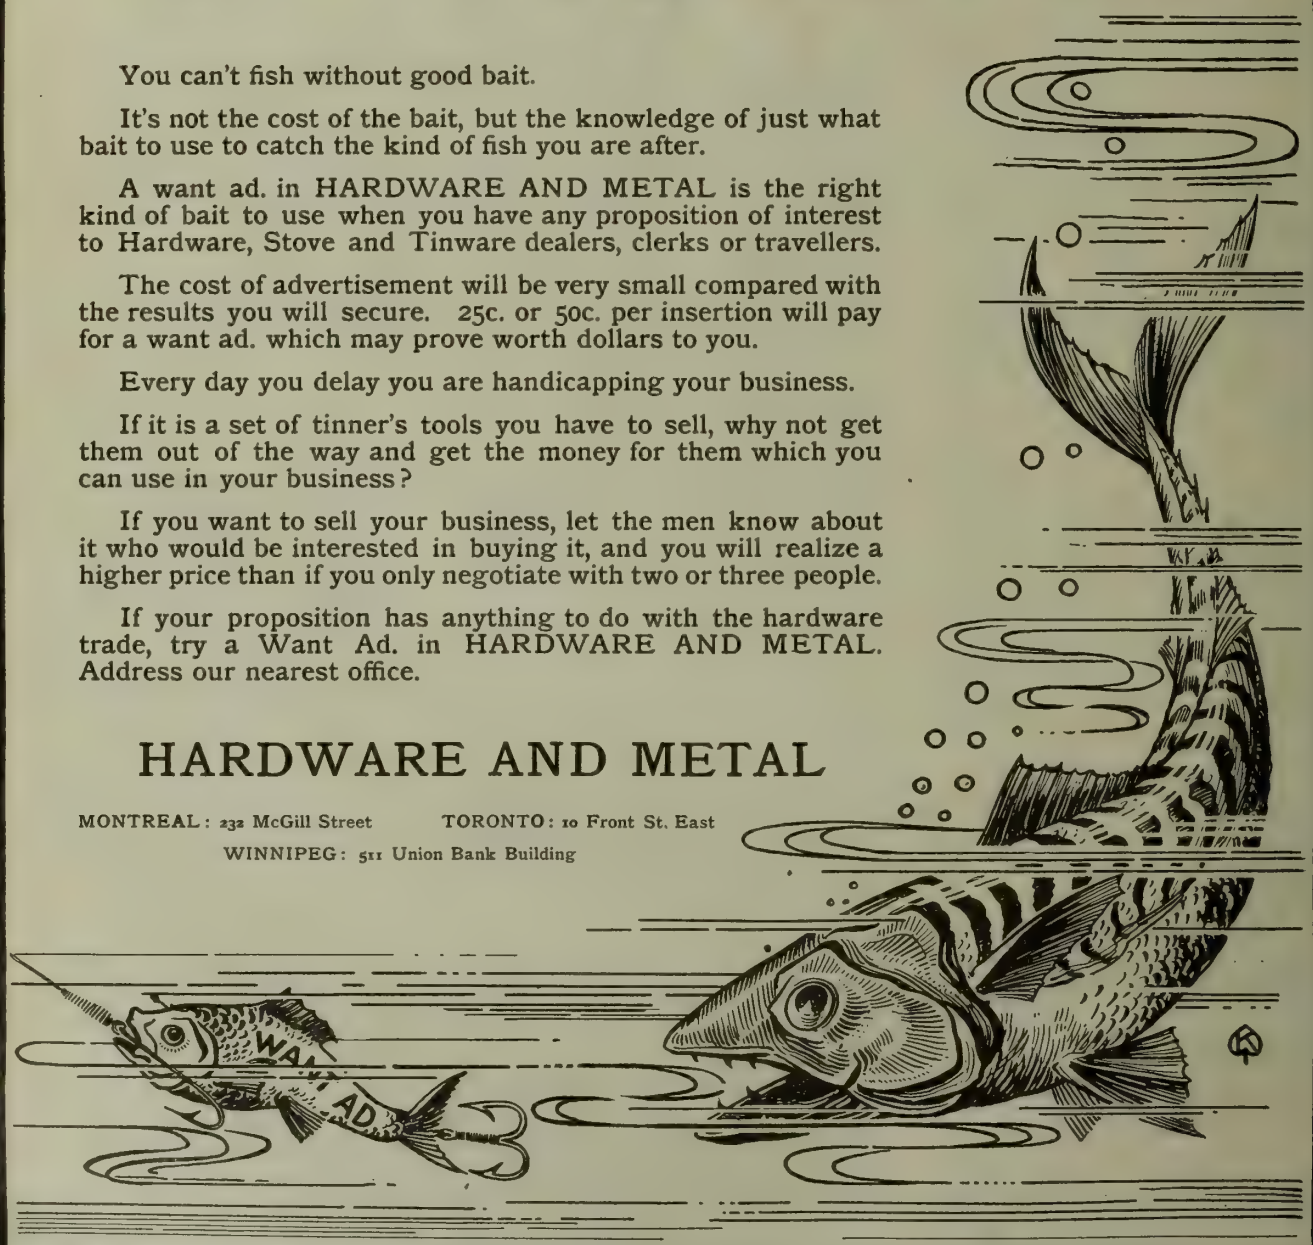
It's not the cost of the bait, but the knowledge of just what bait to use to catch the kind of fish you are after.

A want ad. in HARDWARE AND METAL is the right kind of bait to use when you have any proposition of interest to Hardware, Stove and Tinware dealers, clerks or travellers.

The cost of advertisement will be very small compared with the results you will secure. 25c. or 50c. per insertion will pay for a want ad. which may prove worth dollars to you.

Every day you delay you are handicapping your business.

If it is a set of tinner's tools you have to sell, why not get them out of the way and get the money for them which you can use in your business?



If you want to sell your business, let the men know about it who would be interested in buying it, and you will realize a higher price than if you only negotiate with two or three people.

If your proposition has anything to do with the hardware trade, try a Want Ad. in HARDWARE AND METAL. Address our nearest office.

HARDWARE AND METAL

MONTREAL: 232 McGill Street TORONTO: 10 Front St. East

WINNIPEG: 511 Union Bank Building

CONDENSED OR "WANT" ADVERTISEMENTS.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost must accompany all advertisements. In no case can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

ARTICLES FOR SALE.

Don't keep any fixtures or tools around your store for which you have no further use. They are worth more to-day than they will a year hence. Don't keep money tied up which you could use to secure discounts from your wholesaler.

ELLIOTT-FISHER STANDARD Writing-Adding Machines make toil easier. Elliott-Fisher Limited, 513, No. 83, Craig St. W., Montreal, and 129 Bay Street, Toronto.

THE WALES VISIBLE ADDING AND LISTING MACHINE is superior to any other machine for these reasons, among others:—Visible Printing, Flexible Keyboard, Columns Space Bar, Automatic Clear Signal, Adjustment for Carbon Copies, Eliminating Keys, enabling the operator by the mere pressure of a key to add without listing or list without adding. 30 days free trial to responsible people. Write us for free illustrated catalogue. Adder Machine Company, Wilkesbarre, Pa.

BUSINESS CHANCES.

HARDWARE and Tinware business for sale. Good clean stock, up-to-date fixtures, good turnover. Box 835, HARDWARE AND METAL, Toronto. (19)

IF YOU ARE LOOKING FOR A BUSINESS opening in the West, state particulars of your requirements to P. O. Box 1752, Winnipeg. (17)

WELL established general hardware business in a central Ontario town, surrounded by excellent farming district. Two railways. A good opportunity for young man. Best of reasons for selling. Box 825, HARDWARE AND METAL, Toronto. (19)

YOUNG man in Winnipeg with experience and some capital wants partner to start hardware business in West. Partner must have money and experience. Box No. 28, HARDWARE AND METAL, Winnipeg. (17)

BUSINESSES FOR SALE.

Somewhere in Canada is a man who is looking for just such a proposition as you have to offer. Our "For Sale" department brings together buyer and seller, and enables them to do business although they may be thousands of miles apart.

The suggestions are applicable to any trade. Price $2.00 postpaid. MacLean Publishing Co., Technical Book Dept., 10 Front St. East, Toronto.

Western Canada Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected by Telegraph up to Noon on Friday.

Winnipeg Hardware Markets.

Probably there are no cities in Canada where the return of spring has such marked effect upon the community as those in the West. The winter season is so long, cold and tedious and the summer so much the reverse that no time is lost when the first fine day arrives to prepare for the necessary renovating and building of the season.

Last week retailers began to sell paints and builders' hardware—a custom which they have waited several weeks for. Now that the season has opened rather late it is expected that goods in these lines will move rapidly. This week promises to be a good one generally for the trade. Sporting goods are beginning to go out well, and this will continue, it is hoped, through the greater part of the summer.

Price Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.90 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base; plain galvanized, wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

The FOUNTAIN Sprinkler

NOT merely a round box with holes punched in it to let the water out —BUT a perfect Lawn Sprinkler.

NOT merely a group of straight round streams working with mathematical precision—BUT a natural shower of spray.

The Sprinkler with the "MIST LIKE SPRAY."

No other Lawn Sprinkler can produce the beautiful—The perfect results like the "FOUNTAIN."

The name "FOUNTAIN" is plainly marked in raised letters on the bottom of every Genuine, Original FOUNTAIN Sprinkler.

When you think of Lawn Sprinklers — Think FOUNTAIN
When you buy Lawn Sprinklers — Buy FOUNTAIN
And insist on getting the FOUNTAIN
Stick to the Sprinkler you KNOW is right.

Do you want a sample for comparative test.

HARDWARE TRADE GOSSIP.

Ontario.

J. G. Lewis, of Lewis Bros., Montreal, was a visitor in Toronto during the week.

James Whyard, hardwareman, Dungannon, is succeeded in business by Whyard & Son.

Percy A. McBride is establishing a sporting goods store at 343 Yonge Street, Toronto.

D. McLeod, formerly of the Aurora Hardware Company, has purchased the estate of A. Thompson, Bradford.

Alex Patton has sold his implement business to McKillop & Ferguson, hardware merchants, West Lorne. Mr. Patton will remain with the firm this season.

Thos. E. Ryan, who for several years conducted a hardware business at Port Dover, died at Hamilton some days ago. For the past five years he had been employed as clerk by the Wood, Vallance Co.

The Gutta Percha & Rubber Manufacturing Company, Toronto, announce that the offices of president and treasurer held in their company by the late H. D. Warren have been filled by S. T. Warren (Mrs. H. D. Warren), as president and Trumbull Warren, as treasurer.

Dunlop & Co.'s large hardware store at Pembroke, was burned to the ground a week ago. During the fire there was a constant fusilade of cartridges and explosions of gun powder and oil. The loss on the store is $9,000 ; insurance, $6,000 ; and on the stock the loss is placed at $45,000, with $35,000 insurance.

T. S. Tait, Campbellford, has taken into partnership in the hardware business his two sons, D. E. and Walter. The elder son, D. E. Tait, has had a wide experience in the hardware business, having been connected with prominent wholesale firms in Montreal and Vancouver, and also having served his apprenticeship here. Walter has for several years acted as salesman in his father's store.

After being in business for 47 years, in his well known stand on the Market square, Guelph, Wm. Sunley has disposed of his stove and tinsmith business to Frank and Austin Howard. Austin Howard has been foreman for Mr. Sunley for the past 8 or 9 years.

Quebec.

J. A. Paquin, of St. Eustache, Que., has been visiting Montreal.

E. E. Shaw, of Shaw & Mason, Sydney, N. S., has been on a visit to Montreal.

A. J. Teakle, of H & J. Young, Quebec, has been visiting Montreal hardware circles.

J. A. Hossack, of the Lufkin Rule Company of Canada, Windsor, has been visiting Montreal.

W. B. Stewart, of the Hamilton Cotton Co., Hamilton, has been visiting Montreal hardware circles.

J. E. Valilee, of the Traders Co., Buckingham, Que., has been visiting Montreal hardware circles.

G. N. Gray, manager of Lewis Bros., Montreal, sample rooms in Ottawa, has been visiting headquarters.

A. W. Harris, purchasing agent of the Laurentide Paper Coy., Grand Mere, Que., has been calling on the Montreal trade.

J. A. Jackson, formerly with Lewis Bros., Montreal, and latterly with the R. Simpson Co., Toronto, intends shortly to open a hardware store in Montreal.

J. Reid, of Caverhill, Learmont & Co., Montreal, who some time ago was injured in the back through a street car accident, has made his appearance at the office again.

Burglars attempted to rob the safe of T. McOuat & Son, hardware merchants, Lachute. The handle was chopped off the safe and it was charged and blown three times, but without success.

P. P. Rankin, a director of Alexander, Ferguson & Co., Glasgow, makers of dry white and red lead, litharge, and all lead products, is on a visit to Montreal, looking up old associates, some of whom are now associated with the Canada Paint Co. Mr. Rankin is on his way back from a visit to the Melbourne, Australia, house of his company.

J. B. Learmont, of Caverhill, Learmont & Co., Montreal, entertained a large audience last week in Emmanuel Church lecture hall, Montreal, on the microscope, its uses and the beauties it reveals. The lecture was illustrated with limelight views. a large number of the staff of the firm attended the lecture.

Western Canada.

J. M. Friesen's hardware store at Aberdeen, Sask., was burned a few days ago.

Anderson & Thomas, Winnipeg, have sold their hardware stock to L. S. Starr.

A. E. Grewer, of Brandon, will take charge of the tinshop of Williams Bros. Co., Gladstone.

Roy Jones, Fillmore, Sask., has taken a position in the hardware department of D. Ackland & Sons, Winnipeg.

E. S. McRory, lately employed by the Souris Hardware Co., of Souris, Man., as sales manager, has accepted the position of head clerk with Armstrong, Smyth & Dowswell, Regina.

W. Peters, who has been bookkeeper in L. Gully & Co.'s hardware store at Vegreville, for the past two years, has gone to Edmonton. It is Mr. Peters' intention to go into business for himself at one of the new G.T.P. towns west of Edmonton.

OLD STOVE DEALERS DEAD.

Thos. Lawrence, Lucknow's oldest merchant, died some days ago, aged 78 years. He was born in England and came to Canada when 21 years old, shortly thereafter entering the employ of J. and O. McClary, stove manufacturers, London. For many years he traveled for them by wagon through western Ontario from London to Goderich, Kincardine and Owen Sound.

Some 40 years ago he opened the first hardware, stove and tinware business at Lucknow, which he conducted up to his death, with the assistance of two of his sons. He held many public offices in his community and was respected by all. A great many business associates from out of town made a special journey to be present at the funeral. Among them were Robt. Finlater, of McClary Mfg. Co.; A. D. Kennelly, manager McClary Mfg. Co., Toronto, two of his early employes, and W. H. Dean, of the Wood, Vallance Hardware Co., Hamilton, which firm sold Mr. Lawrence his first bill of goods.

Another old stove man to pass away is William Batters, manager of the Gurney Foundry Co.'s retail store on Queen Street West, Toronto, who died on April 8. Mr. Batters had been with the Gurney Company for about fifteen years, prior to that time having represented Copp Bros., Hamilton, in Toronto. Before that he had been in business at Hamilton and Brantford, having been in partnership with Thomas Potts at Brantford, selling out to Howie & Feely, the business still conducted by that firm. Originally he came to Canada from Chicago to work for the Wm. Buck Stove Co., Brantford, with whom he spent twelve years before going into the retail business.

THE LITTLE PAINT MAN.

The Linseed Oil Situation

The "Boss" called me into his private office the other day and he sez, "Shorty." He always calls me "Shorty" when he gets confidential. Sez he, "Shorty, I've been lookin' over the sales reports for the week, and there's still a few dealers of good standing throughout the country who aren't selling Sherwin-Williams Oil. I venture to say that they don't know that they have an opportunity to get such a superior quality of oil as S-W. Screw Press Oil. Now, Shorty, I put it up to you to see that these good dealers find out about our oil. I don't care how you do it, BUT DO IT."

The only sure way I know is to just explain the situation frankly in this Magazine-Newspaper of mine, as I've got every live dealer in the country on my subscription list.

The Little Paint Man

569

S-W. Screw Press Oil is much superior to the "general run" of oil on the market.

We crush only the choicest of No. 1 Northwestern flaxseed.

Although it has been cleaned when we buy it, we reclean the seed in our own mills.

Our special "Screw Press" process extracts the oil at a lower temperature than is usually employed, which keeps in the dry crushed seed the mucilaginous matter which ordinarily finds its way into the oil.

The newly pressed oil is then filtered and then aged in steel storage tanks until it is clear and brilliant and free from sediment.

The result is oil of such exceptional quality that it is immediately appreciated by painters and other expert users.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Activity.

A new public building will be erected at Portage la Prairie.

Bank Street Presbyterians will build a new church at Ottawa.

Fern Ave. Presbyterians, Toronto, will erect a $40,000 church.

A $16,000 addition is planned for the Revelstoke, B.C., hospital.

Plans for Montreal's new technical school have been completed.

The Lee Mfg. Co. propose to build a new foundry at Pembroke.

The McLaughlin Carriage Co. will build a $?3,000 garage at Winnipeg.

The Baptist congregation, Regina, has decided to erect a new church to cost $48,000.

The Ontario Parliament Buildings will be enlarged by the addition of a $750,000 wing.

Christ Church congregation, Deer Park, Toronto, will erect a new $20,000 edifice.

The Imperial Asbestos Co., capitalized at $1,000,000, will operate at Black Lake, Que.

G. F. Turney, Trenton, has the contract for building a $25,000 school at Haileybury.

Lemmon Bros.' knitting mill at Kingston is expected to begin operations about May 1.

The congregation of the Dufferin avenue Presbyterian Church, Winnipeg, will erect a new church.

D. Perry of the Watt Hose Co., Woodstock, proposes to build a hose coupler factory at Port Hope.

The capacity of the Comox (B.C.) lumber mill will be doubled, so great is the pressure of work.

Geo. Hamilton will build a $10,000 block at Haileybury, the lower floor to be used as a post office.

Extensive additions will be made during the present year to the plant of the Hamilton Bridge Co., Hamilton.

The B.C. Government has promised to subscribe $15,000 to the erection of a new $45,000 school at Revelstoke.

The Tudhope Co., Orillia, will erect a large new addition to their works to manufacture motor cars and motor buggies.

Four vessels, estimated to be worth $175,000, are on the stocks at the Cameron Lumber Co.'s shipyard at Victoria.

The University of Saskatchewan will be located at Saskatoon, and the buildings to be erected must be ready by September.

Plans are being prepared and work will be commenced at once on the erection of a new church at West Burnaby, near Vancouver.

The trustees of St. John the Evangelist Church, London, have purchased a lot on which they intend to erect a new church.

The Bowmanville Foundry Co. finding themselves cramped in their present buildings purpose this summer enlarging materially.

The C.P.R. is said to be planning the erection of mammoth coke ovens at Fort William and a plant for creosoting railway ties.

The congregation of St. Bartholomew's Church, Ottawa, will erect a new church at Rockcliffe, on a site which has been donated for that purpose.

The Trustees of the House of Industry, Toronto, have made application to the Board of Control for a grant of $50,000 to enlarge the institution.

The Strathcona City Council has decided to offer the Government a free site for the proposed armory, for which the government has appropriated $10,000.

The Dodd and Struthers Co., with headquarters in Des Moines, Iowa, has established a branch Canadian plant for making lightning rods at Sherbrooke.

The Hercules Specialty Co., of Grove City, Mich., makers of sanitary shields and toilet paper services, propose establishing a branch factory at Guelph.

Architects Hutchison & Wood, Montreal, have prepared plans for a building to be erected at the Protestant Infants Home. The structure will cost $50,000.

By-laws will be submitted to the ratepayers of Galt, for $15,000 for an addition to the central school and $20,000, for a new wing and improvements to the hospital.

The Vancouver Associated Charities propose taking immediate steps to secure funds for the building of an infirmary ward in connection with the General Hospital.

A site for a sailors' home has been requested of the Toronto Board of Control by the Upper Canada Tract Society. The proposition is to erect a building to cost $15,000.

J. Eveleigh & Co., trunk and bag manufacturers, have awarded the contract for the erection at St. Henri, Que., of a large trunk factory.

The Presbyterian congregation, Port Colborne, propose to expend the sum of $3,500 for remodelling their church, which was recently damaged by fire.

A U. S. concern with a capital of $150,000 has established at Weedon, Que., a plant for the manufacture of creosote, the first of the kind in Canada.

Municipal Undertakings.

Edmonton will establish a filtration plant in connection with its waterworks system.

Work will be commenced at once on the central portion of Revelstoke's sewerage system.

Thessalon, Ont., will spend over $9,000 on a waterworks and electric lighting system this year.

Revelstoke, B.C., has taken over the gas plant instaled there by the Canadian General Electric Co.

Three hundred new water services were installed at Vancouver during the first three months of this year.

Waterloo's town engineer is preparing a profile in connection with the construction of a sewer on Victoria Street and tenders will shortly be called for.

Yarmouth Town Council decided to borrow $12,000 for the extension of the town water main and $6,000 for the completion of the Milton engine house.

The B. C. Provincial Government has given Vernon permission to take 50 inches of water from Long Lake for domestic purposes and for fire protection. Plans for a new water system will, therefore, be made.

The Edmonton City Council awarded the contract for the supply of the piping for the new power plant to the Babcock & Wilcox Co. at $6,770 for the piping complete and erected.

Tenders will be received until May 1 for trenching and back-filling necessary to be done in connection with New Liskeard's waterworks system, as required for making house connections; and for tapping the mains, supplying all necessary material (except brass supplies), making connections, etc., as required for making house connections.

The McKnight Construction Co. has successfully laid eight hundred feet of the outlet sewerage piping into the lake, at Haileybury, so that now the sewerage of the town can be carried away without danger to the inhabitants. By next year the whole town will practically be well drained with a modern system of sewerage. Haileybury already possesses a waterworks system.

Public Buildings.

It is reported that a $150,000 building will be erected at Vancouver to house St. Mark's College.

Architects Ellis & Connery, Toronto, have prepared plans for a $19,000 school building to be erected at Trenton.

The Fathers of the Resurrection, who have charge of St. Jerome's College, Berlin, will greatly enlarge the building.

A four-room addition to Shakespeare Ward School, Stratford, at a cost of between $15,000 and $20,000 will be built.

Architect Chas. Bernier, Montreal, has prepared plans for the erection of a Roman Catholic Church in Ville St. Paul.

Oshawa ratepayers have passed a by-law authorizing the expenditure of $30,000 for the erection of a new high school.

Architect Wm. G. Murray, London, is preparing plans for a $5,000 one-storey school house to be erected in Dorchester, Ont.

The general contract for the addition to be erected to the new jail at Bordeaux, Que., has been awarded to J. B. Pauze Co., Montreal.

The Moncton School Trustees are considering the question of issuing bonds to the extent of $15,000 for additional school accommodation.

The Government of Quebec has decided to erect an addition to the Jacques Cartier Normal School at Lafontaine Park, at a cost of $60,000.

The C. N. R. and G. T. P. are announced as having completed arrangements for the construction of a large union station and hotel at Calgary.

Architects Ross & Macfarlane have prepared plans for the new church of St. Matthias to be erected at Montreal. The building will cost $45,000.

The board of Havergal college, Winnipeg, have decided to build a three-storey addition to the college this summer. The new structure will cost $35,000.

The Berlin Public School Board has decided to erect two four-room additions to the Rosland Avenue and the Margaret Avenue schools at a cost of about $21,000.

Cutting Patterns in the Tin Shop

Readers of Hardware and Metal Are Requested to Make Use of This Department—Questions Regarding Patterns Will Be Answered By Experts—Discussion is Also Invited on Any Matter Pertaining to the Tin Shop.

PATTERN FOR A FINIAL.

In Fig. 1 is shown a perspective of a finial such as may be used at the base of a round flag-pole that extends through the peak of a square hip-roof.

First draw the elevation (Fig. 2) but leave out the curved lines GB and GE. Then draw the plan JKLM with the circle NOPQ representing the top, on the line CD of elevation. Divide the circle in plan into four equal parts as shown by NOPQ. From J to N and J to O draw lines as shown from the

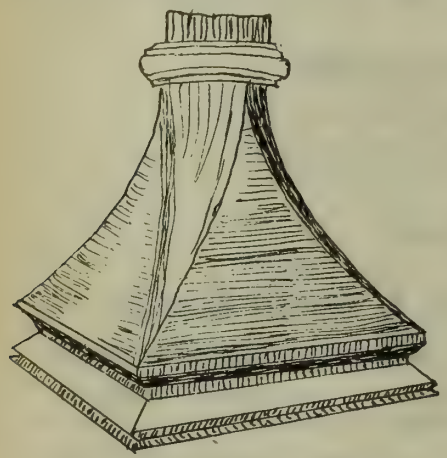

FIG. 1

other corners. Divide the curved line from B to C of elevation into equal spaces. From these points draw lines parallel to the centre line I H to the line O J of plan as shown by e.f.g.h. To obtain the curved lines GB and GE (which you were to omit in drawing elevation) draw lines from the points on the curved line CB of elevation to the centre line and parallel to the line BE as shown by 1a., 2b. etc. In the plan transfer the points e.f.g.h. of line JO to line KP. From these points draw lines parallel to the centre line and crossing the same representative lines in elevation as shown. Through the points thus established draw the curved line GB. The line GE is obtained in the same manner by transferring points to the line LP of plan.

We can now get the pattern for the sides. Draw the line TW which is a continuation of the centre line drawn through X of plan at right angles to KJ. On it set off all the divisions shown from A to B and to C of elevation. The part between AB is unimportant in this drawing as it only represents a square mitre and its points are extended to the line KX of plan. Through the points on the line TW draw lines parallel to KJ. From the points on the line KO draw lines parallel to TW until they cross the same representative lines drawn through TW. Through the points thus established draw the curved line TU. By extending the lines drawn to KX crossing those between UV that part of the pattern will be completed.

Now there remains the pattern for the gore-piece (necessary to complete the corners) to be developed. This piece as will be readily seen, curves two ways and will have to be hammered into shape. The pattern for this can only be developed approximately, that is, sufficient material must be put into the pattern and in the right place so as to make the part. We will be obliged to draw sections in plan of the corners, these sections being taken as though the article was cut on lines 1a., 2b. etc. of elevation. To draw these sections in plan proceed as follows:

From e.f.g.h. of plan draw lines parallel to KL until they intersect the diagonal JX. Where these lines cross the diagonal lines will be the centres for quarter circles as shown by l.m.n.o. Perpendicular lines dropped from these centres will complete these quarter circles and meet the circles where they cross line NJ. It will now be required to find the length through the centre of the gore lengthwise. To do this we will have to construct a diagonal section. Draw the line DA of the diagonal section, which is a continuation of line XK of plan. From the elevation transfer the spaces G a.b.c.d. Y to D a.b.c.d. A of diagonal section. Through these points draw lines perpendicular to DA.

From the plan project lines from the diagonal line as shown from the points p.q.r.s. and t. which is where the quarter circle crosses the diagonal line KJ. Continue these lines until they cross the lines drawn in the diagonal section. Through the points produced by the crossing of the lines, draw the curved line C to B which is the length of the gore. Draw the line CB of pattern for corner gore at one end, and at right angles to it draw the line AD from C to B. Set off the spaces as shown by the same numerals of the diagonal section from C to B and draw lines through the points parallel to AD. In the plan divide one-half of each quarter circle O t.e.s. etc., into equal parts and set off these spaces on the lines each side of the centre line CB of the pattern as shown by x.y.z A which are the spaces for the part O t of plan.

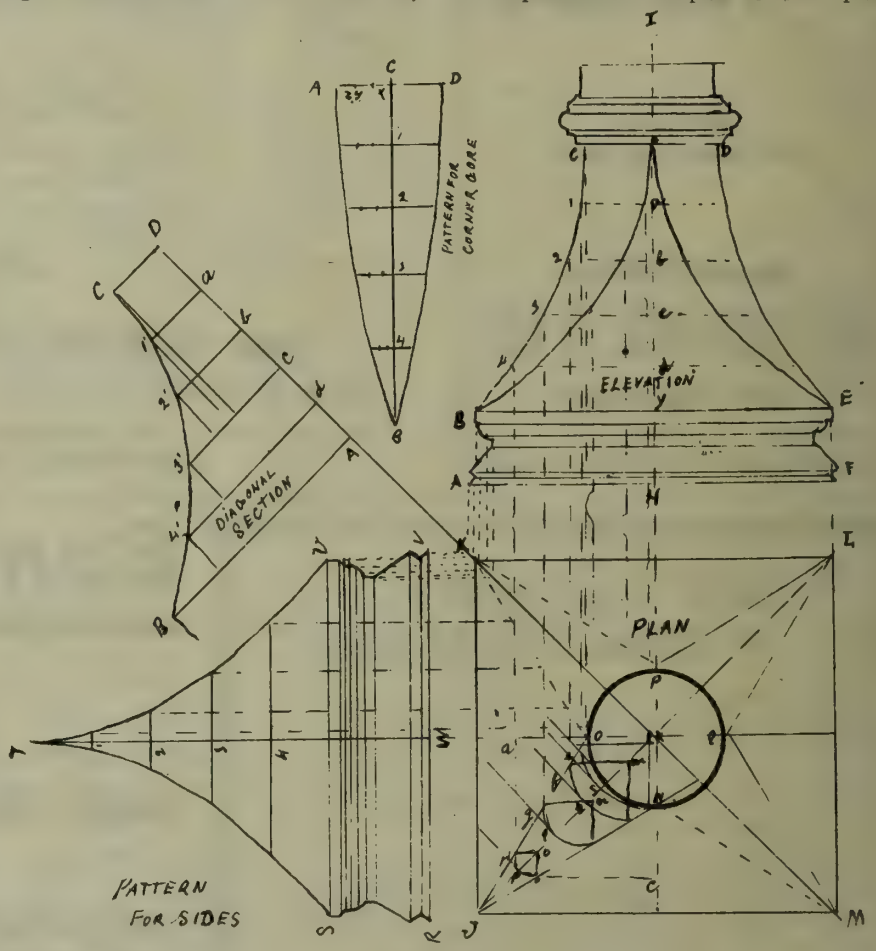

Fig 2.

When all have been set off draw the curved line AB and DB which completes the pattern.

Edges to be allowed. W.M.M.

Poultry fencing wire, painted a dark color, makes an excellent backing to hang goods on in the light space above the back of panels in the show window.

The dealer should keep his eye on all the building operations that have been begun or are likely to be begun in his vicinity; interview the builder and try to sell him his supply of locks, knobs, hinges, etc.

News of the Paint Trade

ADULTERATED TURPENTINE.

Editor Hardware and Metal.—In reference to your articles in the last two issues of Hardware and Metal, in regard to adulterated turpentine, I beg to say that within the past few days I have been requested by a party from Preston, to have a sample analyzed which they had from the Carolina Pine Products Co. I have sent it forward to the Inland Revenue Officer at Ottawa, with a request that they shall get me their statement at the earliest possible moment. I am also in receipt of a letter from a hardware merchant at Lindsay, complaining of goods received from the Carolina Pine Products Co., and asking if I know of others who have found their goods to be impure. Another statement has been received from a party whose name is given by this company as reference, who says that on receipt of his first supply he cancelled the balance of the order and if it had not been that an employe emptied the goods into a tank with other turpentine, he would not have retained any of it. Another merchant who received some goods from the same concern writes, that he sent some of it to a manufacturer of pianos who immediately reported that it would not mix properly with varnish, while another customer who wished to use it in connection with floor wax also returned it saying that it would not mix with the wax like other turpentine.

From these reports, I think it is evident that somebody has been adulterating turpentine at some point pretty extensively. Possibly the Carolina Pine Products Co. have been imposed upon by someone that they were buying goods from or by someone who had the goods stored for them which they may be glad to have an opportunity of exposing, so for their information I have forwarded them a copy of the analysis published in your paper two weeks ago.

E. FIELDING.

Toronto, April 20.

Editor's Note.—The Editor of Hardware and Metal is also in receipt of a number of inquiries from readers in various parts of Ontario, indicating that the trade generally is being offered turpentine at cut prices, the product being guaranteed pure but the guarantee being made by a concern with headquarters in the States.

PAINT SPECIALTIES.

A profitable line for the paint dealer is what are known as "shelf goods," which include varnishes, stains, floor paints, paint and varnish remover, screen enamel and a host of similar specialties which the housewife is in constant need of. Few customers would not at some time or other buy a certain quantity of shelf goods if they were noticeably and attractively displayed; and the profits on this line of goods are most liberal.

Paint and Oil Markets

TORONTO.

April 23.—A nice, steady business is being done among paints this week, with trading improving from day to day. Seasonable lines, of course, have the greatest call, but all lines show some activity. Repeat orders are already being booked for ready-mixed paints and some fair stocking-up calls are being made for varnishes and brushes.

Glass is yet quiet, and is expected to remain so for at least the early part of the season, which will open about the second week in May, when navigation of the St. Lawrence will again be in swing. There is a firmer tone abroad in regard to glass, but a great deal of Ontario orders have been placed early in the year at the prices then prevailing, and as these orders called for delivery early in May, it is likely they will be filled from the new consignments, as glass stocks are very low here just now.

Shellacs are easier and lower, but as turps have advanced and oil shows stronger there is no probability that varnish lines will be lower. Varnishes, enamels, alabastine and brushes continue to go out freely, and lead lines are still very active. Paris green, too, at the lower quotations is a good seller. Turpentine has advanced two cents during the week; and linseed oil is getting decidedly firmer.

TURPENTINE.—Reports from Savannah confirm the statement of last week that the weather conditions have been very much against producing turpentine so far for the month of April and that receipts have been much less than was anticipated, consequently, prices have been advanced 3 cents per gallon in the South. If the rains and cool nights continue, which have militated so much against the producing of the gum, there is no likelihood of a reduction of production for the month. Prices have been advanced in Toronto 2 cents per gallon. Single barrels are now 58 cents.

LINSEED OIL.—The Liverpool market quotes 22s. 6d. to 23s. per cwt. for export casks; London reports, 21s. for barrels; Manchester reports, 22s.; Hull reports that an advance of 7s. 6d. to 10s. has been the case at that place of production, and Glasgow reports, 21s. 6d. The average of these prices might be said to be about 22s. per cwt., which would make the cost in Toronto for English oil about 3 cents per gallon above the Canadian carload price. There is a decidedly firmer tone, locally, as prices in the U.S., too, have advanced consequent on the shortage of seed. Raw oil per barrel is yet 59 cents, and 62 cents is the quotation for boiled in single barrels.

WHITE LEAD.—Unchanged market quotations prevail. No. 1 is $5.40 to $5.65; pure white from $5.80 to $6, and a superior line is offered at $6.25. Genuine red lead is quoted at $4.50 for casks and $4.75 to $4.80 in 100 lbs. Trading is very active. Red lead is also selling well.

PARIS GREEN.—Business is very fair this week, due, no doubt, to the lower quotations—25 lb. drums at 17¾ cents.

STAINS AND VARNISHES.—These two lines with alabastine, enamels, whiting, etc., are very good sellers and demand is equal to anything during the past decade. Brushes, too, are going out pretty freely. They are at the old quotations, with 75 per cent. discount.

GLASS AND PUTTY.—The movement of a week ago proved to be a spasmodic one. The glass trade just now is anticipating, and until the middle of May, when the new glass arrives, no great demand is expected. The bookings early in the year call for fairly large quantities. Putty, too is rather quiet again.

SHELLAC.—This and other gum lines are easier and lower. Pure white is now $1.75; pure orange, $1.70; and No. 1 orange $1.25; standard orange is $1.55; and finest orange is $1.85; with standard and finest white 25 cents in advance of these latter two figures. All these prices are for barrel lots.

PETROLEUM.—Unchanged in condition and price. Prime white is 13½c; water white, 15½c. and Pratt's astral, 17½c.

MONTREAL.

April 23.—The bright tone noticed last week is maintained, and orders are swinging in freely. Should shipments keep up in the present satisfactory manner, and they show every appearance of so doing, the ground lost by any mid-winter slackness will soon be overtaken. The markets are firm and unchanged with the exception of shellac varnish which is easier. Ready mixed paints continue to be a prime mover, showing evidences of a strong spring movement.

TURPENTINE—A splendid inquiry exists for turpentine, the pure southern article apparently holding its own against all other kinds. Shipments are on the heavy side with the market unchanged in price, and we quote 55c for single barrels, net 30 days.

LINSEED OIL—Steady shipments are being made for ordinary sized lots. There is no tendency to stock up largely on the part of buyers, the great steadiness of the market apparently removing the article from speculation. There is no change in prices, and we quote: Raw, 1 to 4 barrels, 59c; 5 to 9 barrels, 58c; boiled, 1 to 4 barrels, 62c; 5 to 9 barrels, 61c; strictly net, 30 days.

GROUND WHITE LEAD—The output at present seems fully equal to that of other years at the same time. The demand was slow to arrive, but a satisfactory turnover is now being experienced. There is no change and we quote: Strictly pure, $5.50 to $6 according to brand, and No. 1, $5 to $5 50 f.o.b. Montreal.

RED LEAD—The recent strong demand for red lead seems to have sub-

Halifax, N. S.

sided now that the spring shipments of supplies are near at hand. Quotations are firm and unchanged. Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; in less quantities, at $6 per 100 lbs.; No. 1 red lead, casks, $4; kegs, $4.50, and smaller quantities, $5.50.

PARIS GREEN—The lower quotations have stimulated trade, and good orders are coming in from all parts of the country. We quote 1-lb. cartons, 18c; 1 lb. tins, 19c; 50 lb. drums, 17c.

SHELLAC—Conditions in the United States being slow to resume their normal activity, standard lines of gum are being freely offered with concessions for quantities. Shellac in particular is experiencing this desire to make sales, with the consequence that quotations locally are marked down 5c per gallon for shellac in liquid form. We quote: Pure white in barrels, $1.90; pure orange, $1.75; No. 1 orange, $1.35.

WHITE ZINC—There is no special feature to report, and the market is quiet and unchanged. Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5¾c.

PUTTY—Putty is in good demand, and prices are well maintained. We continue to quote: Standard putty, 880 lbs., in casks, $1.65; in 100-lb. drums, $1.90; bladder putty, 400 lbs., in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb. drums, $2.00; 25-lb. tins, $2.05; 12½-lb. tins, $2.25 f.o.b. Montreal.

EVOLUTION OF PAINT.

It was no uncommon thing in the years gone by to paint the front of a dwelling, the part facing the road, white in lead and oils and the rest of the structure red, says an exchange. The latter color the farmer found much cheaper because he got it by mixing Venetian red with butter milk. Pride and high grade mixed paint at reasonable price rapidly did away with the necessity of such economy.

Twenty-five years ago the consumer looked with suspicion upon mixed paint, and rightly so, because most of it was adulterated, and only the maker himself knew what went into it. It didn't take a purity law to straighten out this situation. Keen competition and chemical analysis of the other man's goods soon showed the deception. As a result mixed paints have come to stay.

Paint used to be considered a luxury, but that idea is rapidly going out. The farmer now is not painting his house so much with the idea of preserving it as of improving its appearance. It's the next thing he thinks of after the mortgage is paid off. The automobile has been a great spreader of the color notion. A machine of distinct hue has reminded the farmer that maybe his house wouldn't look bad painted that shade. Then his neighbor takes up the idea, and so on.

CHICAGO PAINT INDUSTRY.

Only 70 years ago the first manufacturing plant was established in Chicago and to-day over 20,000 industries employ a capital of $600,000,000 and give a yearly output of a billion dollars says a Chicago exchange. Despite her youth, in two generations Chicago turns out three-fourths of the volume of New York's annual manufacture. With this development the paint industry has grown apace and to-day Chicago stands second to no other city in its output of paint, oil and varnish. Its nearness to the source of supply of most of the raw material used in the manufacture of paints, together with the use of modern machinery and up-to-date methods, has enabled the paint manufacturer of Chicago to stand before the world as an exponent of scientific manufacturing methods and supreme quality of the products. The ineffective, wasteful methods of the past have given way to the methods of modern manufacture. To-day well paid experts test the use of raw materials and watch every process of manufacture. This paint making of to-day, and by this we mean scientific machine prepared paint, is but an evolution of the time. It is the same advance movement in the paint world that shows itself in other fields; the same movement as that which displaced the old system of setting type by hand by the up-to-date linotype machine. The national consumption has grown from nothing twenty years ago to approximately 90,000,000 gallons during 1907; one gallon for every man, woman and child in the United States. In this development in Chicago along scientific lines each manufacturer has done his part and added his mite of knowledge to the general sum for the good of the industry. In comparison with other manufacturing industries in Chicago, the paint industry stands eighth in capital and production, the output being not far from $25,000,000 annually. There is an artistic side to the development of paint manufacture which is not generally understood. The manufacturers of paint to-day must be in touch with the artistic sense of the people. The decoration of our modern houses and public buildings demands an appreciation of artistic values and effects. It is better to sell on quality than to sell on price. The price is soon forgotten, but the paint and paint materials stand out for themselves and are long remembered. Competition grows keener every day, and only by hard work and close attention to details is the manufacturer able to make a success.

PAINT NOTES.

The Crescent Oil Company will build a storehouse in Hamilton during the present year.

Mathewson Bros. have sold their painting and wall paper business which they have conducted at Port Colborne for a number of years to Smith Bros. of St. Thomas, who will take possession at once.

Florida is the banner turpentine and rosin state, according to a report just issued by the United States government forest service. The entire country produced 36,500,000 gallons of "turps" and 4,000,000 barrels of rosin in 1908, and of this amount Florida furnished more than 17,000,000 gallons of the turpentine, and nearly 2,000,000 barrels of the rosin.

The charm of the

Canada Paint Co.'s Paint

is its beauty and its strong stand against WEAR and WEATHER

These qualities are to be found in GENUINE PAINT only—for instance, that of the CANADA PAINT COMPANY. There are a number of disappointing imitations, but all reputable hardware shops sell the PAINTS, VARNISHES and manufactures of the

Canada Paint

COMPANY

Ramsay's Creosote Stains

Don't lose the chance to make a few dollars on these beautiful shingle stains. These are daily becoming more fashionable. You should post yourself on the full line. We have beautiful show cards telling all about them. Don't pay the high prices for imported goods. You don't need to, and the goods are not worth it.

Ramsay's Shingle Stains

are in perfect accord with the demands of architects and house builders for the proper line to protect and beautify the shingles on every roof. Write us.

Keep Your Gasolene Outdoors

STORE IT IN A BOWSER OUTDOOR CABINET

Cut 10—Outdoor Cabinet

The Bowser will keep your property absolutely safe from gasolene fires and explosions because it keeps explosive gases from forming.

It will increase your profit on gasolene because it stops the usual loss of from 15 to 50 per cent. through evaporation, leakage and waste. It draws new trade because it is placed in front of the store where it continually advertises the fact to automobilists and others that you sell gasolene.

The Bowser costs you nothing because it pays for itself by its own saving of gasolene. Ask us to send Gasolene Catalog 5445. It's free.

S. F. Bowser & Co., Limited

66-68 Fraser Avenue, Toronto

If you have an old Bowser and want a new one, write for our liberal exchange offer.

FOR

Floor Work Cabinet Work

NOW IS THE SEASON TO RUSH THE TRADE

"Make Hay while the Sun Shines" is a good motto, but no better than the rule of action to push the sale of floor and cabinet finishes during the busy house cleaning and painting period.

FLATTINE for Floor Finish contains no wax, is tough and durable and does not show evidence of wear or scratches. It dries over night.

FLATTINE for Cabinet Finish produces an even and full flat finish. It resists the action of moisture and does not mar or scratch white.

What Constitutes a Pure Perfect Boiled Linseed Oil?

It must be conceded that for the most perfect Boiled Linseed Oil, the life of the Raw must be preserved in the Boiled for durable painting. The mission of Linseed Oil is to preserve wood and iron from the destroying effects of oxygen of the air. Hence the same durable, preservative qualities of Raw Oil should exist in Boiled Oil. Our "Maple Leaf" brands of Pale and Double Boiled Linseed Oils are PERFECT and fill these requirements. Try a sample lot.

Canada Linseed Oil Mills, Limited

Aeolian Ventilators

THE BEST MEANS FOR INSURING PURE AIR

One Testimony:

Montreal, June 12th, 1903
Canadian Pacific Railway Company.
Messrs. J. W. Harris Co., Limited,
7 St. Elizabeth St., Montreal, Que.

Gentlemen,—Answering yours of June 1st, I am not personally familiar with the merits of the "Aeolian" Ventilators but our Assistant Engineer, Mr. F. Crossley, reports that the Ventilators of this type manufactured by you and used by this Company at the Place Viger Hotel, Chateau Frontenac, Windsor Street Station and elsewhere, have proved satisfactory.

Yours truly,
E. H. McHENRY, Chief Engineer.

Write direct for booklet and catalogue to-day. Learn about our system of ventilating. A pleasure to send books.

SHRP-SHAVR SAFETY RAZOR

25c.

There is no better razor sold at ANY PRICE

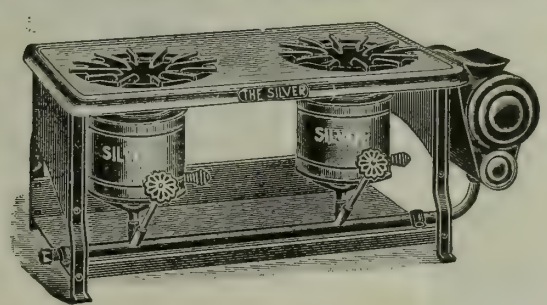
We do it to Sell our Blades

Sold under a positive guarantee. Your money back if you want it.

Shrp-Shavr Razor Co

Smith Hardware Co., Limited

2 & 4 Lemoine Street



Montreal, Canada

We sell it at 25c. to create a quick and large market FOR OUR BLADES because we make the BEST blade. In fact, "it's all in OUR BLADES." The profit to the retailer as well as to the manufacturer is in the continuous sale of blades.

The frame or blade-holder is beautifully SILVERPLATED, and the adjustment is absolutely correct. It fits the face. The blade can be adjusted or released instantly. But you don't shave with a razor frame whether it costs $5.00 or 25c., the blade is the thing.

Our proposition is a revelation and revolution in safety razor selling. The SHRP-SHAVR is the ORIGINAL 25c. RAZOR.

Amatite ROOFING

TRADE B MARK

FIVE ROOFINGS TESTED

GENTLEMEN: OAKFORD, Pa., February 15, 1908.

The Amatite Roofing you advised me to try has proved to be the best roofing I have on any of my chicken houses, having tested it for two years with four other roofings. Consequently, when I was compelled to buy a new roof on my wagon house, I used Amatite.

If you see fit to use this letter as a testimonial, you will be doing the chicken fanciers a great benefit.

If anyone wishes to see how the roofing lasts I will be pleased to have them visit my farm.

Yours truly,

HILL CREST FARM. WILLIAM F. FOTTERALL.

This is the kind of letters which we get daily regarding Amatite.

When it was first put on the market a great many people were attracted by it, but did not wish to spend all their money in a new type of roofing, so they used some Amatite with the old-fashioned "smooth-surfaced" roofings right alongside so as to get a good comparison of their durability. Now they are finding that Amatite WITHOUT ANY PAINTING lasts longer than other roofings that need CONTINUAL PAINTING, and they are writing in letters like the above.

Amatite has a surface of REAL MINERAL MATTER which will not rub off or wear off, as the coal tar pitch which holds it in place is a powerful adhesive.

The price of Amatite is very low. The smooth-surfaced roofings sold at the price of Amatite are usually a one-ply or half-ply grade which is very flimsy and light in weight, and do not compare with Amatite, which is FIVE-PLY. Amatite has a double layer Coal Tar Pitch, a double layer of wool felt, and A REAL MINERAL SURFACE.

Send for a sample of Amatite and see what the mineral no-paint surface looks like. You'll then understand why it is so much better than "painted roofing."

Read a Few of the Comments of the Leading London Dailies on the Supremacy of the Ross Rifle at the 1908 Bisley Meet.

"Long range Champion, breaks all records, a rifle of wondrous precision." *London Morning Post, July 16th.*

"Records broken at Bisley. A fine Canadian rifle." *London Daily Express, July 16th.*

"Record scoring with the Ross rifle." *London Daily Telegraph, July 15th.*

"Champion of the year." *New York Herald, July 16th.*

"Performance phenomenal by the Ross rifle." *London Field, July 18th.*

"The new Canadian rifle has made an unexpected and altogether successful appearance." *London Daily Mail, July 15th.*

"Great triumph for the Ross rifle which has beaten all the world's rifles." *London Standard, July 15th.*

"Many experts declare that Ross rifle better than new U.S. Rifle." *Nottingham Guardian, July 17th.*

"An individual triumph, the Lee-Enfield hopelessly beaten." *London Morning Post, July 15th.*

"The Ross rifle achievements were truly remarkable." *London Evening Standard, July 15th.*

"Great victory for the Ross rifle from Canada." *London Daily Express, July 15th.*

"The rifle of the future is the Ross rifle." *London Times, July 16th.*

"A 'plague of possibles' with the Ross rifle." *London Sphere, July 15th.*

A good thing is worth talking about

When you sell a TAYLOR-FORBES LAWN MOWER you are placing in the hands of your customer a machine that is fully guaranteed.

They represent the highest art and most advanced practical ideas in grass-cutting machines.

Every part is readily interchangeable.

Every Mower is self-sharpening and made of the very best materials. That's why 95 per cent. of the Hardwaremen handle them in preference to others.

ELECTRICAL OUTFITS

BUY A FAIRBANKS MORSE GAS OR GASOLINE ENGINE AND LIGHT YOUR OWN STORE

Plenty of Light at the Lowest Cost

CHEAP LIGHT

The H. L. P. McNeil Co., of New Glasgow, N. S., dealers in boots and shoes, have for the past two years manufactured electricity for lighting purposes. They make use of a 4-H.P. vertical kerosene engine belted to a 2½ K.W. direct current dynamo. This gives them the equivalent of about 35-16 C.P. incandescent lamps, which is ample for lighting two stores.

Several tests made show that the cost of lighting figures under 5c per kilowatt hour—this including kerosene at 17c per gallon, and the small amount of lubricating oil required.

(*From the Canadian Industrial Review*)

HOW MANY dealers are to-day purchasing their electrical light for 5c per kilowatt hour?

We are prepared to instal equipments of any size for any requirements.

Send for illustrated catalogue and further particulars.

No. 2

No. 1

No. 3

Illustrations of three Dana Freezer advertisements running in the leading magazines.

Thousands of women will read them—will ask you for the Dana Peerless.

Can't you hear the woman say to her husband, at the new Plaza Hotel in New York for instance:—"I wish we could make Ice Cream like this at home." And the husband who always knows it all replies:—

"The French Cooks in these big hotels use a different kind of freezer." And appreciate the humor of it when you find out that the Ice Cream served in the new Plaza Hotel is made in a Dana Power Freezer, exactly in the same freezer that we sell for the home, only bigger. That is the very point brought out in our advertising this year: Use the freezer the $10,000 French Cooks use.

Don't miss sales

The **best** freezer has to do **three** things **better** than **any** other.

Make the **best** quality cream. Freeze **fastest**. Be **easiest** to turn.

The Dana Peerless does **all** three.

Dana advertising is telling the women **why**.

No. 1 explains how the Dana is built along the lines of the old French Pot, the freezer that **never** fails, always gives the **smoothest** cream.

No. 2 shows that the Dana can is the **smallest** in diameter and the **tallest**—has the **greatest** surface next to the ice. Therefore, freezes **fastest**, just as a vessel of water with the greatest surface next the fire **boils** first.

No. 3 contrasts the **ordinary** dasher with the **Dana** dasher. The ordinary kind is **pushed** through the cream—**harder** and **harder** work as the cream freezes. The Dana is **stationary**—the **can** revolves—**no** resistance, except the thin film freezing on surface of can.

We also stock "Dana Frezo" all sizes One to Twelve Quarts
the best value low priced Freezer in the World

THROW A SPRAT TO CATCH A MACKEREL

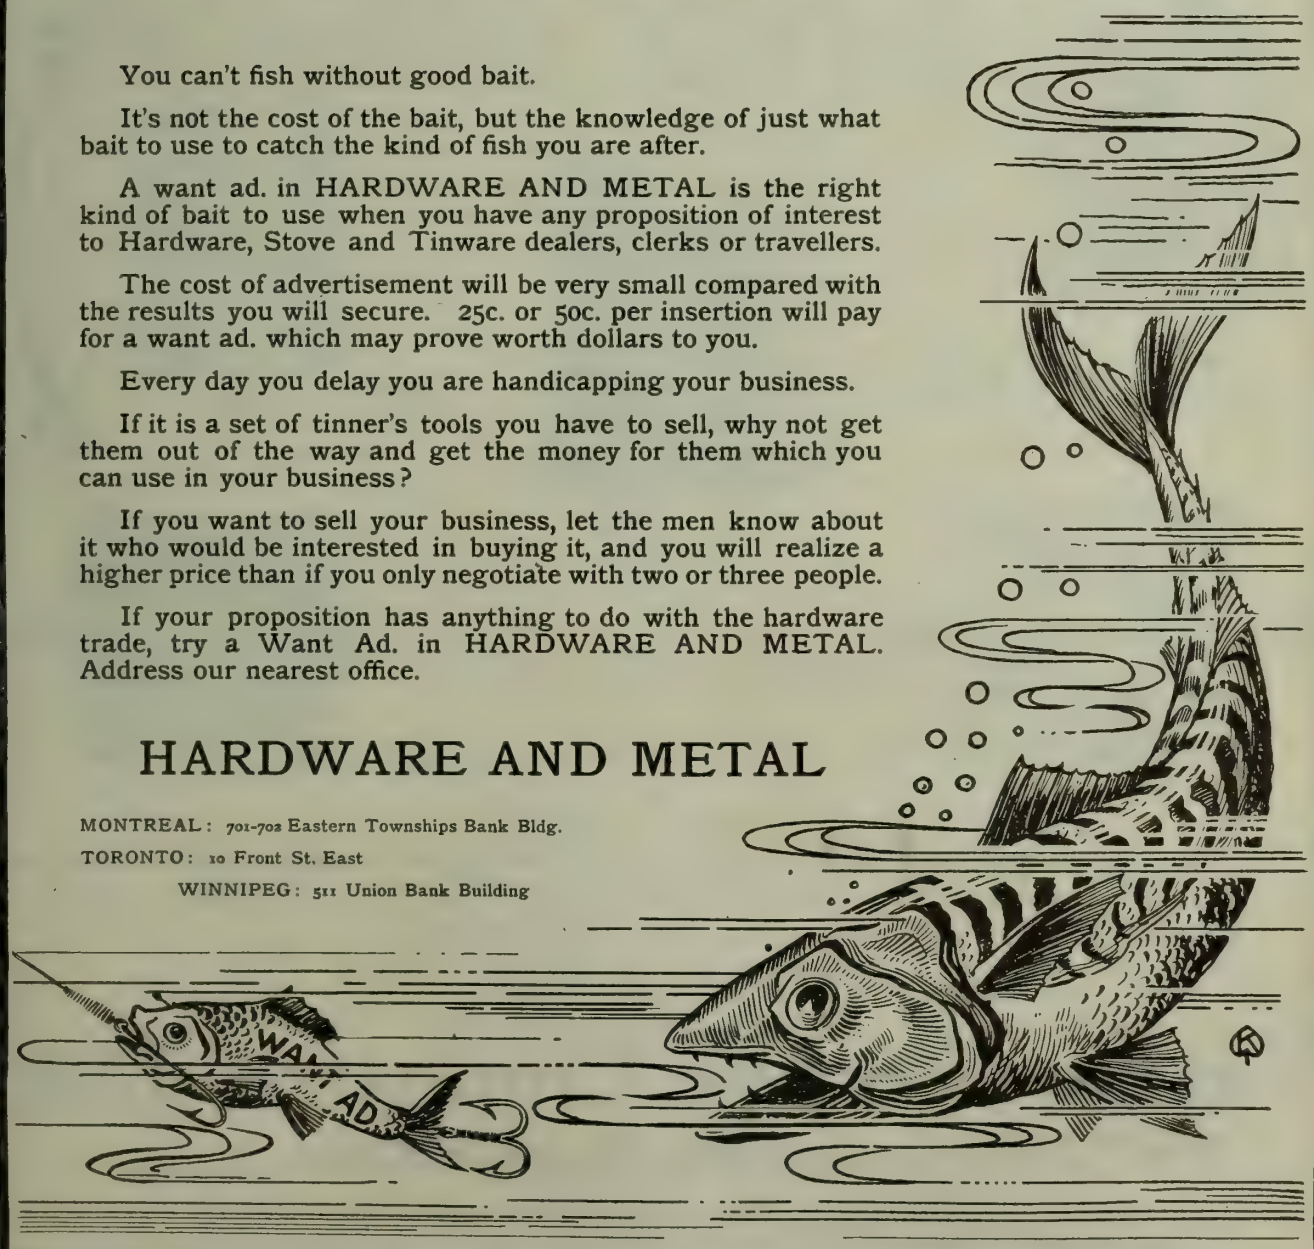
You can't fish without good bait.

It's not the cost of the bait, but the knowledge of just what bait to use to catch the kind of fish you are after.

A want ad. in HARDWARE AND METAL is the right kind of bait to use when you have any proposition of interest to Hardware, Stove and Tinware dealers, clerks or travellers.

The cost of advertisement will be very small compared with the results you will secure. 25c. or 50c. per insertion will pay for a want ad. which may prove worth dollars to you.

Every day you delay you are handicapping your business.



If it is a set of tinner's tools you have to sell, why not get them out of the way and get the money for them which you can use in your business?

If you want to sell your business, let the men know about it who would be interested in buying it, and you will realize a higher price than if you only negotiate with two or three people.

If your proposition has anything to do with the hardware trade, try a Want Ad. in HARDWARE AND METAL. Address our nearest office.

Every Little Bit Helps!!

Mr. Hardware Man,—Don't you often find that the "little sales" of the day are a big feature in the day's receipts and are often the lever to larger sales?

The Kaiser Wax Pad and Iron Cleaner

is a "little thing"—retails at 10 cent—but it is a household necessity, something entirely new on the market, a quick and big seller, with a good profit.

Every housekeeper dreads ironing day, especially so when she has a lot of shirt-waists, men's shirts, collars, cuffs, etc. to iron, she always wants to obtain a high-grade finish, equal to first-class laundries. She of course asks the dealer for advice—in return he offers her the common wax—She knows it is impossible to do good work with the common wax—So she walks away—one customer lost.

Now where she can procure an article of this merit—that reduces ironing time by half—reduces labor to a minimum—adds to the finish of clothes—and makes ironing a day of pleasure—THERE SHE IS SURE TO DO HER BUYING—AND LEAVE HER ORDER FOR OTHER THINGS.

A post card to any of our Canadian agents or direct will bring a sample of this great little business getter.

New ways to satisfy old wants Open up new opportunities for sales

THE OLD APPLE TREE SWING and ONEIDA HAMMOCK CHAINS are new ways of satisfying old wants and they do it better than old methods. They are made of "Niagara" pattern steel wire chain, galvanized, and will hold a weight of 1500 lbs.

THE OLD APPLE TREE SWING was introduced by us last year when we handled only one size. Our sales were large and our customers report they took well. This year we have two sizes to offer. No. 75 is long enough to use on a rafter or tree branch nine feet from the floor or ground, and No. 100 twelve feet. They are put up one in a box and make a neat shelf package. Screw rings, cotton hand grips and apple tree board make the swings complete and attractive. They are very reasonable in price and sell at a good profit.

The ONEIDA HAMMOCK CHAIN also sold well last season. We have two sizes, No. 3 and No. 6, three and six feet long respectfully. The large illustration shows how they are used, and the box the style of package containing one pair.

Try sample lots of these two articles. You will find they will sell.

The Proof of the Demand for The "Gillette" Safety Razor

Five years ago the ***Gillette*** factory was a single room with a handful of employees.

Since 1904, the Boston factory has been enlarged four times. The buildings shown above have four acres of floor space, and house seventeen hundred workers.

The world-wide demand for the ***Gillette*** necessitated the establishment of factories in Montreal, London, Eng., Paris and Berlin.

For the ***Canadian*** trade the ***Gillette*** is made in Montreal in the largest and most up-to-date plant in the Dominion devoted exclusively to the manufacture of safety razors.

To you this demand for the ***Gillette*** means, if you take advantage of it, a source of steady profit. Every day men everywhere—right in your neighborhood, among your customers—are discarding old-fashioned razors and makeshift safeties, and turning to the ***Gillette*** for shaving comfort and satisfaction. Some dealer in your town is going to supply them, get their steady trade in new blades, and reap the profits.

The profits are sure and substantial, too, for the selling prices are fixed—and there's no price cutting.

KNOWN THE WORLD OVER

The "Norka" Two-Grooved High Speed TWIST DRILL

THE DRILL WITHOUT A TANG

This is the strongest High Speed Twist Drill on the market to-day and will do accurate work.

BECAUSE:

It is twisted while hot, from "W & B" High Speed Steel; therefore, the grain of the steel is not disturbed in any way.

Our special process of tempering enables us to produce the necessary hardness for great wear, and at the same time to retain the toughness of the steel, which reduces breakage to a minimum.

There are no "tang troubles" with the "Norka" Two-Grooved High Speed Twist Drill, as there is no tang on the Drill.

In making the Drill, a piece of the steel is left untwisted to form a shank. The jaws of the chuck fit perfectly in the grooves of the shank and the Drill is securely locked therein with a clamping nut. This also centers the Drill and insures accuracy.

"Norka" High Speed Twist Drills are ground to size, highly finished and fully guaranteed.

If you are interested in reducing your expense of drilling, write us for further information and our High Speed Tool Catalogue, No. 72.

Export Trade

Represents the Great Future Market for American Goods

Manufacturers that cultivate the field **NOW** are assured of the largest share of this trade in the future.

Our service, the greatest single power in Export Trade, enables manufacturers to get their products prominently before the trade abroad. An efficient service, covering all export markets at minimum of expense.

The aim of the **American Exporter** is and has always been the up-building of a world-wide demand for American machinery and goods. Issued in two editions each month, one in English, and other in Spanish **(Exportador Americano.)** The two together cover all countries that import American goods.

It is the only journal of foreign circulation which regularly publishes its exact circulation every month in its editorial pages.

Stronger evidence of the AMERICAN EXPORTER'S strength in its chosen field could not be brought forward than the phenomenal growth in its advertising pages during the past three years. The AMERICAN EXPORTER in net volume of advertising business carried three years ago 52 pages of net advertising; two years ago 88 pages; one year ago 116 pages; carries to-day 122 pages. Its number of regular advertisers three years ago was 325; two years ago 400; one year ago 550; and to-day 650. It is seen that notwithstanding a "panic," there is a growth in the last 12 months.

An increasingly important feature of the **American Exporter** is the Foreign Trade Service maintained on behalf of its advertisers. This service includes the sending of our representatives into foreign markets to study conditions in the interest of our clients, the furnishing of selected names of possible customers or agents in any country, commercial ratings on prospective foreign customers, translation of foreign correspondence from and into any and all languages resulting from or pertaining to the advertiser's announcements.

Representative space regularly in the **American Exporter** gives you all the export advertising you need, for this publication covers every foreign market for your goods. This publicity. coupled with our Foreign Trade Service, provides you with the necessary facilities for conducting intelligently an export trade.

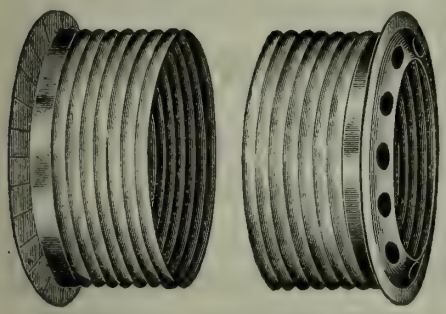
It's Time to Buy Your Awning



The accompanying cut shows the best awning ever invented for use on a store-front that has a prism fanlight. It is a roller awning with our exclusive Diamond Arm and Sprockle winding gear. It is very easily operated and does not interfere with the prisms. You will find this a handsome, convenient and durable awning.

O.K.
Adjustable Thimbles

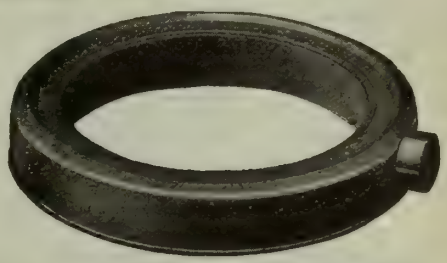
are the most practical Stove Pipe Thimbles in the world. They are handsome, durable and economical. They have no parts to get out of repair, and no springs to lose tension. They are composed of two sections which screw together so easily that anyone can adjust them to any size wall or floor.

Sold by jobbers, or by the manufacturers

The FOUNTAIN Sprinkler

NOT merely a round box with holes punched in it to let the water out —BUT a perfect Lawn Sprinkler.

NOT merely a group of straight round streams working with mathematical precision—BUT a natural shower of spray.



The Sprinkler with the "MIST LIKE SPRAY."

No other Lawn Sprinkler can produce the beautiful—The perfect results like the "FOUNTAIN."

The name "FOUNTAIN" is plainly marked in raised letters on the bottom of every Genuine, Original FOUNTAIN Sprinkler.

When you think of Lawn Sprinklers — Think FOUNTAIN
When you buy Lawn Sprinklers — Buy FOUNTAIN
And insist on getting the FOUNTAIN
Stick to the Sprinkler you KNOW is right.

Do you want a sample for comparative test. Post paid to any dealer at the wholesale price.

The Advantages of a Steel Rim Lock

are all strongly evidenced and appreciated in DOMINION, No. 3800, made in Canada. It is stronger, safer, surer and more satisfactory in every way than any ordinary lock. You can depend upon it. For that reason it is popular and a steady seller. Reasonable in price and reliable in construction, it is a line you should carry.

Write your Jobber for the National Brand

NATIONAL HARDWARE CO., LIMITED
ORILLIA ONTARIO CANADA

CONGO — The only Roofing Guaranteed by a SURETY BOND

IT PROTECTS YOU ABSOLUTELY

A Guarantee Without a Loophole

When we used to say that Congo 3-ply would last ten years people laughed and replied that "Every body claimed that." When we offered to *guarantee* such service they said "Guarantees mean nothing—the buyer can never enforce them."

So we went to the National Surety Co. and paid them a large cash premium to issue a Surety Bond *with every roll* of Congo Roofing.

These bonds give our customers a real, substantial guarantee *as good as a government bond.*

If the customer's own lawyer drew the guarantee he could not devise an instrument that would give any better protection.

It is because Congo is so tough, perfect and durable that the National Surety Company is willing to stand back of it. They know that we use the *best materials* and the *best methods* and that we watch and inspect every roll. Then we wrap it for domestic use just as carefully as if it were destined for Madagascar or Thibet, and you get perfect, undamaged rolls, every inch of which you can use.

The man that buys Congo gets the most value for his money and *takes no chances.*

We will send you a copy of that guarantee on request—also a sample of Congo Roofing free.

SUNSHINE FURNACE
is Superior to other furnaces

Because it is Easier to Operate, Easier to Clean and Easier to Protect.

The feed door on a No. 200 Furnace is 12 x 13 inches. This means that the largest shovel can safely be emptied into our smallest size, and that good-sized chunks of wood require no chopping in order to be used as fuel.

To keep the correct humidity for sanitary purposes, we place the water pan in Sunshine Furnace right over the main door, a place where the heat will reach it and where the householder can reach it. So in Sunshine Furnace the water never gets stagnant, and the householder never complains about the awkwardness of pouring water in.

To make the Sunshine the easiest-to-be-cleaned Furnace, we construct two flue doors, and place same not only an equal distance from each other, but an equal distance from the large feed door. So the operator with an ordinary soot cleaning brush can go completely around the radiator without inconvenience; and, what is more important still, he can do this without having to put out the fire or take down the smoke pipe.

35,000 Kelsey Warm Air Generators Sold

The Kelsey Warm Air Generator

We are not giving these figures showing the number of Kelseys sold since 1889 (when three heaters were sold) with any other motive than to impress you with the fact, that, although Kelseys cost more to produce than other heaters, they have made good because of sheer merit and good results accomplished.

IN COMPETITION with cheap furnaces and good furnaces, and steam and hot water heaters, the Kelsey has steadily forged ahead; the sales have constantly increased, and to-day more good dealers are urging Kelsey sales than ever before.

Kelsey Heating is for Homes of Any Size, and for Churches and Schools, and there's no heater or system of heating for these purposes that is better at any price

ANY DEALER who will explain the many advantages of the Kelsey will have little difficulty in selling to those people who consider comfort, health and efficiency above the matter of a low first cost.

Address on Retail Salesmanship

An Address Delivered by H. H. Welch, of the British-America Paint Co., at the Recent Convention of the B. C. Hardware Dealers' Association at Vancouver.

In opening, allow me to congratulate you upon the past success of your association, and the able manner in which its affairs have been administered.

We are now entering upon the business season of 1909 which promises to be a most fruitful and successful one, and the outlook for a prosperous year's business is even brighter than in 1907—our banner year.

It is up to yourselves "when you next take stock" whether your season's business has been profitable, or not, and this Association of Hardware Dealers is a very powerful agency for bringing about success, and placing your whole field of business associations on a profitable and pleasant basis. It gives you a chance of combining for mutual protection, and of creating better feeling, preventing slashing and cutting, which is both unwise and unnecessary, for, with confidence in one another, and a little business courtesy, nearly all differences can be easily and satisfactorily settled.

Confidence is the corner stone of business, the keystone of the arch of success. If you stop and think for a moment, you will realize that nearly all business transactions are based on confidence in our fellow man. Consequently, when some customer comes and tells you that he can purchase certain staples below the association price, don't cut your price at once, but ascertain whether he is mistaken or just trying to work you, as is so often done.

Let your standard be "good prices for good goods" and if you know your goods are right, you need have no fear to ask a good price for them. Remember the salesman's maxim that there is no satisfactory sale, unless the purchaser is getting good value, as well as the seller.

Win Your Competitor's Trust.

This Association should create a bond of good fellowship and understanding, that will permeate our business as it does our friendship, and, it is right here that I want to urge upon you the fact, that its success depends upon a full and regular attendance at all meetings, and, your enthusiastic support given the officers, to the end that full measure may be attained. Let your actions and thoughts in transacting the Association's business have the spirit of "Come on" instead of "Go on."

The carrying out of the purposes and objects of this Association tends toward profit making, while, on the other hand, the slashing of prices may result in serious loss or greatly diminished profits, because all houses of business (whether large or small), have certain fixed items of expense, which must be met. Observation will lead to the conclusion that many of the failures in business are traceable to the evil of price slashing. Fortunately the practice is the exception, and not the rule, with British Columbia hardwaremen, for which you are to be congratulated. Remember you are trusting the other fellow to maintain prices; don't give him cause to lose faith in you.

All here present can lay claim to the title of successful salesmen, I believe. Our experience has given us the knowledge, while our positions are our diplomas. We all realize the ultimate success of a business depends upon the selling end, and that as your salesmen are virtually your representatives, the best type of men and the highest degree of efficiency are necessary for the greatest success. Any old "stop-gap" is not good enough for the hardware merchants, in this age of keen competition, as a poor clerk will drive away more trade than would pay for a good one.

As Sheldon says, "The real salesman is continually sowing seeds that will ripen into profits on future sales. He is ever starting endless chains of influence for other sales."

A satisfied customer, made so by an honest intelligent salesman, will not only come again, but bring his friends, and this means profits on future business. Endeavor to get your men to take an honest and intelligent interest in the goods they are selling, as earnestness is an essential to successful salesmanship.

Salesman Must Be Polite.

Every hardware or other commercial institution, is in the business for the profit it can make from its sales, and, therefore every firm, corporation, or single individual operating for the sale of goods for profit is a "composite" salesman. Every salesman and worker in that institution, from the manager down to the delivery boy, is a unit of that composite salesman. The science of success to-day is nothing more than the science of service.

He profits most who serves best, and as confidence is the basis of trade and all human relations, it therefore behooves ever man in this convention to do all he possibly can to stimulate loyalty and enthusiasm on the part of his employes by recognizing and rewarding intelligent, earnest and persevering service from them.

The true salesman is a gentleman; he is polite, considerate, self-controlled, and watchful of the interests of others; he will greet his customer with a pleasant good morning, will use "Sir" or "Madam" in speaking, thereby exhibiting his culture and good breeding.

Rebukes and turn downs he will take kindly, and he will invite his customer to "call again." He is patient with shoppers and will endeavor to find out exactly what they want and sell them what is best suited to their requirements. He will command attention by pleasant manners, in short he will make a friend of every customer. We should all do this, as it is much easier to make a sale to a friend than to a stranger.

Confidence the Basis of Trade.

A salesman should always feel he is not doing his full duty by simply showing the customer the article he asks for, but should interest himself heartily in the customer's welfare. He should help him by his superior knowledge of the hardware trade. If a customer asks for an article and the salesman knows of an-

There is an old saying that "Salesmen are born not made." I hardly agree with that as I am convinced that salesmen are made as well as born, for salesmanship is largely composed of good common sense, and the power of making the other fellow feel as you do about the goods you have to sell. Enthusiasm is essential to success and if you are enthusiastic over your own business, you will naturally enthuse those you have around you. I know this from experience, like the man who said it paid to be honest, because he knew both ways.

In mentioning the great truth that there is more in business-building than in business-getting, I will quote "Sheldon" in a recent address, when he said that confidence is the basis of trade—and every thought that you think, every word that you speak and every act that you perform, either adds to the sum of confidence which the public has in your institution, or it subtracts from it.

The whole thing may be summed up by saying, "Make your customers repeaters." Do this by giving them good goods, fair prices and efficient service. Make it a policy of your business to carefully select your men behind the counter. In other words "get square plugs for square holes and round ones for round holes."

Address Appreciated.

Mr. Welch's address was greatly appreciated by the members and he was asked to deliver it again at the banquet for the benefit of the employes who would be present.

A hearty vote of thanks was tendered Mr. Welch for the able assistance given the Association and his address was ordered to be forwarded with the official report to Hardware and Metal for publication.

CANADIAN WINS FIRST PRIZE.

Glenn A. Henry, of John Bailes & Son, Oshawa, Ont., won first prize in a story writing contest recently conducted by the Sherwin-Williams Company, the competition being open to all agents in Canada and the United States. Chas. D. McCaffrey, with W. Curry & Co., Omemee, Ont., is fifth on a list of thirteen, the first three securing cash prizes and the next ten honorable mention.

Robert Munro, managing director of the Canada Paint Co., Montreal, spent Thursday in Toronto. Mr. Munro leaves next week for Scotland, where he will spend a couple of months on his native heath.

Seasonable Windows and Show Cards

Two Prize-winning Broom and Brush Windows Arranged by Toronto Hardwaremen—Suggestions for Writing Show Cards.

Between April 10 and 24 brooms, brushes, woodenware and house cleaning utensils were shown in Toronto hardware and grocery stores as never before, the reason being the announcement made by the manufacturers of Boeckh's brushes (United Factories, Limited), Toronto, that $100 would be given in prizes for the best displays of goods of their manufacture. To both hardwaremen and grocers three prizes of $25, $15 and $10 were offered and the editors of Hardware and Metal and the Canadian Grocer were asked to judge the displays.

The best display from the standpoint of attractiveness was made by a grocer, W. J. Graham, 842 College Street, it being very original in construction, the centrepiece being a cottage made up of brushes, with a roof of whisks trimmed with clothes lines, a porch being also made up of scrubbing brushes with clothes pins as pillars. In front of the cottage was a garden with flower beds, the yard being enclosed by a fence of clothes pins with whisks set in the floor as corner posts. Above the house was a semi-circle of brooms with the handles grouped together in the centre.

S. M. Burt, also with the lucky number of "842" Yonge Street, was awarded first honors among the hardwaremen, his display, shown in the accompanying illustration being very original in appearance, and more likely to sell goods than Graham's window. It was put together in the form of a canopy of brooms wired together over a dome covered with a wide variety of Boeckh's brushes ranging from tooth and shaving to whitewash and paint brushes. In the window are also shown washboards and pails, stable brooms, scrubbing brushes, sink brushes, window cleaners, hardwood floor polishers, carpet sweepers, whisks, etc., most of the goods being price marked in plain figures on the handles, the neglect of pricing being a fault with too many of the windows examined. Above all Mr. Burt had a sign reading "Boeckh's Brooms" made up of broom corn.

George Pearsall & Son, 417 Yonge Street, captured second prize with a window attractively draped with red crepe paper on iron rods, hanging from the rods being samples of several dozen styles of brushes made in the Boeckh factory. The background was also neatly arranged, while on the base rested two pillars showing brushes for waxing hardwood flooring. Below this was an example of artistic assembling of brushes, samples of various kinds being stacked together and tied with ribbons. A centrepiece calculated to attract attention was a card: "The flag and brush that can't be beat," accompanied by a Union Jack and one of the Boeckh brushes. Mr. Pearsall did not price his goods but he had a display which attracted attention and sold goods.

Third prize went to W. Walker, 1228 Yonge Street, above the C.P.R. tracks, whose store is, barring the new Vokes Hardware Co.'s store, the neatest in Toronto, so far as construction, shelving and fixtures are concerned. Mr. Walker's window, which is not shown this week, differed from any of the windows referred to, having a centrepiece of four tubs set into each other surrounded by circles of scrub brushes, clothes line and clothes pins, and with a top of wash boards. A fan shaped arrangement of brooms was shown on both sides of the window and a neat display of waxing brushes, door mats, blacking and paint brushes filled up the bottom. Mr. Walker did not price his goods as he has found that it has worked out to his disadvantage to do so in lines in which he is competing with grocers.

Altogether there were about fifty stores competing for the six prizes, five of which went to Yonge Street stores, showing that more attention is paid to window advertising by the merchants on Toronto's main street than is done by those on Queen, College, Bloor and other business streets. Commendable displays, however, were made by George Stirrett & Co., 597 Dundas Street, J. C. McFadden, 763 Queen Street east, Samuel Hobbs, 1434 Queen Street west, J. W. Oram, 836 Yonge Street, R. T. Walker, 847 College Street, Prichard Hardware Co., 142 Dundas Street, John Hewitson, 904 Yonge Street, W. H. Lake, 608 Queen Street west, and C. F. Moorehouse, 220 Queen Street east. Other displays had no points out of the ordinary.

The judges in making their decision worked on a basis of giving points for selling qualities, attractiveness and originality, these being considered in the order named. A window might have a good appearance but if it lacked originality and failed to have strong selling power, calculated to arrest the attention of passers-by and bring them into the store to buy, the window stood no chance to win a prize. And the judges felt that more attention paid to placing inconspicuous price tickets on the goods would have added much to the selling power of many of the windows shown.

Window dressed by S. M. Burt, Toronto, awarded first prize of $25 in the Boeckh Brush Co.'s Competition.

In window displays this important fact should be remembered. Keep the backgrounds neat and attractive, changing them as often as it is necessary to obtain the desired effect from the goods displayed. Avoid long-worded cards, and plan out the design before the window display is started, take time, and see that the work is done neatly. Price each article if any pricing is done at all, although in an elaborate descriptive design pricing should not be attempted. If newspaper advertising is done, be certain to refer to the windows.

Don't worry. Things are never half as bad as it is possible for them to be.

Hardware Letter Box

Any questions on trade subjects will be answered by the editor in this department. Do you want any address, any special line of goods, anything relating to the hardware trade? Ask us. Letters from manufacturers, jobbers, travelers, retailers or clerks are solicited. Suggestions for trade improvement or discussions on trade evils are invited.

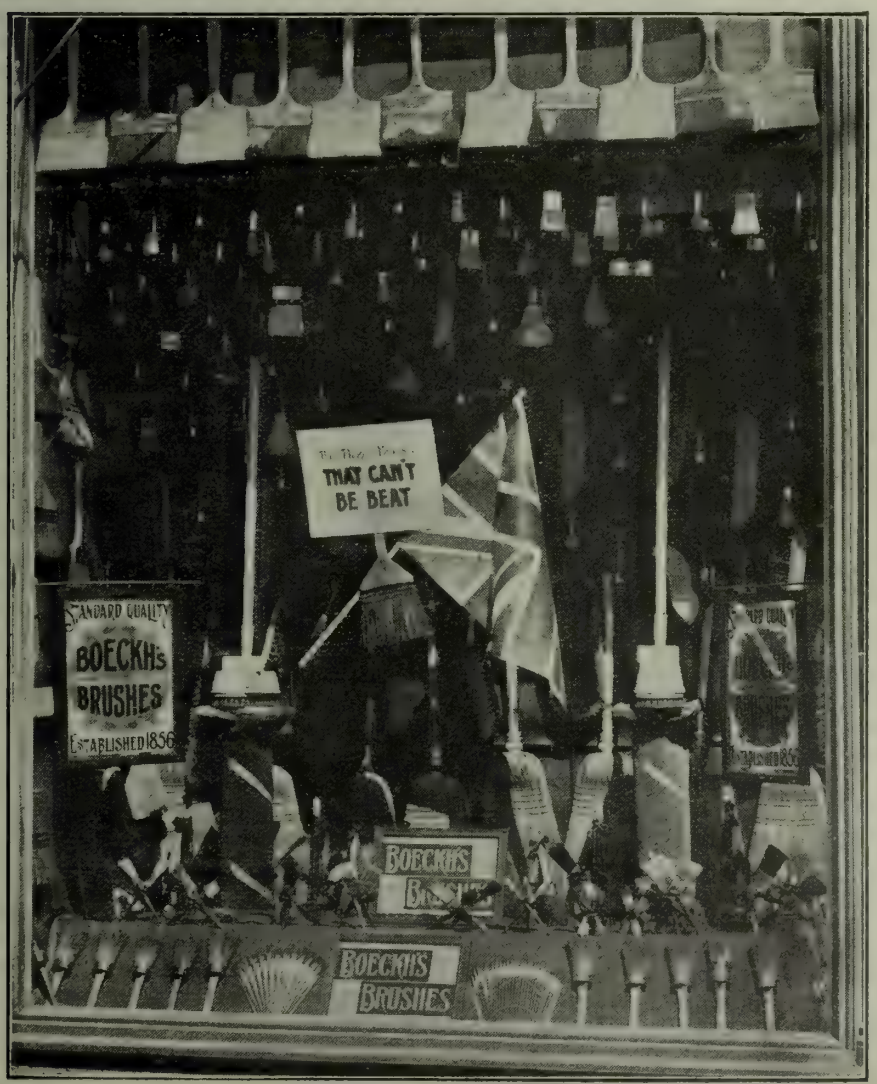
Lawn Mower Sharpeners.—Chas. E. Boyd, Simcoe, asks for the makers of lawn mower sharpeners.

Robert Woon & Co., Oshawa, make a reasonably priced machine, other makers being the Caldwell Lawn Mower Co., Newburg, N.Y.; Chicago Wheel and Supply Co., 39 Randolph street, Chicago; Luther Brothers, Milwaukee, Wisconsin; Osborn Mfg. Co., Cleveland; and the National Machine and Stamping Co., Detroit.—Editor.

Crescent Bicycles.—Frank Koehler, Watrous, Sask., asks if any one in Canada sells the Crescent bicycle.

The Canada Cycle & Motor Co., West Toronto, took over the agency for this machine several years ago but are not now manufacturing it. They can supply parts, however.—Editor.

One Minute Washing Machine.—Mrs. Catharine Hanauld, Ethel, Ont., asks where the "One Minute" washing machine can be procured.



White-Ehrhardt Co., 121 Logan Ave., Toronto.—Editor.

Steel Eyebeams.—J. A. Henderson, of Brampton, asks where he can buy iron eyebeams in the United States.

Drummond, McCall & Co., Toronto, are import agents for the United States Steel Products Co., who also have an office at Buffalo. Samuel, Benjamin & Co., Toronto, are also importers chiefly of European goods.—Editor.

J. H. Worsell & Son, Goderich, ask where they can buy sheet iron boxes for hospital donation work.

W. F. Heise Mfg. Co., 61-63 Union Park St., Chicago, are reliable makers of rural mail delivery boxes and similar goods. The Macdonald Mfg. Co., Toronto, also make small savings banks of decorated tinware, these being used by the Salvation Army. They might undertake to make heavier boxes.—Editor.

Window shown by George Pearsall & Son, Toronto, awarded second prize in the Boeckh Brush Co.'s Competition.

Catalogues and Booklets

Manufacturers or jobbers sending printed matter for review, should draw attention to the new lines listed; and retailers sending for catalogues or other matter, should write on their regular printed letterhead and mention this paper to make clear that they are in the trade.

Star Brand Hammocks.—The Dominion Hammock Mfg. Co., Dunnville, is issuing, through the jobbers, a catalogue containing price list and discounts. This catalogue is devoted to illustrations and descriptions of the "Star Brand Hammocks" made by the company. With the summer season near at hand hammocks should be a good article for hardwaremen to handle, and if there is a department in the store for the selling of seasonable goods, hammocks should help make that department one of the best paying in the establishment.

NEW MOLDING FLASK.

Louis W. Daman, of the Enterprise Foundry staff, Sackville, N.B., has been granted patents in Canada and the United States for an improved form of molding flask, which, it is claimed, will lessen the cost of manufacturing in foundries and will also help to increase the output. The new system made possible by the Daman flask will be applicable in all branches of foundry practice.

With the present foundry flask it is necessary to have a wooden or iron flask for each mold required excepting in bench molding, which is limited to a very small size. For instance, if a molder was capable of making 30 molds of a given size per day he would require 30 wooden or iron flasks. With this new system the number of molds possible is unlimited; all that is required is one flask and four or five jackets. The jackets are to be shifted from one mold to the other until all the molds have been filled. With the jacket in place and clamped down to the bottom board there is no chance for a run-out or strain on the castings, for there is nothing to yield to the pressure of metal while it is being poured. This is one of the many faults found with the present foundry flask.

Wooden flasks, which are mostly used, soon wear out, or twist and become weak. The loss from strain and run-out and burning of wooden flasks is great. On the other hand, cast iron flasks are too heavy to handle quickly and the breakage is a great expense. Very often, too, a change in a pattern will make them useless. With the new system a great variety of castings can be made without any change in the system outside of a possible change in the bars. For instance, in the stove business, it is necessary to have 36 flasks to make one ordinary No. 8 cast iron range. If the business demands 20 ranges per day the foundry must have 720 flasks at about $3 each; with this new system it would require about fifteen flasks and 75 jackets only to make all the 20 or more complete stoves per day and a variety of other patterns.

PUBLISHED EVERY SATURDAY.

THE METAL DEMAND.

Although buying has undoubtedly improved in the primary markets, the great rally in the demand that we have been looking for since nearly a year ago, has yet to make its appearance. Nobody with the true interests of the metal situation at heart, desires a strong boom which would inflate prices without giving stability. Speculators holding large stocks would like to see a meteoric rise, but the legitimate merchant wants stability with improvement, for he thinks of the future as well as the present. It is not easy to recover from a depression. Hard times come quickly but their effects are felt for long afterwards, even though the real pinch is past and done with.

The aggregate consumption is better than it was, leaving out the little boom round the Presidential election, but it is a long way from what it should be considering the poor buying all last year. Users have undoubtedly more confidence in prospects, but their confidence stops at buying more than they can scrape along with. Even the railroads which should be in the van, as the most progressive of commercial corporations, are still economizing and thinking of present rather than future dividends. All the way round users of metals are taking a restricted view of the situation rather than a broad one. Of course a large amount of metal is being consumed, and we are afraid a very large amount stored by speculators, but the consumption is not what it should be in the spring of a year that promises so much prosperity. It is only necessary for consumers to put aside their cautiousness and encourage things by increasing their output, to start the confidence ball rolling in good earnest. The consuming demand for the finished article wants encouraging, and the best way is for the manufacturer to show by his activity that he knows that the future is bright.

Within the last week or so there seems to be a brighter feeling in the iron and steel situation and this should encourage the other metals, for after all it is iron and steel which reflect the real condition of trade. We feel sure that a strong progress in demand is waiting to break in. It wants the strong controlling influence of the railroads and the large consuming concerns to show that the need for cautious buying and no stocks is at an end.

KEEP STOCK WELL INSURED.

A hardware store recently destroyed by fire in an Ontario town had $35,000 insurance on a $45,000 stock and $6,000 on a $9,000 building, the loss, therefore, being about one-third of the total value of stock and building, with the result of several years of labor swept away in a night. The hardwareman is still young and can retrieve his loss but it is safe to say he will take less chances with the fire demon in future.

Too many merchants take chances, risking not only their own property but their connections with those who are jointly interested with them in the success of their business. They feel that fire is hardly likely to hit them and they run along with a limited amount of insurance, besides taking additional risk in carrying dangerous stock on the shelves or in barrels where they can cause untold damage if fire reaches them.

High insurance rates undoubtedly encourage laxity in insurance matters, and lack of appreciation of friendly actions arouses antipathy to insurance companies. Hardware and Metal knows of one case where a hardwareman was refused reasonable damages to pails, rope, etc., which he allowed fire fighters to use in quenching a fire in an adjoining building, both buildings being insured in the one company and both being saved largely as a result of his assistance. The dealer is anxiously awaiting the time when he can place his insurance with the proposed Ontario Retail Hardware Mutual Fire Insurance Company.

Hardwaremen should take advantage of every fire fighting device, meeting the requirements of the Underwriters' Association in getting their rates down to a minimum and maintaining some appliances for quenching a blaze when one occurs. A fire, even if the stock and building is well insured, is a thing to be avoided.

PAINT SELLING POINTS.

It is very important that the merchant should take the utmost pains with his paint customers, especially if they are of the opposite sex. Most women have little knowledge of the correct way to paint, and there have been cases where failure to stir the paint brought forth complaints as to the quality of the article supplied. Then again paint is often bought where stain would have been the correct thing, and a thick brush where a thin one would have done. Although such mistakes are not the fault of the merchant all these things are laid to his door, and his paint department suffers.

The merchant, therefore, should interest himself, not only for his own sake but to make a friend of his customer, in each sale. He should inquire the purposes for which the paint, stain, or whatever it may be, is wanted, and then if he sees that the customer is not buying the most suitable kind, or the best color for the work, he should tell her so. Not only is his client pleased at the interest that the merchant is taking in the case, but there is less danger of complaint afterwards being made.

The merchant should also follow this up with some practical pointers as to the best way of using paints and stains. Some people imagine that all one has to do in painting is to seize the brush and pour the paint over the surface, paying no attention to the previous condition of the latter, and expecting the new surface to show up bright and clean looking and without blemish. Then when on the contrary it looks smeary, or blisters the merchant must sell bad paint. It is, therefore, well for the dealer to see that his customers are warned as to the necessity of seeing that the surface to be treated is in good condition to take the paint. Explain that surfaces must be dry, free from grease, and that the paint should be applied in thin coats. Also that it is false economy to use only two coats of paint on a new surface. Advise also as to the best brush to use, and the best color. Let the customer see that the merchant is greatly interested in the painting work that she has before her, and that he is anxious she should make a good job of it. In that way he gets the customer pleased with the store, and not only strengthens her patronage, but makes her willing to recommend the dealer to her friends. It is salesmanship of this kind that helps the store.

Just as the circulation of the blood is a necessity to carry vigor and life to the extremities of the human body, so the constant circulation of ideas throughout the entire store keeps the whole vibrant with life, and resonant with the energy of prosperous business.

Suggestions for May Business

With his spell of marking-time over, the merchant is face to face with the spring demand, and his success during the coming weeks will be commensurate with the extent of the preparations he has made, and the efforts he has planned to stimulate the natural flow of business. The man who has left off certain necessary alterations to his store until the present moment, with the result that workmen will be in possession of the place when the customers are pouring in; the man who has delayed getting his stock in, either through the evil of procrastination, or through a belief that the markets were bound to fall—which they have not done—and the man who has undertaken no advertising campaign to stimulate consumption, have done their best to strangle their chances. They are, as it were, starting in the spring Marathon, untrained and with little knowledge of the course. They will last the race, but they will not come in first, or second, or third. They will struggle in when all the shouting is over.

But the merchant who has committed none of these errors, who has his store in the best shape, everything looking as fresh as spring itself, with nothing on order with his jobbers, a complete assortment of lines displayed to the best advantage, and who has advertised, and is ready to advertise, is in the best possible condition. He is ready to start when the pistol goes off, not to slacken up until the course is run. We cannot too strongly urge upon dealers the great advantage of taking time by the forelock. Be ready for the trade, have all your window displays planned out, so that concentration can be made on your salesemanship. The judicious cultivation of the district during the tail end of the winter, gives the store a niche in the minds of the consumer. The latter has already associated your store with what he knows he will have to get, and now the time has come, the merchant reaps the reward of his labors.

* * *

The merchant should not be in a hurry to take out his window displays of house-cleaning utensils. He should be guided by the weather, and if radiators and stoves are still kept going, and storm windows undisturbed, then the housecleaning lines should hold pride of place. No woman likes to do her housecleaning until the "dirty" fires are done with, and the windows of the house got at easily. Besides, these lines especially appeal to the women, and it is the women that the merchant wants to entice into his store. They are the future purchasing agents of the community, and they should be made as familiar with the hardware store as they are with the grocer.

Then do not forget the paints. Keep them displayed all the time, and more particularly when displaying cleaning utensils, show the stains, enamels, and other specialties that would be wanted in the house to help in this brightening-up process. Impress upon the housewife the value of paints and allied lines theeir hygienic qualities and the ease with which they can be applied. Push paints, for there is profit in the process.

* * *

Gardening tools should now be displayed to their fullest extent. It is with these articles, excepting paints that the merchant can give the best appearance of spring to his windows. Put plenty of green into the window design Let the merchant pronounce the fact that spring has arrived, although a clouded sky may make some people sceptical of the fact. Let the merchant by his display make it evident that gardening tools have to be bought at once, and at his store. This can be done if the display is strong enough.

* * *

During the month show carpentering tools, and a good assortment, too, althought it would be well to leave out the articles that are out of the ordinary use and of high pricee. Building during this month is commencing to swing with vigor, and the workman wants his kit in shape. On occasions devote an entire window to tools, arrange them artistically and keep them classified as to sizes and prices. Builders' hardware should also be given a good run. This line of goods is getting more artistic every year, and Canadian manufacturers are turning out finer articles as the demand improves. Escutcheons, handles, rosettes, etc., mounted on stained boards, makes a most artistic and attractive window.

* * *

An elaborate display should also be made of refrigerators, ice cream freezers and water filters. The following pretty design has been suggested for a display of ice cream freezers. Erect steps in the window for several feet, covering them with white; over this put cotton in rugged form, sprinkling diamond dust on the cotton. From the roof suspend long strips of cotton in an irregular manner, hanging down and running over the edges of the ice cream freezers. Between the freezers show the imitation of snow drifting. The effect of such a display during May will be remarkable, especially if the days are hot. Price each freezer, and also use a catchy card referring to the need of something cooling on a hot day. Merchants handling a line of saddles and harness, should make an attractive display of this class of goods, showing at the same time, whips, bridles, and stable accessories.

* * *

Winter stoves are now relegated to the background, but in their place kitchen ranges, gas, spirit and oil stoves can be pushed. There is a market for ranges all the year round, while the stoves we have mentioned sell the best in spring and summer. Besides the camping out and picnicking parties will soon be on.

* * *

Then the sporting department should be pushed with vigor. Starting out with fishing tackle, the merchant can, as the time goes on, include baseball, tennis, football, yachting supplies, automobile and bicycle accessories, etc. A good, but yet economical display of fishing tackle can be made by simply stretching a net, either diagonally from the back wall of the window to the floor, or in a semi-circle the full length of the window, using apple-green for the background and floor helped out with artificial leaves and moss. Display such goods as floats, quills, lines, artificial minnows, etc., on this net, using the floor for the hooks in boxes, minnow buckets, and large goods, which could not be well placed on the net. Too much stress cannot be placed upon the proper display of sporting goods. Indeed, much of the success in selling these lines depends upon this very thing. They are not a necessity like other classes of goods, and therefore should be given the best chance. Many dealers fail to secure the trade that is at their door because they do not push the lines properly. They do not place their goods where the people can see them, or inform the community by other advertising means that their stores carry the lines. They should hustle after the trade instead of allowing it to come to them.

Don't get in with people who are always falling out.

Many a man who isn't a coward is afraid of consequences.

Run over the list of your friends and you will be surprised at the number you could dispense with.

CANADIAN METAL MARKETS

See Itemized Market Quotations on Page 74.

MARKETS IN BRIEF.

Montreal.

Tin—Down a cent.
Spelter—Firm.
Tin—Unchanged.
Bolts—Firm.
Lead—Cut of 10c.

Toronto.

Turpentine—Cutting.
Chalk Line—Reduction of 2½c lb.
Buck Saw Blades—Some lines down 10c.
Iron—Canadian pigs $1 advance.
Lead—10 cents lower.

THE METAL SITUATION.

Despite improved consumption in New York in tin, the English market has shown a declining tendency. The bear operations have been too strong for the orders coming across the Atlantic, and prices have sagged badly. The unrest in the European political situation is also responsible for the hammering that has gone on. Copper has shown improvement in London, but not enough to influence New York where quotations remain very much as they were. The home markets are dull but exportations to Europe are heavy, which seems to show that foreign speculators have confidence in the situation. No efforts are being made to restrict production. Lead in London, after declining, improved a little, but there has been no strength to the market. Spelter is as firm as ever, and London quotations are as steady as Cleveland warrants were last year. St. Louis also keeps up well. Consumption is good, and production well in hand. Cleveland warrants are quoted at 47s 6d., a decrease of 3d. since last figures. The situation in the Old Country seems about the same. An improved tone is manifested in pig iron and steel in the States. Stocks of pig iron continue to decrease, while orders are swinging in more freely. There is an increased inquiry for finished steel products, and prices generally are held fairly firm.

MONTREAL.

April 30.—The opening of navigation has greatly stimulated trade, some heavy cargoes being already shipped, or in the course of shipment. Jobbers find that buying continues as free as ever, but still on the light side. Users are accumulating no stocks, and the markets in that respect are in good shape. Inquiries are better, and users continue to display strong interest in the situation. All metals are in request, but tin and spelter are most prominent. As a matter of fact there is not an overabundance of tin on the market.

The markets are unchanged this week with the exception of lead, which has been cut 10c. Spelter continues very firm, as is only natural, considering the demand and the firm figures in the primary markets. Copper is inclined to be week, but the changes in the New York market have not been strong enough to affect local prices. Heavy cargoes of imported iron are on their way, and the port will soon be busy.

PIG IRON—Activity has increased in pig iron as the heavy consignments from Glasgow and Middlesboro are now expected within a few days. New orders are coming in more freely, and busy times are anticiated. Scotch grades are still firm, while English lines are stiff, producers not being anxious to contract ahead at present prices. Canadian furnaces are reported as being busy, although there is no great rush. We quote imported pig, Clarence, $16.75 to $17; Middlesboro No. 3, $16.50 to $16.75; Summerlee No. 1, $18.75 to $19; No. 2, $18.25 to $18.50.

TIN—Orders are swinging in well, and the market, despite a sagging in London, is on the firm side. There is not too much tin at present in sight locally, and jobbing prices are maintained at 32½ for ordinary lots. Good consignments of tin are booked for boat delivery. Inquiries are coming in well, and with the primary markets in better shape than they are, business would be influenced. New York consumption is very good, but although orders have been freely placed in London English bear operators have kept figures down.

COPPER—The jobbing price of copper is unchanged at 14c with fair trade moving. The fluctuations in New York have not been sufficient to influence jobbing prices. Heavier consumption would help things along here, but the primary markets continue dull and apathetic. The Dominion Copper Company which has gone through so much tribulation is to be sold early in May in British Columbia, and the reorganization committee are reported actively getting things into shape again.

SPELTER—Spelter continues to sell well, and the market is firm and unchanged at $5.75. The London and St. Louis markets maintain their strength splendidly, and this helps to keep things moving well locally.

LEAD—There has been a cut of 10c in lead, making the price of imported pig $3.65. Trail naturally follows suit, and is marked at about $3.55. Fair orders are being received but the English market is far from being strong, and the recent sagging naturally affected the local market.

TORONTO.

April 30.—The metal market is showing a little more strength this week and there is some little improvement in buying, though orders still call for small quantities. While there are more buyers in the market there are also more sellers bidding for business, so no one or few houses are able to get all the trading that is going.

Copper and iron are the centre of attraction. While the former metal is at the same quotation as last week, there is a decidedly easier tendency. Domestic pig iron has advanced, no doubt due to the firmness noted in the eastern U.S. markets with the prospect of higher prices, together with decreased production of home furnaces. The other metals show some changes. Tin is off a cent, though it is likely it will go up again before another week goes by. Lead is much easier and the local quotation is lower.

Demand from consumers appears to be strictly confined to absolute requirements, which leads one to think that activity in the manufacture of metals is somewhat restricted.

PIG IRON.—While the decline in English pigs noted a week ago yet holds good, there is a firmness to the domestic product and prices have advanced to $19.50 for Canadian foundry. Production has not been increased at home and this fact taken in conjunction with the promise of higher prices in Pittsburgh and New York have given a firmness that has been lacking for a year. This has had the effect of boosting Canadian pigs $1 over the quotations prevailing until now. The high quotations of English iron during the winter were hardly justifiable and those lines are now at a figure more in conformity with the condition of the market. Of course the opening of navigation has allowed imports to come nearer Toronto by boat and there is too, a consequent lower freight rate. No. 3 Middlesboro is $20 and Cleveland, $21.50.

COPPER.—Supplies are still very large and likely to remain so for some time. The local quotation remains at 14c, though during the past week the price has been fluctuating between 13c and 15c. A ½c better price may be had for quantities, as there is a much firmer tendency abroad.

LEAD.—Another decline is noted in imported lead and the market now shows $3.65 as the quotation. Large quantities may be had below this, but for jobbing lots this is a fair price.

SPELTER.—This metal although unchanged in quotation for several weeks shows a firming up tendency. Ever since the beginning of April, spelter has been strong and there certainly will be an advance if the present improvement continues.

SHEETS AND PLATES.—There is hardly any perceptible change in conditions and no change at all in price. Unlike other metal lines sheets and plates do not enter into so much speculation. Importations are made once or twice a year and the price for the season is fixed in the buying price and irrespective of market values. The spring importations are now on their way to Montreal and they are expected to arrive next week.

TIN.—Pig tin is off again this week and a decline of a cent from last week's quotation is asked. It is not thought that this low price will last, except for fair quantities, but that before many years the market will firm up again.

OLD MATERIALS.—All lines are moving more freely. Stocks continue large, but there is not the accumulation of a couple of weeks ago. Dealers are buying freely still, but there are also some fair sales being made. Prices are unchanged and dealers are paying for heavy copper and wire, 11c; light copper bottoms, 10c; heavy red brass 9¾c; heavy yellow brass, 8¼c; light brass, 6¾c; tea lead, 2½c; heavy lead 3c; scrap zinc has gone up from 3¼c to 3½c and 3½c; No. 1 wrought iron, $10; machinery cast scrap, No. 1, $14; stove plate, $12; malleable and steel, $8; old rubbers, 7¼c to 7½c.

HARDWARE MARKETS

MONTREAL.

April 30.—Orders from Quebec have been somewhat quieter this week, owing no doubt to the cold weather. Snow storms are hardly stimulating to spring trade, and dealers have not been so busy as they would be under more genial conditions. The Maritime Provinces, however, do not seem to have been so affected as business is coming along steadily and well. The Northwest appears to be in good shape, and well assorted orders are being received. Seeding has been delayed, but no uneasiness is being felt over this. Shelf lines continue to move much better than the heavy stuff.

Gardening tools, especially hose and lawn mowers, are in good demand, while builders' hardware continues to develop splendidly, especially locally and nearby points. Harvest tools have improved. The near approach of the baseball season has stimulated the demand for baseball supplies. Booking ahead generally is still quiet, nearly everything being for immediate delivery. No important changes in prices are announced, and the markets are firm. Bolts are very stiff under a good demand.

BUILDERS' HARDWARE. — A strong local demand has sprung up, influenced no doubt by the very encouraging building prospects. Jobbers report good orders of an assorted character from all over the country. The markets seem generally firm, and we continue to quote: Door sets and escutcheons 50 and 10; escutcheon pins, steel, 50; brass, 55. Spring hinges, No. 20, $9 per gross.

SPRING LINES.—Gardening tools are now moving prominently, especially hose and lawn mowers. House cleaning lines are in steady demand but there is not quite the rush noticeable a week or two ago. Repeat orders are coming in for screen doors and hinges, green wire cloth and poultry netting. Refrigerators are moving steadily. We continue to quote: Screen doors, stained, $7.80; grained, $8.10; screen hinges, $9 a gross; poultry netting, 60 and 2½; green wire cloth, $1.70 in 100 feet rolls.

HARVEST TOOLS.—Bookings have improved in these lines, and a promising call is opening up. Some immediate delivery orders have appeared, but the full movement has not yet been felt. We continue to quote: Hay fork pulleys, $1.60 to $8.50 a dozen; hay carriers, hay rakes, etc., 55 off.

MINERS' SUPPLIES.—Fair business is swinging in. Repeat orders are at hand from some of the large mining districts, and business seems to be improving, There are no changes in prices, and we quote: Miners' picks, 17c a pound; prospectors' hammers, 20c; pick handles, $1.85 a dozen; drilling hammers, 6c a pound; crowbars, 3½c; drill steel, 8c.

BOLTS AND NUTS.—The market in bolts is very firm under a good demand. Orders are for larger bulk, and dealers are stocking up. We continue to quote: Discounts on carriage bolts, ⅜ and smaller, 70; machine bolts, ⅜ and less, 60, 10 and 10; coach screws, 75; stove bolts, 80 and 7½.

SCREWS.—A steady movement characterises all ordinary sizes. Prices are unchanged and we quote: Discounts at 85 and 10 off for flat head bright; 80 and 10 off for round head bright; 75 and 10 for flat head brass, and 70 and 10 for round head, brass.

WIRE.—Wire is still a prominent seller and the five movement noticed last week continues. Prices are unchanged and we quote: Barb wire, car lots and mixed, $2.65; small lots, $2.70; plain, twist, car lots, $2.95; small, $3; plain wire, $2.30 base; barb wire, $2.65 in straight and mixed car lots, and $2.70 in small lots. Galvanized wire No. 9, $2.35 in straight and mixed car lots, and $2.40 small lots, f.o.b. Montreal. Coiled spring fencing, $2.65, straight and mixed car lots, and $2.75 small lots.

BRIGHT WIRE GOODS.—The demand continues good. Jobbers report well assorted orders with the markets firm and unchanged. We quote: Gate hooks and eyes, and screw hooks at 60 and 20 per cent.; stove pipe eyes, screw eyes, and square hooks, 60 per cent. Wire hat and coat hooks, 40c a gross.

TORONTO.

The hardware trade is enjoying continued good business this week, and if anything is a little better than last week. All the jobbers report splendid sales, and orders for hardware are being filled and shipped out just as quickly as they can be put in hand. Seasonable lines, of course, have the call; but it is particularly noted that country hardware merchants are stocking up more liberally than for nearly eighteen months past.

Garden tools, lawn goods, household utensils, shelf goods, and nails and screws and builders' hardware easily carry off the palm for volume of trading being presently done, though there is also a first-rate demand for general lines. Wire, green wire cloth, screens, poultry netting, etc. are frequently asked for.

Hardware lines generally are maintaining their prices well. In fact, if anything there is a somewhat firmer tendency, though some chalk lines and saw blades are at a lower quotation, and lawn mowers are at a low price.

SPRING LINES—There is such an immense variety of hardware articles classed under this general heading that it would take a deal of space to enumerate them, but netting of all kinds and screens, too, together with many articles used in repairing around house, garden, barn and farm, are going out freely. Lawn seeders have created a sudden demand. Summer goods, such as hose, lawn mowers, sprinklers, swings, awnings, lawn chairs, refrigerators, and ice cream freezers are beginning to move fairly well. Spear & Jackson's (Sheffield) buck saw blades are down in price this week. 30-inch has dropped from $3.60 to $3.40 per doz.; 32 inch from $3.80 to $3.65, and 34 inch from $4.20 to $4.00.

SPORTING GOODS—Chalk lines in 4½ pound tubes which were selling at 30 cents a pound are now quoted at 27½c. Fishing outfits are moving fairly free, the demand for steel and bamboo rods being about equally divided. Baseball goods just now are selling best, but lacrosse and football outfits are coming along pretty well, and guns and ammunition are figuring in inquiry.

BUILDERS' HARDWARE—In the city this line is probably the greatest in demand, though the country trade, too, is improving from week to week. Springs, hinges and locks are free sellers, and building papers of all kinds are going out well. Screws are at full tide in demand.

HEAVY GOODS—Nails are again to the front and moving as freely as they were a month ago. Bar-iron is a fairly good seller. Manufacturers and jobbers seem to be quite encouraged with the increased buying that has begun to assert itself.

METAL NOTES.

Although lake navigation is about to open, there is no expectation of a brisk movement of Lake Superior iron ore for some time to come. This is the consensus of opinion of shippers and rail and water transportation men. The stocks of ore at eastern lake ports are said to be still pretty large.

Chairman Gary of the U. S. Steel Corporation reports a steady gain in the steel trust's business since December last.

A speech on the iron resources of Vancouver Island was delivered in the B. C. Legislature recently by Mr. Thomson, one of the representatives of Victoria. "We can," he said, "manufacture pig iron here for $12 a ton, as against $15 a ton in Tacoma and Seattle, and this does not take account of any Dominion bonus. The main reason for this is the cheap and economical way we can assemble our materials."

HARVEST TOOL BUSINESS SOLD.

Announcement has been made this week of the sale of the business of the Maple Leaf Harvest Tool Company, Tillsonburg, Ont., formerly controlled by J. C. Dietrich, senior, president; C. J. Shurly, vice-president; F. D. Palmer, treasurer; W. W. Janney, J. Charles Dietrich, Oscar H. Vogt, T. Fred Shurly and P. G. Dietrich, all of Galt, to P. H. Withington, Cleveland, vice-president of the American Fork & Hoe Company, and T. H. Russell, Geneva, Ohio, secretary-treasurer of the same corporation. These gentlemen will be president and vice-president respectively of the new company with C. K. Janson, formerly manager of the Maple Leaf Company, continuing as manager and also acting as secretary-treasurer.

Mr. Janson advises Hardware and Metal that the sale was made to the Ohio gentlemen as individuals and not to the American Fork & Hoe Company, as stated in the daily press. The business will be continued under the name of the Maple Leaf Harvest Tool Company and the alliance with the fork and hoe trust will necessarily be a close one.

The Tillsonburg plant will be enlarged to about four times its present size and about 200 additional men will be employed. The increased output will be for the export trade, advantage being taken of Canada's more favorable trade relations with other countries than enjoyed by the United States.

The American Fork and Hoe Co. is one of the concerns affected by the Canadian customs ban on prison made products, it controlling the output of factories employing both free and prison labor. The customs authorities do not prohibit the importation of the products of free labor factories conducted by such companies but are naturally suspicious of any goods shipped into Canada by them, this causing the importers considerable trouble. With the trust in control or working in harmony with a Canadian factory this trouble will be avoided and the trade in this country will not receive any of the prison goods.

The former proprietors, according to J. C. Dietrich, were not anxious to sell, but the price offered was too good to refuse.

OPEN MARKET IN WIRE.

The Iron Trade Review (April 28) says conditions closely approaching a genuine open market in wire products are prevailing, and the official price schedule which is becoming more and more nominal is being generally undercuoted.

The increased activity in pig iron is continuing, but the heavy stocks in northern furnace yards are holding going business at bottom quotations. Old material is in a stationary state awaiting the time when the mills will be able to offer higher figures for their melting stock.

Hardware Trade Gossip.

Quebec.

Stevens & Collard, tinsmiths, Montreal, have registered.

The assets of Labadie & Moreau, tinsmiths, St. Romauld, have been sold.

The assets of O. B. H. Maille, hardwaremen, Longueuil, have been sold.

A demand of assignment has been made on B. Coren, hardware merchant, Montreal.

E. W. McCarty, president of the Imperial Asbestos Company, has been visiting Montreal.

C. W. Webb, of Warden King, Montreal, is in Winnipeg on business. A. W. Lamontagne is undertaking his duties for the time being.

J. R. Dargavel, Elgin, Ont., who graduated from McGill ten years ago, has been renewing old acquaintances in Montreal and attending class dinners, etc.

William Starke, of Starke-Seybold, Montreal, has been made vice-president of the Slater Shoe Company. Montreal, and Lt.-Col. R. Starke, one of the directors.

The Choral Association of St. Louis de France, of Montreal, of which Fred C. Lariviere, hardware merchant, is president, entertained 3,500 people in the Arena, Montreal, on April 13, the chorus of 250 singing one of the master pieces of modern composers, "The Children's Crusade of Gabriel Pierne, Grand Prix de Rome in 1882." This work was executed for the first time in 1905 under the direction of Mr. Colonne at Paris, France.

Ontario.

S. L. McKay, Kingsville, has sold his hardware business to D. H. McCoy.

E. H. Jeeves, hardware merchant, Port Rowan, has advertised his business for sale.

W. S. James, hardware merchant, Niagara-on-the-Lake, has just completed the electrical wiring of the village.

Mr. Cole, of Cole & McMurray, Niagara Falls, was a caller at the Toronto office of Hardware and Metal last Friday.

J. Mahon, of Mahon Bros., Campbellville, who recently bought Beattie & Son's hardware business at that place, paid a buying visit to Toronto this week.

Berriball & Blackmore, Huntsville's new hardware and tinware firm, opened their store last week. Berriball and Blackmore are experienced hardwaremen from Toronto.

Homeyer & Richert, Breslau, have purchased the business of J. P. Jupp, West Montrose, and will conduct it as a branch with A. E. Richert in charge, Wm. Homeyer continuing at Breslau.

G. F. Stephens, wholesale paint merchant, Winnipeg was in Toronto this week spending a few days with friends on his way back from a three months' visit to New Orleans and other points in the Southern States. Mr. Stephens began his experience as a traveler in Montreal in 1875, going to Winnipeg to establish a paint supply house in 1882. Mr. Stephens will visit Montreal next week before returning to Winnipeg.

Western Canada.

W. H. Park, hardware merchant, Arden,Man., has assigned.

Ritz & Coblentz, hardwaremen, Lockwood, Sask., are succeeded by E. H. Ritz.

SPORTING GOODS MANAGER RESIGNS.

In a recent issue of Hardware and Metal it was stated that H. W. Alger manager of the sporting goods department of the Miller Morse Hardware Co., Winnipeg had resigned his position to take charge of a similar department for Lewis Bros., Montreal. This was a mistake. Mr. Alger is leaving the Miller Morse Hardware Co. to succeed the late

H. W. ALGER, WINNIPEG.

Who is leaving the Miller Morse Co., to accept a position with a Chicago wholesale house.

H. W. Chester in the management of the sporting goods department of Hibbert, Spencer, Bartlett & Co., Chicago. He will assume his new duties on June 1.

Mr. Alger has had twelve years' experience in sporting goods departments, having been connected with the Fletcher Hardware Co., Detroit; the Marshall Wells Hardware Co., Duluth, and for the last four years he has been manager of the sporting goods department of the Miller-Morse Hardware Co., Winnipeg. He organized the department for the Miller-Morse Hardware Co. and made it an important factor in the firm's business.

Mr. Alger was very popular among the hardware trade in Winnipeg and his friends are sorry to see him leave the city.

Trade News From Atlantic to Pacific

Maritime Provinces

St. John Valley Railway to be Constructed—Elections at St. John—Death of a Prominent Member of the Maritime Board of Trade—The Bicycle Trade Booming at Halifax.

ST. JOHN.

April 28.—The delegation from St. John, Fredericton, Woodstock, Centreville and other places along the St. John river, who went to Ottawa last week to present the claims of the proposed St. John Valley Railway before the government have returned home greatly pleased with the result of their mission. The delegation was received by Sir Wilfrid Laurier, Hon. Geo. P. Graham and Hon. William Pugsley. The case of the construction of the road was argued by W. E. Foster, president of the St. John Board of Trade; J. T. Allan Webblee, of Woodstock; J. E. Porter, of Andover; James Burgess, M.P.P., of Grand Falls; F. B. Carvel, M.P., of Woodstock, and Hon. J. K. Flemming of the New Brunswick government.

The proposal which the delegation laid before the federal ministers was that the government should continue the double subsidy for the construction of the line down the St. John from Grand Falls to St. John and that on the bonds of the proposed company being guaranteed by the province the Intercolonial should undertake the operation of the road and pay to the company forty per cent. of the gross earnings.

Sir Wilfrid Laurier replying for the government assured the delegates of his hearty sympathy with their proposition and said the double subsidy should be at their disposal. Regarding the operation by the I.C.R., he said the government would take the matter into serious consideration. It is expected the aid of the provincial government will be secured and that the building of the road will soon be an accomplished fact.

Six new aldermen will sit at the council board after May 1 as a result of the civic elections held on Tuesday, April 21. Among the new men is Joseph A. Likely, lumber dealer, who operates a saw mill in the north end. Alderman William Lewis, of the firm of William Lewis & Son, manufacturers of bolts and wrought iron work, was re-elected and Ald. John McGoldrich, dealer in heavy metals, was elected by acclamation and enters upon his 26th year as an alderman Ald. Alexander Rowan, hardware dealer, Main Street, was defeated by A. O. Havelock Wilson, wholesale dealer in fish.

Architect F. Neil Brodie has signed contracts for a self contained residence for A. H. Wetmore on Canterbury Street. The successful tenderers are: A. Dodge, carpenter work; J. H. Burley, mason work; G. & E. Blake, plumbing; W. A. Steeper, galvanized iron and sheet metal work, and R. Barbour & Sons, painting and glazing.

HALIFAX.

April 26.—Business at the Port of Halifax was exceedingly brisk during the past week. The large sheds at the steamships were filled with freight principally goods for shipment to Montreal, Toronto and Western Canada. These goods consisted mostly of slag, cement, glass, machinery, and heavy metals. The local hardware trade is quite satisfactory and large quantities of goods are being sent out. Collections are fair. The weather is a little backward and this affects trade to some extent.

The Halifax Board of Works opened tenders this week for a large quantity of iron pipe and valves. The tenderers for the water pipe were: The Canadian Iron Corporation, Londonderry; Stonely Coal and Iron Co., England; Wm. Stairs, Son and Morrow, Halifax; Watson Jack & Co., Montreal; J. Coates & Co., London; Canada Foundry Co, Toronto; L. H. Goudey & Co, Quebec; W. Beverley Robinson, Montreal; D. Y. Stewart & Co., Glasgow; and R. D. Ward & Co., Philadelphia. The tender of W. Beverley Robinson, being the lowest was recommended to the City Council for acceptance. The quantities and the prices were: 87,000 feet of 12-inch pipe at $28.70; 25,000 feet of 9-inch at $29.00, 10,000 feet of 6-inch at $29.80, and 500 feet of 3 inch at $31.67 delivered. The tenderers for supplying iron socket valves were: Stewart & Co., Canadian Foundry Co., W. Jack & Co., and Stairs Son and Morrow. The Canadian Foundry Company offered to supply 25 6-inch valves at $9.65; 6, 3-inch at $4.55 and 15, 12-inch at $38.65, and the tender being the lowest was recommended for acceptance.

The bicycle promises to be more popular than ever this season, and the demand has started already. Not for many years have the merchants in Halifax received so many orders for wheels, and considering that it is so early in the season the year promises to be a banner one. An evidence of the increased demand is shown by the fact that Clayton & Sons have moved their bicycle, automobile and carriage departments into spacious apartments in north end of their fine new building. This firm does a very extensive business in bicycles, and handle the "Cleveland," "Brantford," and the "Massey-Harris" wheels.

Mr. Lane, an American capitalist, proposes to build a cold storage plant at Shelburne, N.S., to cost $80 000 and to do a general fish and exporting business. He will also use the by-products in the manufacture of glue. There is no glue factory in Eastern Canada, and Mr. Lane will endeavor to have the Canadian Government put a duty on glue. A delegation from Nova Scotia, accompanied by Mr. Lane are now at Ottawa interviewing the Government.

Melville G. DeWolfe, a prominent man of Kentville and well known throughout the Provinces for his interest in public affairs, committed suicide by drowning in the Cornwallis River, a short distance from his home yesterday. Ill-health and despondency caused him to end his life. He was sixty-three years of age, and had been in business in Kentville all his life, having succeeded his father. From their inception he was a member of the Maritime Board of Trade, the Nova Scotia Fruit Growers' Association and the Nova Scotia Farmers' Association, having at times held the presidency of each. He was a prominent figure at the meetings of the Maritime Board, and his death is universally regretted undr such sad circumstances. His body has not been recovered.

Craig and Morton, the new hardware firm have offered ten medals for the team winning the Halifax Baseball League series.

All the mills are now running and the lumber business promises to boom this season. A large crew of men are now engaged at Fredericton in rafting the drift drive.

W. E. H.

Ontario Trade News

Brantford Police Making Campaign Against Air Guns—St. Thomas Makes Good Arrangement With Telephone Company—Wallaceburg Glass Factory to be Rebuilt.

KINGSTON.

April 27.—Plans are prepared for extensive alterations at the penitentiary. The main building, now used for the office, will be done away with, and made into cells, so as to get more room for the inmates. A fine sanitary building will be put up on the left of the main entrance, for female convicts. The deputy warden will have a residence outside the grounds.

All the sporting goods men have placed large orders for fishing tackle. They state that they dispose of considerable tackle during a season. One fact which goes to show that considerable business is done is that a number

of the tobacconists also carry a large stock in this line and they do a rushing business. "Sold nearly every bit I had last summer," said one tobacconist, when asked by your representative. Kingston is thronged all summer long with tourists going to and from the Thousand Islands.

The gasoline launches and "put-puts" are now making their trial trips and the demand for gasoline from the hardware merchants, is beginning to pick up. There has also been quite a brisk sale in paints, varnishes and other necessaries for vessels.

An extensive addition is being made to the Davis tannery. The new building, which is being erected, is 212 feet long, and 62 feet wide, the roof, floors, etc, being all of concrete reinforced with metal. E. G. B.

PETERBORO.

April 28.—Ray Best, of the Best Stove and Hardware Co., states that the spring business has been particularly good from the hardwareman's standpoint. One of the best lines so far has been paint, which has been sold for brightening up homes and for the annual cleaning which is now at its height.

W. R. Higgins, of the Higgins Hardware Co., is among the optimists. The season has been suiting him thus far and in supplies for farm buildin~ and for local work he has had his share.

An interesting exhibit has been made this week in the hardware store of the F. R. J. MacPherson & Co. The electric toaster manufactured by the Collier Electrical Supply Co. was demonstrated by one of the members of the firm. Bread was toasted and the public treated to toast and coffee. The heater is simple in its appearance and in its mechanism, and yet gives excellent service. It toasts the bread uniformly and can be easily regulated. It saves the trouble of making a fire and at the same time the bread is claimed to be toasted better than if it had been before a fire.

The Trent Valley canal, being opened this week, the hardware merchants will experience an increased Saturday trade as the farmers come into the city from points along the river and all along Rice Lake. The work of painting the locks along the canal is a big job and has already been begun for this year.

Practically all the local hardware stores have windows displaying garden tools, and different lines of paint still have a prominent position.

The weather in this locality has been not encouraging to those in the building trades. While it has not been really cold its effect has been deterrent upon the building boom that is expected and which is gradually opening as the report of the number of building certificates shows.

Peterboro has practically landed a new industry. It is the Purity Ware Co. which will manufacture enamel and galvanized ware. The citizens will have to ratify the by-law the council has passed by a vote on June 1. This will mean that this city will be the distributing centre for a large firm manufacturing similar goods in New York. H. T.

TORONTO.

April 29.—The Vokes Hardware Company have moved this week from their old premises at Yonge and Adelaide Sts. to their new five-storey building at 40 Queen St. east, adjoining the Pease Foundry Company's premises. The new building is being fitted up in splendid style and will have the finest battery of shelf boxes in any Toronto store. The building is constructed on fireproof lines with bricked-in stairways and elevators, and a lot in the rear of the Pease building provides excellent shipping facilities.

Albert Maas, hardware and stove merchant, 534 Queen St. west, Toronto, has sold his business to Anthony Mole, who has been in his employ for the past sixteen years. The transfer takes place on May 1.

Fred G. McBrien's store at 1000 Bloor St. west, is being enlarged. The excavation for the extension in the rear has been made and the walls are now being constructed. Work on his new nail factory on Main St. has been suspended owing to a shortage of brick, the walls now being up beyond the first story.

George Pearsall & Son, 417 Yonge St., have been doing some enterprising advertising in an evening paper, occupying a space 10 inches deep by three columns wide, twenty-four articles being illustrated and priced in similar style to the Russill Hardware Co.'s, and the departmental store ads. "Pearsall's Hardware Bargains" ought to bring him a lot of business, while not hurting competitors as prices are well maintained.

Samuel Hobbs, 1434 Queen St. west, has been making a novel window display in the form of a flower garden enclosed in lawn fence. Mr. Hobbs says a similar window sold a lot of fence last year and he expects even better results this spring.

George Oram, 836 Yonge St., returned this week from a two months' pleasure trip to Florida and other Southern States.

Trade has been quite brisk during April, both paints and sporting goods having been in excellent demand with a nice trade in builders' supplies picking up. The outlook is for an exceptionally good year in builders' hardware and tools. W. W.

HAMILTON.

April 27.—Recent evidence of the extensive and careful manner in which Hardware and Metal is read, is to hand in connection with the sudden suspension of the building operations on the new building for the Mills Hardware Company a couple of weeks ago. A full account of the plans of this concern were published in Hardware and Metal and the railway officials who had not previously been aware of the extensiveness of the proposed scheme, immediately pricked up their ears and decided to secure the property before the big building was erected. By their prompt action they saved thousands of dollars, for if they had allowed the building operations to go on and then tried to purchase the building and property the cost would have been enormous. So much for the influence of Hardware and Metal.

In an interview as to the prospects of business during the coming summer, Walter B. Champ, president of the Board of Trade and secretary-treasurer of the Hamilton Bridge Company, said, "With reference to the outlook for 1909 and 1910 I would say that it is looking better every day. It cannot be expected that this period will be as prolific of good results as the year 1907 as that year was an abnormal one. However, with the prospects of a good crop and an early spring I have no hesitancy in stating that by the first of June all lines of business will have about all they can take care of." He said that the largest customers of the country, the railway companies, were not purchasing anything but what they required to meet their immediate demands and as soon as the crop of this year was assurred they would no doubt place large orders for necessary equipment and supplies. And just as soon as they did this the trade outlook would get a tremendous uplift. He expressed the belief that the tide of immigration would be great this year and this would help to improve trade conditions, as these new settlers will require building materials, clothing and other necessaries of life. In conclusion Mr. Champ said he thought everything depended on the crops and if we had one like last year or better there was little doubt that business would soon be on a sound basis.

Operations will be commenced this week on the erection of the new Y.W.C.A. building on West Main St. The present building will be remodelled and a large addition made to the rear of it. The work will cost $36,000 and the contracts have been awarded as follows: John E. Riddell, tinsmithing; John Rodger, painting; Hamilton Bridge and Tool Works, steel work; Middleton Marble Works, builders' hardware and supplies. D. L.

LONDON.

April 27.—"Business has been very good the past week particularly in garden tools and paints," said W. B. Gillespie, this morning. "We are looking forward to a brisk business in builders' supplies as soon as building operations which are going to be very active this season, get well under way." Mr. Gillespie speaks the views of the trade generally.

Thomas Seaton, for some time electrician for the McClary Manufacturing Company, has resigned his position and intends moving to Winnipeg.

The manager of a local machine concern states that this is going to be the biggest year for gas engines on record. "We have already enough orders to

keep us busy till fall," he said, "and orders and inquiries are constantly coming in."

The office staff of the McClary Manufacturing Company and the clerks in the employ of the Cowan Hardware Co. are represented in the Commercial Baseball League of six clubs, and both are expected to give a good account of themselves.

The City Council is still after the branch of the United States Steel Corporation which is to be established in Canada, the object being to have it located at Port Stanley. Word has been received that the matter is in the hands of J. S. Farnell, of New York, president of the company, and the chairman of the Manufacturers' Committee is getting in touch with him.

D. J. Cowan has purchased at auction the site at Pottersburg, outside the eastern city limits, on which the burned Canadian Packing Company's buildings were located, for $3,100. Mr. Cowan is vice-president of the London Foundry Company, and says that in all probability that company will build on the property he has purchased and remove their business to Pottersburg.

F. T. Y.

BRANTFORD.

April 20.—Housecleaning time is here and local merchants report a brisk moving in seasonable goods, such as brooms, mops, wringers, wash tubs and boilers, etc. There is also a good demand for butter-making utensils and churns. Gardening tools and builders' hardware is going out well, while the movement in paint and glass is steady.

The Elliott Hardware Company is using a good deal of newspaper publicity for Saturday bargains, with a corresponding gain in returns.

The North Brant Agricultural Society will erect a new sheet iron building to replace the exhibition hall at Paris, burned down recently.

The Massey-Harris Company will shortly ask for tenders for the erection of an additional storage warehouse, to be built at the rear of their present warehouse. It will be of white pressed brick, 66 x 162 feet.

The local police are waging a campaign against the illegal sale of airguns to boys under age. A local hardware dealer was given a warning last week, and a young lad who was found with one had it confiscated.

Brantford will go in for street paving by the municipality. Contractors will be asked to furnish material with a ten year guarantee to pave George street as a start. Should it prove successful more will be done.

The senior partner of Howie and Feely, hardware dealers, this city, is rather seriously ill.

At a meeting of the retail merchants held on Thursday evening, it was decided to advertise for a collector on the plan which has proved so successful in Guelph. A list has been in circulation here for some time, and has been sufficiently supported to take this step. The result will be that, to a great extent, the "dead beat" will be done away with.

The agreement between the town of Paris and the Sanderson-Harold company was signed on Monday.

The contract for improvements at the County Court House was let to the Shultz Bros. Company for $5,000.

John Malcolm & Son, St. George, are making an addition of a large warehouse to their present factory. It will be 26x42 feet. A concrete reservoir will also be erected.

The local hardware dealers are showing lines of housecleaning supplies and fishing tackle. Howie and Feely have in their west window a neat display of dairy utensils.

A. W.

GALT.

April 28.—The month of April will be the best in years according to local hardware dealers. The outlook at present is very bright. There will be a large amount of building, including one hundred dwelling houses, two blocks of stores, an addition to the Goldie Co.'s mill, and additions to several of the manufacturing plants. All the plumbers are exceptionally busy installing the plumbing arrangements in new houses. It will be the best building year in the history of Galt.

Wm. Twaits accountant at the Canadian Brass Company was married on Tuesday to Miss Laura Osborn, of Mount Forest. The employees of the factory presented Mr. Twaits with a handsome set of silver and a plateau. He is well known in hockey circles in Ontario.

The new building for the Hammond Potato Machinery Co. is about completed and the factory will soon be running full blast.

Scott & Bennett, plumbers and dealers in plumbers' supplies, have let the contract for a brick block on South Water street to replace their present building. The new block will contain three stores and will be three stories high. One store will be used by the present firm and the other two will be to rent.

There is a big demand at present for fishing tackle in anticipation of the opening of the trout season.

It is understood that an American company will shortly take over the plant of the Edge Tool Company which went out of business about a year ago.

B. E. C.

CHATHAM.

April 27.—Business in all lines seems to be picking up steadily, and the hardwaremen share in the general advance. All report the outlook for spring and summer to be excellent.

Garden tools form a feature of several excellent window displays this week. J. C. Wanless displays a metallic hose reel, which is something of a novelty here.

E. L. Webster, formerly of Westman Bros. staff, has severed his connection with that firm and taken a position in Ernest C. Brisco's bicycle and sporting goods store. Edward Rollins has taken Mr. Webster's place on the Westman staff.

Stephens & Douglas are handling the Boyer Gliding Settee, manufactured at Stratford. One of these appliances occupies a prominent position in this week's window display.

Fred C. Moore, at one time connected with Westman Bros. and who latterly has been travelling in the west and managing a grocery store up north, is back at the hardware business. This week he joined the staff of P. Cunningham & Co.

Stephens & Douglas make a feature of cut glass a line of goods usually associated in the public mind with the jewelry trade. A show case is devoted to a cut glass display, and returns are good.

Mayor Westman, of Westman Bros., has been invited to attend a conference of western municipalities to be held on Thursday, in Toronto, with reference to securing for Western Ontario towns better terms for Niagara Power. He states that he will likely be present.

The vexed question of natural gas purification has at last come to a head, Government Inspector A. F. Nash having laid an information against the Chatham Gas Company, charging it with supplying gas for illuminating purposes which is not properly purified and contains sulphuretted hydrogen. This morning the case was adjourned for a week. Recently, Mr. Coste, of the Volcanic Gas Co., which supplies the Chatham concern, went so far as to threaten to cut off the city's supply. The company claims that the expense involved in purifying the entire supply would eliminate all the profit; though experiments are being made with individual purifiers, to be used solely for illuminating gas.

The Manson Campbell Company, Limited, of this city, well known for the manufacture of fanning mills and kitchen cabinets, has branched out into the making of natural gas burners. The company also carry a full stock of pipes, valves and fittings of all kinds, and is advertising throughout the newspapers of the country.

The Sydenham Glass Co., Wallaceburg, recently burned out, is securing from the Pittsburg Construction Co., plans for a mammoth steel structure to replace the old factory. The new building will be entirely of steel, brick and concrete. Armstrong & Dickson of Pittsburg are arranging for tanks and machinery. The output will be largely increased.

An all night electric light service is being inaugurated in Wallaceburg by the Premier Electric Light Co.

Davis McCay has bought out S. L. McKay's hardware business at Kingsville. The latter gentleman is extensively interested in oil and gas operations, and is one of the most prominent men behind the Rondeau Oil and Gas Co. now seeking a franchise from Windsor.

Tilbury Telephone Co. is ordering equipment for 40 miles of rural lines, work on which has been already com-

menced and which will be in operation this season. While adjoining towns and villages are reaching out into the country with rural phone lines, Chatham has done approximately nothing.

Ed Ulch, of Merlin, is on the road handling a number of lines for the Fletcher Hardware Co., Toronto.

Dobbyn Bros., the Wheatley hardware men, last week opened a branch hardware store in Coatsworth. The new store will be under the management of P. O. Dobbyn.

East Tilbury, Canada, Oil Fields, Limited, the new English syndicate which recently acquired extensive holdings in the Tilbury East oil fields, is preparing for comprehensive development of the field. Twenty-five new wells will be started in the immediate future.

V. L.

INGERSOLL.

April 27.—The contract for the erection of a four-roomed school in Ward One has been awarded to P. H. Secord & Sons, of Brantford. Much difficulty was experienced by the board of education in getting a tender anywhere near their estimate of $10,000. Some of the first tenders ranged from $13,000 to $19,000. Several efforts were made to have the cost reduced and as a last resort it was necessary to pare the specifications. The tender of Secord & Sons of $11,311 was accepted by the board subject to the council making an additional grant of $1,500, but as no action was taken in regard to the request, the specifications were cut down and a new tender of $10,269 received and accepted.

Wm. Woolson, who, for several years, has been identified with the Noxon Co. and M. T. Buchanan & Co., has gone to St. Paul, Minn., to accept a lucrative position.

J. T. Norton, who, a few years ago, engaged in the hardware business here, and recently accepted a position as traveling salesman with the Erie Iron Works, of St. Thomas, has removed to Toronto.

Ingersoll is to have a Carnegie library. Some time ago it was decided to accept Mr. Carnegie's offer of ten thousand dollars, and a site has now been obtained. A joint committee from the council and public library board has been appointed and it is hoped the building will soon be in course of erection.

At a meeting of the shareholders of Reid Foundry and Machine Co., Limited, it was decided that the present stockholders should advance an additional sum for the purpose of liquidating the company's debt and to secure the recommencement of operations at their plant with as little delay as possible.

H. J.

ST. THOMAS.

Building prospects continue to brighten, so that retailers are quite hopeful for the coming year. Mr. Ingram of Ingram & Davey Limited, in speaking of a comparison of returns for the month of March over last year, reports a substantial increase in the business in the new store over the same month of last year in the two stores. The wire and fencing demand has been very heavy and although heavy stocks were put in, most lines have had to be renewed. In the building trade plans are being prepared for a new church for the Grace Methodist congregation, to replace their present building, which was erected in 1872.

Darrah Bros., of the Electric Laundry, are forming a joint stock company and will erect a new home for the business.

The plans for St. Clair Leitch's new residence call for a very high grade line of fixtures and it will be the most expensive house in the city.

Any man who wants work in St. Thomas can get all he can attend to. On Saturday afternoon which is usually a holiday with painters, it was found impossible to find one idle or one who would break off work long enough to put in a couple of lights of glass.

The general financial depression of 1908 does not seem to have effected Port Stanley. The customs returns for this port for 1908 were $98,663.06 against $65,306 of 1906 and $87,810 for 1907. Some ten years ago the revenue was nil. The customs returns for St. Thomas for March show an increase over last year of nearly $10,000.

A. E. Campbell, who has purchased the Crawford store on Ross St., when asked for his subscription for Hardware and Metal, said: "Certainly I want it. I could not get along without it."

In referring to Hardware and Metal the want of it was emphasized last week when the usual batch for St. Thomas went wrong, and it did not show up. The postman was closely questioned by subscribers, why he didn't deliver it, and enquiry had to be made of the publishers for information.

The city council has been able to make a good bargain with the Bell Phone Co. through the efforts of the rural lines to get into the city. In the agreement just signed (which is for a three year exclusive franchise) the city gets 500 worth of free phones, a new building and over a mile of underground conduit work. The rural companies are to have connections at the most favorable rates. Work on the new building will commence at once.

That all stairways and elevator openings should have guards, especially where such are accessible to the public, was shown Saturday evening when a child fell down the stairway to the basement in the new Ingram & Davey store. Fortunately the stairs have an easy descent, so that the child when picked up was found to have suffered only from fright.

W. J. McMurtry, of the McMurtry Hardware Co., Galt, spent last week in the city initiating Geo. D. Hubbard (late of Torrens & Co., Tillsonburg) as manager of the St. Thomas branch.

The Board of Trade will make a big effort to interest American manufacturers of light goods, to locate in the vacant buildings at the west end. As these can be secured at a low cost with cheap power and unsurpassed railroad shipping advantages, the opportunity presented will no doubt appeal to such manufacturers and be the means of enlarging the manufacturing interests of the city.

Aylmer is experiencing a building boom and will this year see a substantial increase. J. B. Hambidge intends erecting a new building for use as a picture show.

The Pork Packing Co. expect to start building at an early date.

The saying that "it's an ill wind that blows nobody good," was emphasized last week when a heavy wind storm passed over this section and in consequence there was a heavy demand for roofing material.

Ernest Davey, of the Ingram & Davey sporting goods department, reports a good trade already in this line. He has contracted with the city league for the Spalding official baseball, to be used for this season.

D. A. Cattanach has purchased the Kinzie & Co. bankrupt stock, Southwold Station, and will continue the business.

R. H. Blackmore has secured the agency for the B. & H. English Paints and is making a fine display in his west window.

G. A. F.

The Prairie Provinces

Calgary Experiencing a Building Boom —McClary Manufacturing Company to Build Warehouse at Saskatoon— Enterprise Hardware Co.'s Building at Saskatoon Nearly Completed.

WINNIPEG.

April 26.—The general condition of the hardware trade in Western Canada has been reviewed by the leading wholesalers in this city.

Although business is progressive there are some features which are not encouraging for the immediate trade, and yet the very presence of those features is a sign which every far-seeing business man will welcome.

The trade is progressing simply because goods are moving and the returns on those goods more than cover all expenses of the wholesale house. But the progress is not so rapid as it was, say, four years ago. There are not the large shipments to-day that there used to be, and the returns are correspondly small. Where a jobbing house ships one carload to-day six carloads would have been shipped a few years ago on the same order. This is the discouraging feature at the present time.

But what does it mean to the wholesaler, when buying is more conservative, and yet the business is paying? It means that the country as a whole, which has passed through a financial crisis, has not succumbed beneath the strain. It means that the hundreds of stores doing business in every quarter of the West where trade was good a few years ago, were not compelled to close their doors during the period when crops failed and money was not to be had. It means also that there was a certain amount of irrationality in the exuberant business life of a few years ago which burst as the bubbles of youthful imagination, and the brains of the country were

compelled to think and contemplate along saner and more lasting lines.

In these facts and conditions lies the basis for the optimism which prevails among the business men to-day.

It is interesting to note the direct effect that last fall's crop had on the hardware business. In certain sections of the country the harvest was very light. For instance, on the Pheasant Hills branch of the C.P.R., from Kirkella to Saskatoon, the harvest was as poor as anywhere in Western Canada. As a consequence, since last August the orders have been very light and few in number from the towns along this line. One merchant in a town in this district which had flourished for a few years previous, could not meet a payment for goods which was due on April 1 of this year. As a result he was compelled to deprive himself of the luxury of two cows in order to keep up his stock of goods. In other sections of the country where the crop was good, as in Southern Saskatchewan, the orders for goods have increased and no difficulty has been experienced in making collections.

The Canadian Oil Co., of this city, owing to the growth of their business, have been granted a permit to improve and enlarge their warehouse on Levis St. at a cost of $2,000.

H. S. Price, who has been in the hardware business at Boisevain, Man., for the past eleven years, has sold out has business to Johnson Bros. Mr. Price has been one of the most active hardwaremen in the West serving a term as vice-president of the Retail Hardware Merchants' Association of Western Canada. He has always taken an interest in municipal affairs and sporting events, and his fellow-citizens naturally regret to have a citizen leave who has the interest of the town at heart, and is willing to make sacrifices for the welfare of the district in which he lives. L. C. H.

PRINCE ALBERT.

April 24.—An effort is being made by the city council to get the C.P.R. and the G.T.P. to build lines into the city. A delegation waited on Manager Chamberlain and W. White with this end in view.

Construction work on the new traffic bridge is complete, the iron workers having just finished their contract. Painting the structure is now being proceeded with. The bridge fills a long-felt want in the city.

Work on the new penitentiary will be started at once. The building in view will be of brick, 250x50 feet and three storeys. Tenders, it is understood, will be asked for shortly on the structure, which will contain 110 cells. The yards will be enclosed by a brick wall 600 feet square and 20 feet high. A 10 h.p. Fairbanks-Morse pump with a capacity of 67,000 gallons per hour will be installed. Kerosene will be used in the engine instead of gasolene.

The building season is likely to be a fairly busy one this year. Some of the buildings in view are a high school, Masonic Temple, stores for the Agnew Bros. Hardware Co., and the Goodfellow block. There are other structures for which the plans are being prepared but the contracts are not yet let. In addition to this the city has an extensive programme of sewer and waterworks extensions.—D. G. R.

SASKATOON.

April 23.—S. A. Clark has returned from a trip to England.

The front windows of the Isbister store have been lowered, which adds greatly to the effectiveness of the goods on display.

The McClary Manufacturing Co., have purchased a site in the wholesale section, with trackage facilities, on which they will build a distributing warehouse.

James Clinkskill, one of our hardware merchants and one of the governors of the university of Saskatchewan, has returned from Regina where a meeting of the governors was held to decide the location and the site of the provincial university.

The warehouse of the Enterprise Hardware Co., which was recently formed here, is now almost complete. The president of the new company is R. B. Emerson, St. John ; vice-president F. Engen, Saskatoon ; secretary-treasurer, A. L. Haining, recently of St. John. The warehouse under construction is on Alberta avenue.

Excavating has begun on the site of the Kempthorne block. The Kempthorne hardware store will occupy the ground floor while the npper storeys will be divided off into offices.

A frame warehouse is being built for the Doak Manufacturing Company in connection with their planing mill. In the new building sashes, doors and other building materials will be stored.

Plans are being called for on a new collegiate institute to cost $125,000. A site was recently purchased on the east side of the river by the high school board.

The Nutana school board will build a new eight room school at a cost of about $30,000. The plans of W. W. La Chance were accepted and excavating will commence at once on the site. All haste will be made with the building so that it may be used temporarily for university classes.

It is probable that in the near future a machine shop will be located here. C. Cornish and W. Overton were in the city recently from Selkirk, Man., with a view to purchasing a site for that purpose. It has been planned to erect a frame building and carry on repairs of all kinds. Apparatus for foundry work will be added later if the business warrants it. C. Cornish is a brother of F. Cornish of the plumbing firm of Elford and Cornish.

The Farmers' Lumber Co. are erecting offices and lumber sheds on their property on the west side.

The Consumers' Lumber Co., of Vancouver, B.C., have located here and will open yards as soon as possible.

The program of improvements laid down by the city council this year include about four miles of sewer and waterworks, bringing the total mileage of sewer pipe laid up to thirteen and three-quarters and water pipe twelve and one-half miles. Three contracts for sewer and water have been let and operations may begin any day. Section one went to H. Welsh for $13,725; Section two, R. Bolton, $17,900; Section three, W. Cook, $9,756.25. When these contracts are complete the systems will extend to the new city hospital and Alexandra school. Numerous applications have been made for connections from private houses and other buildings and tenders are now being called for on laying sewer and water-house connections. The extensions will be supervised by G. T. Clark of Toronto, who has recently been appointed city engineer. D. G. R.

CALGARY.

April 21.—The occasional flurries of snow we have been having lately do not appear to hinder any of the building or other various lines of work. Paving on the streets is in full swing, and the rails are being laid on Eighth Ave East for the street railway.

Linton & Hall's window during the Horse Show attracted much attention, and those who were judging in the window competition commended it very highly. The fact that the Grand Trunk Pacific propose building their depot on the grounds at present occupied by the R.N.W.M.P. Barracks, is causing considerable stir on Eighth Ave. East. Another new building to be erected east of the Queen's Hotel is a three storey block by George Wood.

Among the building permits issued this week is Wm. Whyte's $1,500 house, J. A. McPhail's $2,300 residence and O. W. Manzer, $3.500 residence.

Excavation has commenced on the north side of Eighth Ave just west of the Alexander corner, of a block for Mackay and Dippie. It will be 25 x 65, two storeys in height, faced with red pressed brick, with stone trimmings.

Healey and Macgregor, contractors, commenced operations, Monday, on the new St. Mary's Separate School, the corner of Nineteenth Ave and Second St. West.

The new Presbyterian church, corner First St. East and Fifteenth Ave., is well under way. Another Methodist church is to be built in the same block on Second Street East.

The city electrician reports an average of six new light connections being made every day.

Mr. Kemp of the Kemp Mfg. Co., Toronto, was in the city last week, and called on the trade. He reports business very bright throughout the West.

E. T. Wright, of E. T. Wright & Co., Hamilton, stopped off for a day on his turn trip to California. It was 12

years ago since Mr. Wright was in Calgary, and he was astonished at the wonderful growth and development of the city A. R. A.

British Columbia.

Another Hardware Firm to Build at Victoria—Lumber Industry Experiencing a Revival—Novel Invention of Nelson Man.

NELSON.

April 17.—B. C. Travis, of the Kootenay Engineering Works, and R. W. Hinton, of the Nelson Iron Works, both express the opinion that the present good demand is stable and that the operations on which their businesses depend will be more expensive than ever before. Both managers are agreed that the outlook for the year is excellent, as the industries are upon a permanent basis and far more likely to expand than contract their operations and also because there is a general tendency among the managers of mines, smelters and mills to substitute new, improved and larger machinery for that installed in the various plants in the initial stages. In spite of comparative inactivity in some mining centres and of the effect on sawmills of the uncertainty as to the immediate prospects of the lumber industry, the demand for new machinery and for repairs and improvements has been greater and more regular during the winter closing than in any preceding season since establishment.

April 24.—. R. Morrison, of this city, has invented what is believed to be a practical current motor, and it is being backed by G. M. Holt, a well known Kootenay engineer, Charles Simpson and William Shackleton, all of Nelson. The contrivance is a boat or a float which has to be anchored in a river a few feet from shore, and the water turns a spiral contained in a tube which is placed lengthwise in the middle of the boat. Tests were made a short time ago at White Bluffs, Wash., on the Columbia river with a boat 40 feet long, 16 feet wide and 9 feet deep. The current motor was seven feet in diameter, thirty feet in length, with a spiral turning one and a third times in the thirty feet. The spiral was connected with a shaft by sprockets and chains, the shaft turning at the same speed as the motor. At the time the test was made, the conditions were somewhat unfavorable, as the boat, lying on the bottom and at an angle of 20 degrees, was not in line with the flow of current, which caused an eddy at the inlet. Owing to this disadvantage only four feet of water could be turned into the motor. The mechanical construction at that time was also imperfect, the friction being greater than if the machine was properly built. Despite these conditions, the motor developed 57.35 horse power, which is considerably greater than the inventor claimed under the circumstances. Although the new current motor will be most conveniently used for supplying power for pumping water for irrigating purposes, it will also be of great value as a cheap power producer for almost all purposes.

R. B. B.

GREENWOOD.

April 17.—The ratepayers of this city have endorsed the proposed $50,000 bonus to be paid by the city to the Greenwood-Phoenix Tamway Company. Work on the big three-mile tunnel has been begun, and mining men are very optimistic regarding the outcome. The tunnel will tap the deep veins of several mines.

VICTORIA.

April 22.—Hardware trade must be increasing in Victoria if the demand for larger and more commodious quarters is any indication. Two or three have either additions under way or new buildings planned. The latest to find their present premises too small is the Victoria Hardware Co., who are to build a two storey building on Johnson St. The new building has been made necessary by the increase of the firm's business, which now requires more up-to-date and larger stock room and store.

Work has commenced on the new Pemberton block. This when completed will be one of the best business blocks in the city; it will be six stories high and will cover an area of 16,500 feet. It will be built entirely of concrete and steel, no wood being used except for doors and windows and a few floors. There will be 11 stores and about 120 offices, etc. About 10 carloads of steel will be used. The contract for the plumbing and heating has been secured by J. Colbert Plumbing Co., who were tenants of the burnt buildiig.

The Y.M.C.A. of this city have undertaken what looked at the outset to be a very heavy undertaking but now it looks pretty good. Just about a week ago they started a campaign to raise $100,000 to build a new building. For this purpose a tent was erected on a vacant lot near the P.O. and a hustling committee got busy. It says a good deal for the good times now being enjoyed by this city when, in the past seven days over $50,000 has been raised merely by an appeal to the people by the young men. The campaign was started on the 14th and the $100,000 is to be raised by the 30th of April, just about two weeks. A little over a week remains and less than half to get it looks like a building for the Y.M.C.A.

The city council is calling for tenders for a brick, steel and concrete building to put a new lighting plant in as the capacity of the present plant is very much overtaxed, and a great many more lights are neded.

The new buildings and extensions of the Victoria Machinery Depot replacing those destroyed by fire about a year ago are nearing completion. Within the past few days the frame work of the boiler shop, the largest of the extensions to be made, has been erected and will be rushed to completion. In this structure, which is 192 feet long by about 90 feet wide, will be housed an entirely new boiler plant which has been shipped direct from England. Among the installations will be a hydraulic rivetter, an accumulator and pumps, an hydraulic flanger, a plate edger, planing machine, a cold sawing machine and a new plate furnace. In the machine shop, now runing full blast, a fine lot of new and up-to-date machinery has been installed, and the present shop, 168 feet long will be lengthened by 24 feet, the capacity of the present plant having been found to be insufficient for the work in hand. The work and growth of the Victoria Machinery Depot is a good indication of the development of trade in Victoria.

W. B. C.

VANCOUVER.

April 23.—In discussing the cement paving that is to be done this year, five miles of sidewalks having already been laid out, the members of the Board of Works were divided on the point of day labor. Contract labor ha not been altogether satisfactory, not only from the standpoint of cost but also as regards work. Still, it was decided to call for bids, and if they were not much cheaper than the engineer's estimate, the work will be done by day labor.

With the Vancouver Horse Show on this week, some of the stores are making special displays. The palm is given to the George Hunter Hardware Company, whose window dresser excelled himself in a cleverly arranged rebus. Hardware does not naturally lend itself to appropriate window dressing for a horse show, yet out of staple and cunningly arranged display cards, a lengthy rebus has been formed, which not only attracts the eye by its striking color arrangement, but also holds the interest owing to the information imparted thereby. The window not only offers a little timely advice about the firm's own wares, but also boosts the show. Prizes are being offered to the first persons who read the rebus.

Reports from different parts of the province indicate that better times are setting in in the lumber industry, and the steady demand has started from the Northwest. This will mean an improvement in general conditions, especially in the interior, where the mills have not the advantages of those on the coast which have local and foreign trade. A. Carney, timber inspector in the Kootenay, who has returned from a trip through those districts, reports that he saw more cars in the mill yards there than has been at any time since the activity of two or three years ago. A further indication of improvement is the increase of ten cents per thousand in shingles and a talked of increase in the price of lumber.

CONDENSED OR "WANT" ADVERTISEMENTS.

RATES.

Two cents per word first insertion; one cent per word subsequent insertions.

Five cents additional each insertion where box number is desired.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost must accompany all advertisements. In no case can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

RULES FOR COPY.

In addressing replies care of HARDWARE AND METAL don't fail to give box number.

Replies addressed to HARDWARE AND METAL boxes are re-mailed to advertisers every Monday, Wednesday and Friday.

Requests for classification will be followed where they do not conflict with established classified rules.

Orders should always clearly specify the number of times the advertisement is to run.

All "Want" advertisements are payable in advance.

ARTICLES FOR SALE.

Don't keep any fixtures or tools around your store for which you have no further use. They are worth more to-day than they will a year hence. Don't keep money tied up which you could use to secure discounts from your wholesaler.

HIGH CLASS COLOR WORK; Commercial Stationery, Posters. The Hough Lithographing Co. Limited, Office—No. 3 Jarvis St., Toronto, Telephone, Main 1576. Art, Good Workmanship; Business Methods.

IF YOU are looking for a side line to add to your business there is none better than COLUMBIA GRAPHOPHONES. Double Disc Records (which means two records for a single price) and Indestructible Records (that will not break or wear out no matter how much you abuse them). The Columbia Phonograph Company is the only firm that manufactures both Disc and Cylinder Machines and Records, therefore, a Columbia dealer has the advantage over all others, as he can furnish his customers with what they want, while his competitor has to sell them what he has or lose the sale, which he generally does where there is a Columbia dealer. Are Columbia goods sold in your town? If not, why not? Do you want the exclusive agency? (remember exclusive). You had better write to-day or someone else in your town will read this advertisement and beat you to it. A postal will bring catalogues and full information free. Write to-day. Do it now. Toronto Phonograph Company, Limited, Exclusive Columbia Jobbers, 40 Melinda St., Toronto, Canada.

7,217 NATIONAL CASH REGISTERS were sold during May 1908. That's more than were sold during May 1907. The National Cash Register Co., F. E. Mutton, Canadian Manager, cor. Yonge Street and Wilton Avenue, Toronto.

NOTICE—Users of Pitner Gasoline Lamps are warned against being induced to purchase parts of other makes of lamps to be used on the Pitner. The most vital part of any lamp is its generator, and the Pitner generator has been granted a patent in Canada, the United States and other countries, on the principle of its improved method of generating gasoline vapour. Supplies and parts for the Pitner lamps can be received by return mail by applying to our representatives or direct to THE PITNER LIGHTING CO., Limited, 36-38 Lombard St., Toronto, Ontario.

The suggestions are applicable to any trade. Price $2.00 postpaid. MacLean Publishing Co., Technical Book Dept., 10 Front St. East, Toronto.

Western Canada Market Situation

Our Western Correspondent Reviews the Market Outlook—Hardware Quotations Corrected by Telegraph up to Noon on Friday.

Winnipeg Hardware Markets.

The market in building material is very brisk at the present time. The greater part of the contemplated building operations for the season has been begun and as a consequence, shovels, nails and builders' hardware have been moving well for some days. One retailer stated recently that he had sold more saws during the past week than he had for a year previous. Such a rush in those lines is what is expected, since the season was rather late in opening.

The retail windows are displaying profusely their attractive sporting goods and baseball and tennis outfits will be selling well.

Price Quotations.

WIRE—Barbed wire, 100 lbs., $3.15; plain twist, $3.40; staples, $2.90; annealed wire, $2.90 base; oiled, 10c extra; bright iron, $3.10 base; brass spring wire, 29c base; plain galvanized, wire, 6, 7 and 8, $3.50; No. 9, $3.10; No. 10, $3.60; No. 11, $3.70; No. 12, $3.30; No. 13, $3.40; No. 14, $4.25; No. 15, $4.75; No. 16, $5.

POULTRY NETTING—57½ per cent.

Condition of Trade in Great Britain

The First Quarter of 1909 Not up to Expectations, According to Hardware and Metal's Special European Co rrespondent.

Sheffield, April 15.—In the hardware and metal trades there is not much activity at present, in fact the year so far has been disappointing. It was expected that trade would brisk up a good deal in the first quarter of the year, but expectations have not been realised, and manufacturers and merchants have to be content to transfer their faith to the second quarter of the year.

I have previously pointed out that the volume of trade which is now not sufficient to keep the works employed more than three or four days a week, would, a few years ago, have taxed the day and night capacity of every mill, tilt, forge and factory. Progression in equipment has been very pronounced during recent years; a leaf has been taken out of the American book.

Government Orders.

Now that everyone in this country, and nearly everyone in the colonies too, has been worked up into a state of excitement about our naval strength, perhaps it will not be out of place if I devote a few lines to the subject, particularly in relation to trade.

The "scare" business undoubtedly has been overdone. That apart, no one can deny the fact that the privately-owned armament works and warship building yards, as well as the shell factories have had comparatively little work to do for quite a long time. Orders have been few and far between, and plant which has cost into the millions of pounds has been virtually idle.

That again is due to development and progression. There is a lot of profit to be made out of Admiralty work, and the price of a Prince's ransom is made out of a succession of armour-plate orders. Therefore, it is not difficult to understand why enterprising firms have doubled, trebled and even quadrupled their productive power in these lines.

Moreover, I cannot do better than voice the expressed opinion that while armament orders pay very well, they do not impart that continued stability to trade which follows the proper investment of capital and labour in productive commercial enterprises. Still, we in Sheffield would not look askance at any big orders for the Admiralty that may come along.

A Novel Method.

It was feared that the dispute in the engineering trades would cripple progress for some time, for the men were strongly averse to accepting the proposal that their wages should be reduced one shilling a week. This was a general move all over the country, and many trade unions were affected.

The situation was so grave that all the societies which had signed the Engineering Trades Joint Agreement sent their representatives to a national conference at which were present representatives of the Engineering Trades Employers' Federation. The decision at which the conference arrived was that no reduction of wages should take place provided that the men were willing to let the present rate of payment operate for five years.

This was communicated to the societies concerned, and the men in the various districts had the matter placed befor them. Ballots were taken and in the majority of cases the truce was agreed to. The Sheffield and district men, who number over 4,000, accepted the terms last Sunday night. Of course, the seriousness of the situation was accentuated by the fact that all the unskilled workmen whose work depends upon those affected by the agreement, would have had to give up work if the proposal had been rejected. In some districts, however, the trouble is not yet over.

The Tin-Plate Trade.

The tin-plate trade is exceedingly active, and the demand is so heavy that further extensions of plant are being made. It is said that in one district of South Wales, arrangements have been made for the erection of between thirty and forty new tinplate and sheet mills. Prospects are very good, and the industry is undoubtedly in for a very good time. New York continues to be a good customer.

A Steel Firm's Centenary.

This month Ibbotson Bros. & Co., steel manufacturers, Sheffield, have celebrated the centenary of the existence of their business. This is a distinction which few Sheffield firms can claim. The founder of the business was William Ibottson, and Mr. F. J. Talbot, (grandson of the founder) is the present chairman of the company. They have a good, steady trade and say they do not know what it is to lose a customer.

Board of Trade Returns.

The February Board of Trade returns show variable results. The value of the export of hardware from the United Kingdom to Canada was £2,882 compared with £3,652 in February, 1908, and £4,745 in Febraury, 1907. On the year there is also a considerable falling off, the two months' value being only £5,240 compared with £7,344 in the first two months of 1908, and £7,630 in the corresponding period of 1907.

Cutlery is not quite so bad, for the Fedruary total was £4,055, being ahead of February, 1907, with its £3,797, but behind 1908 with its £4,922. Taking the first two months of the year, 1909 is credited with £7,964, 1908 with £9,340 and 1907 with £10,150.

Tin Exports Increasing.

Figures more remarkable are to be encountered. Unwrought tin exports, for example, are better now than for a very long time. The February export to Canada was valued at £11,078, nearly twice as much as February, 1908, with £5,812, and ahead of February, 1907, with £10,123. The two months' figures are even more notable. They reached £26,966 compared with £10,711 in the corresponding period of 1908, and £22,647 in the corresponding period of 1907.

Tinned plates and tinned sheets are much better still. The February, 1909, total was £41,276, nearly three times as great as February, 1908, with £15,165 and nearly twice as much as February, 1907, with £21,431. The two months' figures are:—1909, £93,333; 1908, £37,094, and 1907, £53,136.

Galvanized sheets also improved considerably. The February total was £18,491 compared with £6,127 in Februrary, 1908, and £10,935 in February, 1907. The total for the first two months of the year was £22,619, twice as much as £11,281 in the corresponding period of 1908, but much behind £26,250 in the corresponding period of 1907.

The export of steel bars, angles, rods and shapes of sections also went ahead. The February value was £10,667 compared with £3,612 in February, 1908, and £14,993 in February, 1907. This year's total up to the present is more than twice as big as last year's, the figures being £23,664 compared with £10,123 in the first two months of 1908, while the corresponding period of 1907 was credited with £28,673.

R. A.

THE SMALL TOOL TRADE.

A dealer who wishes a nice trade on small tools must post himself thoroughly on what tools are required in the shops or factories in his town and also find what makes of tools are popular among the workmen and then put in a stock of the most salable sizes, which might amount to $100 or $150. His next step should be to let people know that he has the tools, and to this end, various things will at once suggest themselves, perhaps the most obvious being to display the goods in a show window, and then to advertise them in local papers. Another way is to send out one of his clerks who may have an aptitude for this class of work, among the workmen in the shops with a sample case showing up the various tools, not necessarily to take orders at the time, but to let the workmen see what the tools are, and to tell them where they can be obtained.

The Western Fire Clay Products, of Weyburn, Sask., which was recently incorporated, with a capital of $600,000. will commence building operations this spring.

Housecleaning and "Haymaking"

Housecleaning time is haymaking time for the paint dealer. Every year sees an increase in the amount of "Brightening Up" that is done about the house. When some of you kind readers placed your stock orders perhaps you underestimated this Spring's demand for Sherwin-Williams Products for brightening up the home—*Brighten Up Finishes*, if you please. In addition to the natural growth of the paint business, our extensive newspaper advertising in 180 papers of local and national circulation has stimulated the demand for Sherwin-Williams Products. In the paint business you must make hay while the sun shines. Unless you are sure

you have sufficient stock of S-W. Shelf Goods to take care of the large demand this Spring, you should make up an order today. We can fill order promptly, so that you will not lose any sales through delay in getting the goods. Do it now—tomorrow may never get here.

I believe I am right in assuming that everybody desires to make their homes cherrier, cozier and more attractive. Are you not willing to spend a little time to tell them how to do it—especially when the chances are good they'll buy the paint and varnish from you to do the work?

We have some good Brighten Up enclosing slips. They will sell the goods. Write for a supply today.

BUILDING AND INDUSTRIAL NEWS

For additional items see the correspondence pages. Information is solicited regarding building and industrial news, the incorporation of companies, establishment or enlargement of mills, factories or foundries, municipal waterworks and sewerage systems, railway or mining news, etc.

Industrial Activity.

J. R. Booth is enlarging his lumber mill at Hull.

The E. N. Heney Co. will build a carriage factory in Montreal.

The Virden Mfg. Co. is building a large addition to its plant at Virden, Man.

A. Campbell & Co., ladies' outfitters, Victoria, are building a large extension to their factory.

The E. B. Eddy Co., Hull, are making a number of improvements and additions to their plant.

The Thompson & King Mfg. Co., of Pary Sound, report rushing business at their boat-building plant.

The Watt Milling Co., Toronto, have been granted a permit to erect a planing mill. at a cost of $10,000.

Cobourg's new steel works will soon be in full swing, and they have already a number of contracts on hand.

The Marmora Cooperage Co., Marmora, Ont., have started work in their pulp mill and have 45 men at work.

The additions and improvements to be made to the Dominion Sttel Co.'s plant at Sydney will cost $2,000,000.

John Malcolm & Son, St. George, Ontario, are erecting a large warehouse to the rear of the condensing factory.

The Trent Valley Woolen Mills at Campbellford propose to erect another building and to employ about 70 more hands.

Philadelphia mining capitalists are interested in a tungsten claim in Nova Scotia and propose to work it on an extensive scale.

Stewart & Hewitson, Port Arthur, have the contract for building a great number of concrete bridges on the C. P.R. north of Lake Superior. The work will occupy five years.

The Expanded Metal Co., Toronto, have purchased the Oxley acetylene welding process and will employ an additional forty men in manufacturing plant for using that process.

The Manitoba Rolling Mills Co., Winnipeg, is prepared to expend $200,000 on extensions to its property and plant. This means increasing the capacity of the plant to four times what it now is.

The E. Long Mfg. Co., Orillia, will build a new plant at a cost of $30,000, and will double their present staff. It is the intention of the Long Company to add a boiler plant to their machine department.

Vice-President McNicoll, of the C.P. R., has given a contract to the Dominion Car & Foundry Co. for the supply of five hundred 50-ton steel cars for delivery during the summer. The cars will be used to carry the coal traffic from the coal mines in Alberta and the Crow's Nest Pass district to the prairie cities and towns.

Sir William Van Horne is leaving on a visit to England, with the object of interesting English capitalists in a scheme for establishing in New Brunswick, in connection with the Grand Falls water power, the largest pulp, paper and sawmills in Canada. It is planned to spend no less than seven million dollars in the establishment of this concern.

John Connor, the new owner of the Walkerton binder twine factory, is busy these days getting things into shape to commence operations. He expects to start the machinery in about ten days.

The Bain Wagon Company's factory at Woodstock, is being run evenings at present, long hours being made necessary by the large number of orders that are on hand.

The Grand Trunk Pacific have just given out several big orders for locomotives. The Montreal Locomotive Works, Longue Pointe, have received an order for 25 engines, to be delivered next July. An order has also been placed with the Algoma Sault Ste. Marie Steel Company, for 22,000 tons of 80-pound steel for rails. These rails are intended for the prairie section of the line and are to be delivered at Fort William.

Every car works in Canada is now busy manufacturing cars for the Canadian Northern Railway and there will be $2,000,000 worth of equipment for the western lines desired before the harvest. D. B. Hanna, third vice-president of the Canadian Northern Railway, said recently in Winnipeg: "Of the new equipment there will be 2,000 box cars and a large number of refrigerator and passenger coaches. We are showing our confidence in the West in the best way we know."

The G.T.P. have ordered from the Dominion Steel & Iron Co., Sydney, N. S., 13,000 tons of 80-pound steel rails, and 2,000 tons of 60-pound rails, sufficient to lay 21 miles of track, intended for sidings. This shipment will be moved entirely by boat around Cape Horn from Sydney to Prince Rupert.

The Grand Trunk Pacific are now building for service on the Skeena river, B.C., two new steamers similar to the steamer "Distributor" built last fall. These steamers will ply between Prince Rupert and the head of navigation on the Skeena river, and will be ready for service in June.

Municipal Undertakings.

An up-to-date sewerage system is proposed for Palmerston.

Work has been commenced on Toronto's trunk sewer.

Tenders are asked before May 19 for the construction of a waterworks system and a main sewer at Estevan, Man.

Victoria, B. C.—The ratepayers will probably be asked to vote on a by-law to raise $50.000 for sewer purposes.

The Board of Trade of Orillia is asking for the immediate construction of a number of sewers in the central portion of that town.

Yellow Grass, Sask.—The ratepayers have passed by-laws for $20,000 for a waterworks system and a $1,000 bonus to the electric light and power plant.

Railway Development.

The C.P.R. intend to connect Winnipeg by a line to Duluth.

The C.P.R. purpose to double-track its line between Montreal and Farnham.

The Stratford Tramway Co. propose building a street railway in that town.

A branch line north from Watrous, Sask., will be built by the Transcontinental.

The G,T.P. intend building a line from a point on the U.S. boundary to Hudson's Bay.

Construction work will begin at once on the G.T.P. lines north and south from Melville, Sask.

Port Arthur is advertising for materials for the extension of its street railway system.

A company has asked for a franchise to build a street railway connecting Cobalt with Haileybury.

The Grand Trunk Pacific has started work on the construction of a line from Wainwright to Calgary.

The C.P.R. will this summer construct a cut-off line three miles long at Jackfish, north of Lake Superior.

The Canadian Northern expects to run through trains between Quebec and Ottawa over its own line this summer.

Greenwood, B.C., ratepayers have voted in favor of a bonus of $50.000 to be paid to the Greenwood-Phoenix Tramway Co.

It is likely that a new electric railway company will ask for a franchise to build an electric road through Cobalt from Clear Lake to Kerr Lake, taking in the best section of the township of Coleman.

Vice-President Wainwright, of the G.T.P., says that road will be in operation between Winnipeg and Edmonton by June 1; between Fort William and Edmonton in time for grain carrying in the fall; and the whole line will be finished by 1911. At present the route from the east is graded right up to the foot of the Rockies.

General Building Notes.

N. Hillary will build a $10,000 dwelling at Toronto.

C. S. Boone, Toronto, will build a $26,000 dwelling.

Wm. T. Harris, Toronto, will build a $15,000 residence.

H. M. Millman will erect a $60,000 block at Winnipeg.

J. A. Coulter will erect a $7,000 residence at Winnipeg.

W. K. George will build a $15,000 residence at Toronto.

J. A. Russell will build a $30,000 residence at Vancouver.

J. A. Goddard will build a $25,000 warehouse at Toronto.

J. Seabold will build a $20,000 apartment house at Vancouver.

Hector Gunn will build a $12,500 apartment house at Toronto.

H. S. Mara will erect three dwellings at Toronto to cost $10,500.

J. C. Sears will erect a $30,000 apartment house at Ottawa.

W. F. Forster will erect five dwellings at Toronto, at a cost of $13,500.

R. T. Brown, Toronto, will erect three dwellings to cost $13,500.

T. P. Stewart will build seven dwellings at Toronto to cost $21,000.

The Pemberton block, a $150,000 structure, will be built this summer.

W. W. Cruise, Windsor, proposes to erect a three-storey apartment house.

R. C. Vaughan will build five pairs of dwellings at Toronto to cost $15,000.

Construction will soon begin on the $75,000 Y.W.C.A. building at Montreal.

A new hotel to cost $1,500,000 is to be commenced this summer at Toronto.

T. O. Johnston, of North Dakota, will erect a three-storey brick block at Lethbridge.

Harvey, Pherrill & Co., Toronto, will build three pairs of dwellings to cost $12,000.

Dr. S. A. Weismiller purposes building a modern apartment house in Parkdale, (Toronto.)

Wm. Heap, Toronto, will spend $15,000 on the erection of five pairs of dwellings.

Weismiller & Mackenzie Bros., Toronto, will build four pairs of dwellings to cost $18,000.

Six attached dwellings will be built at Toronto by M. S. Thompson at a cost of $25,000.

A new building for departmental store purposes will be erected by W. H. Scroggie, Montreal.

Grand Forks, B. C., is experiencing a building boom as a result of the big fire there some time ago.

Architects Daoust & Lafont have drawn plans for a hotel building to be erected for A. Dufresne, at Three Rivers.

Thomas H. Wiley, St. Catharines, has prepared plans for three dwellings to be erected for Peter Forsythe at a cost of $5,000.

A permit has been issued to Geo. C. Meshor for the erection of an apartment house at Victoria, B. C. The building will cost $8,000.

Wm. G. Murray, London, Ont., has prepared plans for a residence to be erected at Ayr,Ont., for Dr. Ward Woolner. It will cost $4,500.

Dennison & Stephenson, Toronto, have prepared plans for the Nurses' Home and new wing to be erected in connection with the hospital for incurables.

W. A. Noble, Hamilton, has taken out a permit for the erection of a $2,600 dwelling, also for six brick dwellings to be built at the corner of Clyde and Cline Streets, at a cost of $6,000.

The following are recent building permits issued at Montreal: Hyman Sykes, two houses, $27,000; Dominion Bank, house, $18,000; G. R. Lighthall, fifteen tenements, $30,000; Chas Corbeil, six flats $6,100; F. Chartier, fifteen flats, $12,000; Laurin Construction Company, six flats, cost $9,000; Eveleigh Company, factory, cost $27,000.

The following are the building permits issued at Ottawa recently: Henry Bristowe, for five brick veneered dwellings, $8,000; Mrs. Pouliot, brick veneered dwelling, $3,200; Mrs. Stewart Taggart, brick veneered dwelling, $3,500; William Spendlow, frame dwelling, $2,500; John J. Gill, double brick veneered dwelling, $1,800; Mrs. L. Cochrane, brick shops, $3,500; Wesley Methodist Church, Ottawa East, $2,500; Albert Horton, stone and brick dwelling, $7,000; William Spendlow, frame dwelling, $2,500; D. C. McBain, brick dwelling, $2,000; John Fixter, six veneered dwellings, $9,000; C. H. Holbrook, brick veneered dwelling, $4,000; Albert Campbell, three brick veneered dwellings, $3,000; W. McKinley, double frame dwelling, $2,500; H. Donoghue, frame dwelling, $1,800; George D. Pope, brick dwelling, $4,000; Thomas Thomas, brick veneered dwelling, $2,700; George Ambridge, six solid brick dwellings, estimated value unstated.

Public Buildings.

Tenders for the construction of a frame schoolhouse at Qu'Appelle, Sask., will be received until May 1.

A new building is to be erected by St. Paul's Anglican Church, Toronto, at an estimated cost of $150,000.

A new library and public hall, towards which Andrew Carnegie has donated $7,500, will be built at Lucknow.

Plans for enlarging the smallpox hospital in London at a cost of $3,000 were submitted to the board of health.

The officials of the Winnipeg Children's Home are contemplating either a new building or extensive additions.

J. Bruce Smith, Inspector of Prisons, has ordered an addition to the court house at Belleville at a cost of $30,000.

Herbert H. New, Hamilton, Ont., is preparing plans for the new Herkimer Baptist Church. Estimated cost, $22,000.

The contract for the new township hall at Ridgetown, Ont., has been awarded W. E. Best, of Thamesville, at $3,467.

A by-law will be submitted to the Chilliwack, B.C., ratepayers to raise $5,000 for the erection of a new school.

Fernie city council have decided that tenders should be taken at once for the erection of the new municipal buildings there.

F. W. Mercer, of Minnedosa, Man., has obtained a contract at $16,000 for the erection of a new six-roomed school building.

White & Foulds, Sherbrooke, Que., have prepared sketches for the proposed extension to the Sherbrooke Protestant Hospital.

Jas. A. McDonald, Lethbridge, has prepared plans for a new town hall to be erected at Magrath, Alta., at a cost of $5,000.

The Montreal Catholic School Board will apply to the Quebec Legislature for authority to borrow $150,000 to build new schools.

Ottawa will seek authority to raise $12,000 by debentures for the necessary improvements and alterations at the Isolated Hospital.

A by-law to raise $248,000 will be submitted to the ratepayers of Toronto for the erection of new fire halls and police stations.

Geo. A. Proctor, Sarnia, has been awarded the contract for the new post office and customs building to be erected at Glencoe, Ont.

J. H. G. Russell, Winnipeg, has submitted plans for the proposed new St. Andrew's Presbyterian church at Yorkton, Sask.

The Franciscan Sisters of Winnipeg are considering the erection of a Home for Women, adjoining the Immaculate Conception church.

A by-law has been passed to issue $5,700 to provide for the cost of enlarging and equipping the isolation hospital at Brockville, Ont.

Plans have been submitted in the competition for the proposed new school building at Dauphin, Man., but no selection has yet been made.

Tenders are being called for the new Sunday school for the Augustine Presbyterian church, Winnipeg. The building will cost from $20,000 to $25,000.

The Strathcona city council has decided to offer the Government a free site for the proposed armory, for which the Government has appropriated $10,000.

It is probable that there will be erected at Winnipeg this year either a new provincial asylum for the insane or a large addition to one of the present buildings.

The contract for erecting an addition to the Harkins Acadamy, at Newcastle N.B., has been awarded to Newcastle contractors, who will do the work for $47,000.

The congregation of St. Bartholomew's Church, Ottawa, will erect a new church on Buena Vista Road, Rockcliffe, on a site which has been donated for that purpose.

Work is to be commenced at once on the new addition to St. Mary's Academy Winnipeg. The building will be four storeys high, of brick construction and will cost $80,000.

In all probability a large wing, to cost $200,000 will be built to the Kennedy St. court house, Winnipeg. It is understood that work on the structure will be commenced in the early summer.

The Ingersoll Construction Co. have obtained from the Maple Leaf Amusement Company, Hamilton a contract for the construction of nearly $40,000 worth of amusement devices at Maple Leaf Park.

At a meeting of the West Toronto Collegiate Institute Board. Chairman Ellis reported that the cost of putting the institute into repair and adding eight rooms, including gymnasium and lavatories, would be $45,000.

New Companies.

John Watson & Son, Montreal; capital, $49,000; to manufacture iron work. Incorporators, R. T. Hencker, A. H. Duff and W. S. Johnson, Montreal.

Horwood Glass Mfg. Co., Ottawa; capital, $20,000; to manufacture stained and leaded glass, and deal in all kinds of glass. Incorporators, C. G. H. Horwood, W. T. Powis and C. J. Stone, Ottawa.

News of the Paint Trade

PAINT WINDOW DISPLAY.

Although on first consideration it may seem to the dealer that apart from the display matter from the manufacturer, his range of design for a series of paint window is very limited, further reflection will alter this idea completely. In the first place it is astonishing how many different groupings of paint tins, all distinct in design, can be made, if the trimmer has a little ingenuity. He is not confined to one shape of tin alone. With his varnishes, enamels, and other specialties, he has a variety of tins from which to select. The different shaped brushes also assist easily in any design. Simply taking a pyramidical arrangement of the tins, a number of different constructions can be made, and although this is the easiest and most common way of grouping tins, there are other designs, with the aid of shelves, just as easy. Paint tins with their attractive labels lend themselves to display, and especially is this so with the paint specialties.

The model of a house painted in artistic colors, and looking so inviting in its cool fresh paint that no property owner could see it without desiring to reproduce the effect on his own building, makes a very attractive window. This model, surrounded with some artificial grass and miniature bushes, and if possible with some scenery to make a background, could not be beaten for display. In addition the merchant could introduce some gardening lines among the grass, and thus kill two birds with one stone.

By his windows is a merchant known, and if he can keep his windows radiating paint in a thoroughly interesting manner, so will people associate the best of paints with his store. Paint is naturally connected with brightness and cleanness. If the merchant has a shoddy and ill kept display of paints, customers will not associate much brightness with this man's paints. The window will not create a desire to repaint and brighten up, but rather a prejudice against the lines of paints the dealer may carry. But with bright and attractive displays the reverse is the case.

We cannot lay too much emphasis upon the using of the advertising matter placed at the disposal of the merchant by the manufacturer. The latter is only too pleased to send all the suggestions that he has evolved for window displays, and will in most cases even furnish the dealer with the material for putting in these designs. What more can a progressive man want. In no other lines that he carries is he helped to such an extent. There is nothing to beat an attractive window. The merchant who keeps his windows clean and attractive, who varies his designs, as he easily can do—in fact, the man who makes a study of his windows, will find it much easier to make sales, and to acquire a reputation for paints, than the dealer who has not grasped the value of a window display and shows nothing beyond a hasty grouping of tins at the commencement of the season and not altered and not cleaned from the time it is put in until it is taken out.

TIGER  BRAND

WHITE LEAD

"Tiger" Brand has a reputation for purity that has stood the test for over thirty years.

During all this time it has continued to grow in favor with the painters till to-day it is the standard by which other brands of Lead are judged.

Made from strictly pure White Lead and pure Linseed Oil, containing no adulteration whatever.

Yellow guarantee label of the White Lead Association of Canada is on every package.

The Montreal Rolling Mills Co.

Paint and Oil Markets

TORONTO.

April 30.—The paint trade keeps advancing, though slowly, owing to the uncertain weather conditions. This week is a little better than the previous one. Jobbers are satisfied with the business at present being done, knowing full well that if there is any dragging just now it will be more than made up when finer weather prevails.

There are no changes in price, though some cutting on turpentine is indulged in owing to the local market price being three cents higher than the eastern markets. However, not much turpentine is moving just now, so there is no strenuous outcry. Glass is going out a little freer. New arrivals are expected soon, the first glass boats being on their way to Montreal. The "Lake Michigan" landed 2,400 boxes from Antwerp at St. John a week ago. but none of that boat's cargo has come to Toronto.

From various sections of the country come reports of a revival of business on a generous scale. In Toronto the coming fall is expected to be near the record (if it does not establish one) for the paint trade. Just now painters are none too busy, the weather being too wet and too unfavorable for spring cleaning.

TURPENTINE—The market quotations locally are still at 58c for single barrels, the advanced price of a week ago. The conditions, however, are favorable to an easier tendency, and in fact some houses are quoting a cut of a cent below the market. Two houses are down even to 55c. The trade, however, is not calling for much turpentine. Conditions in the south show pretty large stocks still held there, but prices are being held firm. Rosins and gums are higher in the south and these higher prices may affect some paint lines later on, though at present no changes are noted.

LINSEED OIL—Firm, steady and good business being done are the oil conditions prevailing this week. Raw is 59c and boiled 62c per gallon for barrel lots. Though buying is freer than for some time there does not appear to be any great tendency towards stocking up.

WHITE LEAD—Prices are unchanged, but there is a firmer feeling in lead in oil as the demand increases seasonably. The indications are favorable for a year of big consumption. No. 1 is $5.40 to $5.65; pure white from $5.80 to $6, and a superior line is offered at $6.25. Genuine red lead is quoted at $4.50 for casks and $4.75 to $4.80 in 100 lbs. Business shows improvement and prices are firmly held.

PARIS GREEN—The low quotations are provocative of continued splendid business. 25-lb. drums are at 17¾c per pound.

STAINS AND VARNISHES — The market continues firm and is likely to remain so under the pressure of present demand, and with the prospect of higher prices for rosins and gums. Stains and varnishes are a good seasonable line.

GLASS AND PUTTY—The incoming rush of glass may have something to do with the present desire of jobbers to allow their glass stocks to be depleted. Prices are unchanged. Good business has been done during the week.

PETROLEUM—Prime white is 13½c, water white. 15½c, and Pratt's astral, 17½c. Business is fair.

MONTREAL.

April 30—A well developed spring movement is now in progress. First requirements are showing increase in bulk as well as in numbers, while the repeat orders swinging in show that a good consuming demand has already appeared. Dealers are more confident now as to the prospects, and travelers report a much more favorable hearing than was previously the case. Ready mixed paints are in strong demand. The markets are unchanged this week. Turpentine is selling well and so is ground white lead. Paris green is feeling the effect of the recent cut and is in better demand.

TURPENTINE—Turpentine continues to be a good seller. Orders are swinging in from all parts, and this counteracts the effect of the heavy supply. The market is unchanged and we quote 55c for single barrels, net 30 days.

LINSEED OIL—The market is unchanged this week. Orders are for medium size lots but they are coming in steadily and well. We continue to quote: Raw, 1 to 4 barrels, 59c; 5 to 9 barrels, 58c; boiled, 1 to 4 barrels, 62c; 5 to 9 barrels, 61c; strictly net, 30 days.

GROUND WHITE LEAD—A good demand continues for ground white lead. Stocks are in fair condition, and there is no difficulty in fulfilling orders. There are no changes in prices, and we quote: Strictly pure, $5.50 to $6 according to brand, and No. 1, $5 to $5.50 f.o.b. Montreal.

RED LEAD—There is a steady inquiry for red lead, but the market is not quite so strong as it was owing to the near arrival of heavy shipments of supplies. There is no change in prices, however, and we quote: Genuine red lead in casks, $4.50; in 100-lb. kegs, $5; in less quantities, at $6 per 100 lbs.; No. 1 red lead, casks, $4; kegs, $4.50, and smaller quantities, $5.50.

PARIS GREEN—Trade has undoubtedly improved. Orders are of fair bulk, and coming in more freely. There is no change in prices, and we quote: 1-lb. cartons, 18c; 1-lb. tins, 19c; 50 lb. drums, 17c.

VARNISHES—With an improvement in industrial activity varnishes are moving more freely. Household varnishes in all sizes are also good sellers.

WHITE ZINC—The market is steady but without feature, Orders are fair, and we quote: Dry V.M. Red Seal, 7½c; Red Seal, 7c; French V.M., 6c; Lehigh, 5c; white zinc, ground in oil, pure, 8½c; No. 1, 7c; No. 2, 5¾c.

PUTTY—Putty continues in good de-

WHEN HE ASKS FOR THE BEST

there is only one white lead you can sell a man—that's

BRANDRAM'S B. B. GENUINE WHITE LEAD

If he is a practical painter, he knows that Brandram's B. B. Genuine is finest, whitest, and has more body than any other White Lead in the world. No other equals it in covering capacity and durability.

Any dealer wants to handle something salable, profitable and satisfactory in results

MURESCO is the Medium

for extending your connection and supplying householders with the finest and most economical preparation on the market for wall finishes. Countless customers bear testimony to this statement and scores of dealers will handle nothing but **MURESCO.** Here is a copy of a letter received this week narrating an experience that is practically the same all over Canada.

RED DEER, ALTA., APRIL 17TH, 1909.

MESSRS. BENJAMIN MOORE & CO.
WEST TORONTO, ONT.

Dear Sirs:—
Please send 100 lbs. in case as follows.—
50 lbs. No. 7 (Green) Muresco
100 lbs. Tinting White Muresco

I have found that Muresco is far ahead of any other preparation I have ever worked with. One of its best features is its not showing laps and coming out when dry with a soft even surface, but hard on the wall so that you could hang wall-paper over it at any time if so desired. Kindly give the best discount possible for so small an order, and ship at once.

Yours respectfully,
H. G. STONE

FRESH PAINT *Look Out*

for **unknown** paints—they're slow sellers. Look out for "shelf" paints—they're loafers. What you want is paint that sells and satisfies.

MARTIN-SENOUR PAINTS

do both, because they are quality paints. They are paints of known standing—of fair profit—and of repeat orders.

The reason a stock of Martin-Senour Paint is **Fresh Paint** is simply because they don't stay on your shelves. Our sales pushing co-operative scheme will keep your stock moving—therefore fresh—and this wins the confidence of your customers. Ask for our plans, terms, etc.

Montreal - **MARTIN-SENOUR CO., Ltd.,** - *Chicago*

Pioneers Pure Paints

THE WINNIPEG PAINT & GLASS CO., Ltd., Winnipeg

THE MARITIME PAINT & VARNISH CO., Ltd., Halifax, N. S.

mand with prices unchanged. We quote: Standard putty, 880 lbs., in casks, $1.65; in 100-lb. drums, $1.90; bladder putty, 400 lbs., in barrels, $1.90; in 100-lb. cases, $2.05; in 25-lb. drums, $2.00; 25-lb. tins, $2.05; 12½-lb tins, $2.25 f.o.b. Montreal.

INCREASING PAINT SALES.

Writing in the American Paint and Oil Dealer on the increasing of paint sales, H. A. Thomson says:—There is good profit in selling paint and it's easy to push the sale of paint, with the help that is now so freely given to dealers by the manufacturers of all standard brands of paint, through attractive advertising matter, signs, color cards, etc. If I deposited the advertising matter under the counter, put the color cards in the safe, and my stock of paint in the cellar or back shed and waited for some person to pry out of me the fact that I did have a stock of paint somewhere around the place, I should not expect to sell much paint or make any money out of my paint department.

I was a partner in a retail paint business for several years, and, as competition was "fierce" we had to hustle some to keep our names in the City Directory as paint dealers. We got the habit of dusting the paint cans and keeping them prominently displayed in show windows and on shelf. When a customer made a small purchase, we suggested that we had a stock of the "real thing" in mixed paints for his house, and perhaps also encouraged the thought to paint his ference or the front porch floor. We even ceased talking politics and lamenting hard times long enough to look up the fellow advertising a house for sale and to suggest that a coat of paint would increase the selling value of the property from ten to twenty-five per cent. It was our ambition to get some person on a good street to paint his house early, which always meant several other houses painted on the same street.

When you encourage house painting you benefit your home town by the outward sign of prosperity that attracts the passing stranger. I was seated in the smoking room of a Pullman car not long ago, and as the train halted at a small town, one of my fellow passengers exclaimed, "I'll bet this is a solid, live and up-to-date town." I looked out the window and inquired. "Why do you think so?" He replied, "Because the buildings are well painted and everything looks fresh and clean." I asked in some surprise "Are you a paint man?" He answered, "No! I'm not a paint man, but it is part of my business to notice such things," and he handed me a card which read, "Mr. John Blank, Special Agent, The Blank Loan and Trust Co., New York." In the conversation that followed, I learned that well-painted buildings have a much better borrowing value than buildings of equal value that needed paint, as it indicated to keen bankers a man's pride in his property that forecasts future payment of the loan. He said that in a well-painted town real estate loans, public bonds, etc., are considered especially desirable.

So don't be afraid to tell your friends that there are other virtues in paint, besides the protective, sanitary and ornamental value. You are a promoter of civic pride and of bigger property values when you sell paint to your neighbors.

And there's good profit in the retail paint business; and that helps some.

MAKING SHOW CARDS.

An exchange advises retailers to use the air brush in making show cards, and says that a little experimenting will teach the user how to shade the letters, which can be then colored with a lighter shade or a different color of ink, giving a beautiful effect. Shading with a thin black or gray ink within the border of the letters gives the appearance of embossed work. Although the air brush is by no means a new invention, its use in sign work has not been appreciated until recently. Its effectiveness in the hands of amateurs should make it very popular. Besides the making of letters, the air brush is used in making beautiful borders around signs, giving the effect of raised plates, shields or frames.

The amatenr's first few signs will no doubt fail to show perfection, but a little experimenting will enable him to make signs good enough for any store window. A high grade of water colors or waterproof inks are best suited for this work, and give an unlimited variety of colors to harmonize with any display.

PUSHING MIXED PAINTS

There are reasons why a retailer should push the sale of mixed paints—other reasons besides the fact that they are profitable.

First—The manufacturer's name on the label, which gives his assurance that the materials used are of the best and that they are properly combined.

Second—A product practically ready for use.

Third—A variety of shades.

Fourth—Uniformity of shades.

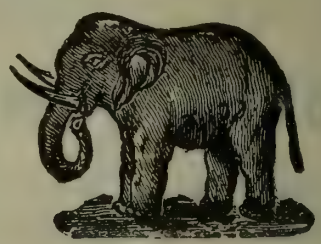
Fifth—Permanancy of shades.

Sixth—A finished product which, when made by a reliable manufacturer and properly applied to the work, will produce the best results.

A KISS AMISS.

He kissed her on the cheek,
It was a harmless frolic,
He's been laid up a week
They say with painter's colic.

PAINT NOTES



Briand & Savard, painters, Montreal, have dissolved.

Of the eight southern States each producing more than 200,000 gallons of turpentine and 25,000 barrels of rosin, Florida leads the list with 17,030,300 gallons of turpentine in 1908, against 15,572,700 gallons in 1907, and 1,932,-114 barrels of rosin in 1908, against 1,-144 barrels of rosin in 1908, against 1,-774,370 barrels in 1907.

The Celebrated "Dreadnought" Milling File

A substitute for Files which is revolutionizing File Work. A great cost reducer; a simple and radical improvement on the ordinary style of hand files; it cuts from 300 to 500 p.c. faster than an ordinary file; it is self cleaning; it can be sharpened four times; it cuts equally well all metals, also wood and marble; its cutting edge outlasts from five to ten ordinary files; although practically a rasp, it leaves the surface smooth. N.B.—The Dreadnought is adaptable to every job in which ordinary files can be used, expediting the work and doing it better, and for numerous jobs usually milled in machines. Gold Medal, Franco-British Exhibition, 1908. Gold Medal, International Exhibition, Madrid, 1907.
